IN THE UNITED STATES DISTRICT COURT FOR THE SOUTHERN DISTRICT OF NEW YORK

Civil Action No. 90-239

UNITED STATES OF AMERICA, Plaintiff,

v.

PAN AMERICAN WORLD AIRWAYS, INC., W. R. GRACE AND COMPANY, and PAN AMERICAN-GRACE AIRWAYS, INC., Defendants.

COMPLAINT—Filed January 11, 1954

The United States of America, by its attorneys, acting under the direction of the Attorney General of the United States, brings this action against the defendants and complains and alleges as follows:

I

Jurisdiction and Venue

1. This complaint is filed and the jurisdiction of this Court is invoked under Section 4 of the Act of Congress of July 2, 1890 (c. 647, 26 Stat. 209; 15 U.S.C. 4), as amended, entitled "An Act to Protect Trade and Commerce Against Unlawful Restraints and Monopolies," commonly known as the Sherman Act, to obtain civil relief against said defendants because of their violations, as hereinafter alleged, of Sections 1, 2, and 3 of said Act.

2. Each of the defendants transacts business and is found within the Southern District of New York.

II

Description of Defendants

3. Defendant Pan American World Airways, Inc. is a corporation organized in 1927 under the laws of the State

of New York as the Pan American Airways, Inc. Its [fol. 2] corporate name was changed to the present one in 1950. From 1928 until December, 1949, this defendant was a wholly owned subsidiary of a corporation, organized in 1928 under the laws of the State of Delaware as the Aviation Corporation of the Americas, which name was changed in 1931 to Pan American Airways Corporation. Pan American Airways Corporation was a holding company having various subsidiaries, including foreign corporations, engaged in the transportation by air of persons, property, and mail throughout the world. In December, 1949, Pan American Airways, Inc. acquired all of the assets and assumed all of the liabilities of Pan American Airways Corporation. Defendant Pan American World Airways, Inc. directly operates routes in air transportation of persons, property, and mail between the United States and various points in Europe, Asia, Africa, Australia, and South America. The term "Pan American" is hereinafter used in this complaint to refer to defendant Pan American World Airways, Inc., and to Pan American Airways, Inc., Pan American Airways Corporation, and Aviation Corporation of the Americas as the meaning may require. Defendant Pan American has its principal offices at 135 East 42nd Street, New York, New York.

4. Defendant W. R. Grace and Company, hereinafter called Grace, is a corporation organized in 1899 under the laws of the State of Connecticut. Defendant Grace is a holding corporation having subsidiaries which engage in numerous aspects of industry, trade and commerce, including steamship transportation between the United States and Latin America. Defendant Grace owns all of the capital stock of Grace Line, Inc., which operates steamship lines for the transportation of persons, property and mail between ports of the United States and the west coast of South America. Defendant Grace has its principal office at 7 Hanover Square, New York, New York.

[fol. 3] 5. Defendant Pan American-Grace Airways, Inc., hereinafter called Panagra, is a corporation organized in 1929 under the laws of the State of Delaware. Defendant Panagra is engaged in air transportation of persons, prop-

erty and mail over routes between the Canal Zone and Buenos Aires, Argentina, via the countries on the west coast of South America. It is wholly owned by defendants Pan American and Grace, each of which owns 50 per cent of the stock thereof. The principal office of defendant Panagra is located at 135 East 42nd Street, New York, New York.

III

The Trade and Commerce Involved

6. Prior to 1928 virtually all transportation between the United States and the nations of Latin America was conducted by steamship. Grace Line, Inc., the wholly owned subsidiary of defendant Grace, was at that time and has remained until the filing of this complaint the largest company engaged in steamship transportation between the United States and countries located on the west coast of South America. Grace Line, Inc. operates steamship routes from New York City southward along the Atlantic coast of North America through the Caribbean Sea to ports located on the north coast of South America, and through the Panama Canal to ports located on the west coast of South America. In 1950 Grace Line, Inc. transported about 90 per cent of the passengers travelling by liner service over the steamship trade route between United States Atlantic ports and the west coast of South America and about 60 per cent of the total commercial cargo carried in all liner service over said route. Over this trade route, Grace Line, Inc. transports virtually all of the passengers and commercial cargo carried in United States flag ships. In addition to its dominant position through Grace Line, Inc. in transportation between the countries on the west coast of South America and between those countries and the United [fol. 4] States, defendant Grace occupies an important position in Latin American trade through a banking subsidiary and numerous other subsidiaries located principally in South America. For nearly 100 years defendant Grace and its predecessors have been engaged in numerous phases of industry, trade and commerce in the countries located on the west coast of South America.

7. In 1928 air transportation service over local and limited trunk line routes was being furnished in a number of South American countries by carriers other than United States flag air carriers. Such service was fragmentary and did not reach north of South America. The potentialities of air transportation between the United States and Latin America had for some years attracted groups and individuals interested in the development of aviation. In 1928 Pan American Airways Corporation (then called the Aviation Corporation of the Americas) was formed to effectuate the acquisition of a number of aviation companies for the purpose of acquiring, developing and operating air routes from the United States to the Caribbean, Central America, the Canal Zone, and down the east coast of South America to Rio de Janeiro and Buenos Aires. Pan American rapidly acquired a dominant position in air transportation between the United States and Latin America by the development of new routes and by the acquisition of competing trunk and local air line companies serving countries on the east coast of South America.

8. The extensive system of Latin American air transportation operated by defendant Pan American comprises over 60,000 route miles certificated by the Civil Aeronautics Board. It extends from points in the United States to Latin America, including the Caribbean Sea, Mexico, and Central America to the Canal Zone, and by way of the north and east coasts of South America to Rio de Janeiro and Buenos Aires, linking the United States with the principal [fol. 5] traffic centers in Latin America. Aside from its 50 per cent ownership in Panagra, and its ownership of stock in Aerovias Nacionales de Colombia, which operates primarily in Colombia, Pan American does not engage in air transportation between countries located on the west coast of South America.

9. In 1928 Pan American acquired an option on a Peruvian air mail contract and concession which had been secured by an American transportation company operating in Peru. Operating rights in Peru were essential to the establishment of a west coast air route paralleling and competitive with the established west coast steamship routes

of Grace's subsidiary, Grace Line, Inc., whose steamships at that time provided most of, if not virtually all, the transportation connecting the countries on the west coast of South America with each other and with the United States. In 1929 Pan American and Grace, pursuant to agreement hereinafter alleged, formed Panagra and have since participated equally in its control. Panagra's line comprises over 10,000 route miles certificated by the Civil Aeronautics Board. It extends from its terminal at the Canal Zone southward through the principal traffic centers of countries located on the west coast of South America and across the Andes to Buenos Aires, Argentina.

10. Until about 1946, Pan American was the only United States flag air carrier operating scheduled service between the United States and the countries on the north and east coasts of South America. For many years it has dominated and at the present time continues to dominate air transportation between the United States and South America. About nine-tenths of all passengers travelling by United States flag air carriers between points in the Eastern coastal states of the United States and countries on the north and east coasts of South America are carried by Pan American. Defendants Pan American and Panagra, connecting at the Canal Zone, carry about four-fifths of the passengers trav- [fol. 6] elling by United States flag air carriers between points in the Eastern coastal states of the United States and countries on the west coast of South America, including passengers travelling over the west coast route to Buenos Aires. Foreign flag carriers, during the twelve-month period ending June 1951, transported less than one-fourth of the air passenger traffic between the United States and the Canal Zone and between the United States and South America.

11. Pursuant to contracts, agreements, and understandings, hereinafter alleged, Panagra does not serve any points served by Pan American on its east coast route, except that Pan American and Panagra have common terminals at the Canal Zone and at Buenos Aires. A substantial part of the traffic of both Pan American and Panagra handled at Buenos Aires is through traffic to or from the United States. The distance from United States terminals to

Buenos Aires is substantially less by way of Panagra's west coast route than by way of Pan American's east coast route. Prior to the passage of the Civil Aeronautics Act in 1938, Panagra never operated its own air transportation service north of the Canal Zone, and since that time Panagra has never sought from the Civil Aeronautics Board authority for the operation by it of such transportation service. Most of the traffic which Panagra handles at the Canal Zone originates in or is destined to the United States. This traffic is dependent for through United States service upon operations furnished by Pan American between the United States and the Canal Zone.

12. Panagra's route along the west coast of South America serves many of the ports and the principal cities in the countries served by the steamship routes of Grace Line, Inc., which link the Atlantic coast of the United States to ports on the west coast of South America. Both Panagra [fol. 7] and Grace Line, Inc. carry a substantial number of intermediate passengers travelling within or between the countries served by Panagra. Defendant Panagra and Grace Line, Inc. are potentially competitive with each other in the transportation of passengers, property and mail.

13. The growth of air transportation of persons, property and mail in competition with water transportation to Latin America has been extremely rapid. During the twelve months ending June 30, 1951, air transportation accounted for about 70 per cent of the total sea and air passenger traffic between the United States and the Canal Zone and between the United States and South America. In that year air transportation accounted for about one-half of the passenger travel between the United States and the Canal Zone, about 85 per cent between the United States and Colombia, about 75 per cent between the United States and Venezuela, about 70 per cent between the United States and Brazil, about 70 per cent between the United States and Argentina, and about 75 per cent between the United States and other countries of South America. The total ton miles of express and freight carried by United States flag air carriers between the United States and South America

increased from approximately 10,800,000 ton miles in 1946 to approximately 29,000,000 ton miles in 1951.

14. During the year 1949, Pan American carried approximately 700,000 air passengers over its Latin American routes. Its total operating revenue for that year from its Latin American air line operations amounted to about $65,500,000, of which about $40,500,000 was revenue from passengers, about $15,800,000 revenue from United States and foreign air mail, and about $9,200,000 from cargo and other sources. During the same period Panagra carried about 90,000 passengers (including intermediate traffic between and within countries in South America as well [fol. 8] as passengers travelling to and from the United States) and its total operating revenue amounted to about $16,800,000 of which about $10,800,000 was revenue from passengers, about $4,400,000 was revenue from foreign and United States air mail, and about $1,600,000 from cargo and other sources. During the year 1950, Grace Line, Inc. carried a total of about 4,000 passengers on its steamship line operating on the through route between the United States Atlantic ports and the west coast of South America (excluding intermediate South American traffic). During the same year Grace Line, Inc. carried about 600,000 tons of cargo over this route.

IV

Offenses Charged

15. Beginning in or about 1928 and continuing up to the date of the filing of this complaint, the defendants have been parties to and have operated under contracts, and have been engaged in a combination and conspiracy to restrain the aforesaid trade and commerce in the transportation of passengers, property and mail, and to monopolize the aforesaid transportation by air of passengers, property and mail, and during said period have attempted to monopolize and have monopolized the aforesaid transportation by air of passengers, property and mail, in violation of Section 1, 2 and 3 of the Act of Congress of July 2, 1890 (c. 647, 26 Stat. 209, 15 U.S.C. 4), as amended, entitled "An Act to Protect Trade and Commerce Against Unlawful

Restraints and Monopolies," commonly known as the Sherman Act. Defendants threaten to continue and will continue such offenses unless the relief hereinafter prayed for is granted. The aforesaid contracts, combination, conspiracy, attempt to monopolize and monopolization, and certain of the acts, agreements and understandings which formed a part thereof and were used in their effectuation, are hereinafter more fully set forth and described.

[fol. 9] 16. For the purpose of obtaining and maintaining domination and control by Grace and Pan American of air transportation between the United States and countries along the west coast of South America and to exclude the establishment of an independent air line which would be competitive with the parallel steamship route of Grace Line, Inc., or with Pan American, Pan American and Grace in 1928 entered into an agreement for the establishment of Panagra. Under the agreement defendant Panagra was to establish and operate an air line on the west coast of South America and was to be jointly owned and controlled in equal shares by Pan American and Grace.

17. Defendant Panagra was established thereafter in January 1929 and 50 per cent of its stock was transferred to Pan American and 50 per cent to Grace. Panagra acquired the Peruvian rights and concessions described in Paragraph 9 above from Pan American pursuant to the agreement described in Paragraph 16 above, and in 1929 began operations as an air carrier on the west coast of South America. In May, 1929 Panagra commenced operations between the Canal Zone and Mollendo, Peru. In October, 1929 its operations were extended to Buenos Aires, Argentina, and Panagra has since that time operated an air line from the Canal Zone, along the west coast of South America, and across the Andes to Buenos Aires, Argentina.

18. As a part of the understanding between Pan American and Grace in the formation of Panagra, it was agreed that the sphere of operations of Panagra would be confined to the west coast of South America and that Pan American would operate air routes on the east coast of South America and between the United States and the Canal Zone. Pursuant to this unlawful agreement and understanding,

Panagra has refrained from acquiring or applying for operating rights or concessions and from operating an air line on the east coast of South America and Pan American [fol. 10] has refrained from applying for operating rights and from operating an air line along the west coast of South America. For its connections at the Canal Zone and for the transportation of its traffic between the United States and the Canal Zone, defendants made and have kept Panagra dependent on Pan American.

19. The general purpose to maintain Panagra under the joint ownership and control of Pan American and Grace has been continuously adhered to. Defendants Pan American and Grace have entered into agreements and understandings for the management and conduct of the affairs of Panagra. Pursuant to such agreements and understandings, the management and operation of Panagra have been kept under the control of Pan American and Grace.

20. Pursuant to such agreements and understandings and by virtue of the control exercised by defendants Pan American and Grace, defendant Panagra has been prevented from establishing and maintaining research, procurement, advertising, sales and commercial services in the United States independently of Pan American, and has been prevented from establishing and maintaining facilities, sales, and commercial representation in South America independently of Grace.

21. Pursuant to their unlawful agreements and understandings, Pan American and Grace each has retained ownership of 50 per cent of the voting stock of Panagra, and each has retained an equal number of representatives on Panagra's Board of Directors. Because of this control, Panagra has been and is required to adhere and has adhered to the unlawful agreements between Pan American and Grace and to the unlawful purposes and objectives of Pan American and Grace, or either of them.

[fol. 11] 22. By virtue of their equal division of control, Pan American and Grace each has had and now has the power of preventing the exercise of Panagra's corporate powers and functions and each has exercised this power to

block and prevent any action by Panagra considered by Grace or Pan American to be contrary or detrimental to its own particular interests. As a consequence, the development of Panagra's routes and operations in South America and their extension to the United States have been blocked, the acquisition of flight equipment and the development of ground facilities by Panagra have been retarded and prevented, and Panagra has been impeded and restrained from developing and expanding competitively, from rendering improved and competitive transportation service and from otherwise independently exercising lawful competitive practices.

23. Throughout the period covered by this complaint, Pan American, in accordance with its unlawful agreements and understandings with Grace to form Panagra and to divide and allocate the areas of air transportation, has used its 50 per cent control over Panagra to block and prevent Panagra from securing requisite authority from the Civil Aeronautics Board to extend its route from the Canal Zone to the United States. Pan American has also used its 50 per cent control over Panagra to block and prevent Panagra from effectuating any agreement with any air line other than Pan American or a designee of Pan American to establish, extend, or improve through air transportation service between the United States and South America. Such restraining action has been persisted in by Pan American despite repeated expressions by the Civil Aeronautics Board that it would be in the interest of the proper development of air transportation for defendant Panagra to be freed from such restraints. So long as Pan American and Grace retain the power to control [fol. 12] action by Panagra through their respective 50 per cent stock ownership, Panagra's development and operations will be substantially and unreasonably restrained.

24. During the period covered by this complaint, defendants Pan American and Panagra, in furtherance of the unlawful purposes hereinbefore alleged, have acquired the stock or assets of, or other interests in, competing lines operating in Latin American countries. Pan American and Panagra (controlled by Pan American and Grace) have used the dominant position and power attained by the

defendants in air transportation to impede and restrain the establishment and development of competition in air transportation between the United States and Latin America by United States flag air lines authorized in and after 1946 by the Civil Aeronautics Board to develop and engage in such transportation. Pan American and Panagra have engaged in restrictive practices to restrain and impede such air lines from utilizing established airports, terminals, communications and other facilities in Latin American countries necessary to the inauguration and development of such air transportation.

V

Effects of the Violations

25. The aforesaid acts, combination, conspiracy, contracts, agreements, understandings, and concert of action hereinabove alleged have had, as intended by the defendants, the following effects among others:

(a) Defendants unlawfully acquired the power to monopolize and restrain air transportation between the United States and Latin America;

[fol. 13] (b) competition in air transportation between the United States and Latin America has been restrained, suppressed and prevented;

(c) competition in transportation by air with transportation by water between the United States and Latin America has been restrained, suppressed and prevented;

(d) defendants have arbitrarily divided and allocated between and among themselves air transportation between the United States and South America;

(e) trade and commerce with foreign nations has been dominated, controlled and monopolized.

Prayer

Wherefore the Plaintiff Prays:

1. That the Court adjudge and decree that the defendants have contracted, combined and conspired in restraint

of the trade and commerce hereinabove described, have combined and conspired to monopolize, have attempted to monopolize and have monopolized that trade and commerce, in violation of Sections 1, 2 and 3 of the Sherman Act.

2. That the Court adjudge and decree that the stockholdings in and control of defendant Panagra by defendants Pan American and Grace have operated so as to restrain and to monopolize trade and commerce, as hereinabove described, in violation of Sections 1, 2 and 3 of the Sherman Act.

3. That the Court order and direct defendants Pan American and Grace to divest themselves of all stockholdings and other interests in defendant Panagra, held directly or through subsidiaries, under terms and conditions [fol. 14] which will accomplish effective divorcement and complete elimination of control of the operation and management of defendant Panagra from defendants Pan American and Grace.

4. That the defendants, and each of them, be perpetually enjoined from combining and conspiring to restrain or monopolize, or from monopolizing or attempting to monopolize the trade and commerce hereinbefore alleged, and from engaging in any practice, relationship, contract, agreement or course of conduct having the purpose or effect of continuing or renewing any of the violations hereinbefore alleged.

5. That the plaintiff have such other and further relief as the nature of the case may require and the Court may deem just and proper.

6. That plaintiff recover the costs of this suit.

Herbert Brownell, Jr., Attorney General, Stanley N. Barnes, Assistant Attorney General, James E. Kilday, Special Assistant to the Attorney General, Frank F. Vesper, Special Assistant to the Attorney General, J. Edward Lumbard, United States Attorney, John Guandolo, Trial Attorney.

[fol. 15]

IN THE UNITED STATES DISTRICT COURT

FOR THE SOUTHERN DISTRICT OF NEW YORK

[Title omitted]

ANSWER OF W. R. GRACE & CO.—Filed April 27, 1954

W. R. Grace & Co., one of the above named defendants, by its attorneys, Cahill, Gordon, Reindel & Ohl, answers the complaint herein as follows:

First Defense

1. Admits that the complaint is filed under Section 4 of the Sherman Act, but denies that W. R. Grace & Co. (hereinafter "Grace") is engaged in any violations of Sections 1, 2 and 3 of the Sherman Act, as alleged in Paragraph "1" of the complaint.

2. Admits the allegations contained in Paragraph "2" of the complaint.

3. Admits upon information and belief the allegations contained in Paragraph "3" of the complaint.

4. Admits that Grace is a corporation duly organized in 1899 under the laws of the State of Connecticut and has [fol. 16] its principal office located at 7 Hanover Square, New York, N. Y.; that Grace has subsidiaries which engage in various aspects of industry, trade and commerce including Grace Line, Inc., all of whose capital stock is owned by Grace; that Grace Line, Inc. operates a steamship route, among others, for the transportation of persons, property and mail between the United States and the west coast of South America; except as hereinabove admitted, denies each and every allegation contained in Paragraph "4" of the complaint.

5. Admits the allegations contained in Paragraph "5" of the complaint.

6. Admits that prior to 1928 substantially all transportation between the United States and Latin America was

conducted by steamship; that Grace Line, Inc. in 1928 and thereafter was and continues to be one of the largest companies engaged in steamship transportation between the United States and the west coast of South America; that Grace Line, Inc. operates a steamship route, among others, from New York City southward along the Atlantic Coast of North America through the Caribbean Sea to ports located on the north coast of South America and through the Panama Canal to ports located on the west coast of South America; that in 1950 Grace Line, Inc. transported approximately 90% of the passengers traveling by liner service between the United States Atlantic ports and the west coast of South America and approximately 60% of the total commercial cargo in liner service between said points and transports substantially all of the passengers and commercial cargo in United States flag ships between these points; that Grace occupies an important position in Latin American trade through its various subsidiaries some of which are located in South America; that for many years Grace has been engaged in various phases of industry, trade and commerce in countries located on the west coast of South America; except as hereinabove admitted, [fol. 17] denies each and every allegation of Paragraph "6" of the complaint.

7. Admits upon information and belief the allegations contained in Paragraph "7" of the complaint.

8. Admits upon information and belief the allegations contained in Paragraph "8" of the complaint; except denies knowledge or information sufficient to form a belief as to the truth of the allegation that the extensive system of Latin American air transportation operated by Pan American comprises over 60,000 route miles certificated by the Civil Aeronautics Board (the term "Pan American" is used in this answer to refer to Pan American World Airways, Inc., Pan American Airways, Inc., Pan American Airways Corporation and Aviation Corporation of the Americas as the meaning may require).

9. Avers that the Peruvian Government by Supreme Resolution on May 28, 1928 granted Huff-Daland Dusters,

Inc., a corporation organized under the laws of the State of Louisiana, permission to engage in transportation by air of mail, cargo and passengers between Peru and the United States; that thereafter Huff-Daland Dusters, Inc. pursuant to permission granted by the Peruvian Government in November, 1928, transferred the rights granted to it under said Supreme Resolution to Peruvian Airways Corporation, an American corporation owned by Grace and Pan American each holding 50% of its outstanding capital stock; that Grace and Pan American each owned a one-half interest in Peruvian Airways Corporation; that Grace and Pan American organized Pan American-Grace Airways, Inc. (hereinafter "Panagra") in January, 1929 under the laws of the State of Delaware; that Grace and Pan American each subscribed to 50% of Panagra's stock which they have held to date and each had and continues to have equal representation on the Board of Directors of Panagra; that Panagra succeeded to all the rights assigned to Peruvian Airways Corporation by Huff-Daland Dusters, Inc.; that [fol. 18] Panagra's unduplicated weighted average route mileage certified by the Civil Aeronautics Board is approximately 6,000 miles and extends from its terminal at the Canal Zone southward through the principal traffic centers of countries located on the west coast of South America and across the Andes to Buenos Aires, Argentina; that said routes were duly certificated in 1940 by the Civil Aeronautics Board issuing a certificate of public convenience and necessity under the "grandfather" clause of the Civil Aeronautics Act of 1938 (49 U. S. C. Sec. 401(e)); that under a Through Flight Agreement with Pan American dated July 31, 1946, approved by the Civil Aeronautics Board on May 5, 1947 (Order Serial No. E-570) and again on May 4, 1950 (Order Serial No. E-4130) Panagra's aircraft operate over Pan American's route between the Canal Zone and Miami to provide direct one-plane service between Buenos Aires and Miami; except as hereinabove admitted, denies each and every allegation contained in Paragraph "9" of the complaint.

10. Admits upon information and belief the allegations contained in Paragraph "10" of the complaint.

11. Avers that Panagra's certificated routes do not duplicate those of Pan American in any part except that both have common terminals at the Canal Zone and at Buenos Aires; that a part of the traffic of both Panagra and Pan American handled at Buenos Aires is through traffic to or from the United States; that the distance from United States terminals to Buenos Aires is less by way of Panagra's west coast route than by way of Pan American's east coast route as presently operated; that most of the traffic which Panagra handles at the Canal Zone originates in or is destined to the United States; that prior to 1938 Panagra did not engage in air transportation north of the Canal Zone; that Panagra has not filed an application with the Civil Aeronautics Board for authority to operate air transportation north of the Canal Zone; that under the Through Flight Agreement referred to in Paragraph "9" [fol. 19] hereof and with the approval of the Civil Aeronautics Board, Panagra's aircraft operate over Pan American's route between the Canal Zone and Miami to provide direct one-plane service between Buenos Aires and Miami; except as hereinabove admitted, denies each and every allegation contained in Paragraph "11" of the complaint.

12. Denies each and every allegation contained in Paragraph "12" of the complaint except admits that Panagra serves some of the ports and principal cities served by Grace Line, Inc. and that both Panagra and Grace Line, Inc. carry intermediate passengers traveling within or between some of the countries served by Panagra.

13. Admits upon information and belief the allegations contained in Paragraph "13" of the complaint except denies each and every allegation contained in the first and last sentence of said paragraph "13".

14. Admits upon information and belief the allegations contained in Paragraph "14" of the complaint except denies upon information and belief that Panagra's total operating revenue for the year 1949 amounted to $16,800,000 and that of this amount $4,400,000 was revenue from foreign and United States air mail and avers that such revenues amounted to $15,035,000 and $2,645,000, respectively.

15. Denies each and every allegation contained in Paragraph "15" of the complaint.

16. Denies each and every allegation contained in Paragraph "16" of the complaint except admits that Grace and Pan American in 1928 agreed to establish a pioneer United States flag carrier which was to be owned in equal shares by Grace and Pan American.

17. Avers that Panagra was duly organized under the laws of the State of Delaware in January, 1929 by Grace [fol. 20] and Pan American each of which purchased and has at all times since then owned 50% of Panagra's outstanding capital stock; that Panagra acquired all the rights assigned to Peruvian Airways Corporation by Huff-Daland Dusters, Inc. as alleged in Paragraph "9" of this answer; that Panagra was awarded a mail contract by the Postmaster General of the United States, with the approval of the Attorney General, for the transportation of mail between the Canal Zone and Santiago, Chile with the option in the Postmaster General to require extension of the service to Buenos Aires, Argentina and Montevideo, Uruguay; that in May, 1929 Panagra commenced operations under the said contract between the Canal Zone and Mollendo, Peru; that in October, 1929, its operations were extended to Buenos Aires, Argentina and since that time Panagra has transported persons, property and mail over its entire route between the Canal Zone and Buenos Aires, Argentina; except as hereinabove admitted, denies each and every allegation contained in Paragraph "17" of the complaint.

18. Denies each and every allegation contained in Paragraph "18" of the complaint.

19. Admits that Grace and Pan American at all times since the incorporation of Panagra have each owned 50% of its stock and elected an equal number of its directors; that Grace and Pan American and Panagra have entered into agreements with respect to the management and operation of Panagra; except as hereinabove admitted, denies each and every allegation contained in Paragraph "19" of the complaint.

20. Avers that certain of the advertising, sales and commercial services of Panagra are handled by Grace and Pan American; except as hereinabove admitted, denies each and every allegation contained in Paragraph "20" of the complaint.

[fol. 21] 21. Denies each and every allegation contained in Paragraph "21" of the complaint.

22. Denies each and every allegation contained in Paragraph "22" of the complaint.

23. Denies each and every allegation contained in Paragraph "23" of the complaint except admits that Pan American has opposed the extension of Panagra's route to the United States; that in 1951 Pan American opposed approval by the Civil Aeronautics Board of an interchange of equipment agreement between Panagra and National Airlines, Inc.; that the Civil Aeronautics Board has determined that it would be in the public interest for Panagra to provide one-plane through service between its terminal in Buenos Aires and the northeastern sector of the United States.

24. Denies each and every allegation contained in Paragraph "24" of the complaint except admits upon information and belief that Pan American has acquired the stock or assets of, or other interests in, air carriers operating in Latin American countries and that Panagra has acquired minority stock interests in two local air carriers operating within Bolivia and Peru.

25. Denies each and every allegation contained in Paragraph "25" of the complaint.

Second Defense

26. A decree of divestiture against Grace should not be granted because

(1) It is unnecessary, unreasonably punitive and contrary to the public interest.

(2) Grace in itself or in its capacity as a 50% stockholder of Panagra, not a monopoly in air transportation nor has it acquired the power to monopolize and restrain air transportation.

[fol. 22] (3) There is no clear, wilful, serious and continuing violation of the antitrust laws.

(4) Any agreement, understanding or transaction alleged in the complaint in which Grace has participated or to which it has been a party was disclosed to, acquiesced in or approved by the Civil Aeronautics Board over a period of many years.

27. Grace's interest in air transportation and its investigation into the possibility and desirability of establishing the same in South America dates back to Lindbergh's transatlantic flight in 1927 demonstrating the feasibility of air transportation. In 1928 Grace agreed with Pan American to organize a company to engage in transportation by air of persons, property and mail along the west coast of South America. Prior to the organization of that company, Grace had no interest in any phase of aeronautics and was not in any respect competitive with Pan American. Panagra was organized in January, 1929 and its charter authorized it to engage in air transportation "when and where lawful". Grace by agreement or otherwise has never limited or attempted to limit the areas of Panagra's operations.

28. Panagra commenced operations in May, 1929 under an airmail contract with the Postmaster General of the United States. In October, 1929 it became the first United States flag carrier to establish scheduled air service with through connections to Buenos Aires. Its record since that time has been one of continuous growth—by extensions of its route, improvement of its flight equipment, additions to its schedules and expansion of services.

29. The Civil Aeronautics Board on July 22, 1940 recognized Grace's right to hold its stock interest in Panagra when it issued a certificate of public convenience and necessity to Panagra under the "grandfather" clause of the Civil Aeronautics Act (49 U. S. C. Sec. 401(e)) covering its operations at that time. The extensions of its route since [fol. 23] then have been authorized by amendments of its certificate.

30. Panagra as a certificated air carrier regulated under the Civil Aeronautics Act has promptly and regularly notified the Civil Aeronautics Board of its operations and its relations with its stockholders through the filing of periodic reports, agreements and understandings.

31. The Civil Aeronautics Board by order dated May 5, 1947 (Serial No. E-570) approved the Through Flight Agreement between Panagra and Pan American dated July 31, 1946 providing for direct one-plane service by Panagra's aircraft between Buenos Aires and Miami and approved the Parent Company Agreement of the same date between Grace and Pan American. The Civil Aeronautics Board found that the arrangement under these agreements was "beneficial to the public," and that "such transaction does not result in creating a monopoly." The Civil Aeronautics Board by order dated May 4, 1950 (Serial No. E-4130) has continued its approval of these agreements to date.

32. Grace in continuing its efforts to extend Panagra's service as required in the public interest and in the interest of Panagra negotiated with National Airlines, Inc. and Pan American to the end of working out an interchange of equipment which would permit Panagra to extend to the public through one-plane service between Buenos Aires and Washington and New York. An agreement was finally entered into by Panagra and National Airlines, Inc. and was filed with the Civil Aeronautics Board for approval (The New York-Balboa Through Service Proceeding, Docket No. 4882).

33. The Civil Aeronautics Board on April 12, 1951 (Order Serial No. E-5282) in the light of the strong public desire for this through service tentatively approved of the interchange of equipment agreement. In approving the [fol. 24] agreement the Civil Aeronautics Board determined that such agreement "is in the public interest, is not in violation of the Civil Aeronautics Act and will not create a monopoly or monopolies and thereby jeopardize any other carrier not a party thereto."

34. By Order dated July 13, 1951 (Order Serial No. E-5541) the Civil Aeronautics Board rescinded the aforesaid order of tentative approval in view of various objections raised by certain parties to the proceeding and postponed further consideration of the agreement.

35. Subsequently Pan American and Eastern Airlines, Inc. filed an agreement with the Civil Aeronautics Board providing for an interchange of equipment between Pan American and Eastern Airlines, Inc. with provisions for participation by Panagra. Grace and Panagra have endorsed this agreement which is presently pending approval by the Civil Aeronautics Board.

36. Grace in its relations with Panagra has at all times cooperated, and is continuing to cooperate, to the end of developing and expanding Panagra in conformity with the public convenience and necessity standard of the Civil Aeronautics Act.

Third Defense

37. Repeats and realleges each and every allegation contained in Paragraphs "27" through "36" of this answer with the same force and effect as if herein fully set forth.

38. Any agreement, understanding or transaction alleged in the complaint in which Grace has participated or to which it has been a party has been in conformity with and within the rulings, decisions and orders issued by the Civil Aeronautics Board under the Civil Aeronautics Act of 1938 and the exemptions, privileges and immunities provided thereby.

[fol. 25]

Fourth Defense

39. Repeats and realleges each and every allegation contained in Paragraphs "27" through "36" of this answer with the same force and effect as if herein fully set forth.

40. The relief sought against Grace herein—with respect to transactions disclosed to, acquiesced in or approved by plaintiff over a period of many years—should under principles of equitable estoppel and laches be denied.

Wherefore, the defendant, W. R. Grace & Co. prays that the complaint herein be dismissed as to it, with costs.

Dated: New York, N. Y., April 27, 1954.

Cahill, Gordon, Reindel & Ohl, By John T. Cahill, Attorneys for Defendant, W. R. Grace & Co., 63 Wall Street, New York 5, N. Y.

[fol. 26] Proof of Service (omitted in printing).

[fol. 27] [File endorsement omitted]

IN THE UNITED STATES DISTRICT COURT

FOR THE SOUTHERN DISTRICT OF NEW YORK

[Title omitted]

ANSWER OF DEFENDANT PAN AMERICAN-GRACE AIRWAYS, INC. —Filed April 27, 1954

Defendant, Pan American-Grace Airways, Inc. (hereinafter referred to as "Panagra"), by its attorneys, answers the complaint herein as follows:

1. Admits so much of paragraph 1 of the complaint as alleges that the complaint is filed and that jurisdiction of this Court is invoked under the provision of the statute therein referred to. Except as so admitted, denies each allegation of paragraph 1 of the complaint.

2. Admits the allegations of paragraphs 2 and 5 of the complaint.

3. Denies upon information and belief so much of paragraph 3 of the complaint as alleges that subsidiaries of Pan American Airways Corporation were engaged in the transportation by air of persons, property and mail throughout the world. Except as so denied, admits each allegation of paragraph 3 of the complaint.

4. Admits so much of paragraph 4 of the complaint as alleges that defendant W. R. Grace & Company is a cor-

poration organized in 1899 under the laws of the State of Connecticut; that it has subsidiaries which engage in various aspects of industry, trade and commerce, including steamship transportation between the United States and Latin America; that it owns all of the capital stock of Grace Line, Inc., which operates steamship lines for the transportation of persons, property and mail between ports of the United States and the west coast of South America; and that it has its principal office at 7 Hanover Square, New York, New York. Except as so admitted, denies knowledge or information sufficient to form a belief as to each allegation of paragraph 4 of the complaint.

5. Admits each allegation contained in paragraph 6 of the complaint except denies knowledge or information sufficient to form a belief that Grace Line, Inc., was and is the [fol. 28] largest company engaged in steamship transportation between the United States and countries located on the west coast of South America; that in 1950 Grace Line, Inc. transported about 90% of the passengers traveling by liner service over the steamship trade route between United States Atlantic ports and the west coast of South America and about 60% of the total commercial cargo carried on all liner service over said route; that Grace Line, Inc. transports virtually all of the passengers and commercial cargo carried in United States flag ships over this trade route and that in addition to its dominant position through Grace Line, Inc. in transportation between the countries on the west coast of South America and between those countries and the United States, defendant Grace occupies an important position in Latin American trade through a banking subsidiary and numerous other subsidiaries located principally in South America.

6. Admits so much of paragraph 7 of the complaint as alleges that in 1928 air transportation service was being furnished in a number of South American countries by carriers other than United States flag air carriers. Except as so admitted, denies knowledge or information sufficient to form a belief as to each allegation of paragraph 7 of the complaint.

7. Admits so much of paragraph 8 of the complaint as alleges that the unduplicated weighted average route mileage of the Latin American air transportation system operated by Pan American is approximately 15,000 route miles certificated by the Civil Aeronautics Board and extends from points in the United States to Latin America, including the Caribbean Sea, Mexico and Central America to the Canal Zone, and by way of the north and east coasts of South America to Rio de Janeiro and Buenos Aires, linking the United States with the principal traffic centers in Latin America served by Pan American and that aside from its 50% ownership in Panagra and its ownership of stock in Aerovias Nacionales de Colombia, Pan American does not engage in air transportation between countries located on the west coast of South America unless this phrase could be construed to cover Uraba, Medellin & Central Airways, Inc., all of the capital stock of which is owned by Pan American, which operates between Panama and Medellin, Colombia, pursuant to a certificate issued under the Civil Aeronautics Act. Except as so admitted, denies knowledge or information sufficient to form a belief as to each allegation contained in paragraph 8 of the complaint.

8. Admits so much of paragraph 9 of the complaint as alleges that in 1929 Pan American and Grace caused Panagra to be formed and have since its formation each owned 50% of its authorized issued and outstanding stock; that Panagra's unduplicated weighted average route mileage, certificated by the Civil Aeronautics Board is approximately 6,000 miles which extend from its terminal at the Canal Zone southward, through principal traffic centers of [fol. 29] countries located on the west coast of South America and across the Andes to Buenos Aires, Argentina. Except as so admitted, denies knowledge or information sufficient to form a belief as to each allegation contained in paragraph 9 of the complaint.

9. Admits so much of paragraph 10 of the complaint as alleges that from 1930 until 1946, Pan American was the only United States flag air carrier operating scheduled service between the United States and the countries on the

north and east coasts of South America and admits that about nine-tenths of all passengers traveling by United States flag air carriers between points in the Eastern coastal states of the United States and countries on the north and east coasts of South America are carried by Pan American and that Pan American and Panagra carry about four-fifths of the passengers traveling by United States flag air carriers between points in the Eastern coastal states of the United States and countries on the west coast of South America, including passengers traveling over the west coast route to Buenos Aires and admits that during the twelve month period ending June, 1951, foreign flag carriers transported less than one-fourth of the air passenger traffic between the United States and the Canal Zone and between the United States and South America. Except as so admitted, denies knowledge or information sufficient to form a belief as to each allegation of paragraph 10 of the complaint.

10. Admits so much of paragraph 11 of the complaint as alleges that Panagra does not serve any points served by Pan American on its east coast route except that Pan American and Panagra have common terminals at the Canal Zone and at Buenos Aires; that a part of the traffic of both Pan American and Panagra handled at Buenos Aires is through traffic to or from the United States; that the distance from United States terminals to Buenos Aires is less by Panagra west coast route than by way of Pan American's east coast route as presently operated; that prior to the passage of the Civil Aeronautics Act in 1938, Panagra never operated its own transportation service north of the Canal Zone and since that time Panagra has not filed an application with the Civil Aeronautics Board for authority to operate such air transportation; that most of the traffic which Panagra handles at the Canal Zone originates in or is destined to the United States and is dependent for through United States service upon operations furnished by Pan American between the United States and the Canal Zone. Except as so admitted, denies each allegation contained in paragraph 11 of the complaint.

11. Admits so much of paragraph 12 of the complaint as alleges that Panagra's route along the west coast of

South America serves some of the ports and the principal cities in the countries served by the steamship routes of Grace Line, Inc., which link the Atlantic coast of the United States to ports on the west coast of South America; that both Panagra and Grace Line, Inc. carry a number of inter-[fol. 30] mediate passengers traveling within or between the countries served by Panagra; and avers that Grace Line, Inc. carries passengers, freight and mail between New York and points on the west coast of South America; that Panagra carries passengers, freight and mail between the Canal Zone and points on the west coast of South America and Buenos Aires, Argentina; that there are various differences in circumstances, terms and conditions under which passengers, freight and mail are carried by Grace Line, Inc. and Panagra including the flying time between New York and Valparaiso, Chile which is approximately 22 hours by air and approximately 18 days by steamship; freight by water transportation primarily consists of bulk cargo such as heavy machinery, automobiles, etc., while that carried by air consists chiefly of medicines, perishables, etc.; the highest freight rate charged by Grace Line, Inc. is less than 2¢ per ton mile compared with Panagra's average charge per revenue ton mile of approximately 41¢. Except as so admitted, denies each allegation contained in paragraph 12 of the complaint.

12. Admits each allegation contained in the second and third sentences of paragraph 13 of the complaint and denies each allegation contained in the first and last sentence of said paragraph 13 of the complaint.

13. Admits so much of paragraph 14 of the complaint as alleges that during the year 1949 Pan American carried approximately 700,000 air passengers over its Latin American routes and its total operating revenue for that year from its Latin American airline operations amounted to $65,500,000, of which about $40,500,000 was revenue from passengers; about $15,800,000 revenue from United States and foreign air mail and about $9,200,000 from cargo and other sources, and during the same period Panagra carried about 90,000 passengers, including intermediate traffic between and within countries in South America, as well as

passengers traveling to and from the United States; and its total operating revenue amounted to about $15,035,000 of which about $10,800,000 was revenue from passengers, and about $2,645,000 was revenue from foreign and United States air mail, and about $1,600,000 from cargo and other sources. Except as so admitted, denies knowledge or information sufficient to form a belief as to each allegation of paragraph 14 of the complaint.

14. Denies each allegation contained in paragraphs 15, 20, 23 and 25 of the complaint and in the last two sentences of paragraph 18 of the complaint; and with respect to the allegations in the first sentence of said paragraph 18 denies that it has knowledge or information sufficient to form a belief.

15. Admits so much of paragraph 16 as alleges that Pan American and Grace entered into an agreement for the establishment of Panagra, and that Panagra was to establish and operate an air line on the west coast of South America and was to be owned in equal shares by Pan [fol. 31] American and Grace. Except as so admitted, denies each allegation of paragraph 16 of the complaint.

16. Denies, upon information and belief, so much of paragraph 17 of the complaint as alleges that Panagra acquired the Peruvian rights and concessions described in paragraph 9 of the complaint from Pan American pursuant to the agreement referred to in paragraph 16 of the complaint. Except as so denied, admits each allegation contained in paragraph 17 of the complaint.

17. Admits so much of paragraph 19 of the complaint as alleges that Pan American and Grace have entered into agreement and understandings for the management and conduct of certain of the affairs of Panagra. Except as so admitted, denies each allegation contained in paragraph 19 of the complaint.

18. Admits that defendant Pan American and Grace each has retained ownership of 50% of the voting stock of Panagra and each has retained an equal number of representatives on the Board of Directors of Panagra. Except

as so admitted, denies each allegation of paragraph 21 of the complaint.

19. Admits that Pan American and Grace have the powers incident to their stock ownership in Panagra. Except as so admitted, denies each allegation contained in paragraph 22 of the complaint.

20. Admits that Panagra has acquired a minority stock interest in two air lines which operate local services in Latin American countries not substantially competitive with those of Pan American or of Panagra and admits that Pan American has acquired the stock or assets of, or other interests in, air lines which operate in Latin American countries. Except as so admitted, denies each allegation contained in paragraph 24 of the complaint.

Wherefore, defendant Pan American-Grace Airways, Inc., demands judgment dismissing the complaint, with costs.

Dated April 27, 1954.

White & Case, Attorneys for defendant, Pan American-Grace Airways, Inc., By Thomas Kieruder, A Member of the Firm, 14 Wall Street, New York 5, N. Y.

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF NEW YORK

[Title omitted]

ANSWER OF DEFENDANT PAN AMERICAN WORLD AIRWAYS, INC.—Filed April 27, 1954

Defendant Pan American World Airways, Inc. (hereinafter called "Pan American"), by its attorneys, answers the complaint herein as follows:

I.

1. Denies paragraph 1 except that it admits that plaintiff seeks to invoke jurisdiction on the basis of the provisions of the statutes referred to therein.

2. Admits paragraph 2.

II.

3. Admits paragraph 3 except the fourth sentence of said paragraph, as to which it denies that subsidiaries of Pan American Airways Corporation were engaged in the transportation by air of persons, property and mail throughout the world.

4. Admits that W. R. Grace and Company (hereinafter called "Grace") is a corporation organized under the laws of the State of Connecticut, that Grace has subsidiaries which engage in numerous aspects of industry, trade and commerce, including steamship transportation between the United States and Latin America, that Grace owns all of [fol. 34] the capital stock of Grace Line, Inc., which operates steamship lines for the transportation of persons, property and mail between ports of the United States and ports in South America, including the west coast, and that Grace has its principal office at 7 Hanover Square, New York, New York, and alleges that it is without knowledge or information sufficient to form a belief as to the other allegations of paragraph 4.

5. Admits paragraph 5.

III.

6. Admits paragraph 6 except that it alleges that it is without knowledge or information sufficient to form a belief as to the percentage of passengers and cargo carried by Grace Line, Inc. and as to whether Grace Line, Inc. transports virtually all of the passengers and commercial cargo carried in United States-flag ships between the United States and the west coast of South America.

7, 8, 9, 10, and 11. Denies paragraphs 7, 8, 9, 10 and 11, except that it admits and avers as follows:

A. In the years immediately after the conclusion of World War I air transportation developed much more intensively in Europe than in the United States. European-owned airlines established themselves in Latin America at a relatively early date. German air services had commenced operations in Latin America as early as 1921, and the French had followed shortly thereafter. By 1928 both the Germans and the French had built up substantial systems in South America. The German-controlled Scadta was operating in interior Colombia and between Colombia and Ecuador and was seeking to cross the Panama Canal and extend its operation up through Central America to Cuba and the United States. Another German company, Lloyd Aero Boliviano, was operating in Bolivia and had projected services reaching through Brazil to the Atlantic seaboard [fol. 35] at Rio de Janeiro. Sindicato Condor, an affiliate of the German Lufthansa, was operating on a 900-mile route on the Brazilian coast south of Rio and had projected a line across the South Atlantic to Europe. The French international airline, Aeropostale, had initiated service between Natal, Brazil, and Buenos Aires, Argentina, in November, 1927. Early in 1928 it established service between France and Buenos Aires, utilizing fast destroyers, made available by the French Government, as a link for transporting mails between Dakar, Africa, and Natal. The destroyers were later superseded by mail planes. Aeropostale and its subsidiaries supplemented these services by routes in Argentina and Chile. Aeropostale also held concessions to extend its service from Natal to Trinidad and the French West Indies and between Trinidad and Venezuela and was actively negotiating for an exclusive international mail contract in Peru. Both the French and the Germans had projected air routes across and around the South American continent and even to the United States.

B. Until late in the 1920s it was exceedingly difficult to obtain the capital needed to develop air transportation within the United States. It was even more difficult to obtain the capital required to develop air transportation under the American flag between the United States and Latin America, where the operator was obliged to provide not only flight equipment, maintenance facilities and working

capital, but also airports and meteorological and communication services which within the United States were normally provided by governmental entities. Until 1928 there was no legislation under which the Federal Government could grant the financial assistance that was essential if air transportation to Latin America under the American flag was to be established.

[fol. 36] C. United States interest in international air transportation was stimulated by the Lindbergh flight across the Atlantic in the early summer of 1927. Pan American was formed in that year and made its first flight from Key West to Havana in October, 1927. At the end of 1927 Pan American's entire fleet consisted of two Fokker F-7s and one Fairchild C-2.

D. On March 8, 1928, there was enacted the Foreign Air Mail Act, 45 Stat. 248. This authorized the Postmaster General to enter into contracts for not more than ten years for the air transportation of United States mail to foreign countries or insular possessions of the United States at rates not exceeding $2.00 per mile. The Postmaster General was to award each contract to the lowest responsible bidder who he should find "can satisfactorily perform the service required to the best advantage of the Government."

E. Pan American Airways Corporation (originally known as "Aviation Corporation of the Americas") was formed in June, 1928, as a means for obtaining the capital required to enable Pan American, its operating subsidiary, to enter bids for foreign airmail contracts to Latin America which were being or were about to be advertised by the Postmaster General pursuant to the Foreign Air Mail Act of 1928 and to conduct operations under such contracts as might be awarded to Pan American.

F. During May and July, 1928, the Postmaster General awarded to Pan American three ten year contracts for air service to Latin America under the Foreign Air Mail Act of 1928. Among these was a contract, awarded to Pan American on July 13, 1928, for Foreign Air Mail Route No. 5 from Miami, Florida, to the Canal Zone, with an option in the Postmaster General to extend the contract

along the North Coast of South America via Trinidad as far as Paramaribo, Dutch Guiana. Another contract, also [fol. 37] awarded to Pan American on July 13, 1928, was for Foreign Air Mail Route No. 6 from Miami to Puerto Rico, with an option in the Postmaster General to extend the contract to Trinidad.

G. Prior to the award of these contracts, Pan American had formulated plans for the extension of its projected Miami-Canal Zone operation down the West Coast of South America. By the end of July, 1928, Pan American had instituted negotiations for operating rights in Panama, Colombia and Ecuador, held an option on an operating concession in Peru which another company had obtained for Pan American's account, and had ordered sufficient aircraft to operate the northern portion of the route from the Canal down the West Coast in addition to its other routes.

H. At the end of 1928 the capital of Aviation Corporation of the Americas amounted to only $3,379,000, Pan American, its operating subsidiary had little more than 100 employees, and the total horsepower and passenger capacity of Pan American's 12 aircraft were roughly equivalent to those of one modern airplane.

I. In the fall of 1928, Aviation Corporation of the Americas entered into an agreement with Grace, evidenced by two letters dated respectively August 31 and September 7, 1928, copies of which are annexed hereto as Annex A and made a part hereof. By this agreement each of the two companies agreed to subscribe $25,000 to the capital stock of a corporation to be formed under the laws of Delaware to operate an airplane service in Peru. The agreement provided that the two companies would cooperate in studying the costs of operation "on a route from the Panama Canal to Valparaiso" and that if Aviation Corporation of the Americas determined "that it is advisable to bid on a contract for carrying the mails between the Panama Canal and Valparaiso", the amount contributed by Grace to the [fol. 38] stock of the company which was to operate in Peru should be treated as a contribution to the stock of the company making the bid and Grace was to have an

option to take an additional interest in such a company not to exceed 50% of the total capitalization. Pan American was to "have charge of the operation of the service from the Canal to Valparaiso" and the Grace houses on the West Coast of South America were to act as agents for the company. The Delaware corporation referred to in the letters was formed under the name "Peruvian Airways Corporation", Grace and Aviation Corporation of the Americas subscribed $25,000 each to its capital, and it began operations in Peru in September, 1928.

J. On January 31, 1929, the Post Office Department issued an advertisement for a contract for Foreign Air Mail Route No. 9, from the Canal Zone down the West Coast of South America to Santiago, Chile, with an option in the Postmaster General to extend the service from Santiago across the Andes to Buenos Aires and Montevideo. Pan American-Grace Airways, Inc. (hereinafter referred to as "Pan American-Grace") was incorporated to bid for this contract, Grace availed itself of the option which Aviation Corporation of the Americas had granted to it in the fall of 1928 to acquire a 50% interest in the company, and, with the assent of its two owners, Pan American-Grace submitted a bid for the mail contract. Accordingly, Aviation Corporation of the Americas and Grace each subscribed to the capital stock of Pan American-Grace $500,000, including the amounts previously subscribed by them to the stock of Peruvian Airways Corporation.

K. On March 2, 1929, there was enacted the Foreign Air Mail Act of 1929, 45 Stat. 1449. This differed from the Foreign Air Mail Act of 1928 primarily in that it authorized the Postmaster General to pay for transportation from foreign countries to the United States as well as in the [fol. 39] outbound direction and provided for the amendment to this end of contracts which had been entered into under the 1928 Act. On March 2, 1929, the Postmaster General, pursuant to the Foreign Air Mail Act of 1929, awarded to Pan American-Grace the contract for Foreign Air Mail Route No. 9. A number of other companies also submitted bids for this contract. The Postmaster General found that although Pan American-Grace was not the low

bidder, it was the lowest responsible bidder that could satisfactorily perform the service to the best advantage of the Government. Among the principal grounds for such finding were the two years of negotiation and preparation for the service down the West Coast in which Pan American had engaged, Pan American's record of successful operations in the Caribbean, and the facilities of Grace along the line of the proposed route. It was not the policy of the Postmaster General at this or any other date to have more than one company operate under the Foreign Air Mail Act over the same route. The financial assistance from the plaintiff provided by a contract under the Foreign Air Mail Act was essential to the institution of air service from the Canal down the West Coast and remained essential to the maintenance of such service until it was replaced by financial assistance from the plaintiff under the Civil Aeronautics Act of 1938, 52 Stat. 980, and such assistance under that Act has since been so essential.

L. The award of Foreign Air Mail Contract No. 9 to Pan American-Grace was protested by the low bidder. The Postmaster General under the Hoover Administration, which had come into office shortly after the award of the contract, requested the opinion of the Department of Justice as to the legality of the award. Attorney General Mitchell, in an opinion dated May 6, 1929, which is reported in 36 Opinions of Attorney General 33, sustained the action of the Postmaster General under the previous Coolidge Administration in making the award. The papers before the Attorney General fully disclosed the identity of the two owners of Pan American-Grace and the circumstances of its formation.

[fol. 40] M. Pan American-Grace commenced operations under Foreign Air Mail Contract No. 9 on July 12, 1929. Until the end of 1929 operations as far south as Guayaquil, Ecuador, were conducted by aircraft and personnel of Pan American. The Postmaster General having extended the contract from Santiago to Buenos Aires, Pan American-Grace operated its first flight across the Andes to Buenos Aires on October 12, 1929.

N. During 1928 and 1929 Pan American expanded and extended its operations in the Caribbean area and on the North and East Coasts of South America. By the end of 1929 Pan American was operating regular service down the East Coast to Paramaribo, Dutch Guiana. In September, 1930 Pan American acquired the assets of New York, Rio and Buenos Aires Line, Inc., a company which had been formed by persons independent of Pan American and Grace with the purpose of operating an airline through Puerto Rico and Trinidad down the East Coast of South America to Buenos Aires. Pan American was urged by the Postmaster General to make this purchase. It declined to do this unless it received assurance that the Department of Justice would not regard the purchase as violating the anti-trust laws. Such assurance was obtained by letter from the Department of Justice dated August 1, 1930. The papers before the Department again disclosed the facts as to the formation of and stock ownership in Pan American-Grace. On September 24, 1930, the Postmaster General awarded to Pan American a contract for Foreign Air Mail Route No. 10 from Paramaribo, Dutch Guiana, to which Pan American was already operating under its contracts for Foreign Air Mail Routes 6 and 5, to Santos, Brazil, with an option in the Postmaster General to extend the contract to Buenos Aires. Pan American commenced service to Buenos Aires down the east coast pursuant to this contract in 1931. This [fol. 41] completed a circle of Pan American routes around South America from Miami to Buenos Aires—the entire eastern half, from Miami through Puerto Rico, Trinidad and Rio, and the northern portion of the western half, from Miami to the Canal, being operated by Pan American itself, and the southern portion of the western half from the Canal down the West Coast and over the Andes being operated by Pan American-Grace as an extension of Pan American's service in line with the agreement pursuant to which Pan American-Grace had been formed. All these operations were conducted under contracts awarded by the plaintiff with full knowledge of the facts as to the formation of Pan American-Grace and could not have been initiated or thereafter conducted but for the financial assistance given by plaintiff under such contracts.

O. The Civil Aeronautics Act of 1938, 52 Stat. 980, 49 U.S.C. §401 ff., directed in Section 401(e), 49 U.S.C. §481(e), that certificates of convenience and necessity should be issued to Pan American and Pan American-Grace for the operations which had been conducted by them under the various foreign airmail contracts and such certificates were issued by the Civil Aeronautics Board in the name and on behalf of the plaintiff.

P. The services of Pan American and Pan American-Grace are not competitive but complementary and have always been so intended. Pan American-Grace was formed and has existed as an extension of Pan American's service to the Canal to give Pan American access to the West Coast of South America. The bulk of Pan American-Grace's traffic on the segment immediately south of the Canal moves north of the Canal on Pan American's routes to various gateways in the United States—Miami, New Orleans, Houston and Los Angeles. Similarly, a very large percentage of the traffic carried by Pan American on its routes between the Canal and these United States gateways moves [fol. 42] south of the Canal over Pan American-Grace. Of all the points which Pan American-Grace serves, Pan American competes only at Buenos Aires, (where Pan American had not operated prior to its purchase of New York, Rio and Buenos Aires Line, Inc. with the approval of the Department of Justice) and there the passenger's origin or destination in the United States and his desires as to stop-overs enroute generally determine his selection of route, so that in fact the competition is negligible.

Q. By reason of the facts set forth above, Pan American has every interest in the provision of the best possible service for traffic between the United States and points on the Pan American-Grace sector of its System. In pursuance of proposals made by Pan American many years before, an arrangement was made in 1946 and approved by the Civil Aeronautics Board in 1947 whereby certain aircraft of Pan American-Grace, operated by that Company on its route south of the Canal, are chartered to Pan American for through operation by Pan American, along with other Pan American equipment, on one of the Pan

American routes connecting the Canal with the United States, namely, that between the Canal and Miami. This agreement, known as the Through Flight Agreement, provided that the charter of the aircraft of Pan American-Grace to Pan American should be extended from Miami on to New York in the event that, pursuant to a then pending application to the Civil Aeronautics Board, Pan American should be certificated for this route. In 1949 Pan American and Pan American-Grace entered into an arrangement with National Airlines, Inc. whereby the aircraft of Pan American-Grace which were chartered to Pan American for operation between the Canal and Miami should be further chartered to National for operation over that Company's route between Miami and New York. National repudiated this arrangement at the end of 1950, and Pan American immediately instituted negotiations with Eastern [fol. 43] Air Lines, Inc. for an arrangement which included, subject to agreement by Pan American-Grace, the chartering to Eastern, for operation over its Miami-New York route, of the aircraft of Pan American-Grace which were chartered to Pan American for operation by Pan American between the Canal and Miami. This proposal, to which Pan American-Grace has agreed, has been pending before the Civil Aeronautics Board since January, 1951.

R. With respect to certain allegations of paragraphs 7, 8, 9, 10 and 11 not specifically heretofore answered, Pan American:

(1) Admits that it operates routes in Latin America under certificates issued by the Civil Aeronautics Board as set forth in the second sentence of paragraph 8, and avers that the unduplicated weighted average mileage of the routes so operated is approximately 15,000 route miles rather than the 60,000 route miles alleged by plaintiff.

(2) Admits that aside from Pan American-Grace and Aerovias Nacionales de Colombia, Pan American has no financial interest in any company engaged in air transportation between countries located on the west coast of South America unless this phrase be construed to cover Uraba, Medellin & Central Airways, Inc., all of the capital stock of which is owned by Pan American, which operates be-

tween Panama and Medellin, Colombia, pursuant to a certificate issued under the Civil Aeronautics Act.

(3) Admits that Pan American-Grace's line is as described in the last sentence of paragraph 9 and avers that the unduplicated weighted average route mileage of Pan American-Grace is approximately 6,000 miles rather than the 10,000 alleged by the plaintiff.

(4) Admits that from 1930, when it acquired the assets of New York, Rio and Buenos Aires Line, Inc. at the in- [fol. 44] stance and with the approval of the plaintiff as set forth above, until 1946, Pan American was the only United States-flag air carrier operating scheduled service between the United States and the countries on the North and East Coasts of South America, and avers that this resulted from policies adopted by the plaintiff, both before and after enactment of the Civil Aeronautics Act of 1938.

(5) Admits the allegations of paragraph 10 with respect to the proportion of passengers carried by United States-flag air carriers carried by Pan American and Pan American-Grace, but avers that in computing these proportions plaintiff has included points in South America to which, as a result of actions and policies of plaintiff, no other United States-flag air carrier has been authorized to operate.

(6) Admits the allegations of paragraph 10 with respect to the proportion of air passenger traffic carried by foreign-flag lines between the United States and the Canal Zone and between the United States and South America during the twelve months period ending June 30, 1951, but avers that foreign-flag carriers cannot lawfully carry traffic between the United States and the Canal Zone and that the proportion of traffic carried by foreign-flag carriers between the United States and South America has increased since 1951 and, on the basis of developments in other parts of the world, can be expected to increase further.

(7) Admits that neither prior to nor since passage of the Civil Aeronautics Act of 1938 has Pan American-Grace ever operated its own transportation service north of the Canal or sought authority for the operation of such trans-

portation service, and avers that Pan American-Grace was organized to operate the portion of the Latin American services of the Pan American Airways System from the Canal down the west coast of South America under the circumstances set forth above, and was not intended to operate north of the Canal.

[fol. 45] 12. Admits paragraph 12.

13. Denies the first and last sentences of paragraph 13 and admits the second and third sentences of said paragraph.

14. Admits the first, second and third sentences of paragraph 14, except that it denies upon information and belief that Panagra's total operating revenues and mail revenues in 1949 were as alleged in said paragraph 14, and alleges that it is without knowledge or information sufficient to form a belief as to the fourth and fifth sentences.

IV.

15. Denies paragraph 15.

16. Denies paragraph 16 except that it admits and avers that the circumstances under which Pan American-Grace was formed were as set forth in paragraphs 7, 8, 9, 10 and 11 above.

17. Denies paragraph 17 except that it admits and avers that Pan American-Grace was organized and has operated as set forth in paragraphs 7, 8, 9, 10 and 11 above.

18. Denies paragraph 18 except as admitted and averred in paragraphs 7, 8, 9, 10 and 11 above and that it further admits that, as a consequence of the function which Pan American-Grace was intended to serve and has served in the Pan American Airways System, Pan American has not, since the formation of Pan American-Grace, applied for or operated for its own account an airline along the west coast of South America and that, pursuant to authorizations granted by plaintiff, Pan American furnishes to Pan American-Grace at the Canal both through and connecting service to various points in the United States.

19. Denies paragraph 19 except that it admits that since the formation of Pan American-Grace, Pan American (or its predecessor company) and Grace have each owned 50% of its stock, have elected an equal number of its directors, and from time to time have entered into agreements with respect to the management and conduct of its affairs, which agreements and understandings have been fully disclosed to plaintiff.

[fol. 46] 20. Denies paragraph 20.

21. Denies paragraph 21 except that it admits that Pan American (or its predecessor company) and Grace have each retained ownership of 50% of the voting stock of Pan American-Grace and have elected an equal number of representatives on Pan American-Grace's Board of Directors.

22. Denies paragraph 22 except that it admits that Pan American and Grace have the powers incident to their stock ownership in Pan American-Grace and the agreements between them.

23. Denies paragraph 23.

24. Denies paragraph 24 except that it admits that Pan American acquired the assets of New York, Rio and Buenos Aires Line, Inc. at the instance and with the approval of the plaintiff as set forth above and that Pan American (and its predecessor company) and Pan American-Grace have from time to time acquired stock interests in certain other air lines operating services in Latin American countries not substantially competitive with those of Pan American and Pan American-Grace.

V.

25. Denies paragraph 25.

For a First Affirmative Defense
Pan American Alleges:

26. The agreement whereby Pan American's predecessor company granted Grace an option to acquire up to a 50% interest in Pan American-Grace as the west coast link of the Pan American system and Grace acquired such an interest was fully disclosed to and approved by the

plaintiff in 1928. The participation of Pan American's predecessor company and Grace in Pan American-Grace was considered by the plaintiff to be a reason for the selection of Pan American-Grace for the difficult task of pioneering air service from the Canal down the west coast of South America in 1929. Pan American and its prede- [fol. 47] cessor company have invested and kept invested large amounts in Pan American-Grace in reliance on the foregoing. Plaintiff is estopped from now contending that these very facts were a violation of the anti-trust laws. Alternatively, plaintiff has been guilty of unreasonable and inexcusable delay and laches in asserting any such claim.

For a Second Affirmative Defense
Pan American Alleges:

27. The facts as to the stock ownership of Pan American-Grace and as to the limited character of its operation were known to the Congress and the President at the time of the enactment of the Civil Aeronautics Act of 1938. By said Act plaintiff ratified and confirmed said ownership and limitation.

For a Third Affirmative Defense
Pan American Alleges:

28. Pan American-Grace has derived great benefits from its participation in the Pan American Airways System. All of Pan American-Grace's sales activities, apart from points on its own route, are conducted by Pan American on its behalf. As a result Pan American-Grace enjoys the advantages of Pan American's 43 sales offices in the United States, Pan American's 64 sales offices in Latin America, and Pan American's 128 sales offices in other parts of the world. Pan American's System timetables, which are published monthly with a distribution of approximately 275,000 copies, show the services of Pan American-Grace integrated with the services of Pan American. So likewise do Pan American's many insertions in aviation and other travel guides. Since 1947 Pan American-Grace's major aircraft and engine maintenance and flight training have likewise been performed by Pan Ameri-

can for its account. Pan American-Grace likewise enjoys the benefits of Pan American's technical, research, purchasing and other services at a cost far below that which Pan American-Grace would have for performing the same services. All these arrangements have been approved by [fol. 48] plaintiff, acting through its duly constituted regulatory agency, the Civil Aeronautics Board. Divorced from Pan American, Pan American-Grace could enjoy no similar advantages except at a prohibitive cost.

29. The relief sought by the plaintiff against Pan American would be contrary to the public interest. For the reasons set forth above, divorce of Pan American-Grace from Pan American would decrease its revenues and increase its costs, and would likewise increase the net costs of United States-flag air transportation generally. In view of the provisions of Section 406(b) of the Civil Aeronautics Act, 49 U.S.C. §486(b), for the subsidization of air carriers, this would require the plaintiff to pay added subsidies for the maintenance of United States-flag air carriers abroad, thereby imposing increased and unnecessary burdens upon the plaintiff and its taxpayers in direct contravention of policies which are currently being announced by responsible officers of the plaintiff.

For a Fourth Affirmative Defense
Pan American Alleges:

30. Both Pan American and Pan American-Grace are air carriers subject to the regulation and control of the plaintiff. The routes which they operate, their right to operate in any area, and the amount of competition which they are to have, are determined by the plaintiff, and the plaintiff has approved the area and scope of their operations.

Wherefore, judgment is demanded dismissing the complaint herein against the defendant Pan American World Airways, Inc., with costs.

Cleary, Gottlieb, Friendly & Hamilton, Attorneys for Defendant Pan American World Airways, Inc., By Fowler Hamilton, A Member of the Firm, 52 Wall Street, New York 5, N. Y.

[fol. 49] ANNEX A TO ANSWER

August 31, 1928

Aviation Corporation of the Americas,
100 East 42nd Street,
New York City

Attention: Mr. J. T. Trippe

Dear Sirs:

This will confirm arrangement under which we will associate for the commencement of an airplane service in Peru with the view of ultimately inaugurating a through mail service from the Panama Canal to Valparaiso, Chile.

A corporation will be formed under the laws of Delaware with a capital stock of $50,000, of which $25,000 will be subscribed by yourselves and $25,000 by ourselves. This corporation will pay to Huff-Daland Dusters, Inc. the sum of $15,000 for an assignment which will convey all of the rights of that company under its present Peruvian mail contract and concession. As soon as possible after the assignment has been completed, operations will be started by this company in Peru and every effort will be made to put the business there on a paying basis.

We will in the meantime cooperate with you in studying the costs of operation on the route from the Panama Canal to Valparaiso and also the advisability of requesting the U.S. Post Office Department to advertise for a mail contract on such route and the terms of such advertisement.

If you determine that it is advisable to bid on a contract for carrying the mails between the Panama Canal and Valparaiso, the Delaware corporation above referred to will be used in such service either by an increase in its capital stock to an amount sufficient to operate on the whole route or as a subsidiary operating in Peru. In either event our subscriptions to the stock of the Delaware Com-

pany shall be credited at their full amount in the capital setup of the corporation operating the through service. We shall also have a reasonable time after a study of the estimated costs of such operation to determine what interest, if any, we will take in the company making the bid in addition to our initial investment of $25,000, such interest not to exceed, however, more than fifty percent of the total capitalization.

You will have charge of the operation of the service from the Canal to Valparaiso and our houses on the West Coast of South America will be the agents of the company on a reasonable compensation basis, such agency to continue during the life of transportation contracts undertaken by the company.

The details of carrying out the above must, of course, be worked out as we go along. We believe, however, that we have stated broadly the basis of our understanding.

Very truly yours,

W. R. Grace & Co.

William F. Cogswell,
Assistant Secretary.

WFC:GVB

[fol. 50] September 7, 1928

W. R. Grace & Company,
10 Hanover Square,
New York City

Attention Mr. William F. Cogswell.

Dear Sirs:

We beg to confirm the arrangement set forth in your letter of August 31st.

Supplementing paragraph four, however, we would point out the fact that in the event you decide not to take up a substantial interest in a jointly owned Company, organized or to be organized for the purpose of submitting a bid on the contract for carrying mails between Panama Canal and Valparaiso then, and in that event, we would prefer to bid on the contract through the medium of Pan American Airways, Inc., or some other wholly owned subsidiary.

If this were done, we would arrange to allow you, if you desired, to take a further stock interest in Aviation Corporation of the Americas, in addition to the $25,000 referred to in paragraph five.

Our Directors are delighted that we are to be associated with your firm in the development of air transportation on the West Coast of South America, and we look forward to a most pleasant and profitable relationship.

We would appreciate your advising us if this letter, in connection with yours of August 31st, covers your understanding of our arrangement.

Yours very truly,

AVIATION CORPORATION OF THE AMERICAS

By J. T. Trippe,
Vice President.

[fol. 16] S. ROBERT MITCHELL, called as a witness on behalf of the Government, being first duly sworn, testified as follows:

Direct examination.

By Mr. Kenney:

* * * * * * *

[fol. 20] Q. Mr. Mitchell, how does Pan American World Airways compare in size with other international airlines of the world?

A. According to the statistics that I have been able to observe, Pan American is by far the largest international air carrier in the world, whether you measure that in terms of passenger miles flown or number of passengers carried, or ton miles flown, or various other measures.

Q. Do you have some basis for your statistics?

A. That information can be observed from a study published by the International Civil Aviation Organization, which is an organization of governments of the world with respect to aviation matters, of which the United States [fol. 21] and over 70 other nations are members, and which publishes a number of studies on transportation trends and traffic information.

Q. Have you seen the digest of the ICAO for the 1947-1957 period?

A. Yes, sir. It is called a Digest of Statistics on Traffic for the period 1947-1957, and from that study you can observe the number of passengers carried or ton miles flown, or passenger miles flown by the various airlines of the world, and from that information I observed that Pan American flew approximately three and one-half billion passenger miles in the year 1957.

Q. Who was the second largest international carrier?

A. The British Overseas Airways Corporation was the second largest. The Pan American was over two and one-half times the size of BOAC, as it is referred to. It had approximately one and a third billion passenger miles of traffic in that same year.

Q. Could you tell us what share of Pan American's business is in its Latin American division?

A. Approximately one-third.

Q. Could you tell us how that compares with other international operators?

[fol. 22] A. That is almost as large as the second largest international air carrier in the world, the BOAC, which I just referred to.

Q. That is, Pan American Latin American division?

A. They carried about one and a quarter billion passenger miles in 1957, according to the ICAO, which was that organization I referred to, reports.

Q. Mr. Mitchell, can you tell us about the growth of Panagra as compared with the growth of Pan American during the period since the formation of the two companies?

A. Yes. We requested information from Pan American and from Panagra on the growth of the two companies, and I have a chart here which was developed from that information, which, I think, clearly illustrates how the two companies have grown during that period of time.

Along the bottom are the years from 1929, which was the first date that Panagra could give us information for, through 1957, at the end, and on the side here are the passenger miles scale flown by these two airlines.

The red line shows the passenger miles flown by the entire Pan American system on all of its routes and the [fol. 23] dashed red line is the Latin American division of Pan American. The Latin American division was the entire system in the early years, of course.

Panagra is indicated by these green lines.

You will see, in the early days the companies had very modest operations. Since the late 1930s, however, and particularly in the last ten years, the Pan American system has grown tremendously, as you can see there to its worldwide operations. The Latin American division of Pan American has also grown quite rapidly.

You will notice, on the other hand, that Panagra has not grown substantially despite the fact that they started operations about the same time in the same general area.

OFFER IN EVIDENCE

Mr. Kenney: May I have this chart, please? I intend to offer this in evidence.

(A pause)

Mr. Kenney: May it please the Court, I offer Government's statistical Exhibit No. 101 into evidence.

Mr. McKay: No objection.

(Marked GSX 101.)

Q. Mr. Mitchell, Pan American's growth since those [fol. 24] early days has been worldwide in scope, has it not, while Panagra has continued to operate in the same areas it did several decades ago?

A. Yes, that is correct. I think that the growth of the Pan American system on a worldwide basis as opposed to Panagra's continuation in the same general area in which it started can be shown by three maps which I have here.

This first map shows the routes of Pan American and Panagra as of the end of 1930, and they were developed from information provided to us by Pan American and Panagra at our request.

The red line shows Pan American's route at that time and the dashed green line is the route of Panagra.

You will see that Pan American at that time, the end of 1930, covered the Caribbean area and went down along the east coast of South America to a point a little south of Rio de Janeiro, while Panagra extended from the Canal Zone down the west coast of South America into Chile and across the Andes to Buenos Aires. Pan American had not yet reached Buenos Aires at that time. In fact, about a year before this, Panagra had already obtained this route structure. Panagra, a year before, was about the [fol. 25] same as it is now, it was running all the way to Buenos Aires, while a year before this chart, at the time of this chart, Pan American only went into Gandia and was only a few months before this, the date of this chart, that Pan American had extended its route that far. So that as of the end of 1929 Panagra was the longest, had the longest international air route of any air carrier in the world, much longer than Pan American.

Here is a chart which compares the two companies eight years later, in 1938. It shows that Pan American had by that time extended its route clear down to Buenos Aires and taken in certain other points in South America and in the Caribbean and, in addition, it had already gone into

other areas outside the Latin American areas. It had moved across the Pacific. It had gone up into Alaska, and had a route into the Atlantic, out to Bermuda.

Panagra, on the other hand, had basically the same route structure that it did back in 1929 and 1930, with some extensions within that route.

The terminal, the northernmost terminal of Panagra, was still Balboa, and the southernmost point was Buenos Aires.

[fol. 26] We will see what the two companies looked like in 1957, about 20 years later. You will see now that Pan American criss-crosses the entire world with routes all around the world, while Panagra is still in the same general area.

* * * * * * *

[fol. 41] Q. Do you have any figures on the participation of Panagra with Pan American?

A. Yes. Between the United States and South America in the period 1950 through 1957 Pan American and Panagra participated in carrying three-quarters or more of the traffic using participation as I have defined it.

I have also broken that down to show the participation by Pan American and Panagra in what is called Eastern United States, which is a band of states, as you can see on this map here, along the coast of the United States which takes in approximately 16 states in a band of some two or 300 miles along the coastal area of the United States. [fol. 42] Over two-thirds of the traffic moving between the entire United States and South America originates in this Eastern area, or the traffic moving from South America to the United States is destined for that area.

It is therefore a very high generating area so far as traffic is concerned.

Q. Do you have the extent of the participation of Pan American and Panagra in that traffic?

A. Yes. Between the United States and Eastern United States Pan American and Panagra have carried about nine-tenths or more.

Q. Between South America and the Eastern—

A. Between the entire South America and Eastern United

States. Eastern United States is the area, of course, where Pan American and Panagra generate most of their traffic.

The remaining exhibits, 10 through 30 in this section you asked me about compare traffic between the United States or Eastern United States with three areas of South America which are illustrated on this map. These areas are also indicated in Exhibit GS 2 in the document that I have before me.

The red line separates countries in South America into Eastern and Western South America. The division between [fol. 43] Eastern and Western South America was made after an examination and consideration of the areas in which Panagra is operating or can serve in a general way.

I can illustrate this by showing you that the blue pins in here are all the points at which Panagra picked up passengers on original journeys in South America, and they are all to the west of this red line which I have used as a division. It includes the countries of Ecuador, Peru, Bolivia, Chile, and in some of the earlier years Panagra did participate in carrying a few passengers into Argentina, but they have not in recent years; at least they have not been loading people at points in Argentina except at Buenos Aires which is served by both Pan American and Panagra.

Panagra is certificated to operate in certain points in Argentina but is not doing so because of local conditions down there.

Q. Did you say they both served Buenos Aires?

A. Yes, sir.

Q. Can you give us the percentage of American passengers carried on certificated flag carriers between the United States and Buenos Aires which was carried by Pan Ameri- [fol. 44] can and Panagra or either one?

A. Yes, sir. Those are shown in Exhibits 24 through 30 of the period 1950 through 1957, and throughout this period over nine-tenths of the passengers were carried with Panagra or Pan American participation.

Throughout most of the period Panagra, primarily in participation with Pan American, participated in carrying more than one-half of the passengers, while Pan American with no Panagra participation carried about two-fifths of

the passenger traffic between the United States and Buenos Aires during that period of time.

Of course now Panagra operates by the Western route and Pan American by the Eastern route. Panagra must connect with another airline at Balboa in order to carry passengers into the United States, which is another reason why Panagra must participate with another airline, and 90 percent or more of that participation is with Pan American.

There is one other area that I have not yet mentioned that is in Western South America, and that's what I have called Western Colombia which for all practical purposes [fol. 45] is traffic to the United States or from the United States and Cali, Colombia. It embraces, as a matter of fact, three departments of Colombia which are specified in the exhibits. They are the departments of Valle del Cauca, Cauca and Narino, and any passengers who originate in the United States and fly to a destination in those three departments would be counted in Western South America. However, practically all the traffic is to Cali which is the northern part of this area and the only point at which Panagra serves in Colombia.

People can fly from some point in the United States to Cali and then take some other airline, like Avianca, to a point below Cali, which is the reason I embrace the entire area there rather than just stopping with Cali.

Similarly, Avianca can compete with Panagra by carrying passengers entirely to some point within Western South America, but they would not, of course, be included in the OD surveys unless they participate with some other U. S. Flag airline, but they would compete with Panagra in the foreign flag statistics.

The red pins are points at which Pan American had passenger originations in the year 1957, according to information that they submitted to the CAB, and you will see [fol. 46] that they are all well to the east of the dividing line that I have set up between the two areas.

This area setup is not a comparison of one airline against another. It is a comparison of the generation of traffic in one area moving to another area. It is not a comparison of the movement of traffic between the United States and Rio de Janeiro, for instance, on Braniff.

Panagra can't get into Rio de Janeiro. They cannot get into Bogota. Panagra cannot get into Asuncion. Therefore these areas cannot be served by Panagra and should not properly be included in an area that Panagra serves.

Panagra has repeatedly stressed before the CAB that it cannot serve Bogota on traffic between the United States and South America. They have an application before the CAB now, unless it has been recently acted upon—I am not positive whether it has or not—in which they say they cannot complete with Bogota traffic, and therefore it would have been very erroneous on my part to have included Bogota as an area served by Panagra or an area that could be served by them.

[fol. 47] Q. In Western Colombia, you mean?

A. In Western Colombia.

I have put Paraguay in the Eastern part of the United States because Pan American is certificated to carry passengers there, although it has not in recent years, although it has indicated to the CAB that it plans to have a non-stop flight operating very shortly between Caracas and Asuncion, so that is Pan American's territory. Panagra does not get into there.

Now, as I think we have already indicated, the third area that I set up was Buenos Aires because that is the area that is served by both Pan American and Panagra.

Q. Panagra coming down the West Coast and Pan American coming down the East Coast?

A. Yes, sir. So this is a division of South America into areas served by the individual companies, Pan American and Panagra, or competing against each other in the third area at Buenos Aires.

Q. Are you through with the map, Mr. Mitchell?

A. We might leave the map there if you want me to discuss the traffic that actually moved between these different areas.

[fol. 48] All right. Well, turn your attention, if you will, to Exhibits GS 32 through 66.

A. Yes, sir.

Q. Which deal with passenger traffic on United States Flag and foreign flag carriers, and tell us what they show, please.

A. These are statistics that combine the United States Flag figures from the OD survey of the CAB with the INS statistics for foreign flag carriers, and I think I have made it clear that there is no other organization that collects statistics on foreign flag traffic between the United States and South America comparable to that—exactly like that compiled by the CAB.

However, I think the INS statistics are the best available that can be used along with the CAB figures in order to arrive at an approximation of the total traffic that is carried by air between the United States and South America, and by comparing Pan American and Panagra's participation against this total we can see where they stand in the traffic picture.

Would you like me to explain what some of these results are?

[fol. 49] Q. Yes.

A. As shown by these exhibits 32 through 66?

Q. Yes.

A. Exhibits 32 through 37 show the passengers carried between the United States and South America on U. S. and foreign flag lines in the years 1952 through 1957, and on the basis of this information it appears that Pan American and Panagra have participated in transporting somewhere around one-half of the passengers, the foreign flag airlines carried around one-third of the total, and the remainder of the traffic was divided among other U. S. Flag airlines that had no Pan American or Panagra participation.

Q. Can you tell us, Mr. Mitchell, in that connection approximately how many airlines participated in the traffic that was not carried by Panagra or Pan American?

A. Well, I am sure that is going to be very carefully brought out in the course of this trial as to exactly how many would participate.

In 1957 there were at least eight foreign flag airlines that [fol. 50] carried traffic all the way between the United States and South America. There were other participating lines in between, as I am sure will be brought out by others. You can add to that the many other airlines that are involved in this traffic on a participation basis. But so far

as through traffic is concerned, one-plane traffic, I would say there were probably eight foreign flag airlines and two other United States airlines that had through-flight traffic between the United States and South America in 1957.

That means then that half of the traffic that is not participated in by Pan American and Panagra is divided into eight or ten or more ways.

Q. Yes, sir.

A. So that when a pie is divided that much you are going to have rather small slices for the remaining companies after you have accounted for Pan American and Panagra.

And in addition I might point out that, at least two of the foreign flag airlines are affiliates of Pan American. Avianca, for instance, which is a very important foreign flag airline flying between the United States and South America, is controlled about 38 per cent, I believe—at least [fol. 51] it was as of the end of 1957—and Avensa is another airline which carries passengers between the United States and South America which is controlled at least 30 per cent by Pan American as of the end of 1957.

There are other airlines operating in the South American area that are also controlled to some extent—foreign flag airlines that are controlled to some extent by Pan American.

Mr. Peck: Wold you mind having him say what he means by "controlled"?

The Witness: I am simply referring to the share of the stock held by Pan American which I indicated is approximately 30 per cent as of the end of 1957 for—

Q. Avensa?

A. —Avensa, and about 38 per cent for Avianca.

Q. You have discussed GS 32 through 37. Will you get to GS 39 through GS 66?

A. Yes. The next group of exhibits 39 through 44, shows the passenger traffic carried between the United States and four Western South American countries on U. S. and foreign flag lines.

The INS statistics are not available for individual cities. They are only available on a country basis. Therefore, I [fol. 52] could not segregate out this section of Colombia where Panagra serves, and I eliminated it from my com-

parison in Exhibits 39 through 45, and only dealt with Ecuador, Peru, Bolivia and Argentina, and traffic between the United States and those four Western South American countries was participated in to the extent of about one-half of Panagra in the years 1952 through 19—excuse me.

Q. You meant Chile instead of Argentina, didn't you, Mr. Mitchell?

A. I am sorry. The four countries are Ecuador, Peru, Bolivia and Chile.

Q. Yes.

A. Argentina I treated separately because it is nearly all Buenos Aires traffic.

Coming back, I want to correct that one-half of the traffic being participated in by Panagra to the year 1957 only, and in the years 1952 through 1956 Panagra carried somewhere around three-fourths of the passengers on a participation basis.

Between the United States and seven Eastern South American countries, which run from Venezuela through the three Guianas, Brazil, Uruguay and Paraguay, Pan Ameri-
[fol. 53] can, without any participation from Panagra, of course, carried about two-fifths of the traffic in the period 1952 through 1957.

And now I treat Argentina separately, since practically all the traffic between the United States and Argentina is concerned with Buenos Aires, and for all practical purposes you can consider these figures to be traffic figures between that city and the United States. Pan American and Panagra shared in approximately three-quarters of the traffic moving between Argentina and the United States carried by all United States and foreign flag airlines.

Colombia I had to treat as a whole, and therefore we will have a mixture of traffic carried by Pan American and Panagra as well as the foreign flag airlines, and we find that Pan American and Panagra participated in carrying around one-third of the traffic in the 1952 through 1957 period.

Foreign flag carriers accounted for about three-fifths of the total. Most of this foreign flag traffic was accounted for by Avianca in the year 1957 which, as we have already pointed out, is owned 38 per cent by Pan American. So

[fol. 54] that Pan American, Panagra and Avianca would possibly account for somewhere around nine-tenths or more of traffic moving between Colombia and the United States.

Q. Does that finish you with that map, Mr. Mitchell?

A. Yes.

The Court: Would you like a recess now?

Mr. Kenney: Yes, sir, if you don't mind.

(Short recess.)

By Mr. Kenney:

Q. Will you please now describe what is shown by Exhibits GS 66 through 72 on the next section? That is the section concerned with passenger traffic carried by carriers in sea liner service?

A. Yes, sir. First of all, I think I might use this map to explain what sea routes are covered by these exhibits.

This is a Maritime Administration map showing sea routes operated throughout the world which are called trade routes. I have colored in blue here, which may be a little difficult to see, trade route No. 2, which extends along the East Coast of South America. Grace Line is a liner operato ron that trade route.

Trade route No. 25 extends along the Pacific Coast of the [fol. 55] United States and along the West Coast of South America.

Trade route 31 operates between the Gulf of the United States and the West Coast of South America.

Q. You mentioned trade route No. 25. Does Grace operator on that trade route.

A. Grace operates on 25 and 2 on its traffic to the West Coast of South America, while its affiliate, Gulf & South American Steamship Company, operates on trade route 31 which also serves the West Coast of South America.

These statistics show the share of the passenger traffic in liner service carried by Grace and its affiliate on these trade routes. In the years 1954 through 1957 Grace and its affiliate carried 90 per cent or more of the passenger traffic by sea on these three trade routes combined.

Q. Does that apply to both United States and foreign vessels, do you know?

A. That includes United States and foreign flag lines combined. Ninety per cent or more was carried by Grace or its affiliate. The great bulk of these passengers come [fol. 56] from the Eastern Seaboard on trade route No. 2.

Q. Could you tell us what percentage comes by that trade route, if you know?

A. Grace is the only United States Flag airline—is the only United States sea carrier in liner service that carries passengers on trade route 2 here.

Q. As compared with the other two trade routes, could you tell us what percentage is carried over trade routes?

A. I think it is about four-fifths of the total passenger traffic that is generated on that one trade route out of the three.

Grace carries all of the United States Flag traffic in liner service on trade route 2 here from the East Coast of the United States to the West Coast of South America, except in 1952 when the percentage was 81 per cent. It has been well above 90 per cent in recent years.

Grace operates a combination ship service on this route, while on the other routes only freighters operate which carry limited passenger traffic.

Q. Do Grace and Panagra appear to have been in competition with each other in carrying passengers between the [fol. 57] Eastern part of the United States and the Western part of South America?

A. I think there is an indication that they have. We have put on this map the through-flight one-plane service route on which Panagra participates with Pan American and National Airlines which will carry passengers all the way from New York on the same plane to points along the West Coast of South America and on over to Buenos Aires.

The black dashed line here is the segment of that route which is operated by National Airlines, the red line is that portion operated by Pan American and the green dashed line is that section operated by Panagra.

It is the same plane all the way, of course. It is simply that different airlines are responsible at different points along the route, and you can see that a passenger at New York who wants to leave New York to fly to points along the West Coast of South America has a definite choice be-

tween whether to take the steamship line of Grace or fly on this one plane all the way to a point in South America.

[fol. 58] Q. Is that where most of the Grace passengers come from?

A. In 1957 all of Grace's passengers on trade route No. 2, got on or got off at New York. There has been an occasional passenger in the past who has gotten on at other points along the East Coast, but Grace discourages that; and, if you were to walk into a Grace office and try to get passage at any point other than at New York, they would tell you that they will not do it, as they told me once.

Therefore people must get on Grace at New York according to my information from the Grace Line, and they will get off at points along the West Coast of South America.

If I may have this other map, I would like to illustrate how this competition between Grace and Panagra can exist. This is the map that we had up before when I described the different areas in which the airlines operate. I did not explain what these yellow pins were. That is Grace's trade route No. 2. It is the most important trade route along the West Coast of South America.

The yellow pin up here is the point at which passengers can get on the Grace Line vessel, and the yellow points [fol. 59] along here are at places and points where they disembarked in 1957 according to Maritime Administration records.

Grace serves other points on a freight basis, but in this year those were the only points at which passengers got off or got on and traveled back up to New York.

Q. Does Panagra also serve some of these points?

A. I think that is very clearly evident here by the location of the blue pins which are places where Panagra picks up or starts passengers. You will see that these two points here are very close together. One is Valparaiso and Santiago and San Antonio. Santiago is served by Panagra, and Santiago and San Antonio are served by Grace.

Q. You mean Valparaiso?

A. I am sorry. Valparaiso and—

Q. San Antonio.

A. —and San Antonio are served by Grace and Santiago by Panagra. Antofagusta, which is served by both, and

Lima, Peru which is served by Panagra is only eight miles from Callao, which is a principal port served by Grace in [fol. 60] Peru. I am only mentioning the more important points where the great bulk of the passengers get off. There are other points like Arica, Mollendo. Arica is served by both Pan American and Grace.

Q. Panagra and Grace?

A. By both Panagra and Grace, yes, and Mollendo in Southern Peru is served by Grace, and there is Arequipa which is served by Panagra.

Then moving north we have Guayaquil which is served by both Grace and Panagra, and we have up here in Colombia, Buenaventura which is the seaport which serves Cali, Buenaventura being served by Grace and Cali by Panagra.

All of the passengers in 1957 got on at New York on Grace's trade route No. 2, the points in Western South America. Or, if they got on at Western South America, they all got off at New York.

It is in New York and the vicinity of New York, therefore, that you would find the greatest competition between Grace and Panagra for moving passengers between the United States and points along the West Coast of South America.

I did not limit Panagra's passenger originations, that [fol. 61] is, passengers who travel with Panagra participation, to just points at New York, at or near New York, but I have looked at an area which I call Northeastern United States which runs all the way out to Ohio and takes in Maryland, the District of Columbia and all states to the north, all the New England states, as points of origin in which passengers could give serious consideration as to whether they would fly to South America with Panagra participation or take a Grace Line ship to some point along the West Coast of South America.

Over 55 per cent in September, 1957 of Panagra's traffic to South America originated in this area. That means the people got on their plane in that area. It could be that people might have moved from Chicago into that area by train or some other method and took a plane from New York to South America. However, it is the majority of traffic on Panagra and it is the traffic area in which the

people could give most consideration to which mode of traffic they wanted to take.

I have another map to illustrate the South American areas where Panagra and Grace compete to the greatest extent.

[fol. 62] I have spotted with yellow pins five cities at which Grace discharges or picks up passengers along the route in South America. These are Valparaiso, Antofagusta, Callao, Guayaquil and Buenaventura. Those five points account for about nine-tenths of all of the passenger traffic on Grace Line's route No. 2 from New York to South America or from South America to New York. When I refer to South America, of course, I am talking about the West Coast of South America.

So these are the five most important points and account for all but 10 per cent or less of the passenger traffic on that trade route No. 2 carried by Grace.

Near these cities are cities served by Panagra which are indicated in blue. Here is Santiago, Antofagusta is served by both, Lima which is very near Callao, and Guayaquil which is served by both, and Buenaventura which is not far from Cali.

I have compared the traffic that has moved from Northeastern United States to those specific points by each of the two carriers in Exhibits 79 through 81, and you will see that from an examination of the figures alone, for in-

[fol.63] stance, in Exhibit 79, that Panagra carried 224 passengers between Northeastern United States and Santiago.

Q. That is per month?

A. Per month, in 1957, while Grace carried 121 passengers between Northeastern United States and Valparaiso which is not far away.

There is very good train service between Valparaiso and Santiago, and a passenger has his choice as to which service he wants to take in traveling between those points.

If we look up in Peru there, Panagra carried 484 passengers per month in 1957 to Lima, and Grace carried 108.

In Guayaquil Panagra carried 130, Grace 16.

At Buenaventura we have Grace with 20 and Panagra went to Cali with 108.

Those figures do not indicate that Grace's traffic is insignificant in relation to that of Panagra in serving these points, and I have only taken five points. I have not attempted to compare other points where people may get off and travel to the same final destination after they leave the Grace ship.

If I didn't mention that, I want to point out, too, that these five points account for these—these five Panagra [fol. 63a] points that are shown here account for about 90 per cent of Panagra's traffic between Northeastern United States and these four West Coast countries of South America.

[fol. 64] Q. I didn't think of doing that. I am glad you pointed that out.

A. In other words, for both Grace and for Panagra, those spots account for 90 per cent of the traffic.

Q. Mr. Kenney, let us turn to cargo and mail traffic that are presented in the document. What do your exhibits show with respect to the growth of overseas air cargo in recent years?

A. In Exhibits 82 and 83, they show that there has been a very substantial growth in recent years in cargo traffic overseas.

In Exhibit 82 you can see that overseas cargo carried by air into and out of New York more than double from 1953 through 1957. In the segment of this traffic that was destined for Latin America, or came from Latin America, it increased by two and a half fold during that period of time.

In Exhibit 83, which is concerned with traffic in and out of Miami, traffic doubled in the period 1952 through 1957, that is, cargo carried by air into and out of Miami.

In the year 1956 to 1957 there was an increase of more than 25 per cent at Miami between these—from that point. [fol. 65] Now, in Exhibits 84 and 85 the share of the Latin American traffic that is carried by Pan American and Panagra is indicated. We couldn't get, for individual airlines, the volume of freight carried from one point to another on a very extensive basis, so that in Exhibit 84 the comparison is confined to all operations of Pan American's Latin American division and each of the other airlines that

operate in that area which have been certificated by the CAB. In other words, this tabulation is confined to U.S. flag airlines.

Q. Do you have any exhibit which would show the relation of the growth of cargo traffic by air to that of cargo traffic carried by sea service?

A. Well, I have an Exhibit 100 here—

Q. Specifically referring to South America, what does your Exhibit GS 86 show?

A. That exhibit deals with all traffic carried in liner service between the United States and points in Latin America, and it showed that from 1952 to 1957 there was an increase of around 20 per cent in the cargo carried by sea as opposed to those increases that I referred to, over 100 per cent, for the air traffic moving into and out of [fol. 66] New York and Miami.

Q. Mr. Mitchell, could you tell us how Pan American compares with the other United States flag airlines in the movement of cargo in South America?

A. Yes. Exhibit 84, Pan American carried about two-thirds of a ton miles of freight, express and mail carried by all U.S. flag certificated airlines that operate in the Latin American area. There are—11 other carriers, I believe it is, other than Pan American and Panagra that operate in that area.

Panagra carried about six per cent of ton miles of passenger—freight, express and mail, giving you nearly 70 per cent for Pan American and Panagra combined.

The nearest competitor of Pan American was Riddle, which was only about one-fifth the size of Pan American's Latin American division on the basis of the traffic figures that I have described.

Q. Mr. Mitchell, I believe you testified that the Panagra carried about 6 per cent of the freight and mail. That is not accurate, is it?

A. That is in the entire Latin America area, in relation to the total ton miles of freight, express and mail carried by all U.S. certificated flag airlines that serve Latin [fol. 67] America.

Q. Doesn't Panagra carry about 13 per cent of the mail?

A. Mail alone, 13.5, as shown in the exhibit.

Q. You were speaking of everything, all three?

A. I was speaking of everything. Freight, express alone is 5.6 per cent. The combination is 6.4.

Q. Could you tell us how much of the cargo carried by sea in liner service between the United States and the west coast of South America is accounted for by Grace and its affiliate?

A. Only three routes I described, from all the major posts of the United States to the West Coast of South America, Grace and its affiliate accounted for about two-thirds of the imports and for about one-half of the exports during the years 1954 through 1957.

Q. Can we refer specifically to trade route 2?

A. Yes, on trade route number 2, which accounts for the bulk of that traffic, Grace carried about three-fifths of the liner service traffic in the 1951 through 1957 period, including in the total that I am comparing that with all foreign flag ships that operate in liner service. In the case of exports, Grace accounted for about half of the liner service exports in the 1951 through 1957 [fol. 68] period. The remaining half was divided amongst at least five other ships—ship operators, the largest of which was not a third the size of Grace.

Q. Isn't it true that on trade route 2, from the Atlantic coast of the United States to the west coast of South America, that Grace accounted for all the American flag liner traffic?

A. I believe that is correct. I would like to check that to make sure, if I may. I know they carried all the passengers.

Yes, in all those years, exports or imports, Grace was the only United States flag operator on trade route number 2 in liner service.

Q. Do you have any statistical information which would indicate at all that any significant competition is developing between Grace and Panagra in the transportation of cargo between the eastern part of the United States and the west coast of South America?

A. My last five exhibits are intended to present information that would assist us in that respect.

Exhibit 97, I have listed all the points at which Panagra has loaded traffic in the South American area, and I have

indicated by an asterisk the same areas or cities or nearby cities that are served by Grace. There is a similar table [fol. 69] for Grace, in Exhibit 99, which shows the points at which Grace picked up or discharged cargo from the east coast of the United States or to the east coast of the United States and the corresponding points that are served by Panagra.

Now, Exhibit 98 does contain some data on cargo carried by Panagra between certain points between the United States and certain points on its route in South America. Miami is the only point, however, for which such information was available.

In Exhibit 100 I have compared that traffic carried between these particular points in South America with the Miami traffic, carried by Panagra, and amount carried by Grace between the same points and any point along the east coast of the United States. Grace is substantially larger than Panagra but it does indicate that there is developing some cargo competition between Grace and Panagra.

Q. Panagra just started its cargo service in 1957?

A. That is right.

Q. In July.

A. These figures are for 1957, and Grace only started its all cargo operation in the middle of that year.

Q. Panagra only started?

[fol. 70] A. Panagra.

Mr. Kenney: That is all.

* * * * * * *

[fol. 72] L. Peter Cornwall, called as a witness on behalf of the Government, having been first duly sworn, testified as follows:

Direct examination.

By Mr. McConnell:

Q. Mr. Cornwall, by whom are you employed?

A. I am with Pan American World Airways.

Q. In what position?

A. I am the cargo sales manager for the United States.

• • • • • • •

[fol. 75] Preliminary cross examination.

By Mr. McKay:

• • • • • • •

[fol. 78] Q. Are you familiar with and have you had any experience in the air cargo movement to the west coast of South America as distinguished from the movement from the United States to the east coast of South America?

A. I have had general experience, yes.

Q. What has that general experience been?

A. In line with my normal duties as cargo sales manager.

Q. But you have no particular knowledge about that—

A. No.

Q. —movement?

A. No, sir.

Direct examination (continued).

By Mr. McConnell:

Q. Could you briefly describe the air cargo operations of Pan American? In a sort of brief way.

A. Well, it has grown tremendously over the past three years, which is a matter of record borne out, I think, by some figures that we have here. So far as air cargo is concerned, we have come a long way. We have gotten away from the purely emergency type of shipment. We are [fol. 79] moving into bulk commodities. We are pretty well into that. We operate any number of fairly—good number of all cargo aircraft for the handling of bulk commodities, I would say.

Q. Could you describe some of the commodities of that character?

A. Well, we carry a good deal of livestock, we carry a good deal of consumer items, such as refrigerators and electric fans, and that sort of thing. We carry some new furniture; a good many household effects, used furniture,

people moving back and forth. We carry automobile parts, aircraft parts, machine parts of various sorts which are other than, perhaps, pure emergencies. The list is very long. We have at least a hundred items.

Q. Would you say that you have expanded that type of carriage a great deal in the past few years? Do you have any figures on that, just to the extent to which you have?

A. Pan American's cargo revenue in 1946 was only nine million dollars, nine and a half million dollars, approximately. By 1950 it had gone up to fourteen million. In 1950 to twenty million plus. And in 1958, the figure I have here is $33,400,000, rounded, which indicates the rate of growth. [fol. 80] I have no doubt that it should exceed that amount this year.

Q. In terms of tons, do you have any figures?

A. I don't have ton miles figures. We did pass 100,000 ton miles this past year, however. We topped that.

Q. What percentage of this traffic that you are referring to, is in what we would call the North American-South American trade?

A. In so far as my cargo sales in the United States are concerned, historically, that is to say, in recent years, a little more than half of air cargo revenue we have created here in the United States has been in connection with South American cargo, Latin American cargo.

Q. Do you have a pretty good back haul of that cargo?

A. In the past it has not been, but the back haul situation is improved now.

Q. From your point of observation would you say that there is an active area of competition there in international trade between air carriers and ships?

Mr. McKay: I object on the ground that the question obviously calls for a conclusion by this witness.

[fol. 81] The Court: I will permit him to answer. You have an exception.

A. I would say—

Q. Do you have an opinion?

A. Well, yes. I believe there is an active area of competition between surface and air at the present time.

Mr. McKay: May I please have the answer read? I wasn't able to hear it.

(Record read.)

Q. Would you explain, generally, the nature of this competition, pointing to the various factors which enter into the choice of either the one form or the other?

A. As I had said earlier, we are well beyond the purely emergency type of traffic that had been the mainstay many years ago. We are now into regular movements of traffic, in some cases very substantial movements, which are sold and generated primarily on the economic basis, that is, on the direct comparison of all the costs related to distribution by one means as compared with all the costs of distribution by another.

Q. Will you spell that out?

[fol. 81a] The Court: Before he does, it is almost one o'clock, we should adjourn now. Is an hour enough?

Mr. Kenney: Rather an hour and 15 minutes or an hour and a half would be preferable to us.

The Court: Is that agreeable to everybody?

2:15.

(Recess to 2:15 P.M.)

[fol. 82] AFTERNOON SESSION

(2:15 p.m.)

L. PETER CORNWALL, resumed.

Direct examination (continued).

By Mr. McConnell:

Q. Mr. Cornwall, before the recess you testified to the fact that from your point of observation there was active competition between steamships and the airplanes as far as cargo was concerned, and then you started in with the explanation of some of the factors that go into the choice

of one mode over the other. Could you go forward with that, please, sir?

A. Yes, sir. I have here some papers of my own which are taken at random from the work of our various cargo sales representatives in the field which show the type of expense that they go into in making comparisons of surface and air. Sometimes these rather exhaustive comparisons are favorable to air and sometimes they are not.

You have export packing by surface. That is essentially a surface cost more times than not. You have various port charges by surface which don't apply, at least in the same [fol. 83] degree, to air. You are apt to find forwarders' fees are higher by surface and more numerous in some instances. Consular fees are sometimes higher by surface. Insurance is usually higher by surface, so we include that always.

There are very often carriage charges by land, overland, associated with steamship shipments, such as rail to the port or truck from the port to an inland city or something of that sort. These may or may not apply by air. Usually they would not because there is an airport nearer the point of origin of the goods.

Q. Do you have in mind a typical situation where that factor comes into play.

A. Well, you would perhaps find it—well, let's see. In Colombia, for example, Bogota is inland. The steamship doesn't get up to Bogota. It doesn't get quite up to Lima and various other cities in South America. That is, there is an area, perhaps rail or highway, between the port area and the true destination of the goods.

Q. What about, say, for example, in the European trade where you have all these interior points? Does the fact of the surface haul after the ship—

A. That is always a consideration. Let's say the haul [fol. 84] in from Hamburg or Antwerp into Munich or Vienna, into Switzerland, something like that; that is always a consideration, and it may, in combination with other things, make air desirable. It is particularly pronounced, however, in the backward countries, the so-called backward countries, the Middle East and certain South American countries.

European ground transportation is excellent by and large.

In a very few circumstances duty at destination will be different by air and by surface depending on the rules of the particular country relating to assessment on a gross basis or something of that sort.

Then there are some pretty abstract but, nevertheless, important factors that are recognized by our clients, such as the interest charges on the goods while in transit or the interest charges in the high level of inventory required at destination in anticipation of surface shipping. Those interest charges can be a real factor.

Q. Will that apply to automobile dealers and men of that sort?

A. Well, it could apply to automobiles certainly, but [fol. 85] automobile parts, I'd say generally parts is the more important thing, particularly where you have many models from many past years and that sort of thing to keep in stock.

Q. Just go ahead.

A. I will give you a couple of examples of these. We have one that intrigues us at the moment considerably. We have a man at Boston who has been giving us, oh, anything from a few hundred up to a few thousand pounds a week of automobile parts for Germany. This has been going on now, I'd say, for something over a year. Actually he ships—he states, and we believe him—something in the neighborhood of ten to 15,000 pounds of parts a week.

We have only gotten the more important, the more necessary, the more urgent parts, because our rate, in combination with the other costs, was not competitive with surface, particularly on an excellent trade route such as from Boston to Europe.

On May 1st, however, our rate applicable to this particular traffic dropped down from 55 cents a pound to 37 cents a pound. This is quite a dramatic reduction. The [fol. 86] net result is that the cost analysis worked by our people in Boston shows that for a given shipment, which happened to have an invoice value of $1,780, considered typical, air in the past would have cost $570 as against surface of $415.

Now with these new charges you come out to $384 as being the new air charge; in other words, a saving of

roughly $30, $35 over the steamship. It is too soon to tell, but we rather hoped that this man would see fit to put his entire merchandise up in the air.

That is a lucky one. We have a great many that are unlucky. Here is one where we didn't work out at all well. This is well known to all our competitors, and I am afraid it is water over the dam now.

It concerns jet engines from England to California and, to some extent, up to the Boeing plant at Washington. We worked a very careful cost comparison which was concurred in by the consignees who were paying the charges on this shipment. That is to say, they agreed with our reasoning; they agreed with the numbers that we had put down as [fol. 87] representative of the shipment of jet engines.

So for a given quantity—it happened to be 5,500 pounds—we figured a cost of $3,318 on the basis of using deferred air freight within the United States plus our own commodity rates trans-Atlantic. This is as low as we could get.

We felt, because of certain collateral benefits upon which you could not put a price, that the business would move air despite the fact that the steamship costs showed out as $3,178.

However, effective in March, I believe—I do not have the date of the tariff reference, but I know that we have lost the business because of the effect in March of a new and reduced steamship rate which was of sufficient incentive to put this business firmly on the surface.

Q. Did you formerly have the business?

A. I beg your pardon?

Q. Did you formerly have the business before they lowered the rate?

A. No, the entire business was in prospect of movement of these Rolls Royce jet engines to be installed in DC-8's and Boeing aircraft. So the business never moved, but we had all known it was going to move.

[fol. 88] Q. Do you have any other comparative illustration?

A. Here is a fairly typical shipment of refrigerators and freezers, in two bids, from Connorsville, Indiana, to Barbados, British West Indies. Here the surface charges show out at $892 and the air charges show out at $881, a very

close margin, but still very possibly one that would be persuasive in moving this cargo by air.

Q. You haven't moved that?

A. This particular traffic is—has moved but in the particular quantity shown here. This is rather high quantities.

Q. Did you move it?

A. Yes, we have moved traffic from this company to Barbados, different quantities.

Q. Do you have any other illustrations?

A. Somewhere over a year ago, my recollection is it would have been during the summer of 1957, we completed some cost analysis, cost comparison work, which showed that certain electric devices for the home could be moved into Venezuela at a slightly lower unit cost by air than was possible by surface at that time. This business started to move from two very large firms here in the United States to Venezuela in very satisfactory quantity from [fol. 89] our point of view until in February, 1958, a new steamship rate was put in, and I have it here. This rate dropped the steamship cost from $39 to $20 a ton for refrigerators and from $35 down to $20 for washing machines, to major commodities. This naturally took us out of the business.

Q. Is that a commodity rate which is put into this one plan?

A. It was a surface commodity rate.

I can recall we have lost business to surface carriers for other reasons. Some years ago there was a very substantial and continuing movement of nylon stockings to Europe before the mills had either the materials or the techniques, apparently, to make them, and we lost this business because the steamships were able to come up with better security on their ships. The big problem had been pilferage. So, there are other than rate reasons occasionally for losing business.

Household effects is very often favorable to air; one of our big commodities.

Q. Have you had any direct competition with respect to the price in the movement of household goods?

A. Well, since new traffic is a large part of our concern.

since most new traffic comes to us on the basis of freight, it is [fol. 90] correct to say that certainly price has had an effect on moving household goods by air. Again, it is not purely the rate. It includes many other factors, such as the packing, which is a big thing. You don't need the things packed for air as you need by surface.

Q. Can you think of any other specific, drawing on your experience, instance in which the steamships have undercut something?

A. I am sure I could come up with any but I don't have any specifically where a steamship company has specifically undercut us, that I have right here.

Q. You say that the cost element in air is a very important factor in this charge of the two modes. If the air cargo operators could reduce their costs considerably, do you think that would, maybe, increase the business?

A. Yes, it certainly would. The example of from Boston to Germany was a good case in point, where the rate dropped from 55 to 37 cents, and we have every anticipation of having all the business from that particular source.

Q. Most of the airplanes used in air cargo are converted passenger planes at the present time, isn't that correct? [fol. 91] A. There are—

Q. Modified.

A. (Continuing) —the DC8 and Lockheed 1049H are essentially cargo airplanes, although they have much of the appearance of passenger airplanes, but they were built as cargo airplanes.

Q. About what does it cost per ton mile to move a typical air cargo now?

A. Well, my concern is less with the cost of moving it and more with the price that I must sell it for. My prices are, in some cases as low as 15 to 18 cents a ton mile, more typically, however, in the neighborhood of 20 and 30, even 40 cents a ton mile, in certain instances. I suppose an average return would certainly be more than 25 cents a ton mile.

Q. Looking at the map here, from your observation of this industry, would you say that, with these routes and contiguous ports of call, in your opinion would there be an

active area of competition between Panagra and Grace Steamship Company?

A. Yes, sir, I would say so.

Mr. McConnell: That is all I have.

[fol. 92] Cross examination.

By Mr. McKay:

Q. Mr. Cornwall, does Pan American make a profit on its all-cargo operations between the United States and the east coast of South America?

A. I don't know.

Q. You don't know whether you make a profit or not?

A. No, sir.

Q. When did Pan American start its all cargo operations to the east coast of South America?

A. I don't recollect for certain. It would have, perhaps, been about 1950, but I don't recollect.

Q. You have been with Pan American all during this period?

A. That is correct.

Q. But you cannot recall. Your best estimate is 1950. From 1950 to this date, 1959 you cannot tell us whether Pan American has made a profit on its all cargo operations from the United States to the east coast of South America, is that correct?

A. I cannot tell you. I don't know.

Q. Mr. Cornwall, Pan American represents Panagra in the United States both with respect to passenger and air cargo, is that correct?

[fol. 93] A. That is correct.

. . . . . .

Q. Mr. Cornwall, do you have any criticism of the air cargo operations of Panagra?

A. As regards?

Q. Their efforts to move air cargo between the United States and South America.

A. They have been—

Q. Could you answer that yes or no in the first instance?

A. Exactly what do you mean by criticism?

Q. Do you think that Panagra has made the best efforts it could in the generation of carriage of air cargo, having in mind that you and your company represent Panagra in the United States? And I would like you to answer that question, if you can, yes or no.

A. I would have to answer that question, no.

Q. Mr. Cornwall, what other air cargo carriers are there between the United States and South America, specifying, [fol. 94] if you will, the east coast and the west coast separately.

A. I am afraid I cannot list the carriers for you.

Q. There are any number of them, though, aren't there?

A. There are a great number of carriers.

Q. Both U.S. flag and foreign flag?

A. Yes, sir, a great number.

* * * * * * *

[fol. 95] Q. Are you familiar, Mr. Cornwall, with the rates charged by surface carriers, namely, the sea carriers as distinguished from air carriers?

A. No, sir.

Q. Are you familiar with the rates that Panagra charges as distinguished from the rates that Grace Line charges?

A. I am—no, no, I am not.

Q. Then, Mr. Cornwall, how can you say there is an active area of competition when you don't even know the rates that one carrier charges as against the other? Hasn't rate a lot to do with whether or not you ship by air or by sea?

A. The rates certainly do—they have a great deal to do with it.

Q. Mr. Cornwall, are you familiar with the total cargo movement between the United States and the east coast of South America, and by total I mean to include both sea and air.

[fol. 96] A. Well, I am aware of the total cargo movement as the rates or any other thing in general terms, that is, I have.

Q. Do you know the ton—pardon me?

A. I have access to statistics, comparative figures, but I don't carry that information in my head.

Q. Have you ever had occasion to refer to the figures that are available to you as to what constitutes the total cargo movement, sea and air, between the United States and the east coast of South America?

A. I have from time to time read reports with particular attention to commodities that we thought at the time might be susceptible to air carriage.

Q. But you have no knowledge at the present time of the total movement?

A. No, sir.

Q. Air and sea?

A. No.

Q. That would also hold true between the Atlantic coast U.S. and the west coast of South America?

A. That is correct, sir.

Q. Have you any idea, Mr. Cornwall, what percentage of that total movement Pan American carries down between the United States and the east coast of South America, [fol. 97] what percentage of the total movement?

A. Of air—of—

Q. Sea and air.

A. Of cargo?

Q. All cargo.

A. I would like to guess that it is less than—

Q. I wouldn't want you to guess.

A. All right, I cannot answer that question.

The Court: You may use the word "estimate."

Q. Have you an estimate?

A. I would estimate that it is less than one per cent, Judge.

Q. Less than one per cent?

A. Yes.

* * * * * * *

[fol. 102] Q. Isn't it a fact, Mr. Cornwall, that in the past and, generally speaking, up to today the commodities carried—let us restrict it to between the United States and South America—either consist of emergency items, commodities which inherently could not be carried, such as orchids, by steamship, or commodities such as jewels and precious metals which have an inherent value to them but a very low weight? Is that correct?

A. Those are very important categories.

Q. Isn't it the fact that that is the majority of the categories that the airlines carry?

A. I would want to—

Q. By dollar revenue, if I may put it that way.

A. I could not answer that question by either dollar revenue or pound.

• • • • • • •

[fol. 105] Recross examination.

By Mr. Peck:

Q. You were asked by Mr. McKay something about Panagra, whether according to your observation it was doing the best it could, considering that you were their agent and I understood you to say no. Now I am not interested in pursuing the question as to what you think Panagra is doing or is not doing, but what I would like to make clear is as to whether or not your organization in selling this air freight is doing the best job you know how to do.

A. I think we are, sir.

Mr. Peck: That is all.

• • • • • •

Victor B. Carmichael, Jr., called as a witness on behalf of the Government, being first duly sworn, testified as follows:

Direct examination.

By Mr. McConnell:

Q. Mr. Carmichael, where is your home, please, sir?

A. My home is near St. Petersburg, Florida.

[fol. 106] Q. What is your business or profession?

A. My profession, business is air cargo transportation, and I am the president and general manager of Aerovias Sud Americana, Inc., certificated U. S. all-cargo carrier.

Q. Roughly what areas do you operate in?

A. Our route pattern is air freight route 113 stemming from Tampa and St. Petersburg as co-terminals; Havana, Cuba; Merida, Mexico; Belize, British Honduras; Guatemala, Salvador, Panama, Bogota and Quito and Guayaquil, Ecuador. That is our certificated route pattern.

However, we have suspended service to Havana, Cuba for the present, and our operation is direct from St. Petersburg to Guatemala, direct to Salvador, direct to Panama, and from Panama direct to Bogota and then to Ecuador.

. . . . . .

[fol. 108] Q. Briefly could you describe some of the commodities that you ship in your trade and operation at St. Pete's?

A. The commodities that we transport by air are most commonly referred to as consumer goods, being the majority of our traffic, supplemented with livestock as a specialty, automobiles, machinery, and most recently household effects, personal effects, and agricultural implements and parts and automobiles.

Q. You would say that it is not confined just to small items; is that correct?

A. No, sir. Our business is a mixture of all kinds of freight.

Q. In your opinion, Mr. Carmichael, from your observations of your operations in Aerovias Sud, would you say there is an active area of competition there between steamships and air cargo carriers?

A. Well, our particular phase of operations I consider most definitely competitive.

Q. Could you give some illustrations of actual situations in which you competed pricewise with the ships for certain cargo?

[fol. 109] A. Well, if I might go back to the early days of ASA, one of the first commodities that we developed into Guatemala was automobiles where we successfully sold the distributor in Guatemala on carriage by air on the basis that the overall costs from factory to distributor were competitive with ocean. These costs are developed on the basis of the surface transport to St. Petersburg, air to the destination which is an interior point in this case, making it more easy to compete, easier to compete

with surface by virtue of a surface haul from the port in Guatemala to the interior.

We handled this commodity as the foundation of our service into Guatemala.

Q. Was there a considerable volume of that traffic?

A. There was a considerable volume, probably as many —frequently as many as two or 300 units a month.

The units were competitive on the basis of weight versus cubic volume. Certain of the vehicles became uncompetitive for air because of the heavier weight. They originally started out with lighter jeeps, and they became so heavy [fol. 110] that then the ocean was able to bring them back.

From there we developed a steady business of automobiles into other markets.

Q. If you will excuse me, did the steamship companies come down in their rates at that time to recapture that traffic?

A. No, at that time the automobiles got heavier so that we were not competitive on a weight basis versus a volume basis for ocean. But most recently, well, within the last year, our volume of automobiles has dropped about 60 per cent because the combination surface, which is steamship and inland transport in Guatemala—the inland transport cut their rates about 50 per cent which gave the advantage back to surface in this case.

But I have with me approximately 50 comparisons of ocean and air which I drew out of the files.

Q. Fifty instances where you have actually competed?

Q. These are on consumer goods. They are not specifically automobiles but all types of commodities.

Q. Can you just at random pick out a few that would be [fol. 111] illustrative?

A. We have developed this concept of ocean-air comparison in about 1954-55. Our sales department will take a specific shipment and compare the surface with air on existing rates at that time.

Here is a case of household goods plus an automobile to Panama in which the total shipment, figuring by ocean, including the dock and wharfage charges, the ocean freight and the export packing ran $2,191. The shipment weighed 11,640 pounds.

By air—I am sorry. This is a shipment from Panama to the United States, but it is still a good example.

By air that same shipment moved at $1,514.

Here is a comparison to Guatemala which is a commodity of cabinets and sinks. The shipment originated in Maumee, Ohio, and it weighs 11,983 pounds. The inland freight charges from Maumee, Ohio to the nearest seaport for ocean was $275. The ocean-air freight or ocean freight was $1,583, charges at port 50, inland freight charges at destination from port to Guatemala City $159, and miscellaneous charges $16 for a total of $2,344 for that shipment. By air the shipment was $2,137.

[fol. 112] Q. You got the shipment?

A. We handled that shipment. That is an example of how we developed—

Q. Can you think of another illustration where it is a rather heavy commodity like automobiles?

A. Here is a shipment of typewriters as an example, also to Guatemala, and the shipment weighed 2,750 pounds. Delivered by ocean it was $1,065 and 40 days transit time. Delivered by air it was $1,067 in 10 days.

I could go on and on. There is a current shipment of stoves and refrigerators to Panama on which we have developed the ocean-air comparison. It turns out to be a local contractor, and it is so competitive, that is ocean to air, that in the final analysis for a shipment of 91,000 pounds delivered to Panama ocean it was $35 less to deliver by air than by ocean. And then the steamship line, apparently able to amend their rates or tariffs, have offered a 15 per cent reduction over their existing rates, so it is still in the mill. But that is a current example of how close the competition is.

This is refrigerators and stoves, a rather sizable shipment.

[fol. 113] Q. And the steamships have lowered their rates to capture that business.

A. They have indicated they have.

Mr. McKay: I didn't hear that answer.

The Court: "They have indicated they have."

A. The shipper has indicated that he has had an offer for a discount from the steamship.

Q. Was Grace and Company involved?

A. I do not know if they are involved in this particular instance—

Mr. McKay: Do you mean Grace Lines?

Mr. McConnell: Grace Lines; excuse me.

A. There is a quotation now from the Port of New York which is the conference that I think Grace is in.

Q. It is a conference.

A. I don't know that that quotation has—this discount was offered at Tampa port by a non-conference carrier, to the best of my knowledge.

Q. With your technical knowledge of the airplane itself, as a trained pilot, do you anticipate that in the near future there will be some developments in cargo planes that will greatly reduce the direct and indirect cost of operating the plane?

[fol. 114] A. Yes, I think it is inevitable. I think the industry—the air transport industry, in particular the air freight carriers, know that in order to develop the additional volume which we know is available from surface transport we must have a better developed, better designed aircraft, and I don't think it is more than, at the most, two years away. Certain types will be phased in by then. For our own operation and for different carriers' operations it takes a different type, different range aircraft. We have looked at all existing models and haven't found one yet suitable to our purposes.

Q. In most of the models that have gone into operation, as I take it military requirements are predominant; is that correct?

A. That's correct.

Q. About how much do you think that these new planes will decrease the cost of air operations, in your opinion?

A. Well, I can state from what I know of our business that a rate decrease in cents per pound of, say, 20 per cent, or just state a rate decrease of 20 per cent overall, should double our existing volume.

[fol. 115] These true air freight aircraft offer two advantages. One is the additional speed, and the other is the rear loading feature which is an absolute necessity for

the time factor. Intermediate aircraft, I believe, will be the surplus propeller airplanes.

Q. These new cargo planes that are on the drawing boards, speaking from your standpoint as an air transport pilot in the Burma-India Theatre, would have tremendous use for us in military operations, would they not?

Mr. McKay: Your Honor, I did not hear the entire question. May I have it repeated?

(Question read.)

Mr. McKay: I object, your Honor, as totally irrelevant to the issues in this case, and the witness has not indicated any familiarity with the planes that are on what Mr. McConnell chooses to call the drafting boards.

Mr. McConnell: Well, you can be certain, my only idea, if your Honor please, and we do not want to get far afield, but we might as well face the fact that since the Russians have surrounded us with submarines and from a logistical point of view—

[fol. 116] The Court: Let's try this lawsuit.

Mr. McConnell: That is all I have.

Cross examination.

By Mr. McKay:

Q. Mr. Carmichael, you are president and general manager of Sud Americana?

A. Yes.

Q. How long have you been president and general manager?

A. Since 1949.

Q. Is that when Sud Americana went into business?

A. No. It was organized in 1947.

Q. 1947. Your first contact with it was in '49, or had you been associated with it prior thereto?

A. I was one of the founders.

Q. Isn't it a fact, Mr. Carmichael, that the operation of your company is still in an experimental and development stage? I would like you to answer it yes or no, if you can.

A. No. No would be my answer.

Q. It is not in an experimental stage?

A. It is not in an experimental stage.

Q. Mr. Carmichael, are you familiar with the recommended decision of the chief examiner, Francis Brown, in [fol. 117] the Civil Aeronautics Board that was handed down February 19, 1959?

A. I am.

Q. Have you read that?

A. Yes. If you are referring to the ASA case—

Q. That is right.

A. —that's right.

Q. You are familiar with his recommended decision?

A. That's right.

Q. Do you recall the following sentence which I quote from that decision:

> "The operation of this company"—referring to Sud Americana—"in the Latin-American area is still in an experimental and development stage"?

Do you recall that statement?

A. I recall it.

Q. Do you disagree with it?

A. I disagree with the "experimental." I agree with the "developmental." And your question, I believe, was as to whether it was an experimental only. And it is develop- [fol. 118] mental, very definitely, but I don't consider it an experiment.

Q. Mr. Carmichael, is the operation of Sud Americana a marginal one at the present time?

A. Yes, it is a marginal operation.

Q. Mr. McConnell asked you on two occasions, the latter occasion being whether or not Grace Line had indicated it would reduce its charges for surface transportation in connection with a certain instance that you gave. Do you recall that?

A. Yes.

Q. And you indicated there was an indication that the reduction was by a non-conference member; is that a fact?

A. The original—

Q. Is that a fact, Mr. Carmichael?

A. Yes. I indicated that the steamship line competing for this traffic locally is a non-conference carrier.

[fol. 119] Q. You know that Grace Line is a Conference member, do you not?

A. Yes, I do.

Q. So you didn't have Grace Line in mind, is that a fact?

A. I might add that—

Q. Yes or no? You haven't answered my last question.

A. I didn't have Grace in mind from Tampa port.

Q. When you say there was an indication of lower rates, do you have any knowledge of whether any steamship company lowered its rates in that instance that you refer to?

A. We are dealing—

Q. You said you had an indication from the shipper, I believe.

A. We had an indication from the contractor.

Q. But you had no personal knowledge as to whether any steamship company lowered its rate?

A. Only what the contractor informed us.

Q. No personal knowledge yourself?

A. No personal knowledge, other than as reported to me by my sales department.

Q. Mr. Carmichael, you have testified that when you [fol. 120] looked into the future you could foresee a 20 per cent decrease in the cost of air transportation; am I correct?

A. No, I didn't state it that way.

Q. Will you please restate it?

A. I say, looking into the future, year, with a 20 per cent decrease in the present operating cost of the aircraft, that, I believe, I am talking of an overall decrease now in the rate structure, that in our particular area, the traffic would double.

Q. What is the particular area, Caribbean?

A. I described it as central and northern South America, excluding Venezuela.

Q. Your testimony is if you can decrease your—by 20 per cent—your overall cost, you will double your volume. Can you tell us, Mr. Carmichael, that your costs will decrease by 20 per cent in the next year?

A. Any further reduction in costs will be almost entirely

dependent upon the type of equipment applied to the air lift.

Q. Mr. Carmichael, you selected the figure as 20 per cent and, for the moment, I want to stay with that figure. If you care to decrease it or increase it, you may. I am asking [fol. 121] you, on what basis do you predict, if you can predict, that your costs will decrease by 20 per cent in the next year?

A. I think I answered the question by saying if we applied a different aircraft, that will operate at a lower cost per ton mile, in direct flying cost. I am not referring to the overhead of the operation. I am referring to the direct flying cost of the machine.

Q. Your testimony is if you can get an airplane that will have the effect of reducing your cost by 20 per cent you predict that your volume will double, is that correct?

A. I don't want to be indicating that we intend to reduce in the next year the rate structure by 20 per cent. I simply stated, with the proper application of equipment, a 20 per cent decrease in rates, general overall rates into our area of operations, I believe, to the best of my knowledge, and on the basis of surveys that we have made, would double the business.

Q. But you cannot tell us now when this 20 per cent decrease will take place, can you?

A. We haven't planned a 20 per cent increase as yet.

Q. Decrease?

[fol. 122] A. Decrease. I am sorry.

Q. What is the frequency of your operations, Mr. Carmichael, to the various points that you have previously testified?

A. Frequency to Central America is a flight every other day to Guatemala, DC4 aircraft, and alternate days to Salvador, and two to three flights per week to Panama, supplemented by C46 aircraft.

Q. You formerly flew into Havana?

A. Formerly.

Q. How long did you continue that operation?

A. We suspended that operation about a year and a half ago.

Q. How long were you in it?

A. We originally were in Havana before we became a certificated carrier, and then we reinstituted the service when Havana was—when we obtained Havana as a scheduled route. We operated it for about one and a half years.

Q. As a sched or non-sched?

A. As scheduled. However, we were unable to compete effectively with other air carriers based in Miami. That was the reason.

Q. What were those air carriers?

[fol. 123] A. Principally Cuban flight operations.

Q. Mr. Carmichael, do you consider that your rates are competitive with the rates of the steamship companies?

A. In many cases, I do.

Q. In many? In the majority or in limited degree?

A. I would say that 40 per cent—well, possibly 40 per cent of our traffic is competitive with ocean at the present time.

Q. 40 per cent?

A. Bulk.

Q. And 60 per cent is not competitive?

A. It may be competitive. We find it not necessary to prove the competitive position because that traffic is merchandise that has been in there so long, this has proven its value on inventory, replacement, against surface transport and time involved, that we don't find that to be competitive with surface. That is competitive with other air carriers with a service matter.

Q. Let us go back over that, Mr. Carmichael, because I want you to lay down a very positive statement for this testimony. Am I correct in saying that you have testified that 40 per cent of the cargo you move is competitive with [fol. 124] steamship companies, is that correct?

A. Yes. I will make that statement.

Q. What is the nature of that movement of the cargo?

A. That cargo is principally white goods, which are refrigerators, stoves, household appliances, livestock, automobiles, household effects, and sea food, coffee, and boats, that is, pleasure boats, personal effects in both dir ions, and household appliances.

Q. What is—are you through?

A. And fresh killed beef.

Q. What is the rate that you charge for that movement?

A. That rate is about one-third—one third of the southbound rate. I might add—.

Q. I would like it in dollars and cents.

A. I will give you a comparison to Panama. Our average rate is approximately 14 cents per pound. Northbound it is 10 cents per pound.

Q. Moving from Miami or Tampa, Jacksonville, Florida, rather.

A. St. Petersburg.

Q. Tampa, St. Petersburg, to Panama, you move the [fol. 125] white goods, etc., at 14 cents a pound?

A. The white goods we have a lower rate on.

Q. What is that?

A. The specific rate on refrigerators and certain other commodities with a minimum of 5,000 pounds per shipment, ten cents a pound.

Q. You make a profit on that at ten cents a pound?

A. We make a profit on ten cents a pound when it is balanced with the northbound.

Q. What's that?

A. When it is balanced with northbound.

Q. Apart from northbound, do you make a profit in carrying—to carry these refrigerators, and so on, ten cents, from Tampa, St. Petersburg, to Panama, is that above or below your cost?

A. That is above—that is below cost.

Q. Below cost?

A. Ten cents per pound is below. In other words—

Q. Does the distance—

A. I want to clear that point. The southbound movement returns more than the cost of the operation of the aircraft.

Q. I am not clear now. I was clear before. Now I am not. Will you please repeat that?

[fol. 126] A. Well, I think that I would rather state my answer on the basis that our concept in the development of southbound traffic, it also is inherently tied in with the development of northbound traffic, and in the past few years the rate structure on northbound has improved considerably by virtue of new products being developed for import into the United States.

Q. Putting it another way, Mr. Carmichael, what you lose on your southbound traffic you hope to or you do make up on your northbound?

A. No, we only apply—well, let me put it another way: Our load factor is around 87 to 90 per cent on the round trip, and that is consistently 80 to 90 per cent. Maybe that answers your question. We base our rate structure on the experience load factors and predicted load factors. And the rate southbound, while it may be low, balanced with the known load factor is a profitable operation.

Q. You operate on a frequency of every other day, is that right?

A. That is our present schedule.

Q. On your present schedule do you have an 87 to 90 per cent load factor every other day?

A. Yes.

[fol. 127] Q. Mr. Carmichael, you cite these prices of 14 cents and 10 cents per pound. That is per mile?

A. That per pound.

Q. Per mile?

A. No, per pound delivered to the destination.

Q. What would your rate be per pound if you flew it from Tampa or Jacksonville, say, to Santiago, Valparaiso?

A. We don't provide a poundage rate for Santiago. It would be a combination of our rate as far as our service goes, which is Guayaquil field at Panama, but I can say, offhand, that the rate amounts to about 70 cents per pound delivered to San Diego, combination.

Q. What I was trying to bring out, and I think your answer shows you are in agreement, that the longer the haul the more expensive it is—

A. That is right.

Q. —to the shipper. Are you familiar with the rates of steamship companies?

A. Generally speaking, I am.

Q. Generally speaking?

A. The Central American area more so than South American area.

Q. Are you familiar at all with steamship company rates, [fol. 128] say from, let us say, the Atlantic Coast of the United States down the west coast of South America?

A. I am familiar with the fact that the rates don't change too much for the long distance.

Q. Isn't it the fact the rates for the steamship company are much, much lower than the air cargo rate from the Atlantic coast of United States down the west coast of South America? And only answer that if you know.

A. I think it is, of course, a known fact that the basic steamship rate is much lower than any basic air rate, but that is not how we compete. We compete on the overall transportation from the manufacturer to the destination.

Mr. McKay: Would you bear with me one moment, your Honor?

(A pause)

Q. Just one more question, Mr. Carmichael. Is it not a fact that Panagra is one of the competitors of Sud Americana?

A. Yes, sir, that is a fact.

* * * * * * *

[fol. 129] GEORGE L. GILES, called as a witness on behalf of the Government, having been first duly sworn, testified as follows:

Direct examination.

By Mr. McConnell:

* * * * * * *

[fol. 131] Q. You are now the president of Riddle Airlines and have been such since that time?

A. Yes, sir.

[fol. 132] Q. What was the situation, do you recall, in Riddle that you had to deal with particularly?

A. In December of 1957 the principal stockholders of Riddle Airlines tried to determine whether they should close down the operation due to expenditures, loss of money. They determined, however, to put in new management and to make an honest attempt in streamlining the operation to see if it could be re-evaluated and put into a profitable operation. At that time they were losing at the rate of $285,000 a month. I went into the operation and reviewed it to determine, first, what was the directive of the opera-

tion, in other words, that is the certification placed by the CAB. That spelled out one thing and one thing only, and that was the movement of materials by air. Riddle Airlines certificate does not allow them to carry passengers. It is purely an all cargo airline. So we eliminated some of the activities that Riddle had been engaging in, such as pipe line manufacture, installation of air conditioning sets in automobiles, and the movement of flowers, bouquets clubs, a few things not pertaining to the movement of air cargo.

[fol. 133] We reduced our personnel from a thousand to around 560, representing almost a hundred thousand dollar savings in the payroll.

Since that time we have been able to bring the airline to a point where today we are averaging around $35,000 loss, cash loss, on the operation.

Q. In connection with the management of the company that had the problems of Riddle, you made very detailed studies with respect to the cost of operating air cargo transport?

A. That is correct. Once we confined ourselves to the basic principle of carrying cargo we had to evaluate the type of equipment that the company owned.

Q. Would you briefly describe the operations of Riddle at the present time?

A. Riddle Airlines is certificated under two particular routes, route number 109, which is from New York to San Juan, San Juan-Miami, Miami-New York; route 120, which is basically from Miami through Toronto into Chicago, Toronto into Cleveland and Detroit. There are intermediate cities within those two routes.

[fol. 134] Q. Would you operate in Puerto Rico from New York; is that correct?

A. Correct.

Q. And from Miami.

A. Correct.

. . . . . .

Q. As domestic air carriers how do you rank in size?

A. Classified on air freight, that is, the freight that you have to go out and generate through sales, in 1958 we ranked third.

Q. Who ranks second?

A. Flying Tigers.

Q. Flying Tigers. Mr. Giles, from your point of observation as president of Riddle at the present time would you say that there is an active competition in international trade between air carriers and ships?

A. Yes, there is.

Q. Will you explain generally some of the factors that enter into this competition and the nature of them?

A. There are certain commodities in which the tariff itself is very compatible. Then, when you add the benefit [fol. 135] of speed to that, you get to a point where you can obtain the contract for movement of material.

There are other categories of materials where the basic rates are not compatible. However, when you analyze them and add to the basic ocean freight the necessity for the export packing, for the domestic haulage to the wharfs, for the documentations at the origin station, and also the same activities at the destination, add to that your speed which is available through the movement by air, we then find that in a great number of cases on general commodities we can be very, very competitive.

Q. Can you give some actual illustrations just drawn from your files—

A. Yes, sir.

Q. —where you actually have competed with ships?

A. Yes. I could cite one that happened recently where our sales personnel became aware of a movement of fire bricks from St. Louis to Venezuela. Our sales personnel approached the purchaser and showed them through speed and through the use of aircraft charter that they would be able to put their thermal station into operation and be [fol. 136] deriving benefit from it prior to the bricks ever arriving in Venezuela had they gone through New Orleans and across to Venezuela by water.

Q. Were the ships soliciting that particular shipment when you did that?

A. This happened to be one case where the Ocean Transportation Company had the contract. We were able to take it away from them.

Q. Take it away from them.

A. Yes, sir.

Q. Do you have any other illustrations that just come to mind?

A. Yes. I can illustrate the case of the movement of Sunbeam Products, basically hair driers, during this last Christmas.

Normally hair driers are shipped north to New York by ocean vessel and across to Chicago by truck. We were able to show the distributor in Chicago that if he shipped by air he would not have to, first, pack for export, secondly he would not have an inventory tied up during a number of days of traffic by ocean vessel and by truck, and thirdly he would have the type of commodity that he wanted for immediate retail sale in Chicago within a matter [fol. 137] of 12 hours. This shipment of 80,000 pounds we were able to handle.

Q. I know you have not searched your file, but is there another illustration?

A. Just another illustration.

Q. Do you have another illustration?

A. Yes. I can even point one out where we moved a circus from Miami across to Puerto Rico, an entire circus which included three elephants. It was possible for the circus operator to have the circus under performance prior to the time of arrival had the animals been sent by surface.

Q. Do you have any other illustration?

A. Yes, I could illustrate, for instance, the textile movement from New York to Puerto Rico where the raw materials are shipped from New York in what we call pre-cut, shipped into Puerto Rico where the hand embroidering is completed, immediately turned around and shipped back to New York and placed on the markets here in New York.

The elapsed time for doing that is many, many days less than it would be for surface, and apparently the industry finds it to their advantage economically to do business that way.

The Court: That must have been some years ago; isn't [fol. 138] that right?

The Witness: No, sir, that is as of today. Each day we have shipments going, every day, five days a week, from New York to Puerto Rico and back.

The Court: Don't they have to pay the same Fair Labor Standard Wages in Puerto Rico?

The Witness: No, they do not. That was one of the attractions that Puerto Rico had to offer through this industrial move of Bootstrap. Over the past five years the labor unions have been bringing considerable force to bear, and the basic wage is being reviewed twice a year. It is now approaching one dollar which is quite equivalent to what it is in the States.

As a result of this it appears that Puerto Rico may not be the heart of the textile embroidering industry, but there is a trend and it is moving toward the Philippines where lower labor is the deciding factor.

Q. What are some of the other commodities that just happen to come to your mind that you ship down to Puerto Rico, back and forth?

A. Goodness, we ship everything. Every day we are shipping bread, we are shipping pies, we ship raw material in the form of aluminum extrusions which are manufactured into jalousied windows in Puerto Rico, then we carry [fol. 139] the jalousied windows back to Miami.

We send down raw materials which are, as I mentioned, embroidery; also send down raw materials for carpet and rug manufacture, electrical, livestock.

Q. All of those—

A. You name it; we have it.

Q. All of those items would go by ship were it not for the air lift; is that not true, sir?

A. That is the type of item that would go by ship, yes.

Q. In connection with your study of the problems of Riddle I suppose you have made very careful analyses of the costs of operations; have you not?

A. Correct.

Q. How much do you figure it costs to operate an airplane?

A. Our present fleet of C-46s and C-54s cost us 25 cents a ton mile.

. . . . . .

[fol. 143] Q. To recapitulate, you say at the present time your cost per ton mile operating a C-46, both direct and indirect, is what, 24?

[fol. 144] A. No, our overall company costs, which would take in our indirect, our direct and our amortization and so forth, is running very close to 25 cents.

Q. What would the use of the Argosy reduce that to, do you think?

A. I might be telling a trade secret. I believe realistically we should be able to operate between 18 and 20 cents without difficulty.

Q. How much would it reduce your direct costs?

A. It will reduce it from the 15.6 to 10 cents.

Q. By 5 cents?

A. That is correct.

Q. And the indirect costs, I take it, just from pure operation of the airplane, it would reduce that by 30 per cent?

A. By 30 per cent, yes.

Q. Do you think a reduction in costs that would take place by the use of this new plane would greatly increase your traffic?

A. Yes, sir.

Q. Can you estimate by about what per cent?

A. I believe that we would be able to increase our traffic 300 per cent by the use of this aircraft over our current and existing routes as we operate today.

[fol. 145] Q. Do you think that that would get Riddle back on its feet financially?

A. That's what we are definitely trying to do, yes, sir.

Q. That increased traffic would be drawn from the surface carriers, would it not?

A. Yes, sir.

Mr. McConnell: That is all I have.

Cross examination.

By Mr. McKay:

Q. Mr. Riddle, Mr. McConnell was—

A. May I correct that? Mr. Giles.

Q. Yes. Mr. Giles, I am sorry.

Mr. Giles, Mr. McConnell has been asking you to speculate as to what would get Riddle back on its feet. I would like to question you as to why Riddle has to get back on

its feet. What happened? Isn't it a fact that Riddle's condition has been described to the Civil Aeronautics Board as critical?

A. That is correct.

Q. And that is your belief, too, is it not, Mr. Giles, that its condition is critical?

A. That is correct.

Q. Is this critical condition of Riddle due to a lack of air cargo to carry?

[fol. 146] A. No, sir. It is due to mismanagement.

Q. Mismanagement?

A. Yes, sir.

Q. When were you first associated with Riddle, Mr. Giles?

A. February 17, 1958.

Q. And who was the prior management that you accuse of mismanaging?

A. Mr. John Paul Riddle.

Q. How long had he been associated with Riddle Airlines?

A. From the inception of the airlines.

Q. And when was that, Mr. Giles?

A. 1946.

Q. Did Riddle lose money from 1946 down to the time you took over?

A. Except for one year.

Q. What year was that?

A. That was in 1947.

Q. And is it your testimony that Mr. Riddle mismanaged his airline from the very inception of it down to the time you took over?

A. Yes, sir.

Q. Mr. Riddle's fault alone?

[fol. 147] A. After all, he was the president.

Q. You have been in office now four months?

A. No, sir. I have been in office a year and three months.

Q. Is Riddle today making a profit?

A. No, sir.

Q. What is this loss?

A. Its cash loss is approximately $35,000 a month.

Q. A month?

A. Yes, sir.

Q. Riddle is a domestic air carrier, is it not?

A. Domestic on one route and international on the other one.

Q. And international only to the extent of San Juan.

A. Correct.

Q. It is a short haul operator.

A. On the domestic, yes, sir.

Q. Do you regard it as a long haul operator from New York to San Juan?

A. Correct.

Q. That is its longest haul, however.

A. That is correct.

• • • • • • •

[fol. 149] Q. Do you hold yourself out here, Mr. Giles, as an expert on the international air cargo movement on a long haul basis?

A. I do not hold myself out as an expert, no, sir.

Q. Do you know Arthur Vining Davis, Mr. Giles?

A. Yes, sir.

Q. Mr. Davis advanced the Riddle Airlines more than $2,000,000 during 1958, did he not?

A. No, sir. In 1958 Mr. Davis did not advance Riddle Airlines one dollar.

Q. I may be in error. Would you pardon me a moment?

A. Yes, sir.

Q. Are you familiar with the application, which I believe you signed, Mr. Giles, to the Civil Aeronautics Board dated March 24, 1958?

A. Yes, sir.

Q. That was an application asking the Civil Aeronautics Board to grant a subsidy to Riddle, was it not?

A. Correct.

Q. In view of its critical condition.

A. Correct.

Q. That without this subsidy it was represented Riddle couldn't continue.

[fol. 150] A. Correct.

Q. You don't recall the statement in that application as follows:

"Mr. Davis advanced the company more than $2,000,000 during the last fiscal year."

A. That is 1957, I believe.

Q. My error. I said it was 1958. You are quite accurate. So that in 1957 Mr. Davis advanced the company $2,000,000.

A. Yes, sir.

Q. And did he thereafter refuse to advance Riddle any further sums?

A. No, sir. I did not ask him for one dollar.

Q. Do you know whether Mr. Riddle did?

A. Mr. Riddle had no association with Riddle Airlines during that period, so I do not know what he did.

Q. You do not know whether or not Mr. Vining Davis refused; all you know is that you did not ask him.

A. No. I will correct that. I know he did not refuse because he was not asked.

Q. Because what?

A. Because he was not asked.

Q. I read you another statement. Perhaps again I am [fol. 151] technically in error, but let me read this statement to you, Mr. Giles, on page 3 of this application which I believe you signed:

"Mr. Arthur Vining Davis, a principal source of funds in the past, has determined that he will put no additional capital in the company."

Is that correct?

A. That is a statement he made at the time he wanted to change the management, yes, sir.

* * * * * * *

[fol. 153] By Mr. McKay:

Q. Mr. Giles, do you blame Riddle's critical condition on the management of Mr. Riddle?

A. Correct.

Q. Isn't it a fact that when you were obliged to apply to the Civil Aeronautics Board for an exemption in order to take you out of this critical situation, that three other air cargoes at or about the same time also applied for a similar exemption on the ground that they, too, were in a critical condition? Is that a fact, Mr. Giles?

A. It is a fact, but I do believe that they were taking advantage of Riddle Airlines having gone in and made

this application. As you might say they were riding in on our coattails.

Q. Have you read their applications, Mr. Giles?

A. Oh, yes.

Q. Do you disagree with anything contained in their applications?

A. Yes.

Q. Do you accuse them of misrepresenting their financial situation to the Civil Aeronautics Board?

A. No, I do not.

Q. And if they say their financial situation is critical, [fol. 154] then you would not disagree?

A. No, I would not disagree.

Q. Do you know whether the Flying Tiger Line has been mismanaged in the past?

A. No, I believe it has been managed very well.

Q. Do you know anything about Slick?

A. Yes, I am aware of their operation.

Q. What about their management? Has that been mismanaged?

A. I believe their failure was through mismanagement, yes, sir.

Q. And what about the other one, Mr. Giles, if I pronounce it correctly, Aaxico Airlines?

A. Aaxico.

Q. Was that mismanagement?

A. No. That is a very healthy little airline.

Q. But they, too, were in a critical situation as far as their application goes and as far as your knowledge goes?

A. I do not believe that they represented their case as being in a critical position. As I recall, they represented their case as the fact that they believed that the all-cargo [fol. 155] carriers should have the right of subsidy in view of the subsidy that had been granted to other carriers.

Q. Isn't it a fact that they said they would be forced out of business unless they get this relief, this subsidy?

A. In Aaxico's case, to my knowledge I am not sure that they made that statement.

Q. I am reading from Aaxico's application to see if it refreshes your recollection, Mr. Giles, at page 5:

"Aaxico is one of four domestic cargo carriers which must inevitably be forced out of business unless some temporary relief is granted by the Board."

Have you any reason to disagree with that statement as far as your knowledge goes?

A. No, in that they say inevitably in the future they would be forced out. I do not believe that represents that they are in financial difficulties at the present time.

Q. But in any event, Mr. Giles, as far as Riddle was concerned, unless it gets this exemption it is a very critical situation, is it not?

[fol. 156] A. Certainly it is critical. As long as you are losing money it is critical.

Q. You made the statement, Mr. Giles, I assume only half seriously, to Mr. McConnell: "You name it; we have it." I assume you meant: you name it, we carry it; is that correct?

A. Well, I believe that is more than just half comical. I believe it would be very difficult for you to name a commodity that we have not carried at some time.

Q. Let's start off with the obvious. You can't carry bulk ore, can you?

A. Bulk ore?

Q. Yes.

A. We have carried bullion.

Q. I am talking about bulk ore.

A. No, in that particular instance to my knowledge we have not.

* * * * * * *

[fol. 158] Q. Isn't it true that a good part of Riddle's business is with the United States Government, moving military cargo?

A. No, sir.

Q. What portion of Riddle? Does it do business and move military cargo?

A. It does business with the United States military which is about one-third of what its overall business is.

Q. I considered that a good portion. I am sorry. But it is one-third?

A. Approximately one-third.

* * * * * * *

[fol. 159] Q. Well, do you consider yourself an expert, Mr. Giles, on international air cargo movement on a long-haul basis? And I don't mean by long haul the 600 miles from New York to San Juan. I am talking New York to the West Coast of South America. You said you weren't familiar with the steamship rates.

A. Correct.

Q. Are you familiar with the rates of the airline over that route, New York to the West Coast?

A. Not to the West Coast, no. That is the West Coast of South America.

Q. Mr. Giles, you said that Riddle had a tentative order for new planes?

A. Correct.

Q. And if you made the commitment you expected a reduction in costs and to increase the volume?

[fol. 160] A. Correct.

Q. Why is the order tentative, Mr. Giles?

A. That happens to be the way that almost every airline places an order. You never go in and buy a new airplane outright. You always place a tentative order whereby it gives you authority to go in and make further evaluation of that airplane.

Q. I see.

A. For one thing, for instance, a cockpit evaluation, the cargo-handling facility evaluation, radar evaluation. Those are all things that you go in and due to your particular airline you have particular characteristics that you want to have included in that airplane.

Q. So it is tentative up to the point that you satisfy yourself that the plane that you have tentatively ordered satisfies your needs and requirements; is that correct?

A. That's correct.

Q. And your order is still tentative, isn't it?

A. That's correct.

Q. I think you said, Mr. Giles—and you correct me if I am wrong—that with this new airplane which is on ten-

[fol. 161] tative order and which you are still debating whether it satisfies your needs or not that you believe that you will increase your volume over 300 per cent?

A. That is correct.

Q. What is the basis of that belief?

A. On the basis of the capacity of the airplane; 27,000 pounds, against 11,000 pounds for a C-46.

Q. Have you estimated your costs, cost of the plane and your other costs?

A. Comparing them to what?

Q. What I wanted to know is this: You say you will increase your volume by 300 per cent?

A. Correct.

Q. By that you do not mean that you are going to increase your air cargo movement by 300 per cent, do you?

A. Yes, sir.

Q. In other words, you would expect to run at 100 per cent load factor?

A. No, you never run at 100 per cent load factor.

Q. Then I am lost. Would you explain?

A. I will be glad to.

[fol. 162] Q. Thank you.

A. You run approximately 80 per cent load factor, and if you take 80 per cent of 27,000 pounds, you will have to take 80 per cent of 11,000 pounds, and with 27,000—let's use 27,000 as a round figure—so it gives you almost three—it gives you two times the capacity plus the speed of the airplane, which is 300 miles an hour, as against 186 or 185 miles an hour for a C-46, you can replace three C-46s with one Argosy.

Now I will go one step further. Today we are carrying around 56 million pounds of cargo a year.

Q. Fifty-six?

A. Million; that's correct. We could continue to operate on exactly the same pattern but with equipment, and I am confident, and this is only my own personal opinion, but I am confident that we could increase it close to three times.

Q. Increase the 56 million pounds?

A. That's correct.

Q. On what do you base that confidence?

A. On the operation as I see it today, evaluating the application of new equipment to it as to what can be done.

[fol. 163] Q. Have you made any study on that? Have you any figures on that, just what cost factors you took into consideration?

A. Certainly. I have repeated them a short time ago.

Q. I am asking you if you have any in writing. This is distinct from the other personal notes. Has Riddle Airlines under your management made any study?

A. Oh, yes. We made a route analysis. We made our cost analysis as to how to pay off on the aircraft.

Q. Have you those with you, Mr. Giles?

A. I do not have them with me, no, sir.

Q. Would you be willing to produce them?

A. I can give them to you. I will be glad to.

* * * * * * *

[fol. 164] By Mr. McKay:

Q. Mr. Giles, do you have the capital with which to buy these planes of which you speak?

A. Not at the present time, no, sir.

Q. Where do you expect to get it, from the subsidy that you are hopeful of?

A. No, sir.

Q. Where is that from?

A. The purchase of new aircraft is a relatively easy thing to do nowadays.

Q. Borrow money?

A. That's correct. You can borrow capital against—finances against your capital equipment, or there are companies who are financing aircraft and leasing them back lease purchased. I would like to bring up, however—you brought up the subject—

Q. You just answer my questions, if you will, Mr. Giles. I am sure Mr. McConnell will bring out anything you care to say.

A. All right.

[fol. 165] Q. You testified on direct examination, Mr. Giles, as to your direct and indirect costs in connection with these new planes. I was wondering if you had figured in depreciation at all.

A. Correct.

Q. You have?

A. We have, yes, sir.

Mr. McKay: That is all.

The Court: Any redirect?

Redirect examination.

By Mr. McConnell:

Q. I know it would be going back, but what idea was it that came into your mind?

A. Thank you.

Mr. McKay: I won't object to the question.

The Court: It might be about going to a show. Can't we confine it to some particular part of this examination.

A. It is a very interesting feature about financing.

The Court: The witness said it relates to a very interesting feature of financing.

Q. What financing does it relate to?

Mr. McKay: I object to the form of the question.

[fol. 166] The Court: I will allow it. Maybe we will get finished.

What financing, Mr. Giles?

The Witness: In this particular instance the English company, through the Export Credits Bank Association, is requiring 10 per cent down on the aircraft. On four aircraft which were delivered in Miami at six and a half million dollars, which includes your 12 per cent import tariff and 15 per cent operational spares, is roughly $650,000. There will be no payment whatsoever during the first year of operation. Then payments will be made at the quarterly rate of roughly 5 per cent interest. If you turn around and run some quick mathematics you will find that that means that you can procure new aircraft delivered in the United States into operation at a monthly figure which is less than what you can lease DC-6 aircraft for today.

[fol. 168] New York, May 5, 1959.
10.30 a.m.

Mr. McConnell: May we recall Mr. Giles for just one brief question?

The Court: All right.

GEORGE L. GILES, was recalled and, having been previously duly sworn, testified as follows:

Direct examination.

By Mr. McConnell:

Q. Mr. Giles, in your operations at Riddle, do you participate at the present time in any traffic coming up from the West Coast of South America?

A. Yes, sir.

Q. Which would be competitive with Grace and the other surface carriers operating on the West Coast of South America?

A. Yes, sir.

[fol. 169] Q. Could you describe that traffic?

A. There is a movement of Bermuda onions which are grown in Chile. A group of planters have selected air transportation to place Bermuda onions in the New York market.

Q. Is that a substantial traffic?

A. Yes. That traffic this past year has amounted to probably 500 tons.

Q. Five hundred tons?

A. Yes.

Q. That traffic formerly moved by ship; is that correct?

A. Yes, sir.

Mr. McConnell: That is all that I have.

Mr. McKay: No cross.

The Court: All right.

(Witness excused.)

STANLEY H. BREWER, called as a witness on behalf of the Government, being first duly sworn, testified as follows:

Direct examination.

By Mr. McConnell:

. . . . . .

[fol. 173] Q. Will you describe the methods used by you in preparing these studies, Professor Brewer.

A. Well, the analysis is fairly technical.

We spent a very large number of man hours with a fairly big staff of technicians.

We first looked at the traffic moved by every form of transportation at the present moment.

We looked at the rate of charge by these various forms of transportation, including truck carriers, rail carriers, freight forwarders and shipping companies.

[fol. 174] Then we analyzed this traffic commodity by commodity to try to determine what would be considered to be air potential.

We looked at growth in the economy out into 1965 in these particular reports, forecasted gross national product, population, foreign trade, various other things that are normally used in forecasting anything in our economy and deduced from this what we considered to be the potential air cargo.

Once we had arrived at what we considered to be potential, we then looked at what we thought could be observed within the immediate future. We looked at the cost of the operation of airplanes; we looked at possible technological break throughs in airplanes; we looked at management interest in air cargo; and from this arrived at what we thought was achievable within the next four or five years.

We are somewhat pessimistic because we saw very little in the way of management interest on the part of the major airlines in air cargo. They were so very concerned with passenger operations, with mail and with other things that they hadn't really spent too much time with this. They didn't have airplanes that could economically carry cargo.

[fol. 175] So that, as we forecast into 1965, we didn't see too much growth in this particular picture.

We saw that the rate of growth in the domestic market would probably continue at about the same rate for the next few years.

We saw a little bit of a break through in the international market simply because we saw that the distances were somewhat greater and that this would multiply our common denominator which we used, which was ton miles of movement.

Since that time we have become a little more optimistic about this because we have become acquainted with the aircraft that is available to operators at the moment.

• • • • • • •

[fol. 179] Q. In your studies did you come to the conclusion that ..e present time there is an area of competition [fol. 180] between air carriers and ships?

A. Well, I would say that there is probably an area of competition, but there are substantial cost differentials at the moment, so this competition now is probably relatively slight.

Q. Will you explain some of the factors that enter into that?

A. Would you be more specific in your question, sir?

Q. When a shipper chooses between modes of transportation, the ship and the air carrier, what are the considerations that go into his choice of the air or the ship?

A. Well, certainly speed is the most important factor in choosing air over ship because the cost of moving by air is considerably greater.

There are other considerations. Certainly, when you move by ship, you have to put materials into what is called an export pack. This pack is much more expensive. It has to stand the rough handling that goes into movement by ship, and it adds considerably to the weight of the product.

Certainly a shipper interested in things that he needs on an emergency basis will weigh the increased cost of [fol. 181] air over ship from what it is costing him to keep a machine tied down for a period of time, waiting for spare parts or something like that.

Certainly we know that insurance costs by air are somewhat lower than they are by ship. We know that in a steamship movement there are a great number of handlings of the freight in terms of moving it from its origin point maybe to the transit sheds, in terms of moving it from the place of location of the transit shed to the apron, in terms of putting it into the hold of the vessel, in terms of breaking it back out of the hold of the vessel, back to the apron, back to the transit shed, maybe to a warehouse and from a warehouse on in.

We think that the air carrier can eliminate at least some of these handlings.

Q. What is your conclusion from your studies of the future of air cargo?

A. Could I ask you what you mean by the future, sir?

Q. Ten years, I think your study encompassed.

A. These particular studies that you are presenting in evidence only go up to 1965 which is now only six years [fol. 182] away. We have forecast the future out to 1975 in more recent studies, and that is why I asked the question.

We see in this immediate future period a period of some turmoil, a period of phasing out of a piston-engineered plane which is much less economical in a cargo operation, a phasing in of what we call a turbine-power airplane.

We see that here is a period of transition; here is a period when the vehicle that the operator will use in the future will become much more economical in freight movement.

We see a period of time in the not too distant future where maybe the airplane carrying freight will be even more economical as a freight-carrying vehicle than it is now as a passenger-carrying vehicle.

We have seen this, of course, happen in every other form of transportation. We talk about the automobile. It was first used for passengers, and then specialized vehicles for freight hauling. We saw it in railroad transportation. To some extent we saw it in ship transportation. We see that the potential in freight movement is so many times greater [fol. 183] than it is in passenger movement that the airplane will come into its own as a routine mover of freight.

We see a major breakthrough in this industry coming some time between about 1961 and maybe 1964.

Q. Will you explain concretely what you refer to as a major breakthrough?

A. Well, a period of time when the operators will undoubtedly start cutting rates very drastically, and as they cut rates, why, of course we know that there is very substantial elasticity of demand for freight movement, this is going to encourage a lot of people to start moving by air.

We think that a lot of firms are going to start taking a very careful look at what we call distribution cost analy-

sis, where they consider all of the factors, the pipeline costs, the warehousing costs, the insurance costs, their capital costs and so forth, and that as they do this, and this is going about in the country at the present time—practically every major producer is beginning to look at this concept—as the rates come down, why, of course, here is when the [fol. 184] traffic starts to snowball as far as the air carriers.

So that by comparison, why, we are talking about a forecasted total movement in international trade, if you want to separate these things, of something over two billion ton-miles by 1965; by 1975, why, we are talking about perhaps 20 billion ton-miles.

Q. About how big an increase will that be percentage-wise?

A. Well, what is it? A thousand per cent? Is that what it adds up to. I don't have my slide rule.

Q. A thousand per cent.

A. Well, if you want to put it—if you are talking about two billion and 20 billion, it is a very substantial increase.

Q. In your studies have you familiarized yourself with the new planes that are being developed for the purpose of expanding air cargo?

A. Well, I am on the consulting staff of the preliminary design department of the Boeing Airplane Company, and this gives me an opportunity to look over the shoulders of those people who are thinking ahead 10 years in terms of the products that they are going to produce.

[fol. 185] Q. Is that confidential?

A. Not for the immediate future, not the things that they are talking about being able to deliver within the next year or two years. Things that they are thinking about, talking about that are out ahead six or seven years are still very much confidential.

Q. Could you describe the plane that they intend to deliver in the next two years?

A. Well, they are talking about a vehicle that will carry 50 tons of cargo—

Mr. McKay: Your Honor, may we have the name of the manufacturer who has this plane?

The Witness: The Boeing Airplane Company for one

A. We have spent time in the last few weeks with both the Boeing people and the Douglas people on this particular thing, and we did a major analysis of airplanes that the military is looking at to fulfill their lift requirements as the people are well aware, that spend time with this, the military has what they call a general operational requirement for 78 large jet airplanes out, and a source selection board is in session on this at the moment and will come [fol. 186] to a decision within the next 30 days, and the airplanes these people are looking at have been designed and delivery dates committed by Boeing, by Douglas, by Convair and perhaps other manufacturers; I don't know. I've had access to that information at least.

So that we know that at least these three manufacturers are talking about delivering any one of these planes to either the military or to a commercial operator within a period of two years' time.

Q. How much do you estimate that these new planes that will be delivered will reduce the cost of air cargo?

A. Well, when you talk about cost, this is a very technical thing, and we just about have to define terms.

Q. Please do that, sir.

A. Well, we normally compare costs on the basis of what is called the ATA formula. This is a formula that was devised by the airline operators and is published by their association, the Air Transport Association of America.

This formula perhaps needs some revision because it was [fol. 187] originally designed to cost out the piston engine airplane, but it can be used as a rough comparison of costs, and it enables us to reduce cost to a common term called ton-mile cost, per ton mile cost.

So that when we talk about present piston-engine airplanes, why, we are talking about costs of around eight to nine cents a ton-mile for the most efficient piston engine airplanes at the present time, and, if we go on up to the cost of some of the airplanes that are being used as freight haulers at the moment, why, we are talking about costs of perhaps 15 cents a ton-mile.

When we start talking about the long-range, high-capacity jet airplanes, by comparison these things enable the operators to move cargo at a direct operating cost of around 4 cents a ton-mile.

[fol. 188] Q. It will reduce the cost from the lowest cost, 9 cents, is that correct?

A. The lowest cost airplane now is around 9 cents a ton mile, and these things will get it around about 4 cents. So you can see, if you add 4 cents for indirect, and maybe another couple of cents for profit, why, this enables the operator to move freight at a cost of, maybe, 10 cents a ton mile.

Q. In your studies have you paid any particular attention or given any particular attention to the South American market?

A. No, sir, we haven't. In the international study we did an analysis of all of the world's markets. In doing so we looked at origin, destination points in 14 major customs districts of the United States. Then we broke the world down into 17 major world areas. One of these world areas was the west coast of South America, and certainly some of these major customs districts, customs districts like Philadelphia and New York, are here on the east coast, but we didn't, at least I didn't spend any great amount of time dwelling on the South American market.

Q. It was part of a study, however?

A. It was part of a study, yes, sir.

[fol. 189] Q. Would the airplanes which you have referred to, that are going to be delivered in the near future, be suitable for the South American-North American trade?

A. I have no idea. This is a very technical problem that is concerned with airport adequacy, it is concerned with volume of lift, concerned with other things. My recollection is that the South American operators have purchased some of the large, long range jet airplanes for passenger operations, and certainly, if they can use them in passenger operations, they can use them in freight operations.

Q. As air cargo grows in importance, do you think that the area of competition between it and ships will correspondingly increase?

A. I don't think there is any doubt about that. If the operators—I have to deal with averages. We are talking about average rates in international movement at the present time of 30 to 32 cents a ton mile. If these people are able to even cut those costs in half, say to 15 cents a ton

mile, they are certainly going to become much more competitive with steamships, and if they get down to 10 cents —we forecast maybe 8 or 10 cents a ton mile, maybe, by [fol. 190] 1975—we think that by that time the manufacturers will have airplanes that can move cargo at a direct operating cost of something around 2 or 2½ cents a ton mile—so you can see here is an opportunity, if these people get into a potential pricing structure, as I think they may do, to move—if we take the average rate of 8 cents a ton mile, here is an opportunity for them to talk about some rates as low as 3 or 4 cents a ton mile and then, of course, some higher. So I think you will see a period of time in the next 10 or 15 years where you will see a substantial amount of competition between the ship and the airplane, especially for the high value item, and I think we will see, probably, quite a new and different concept in distribution in the area of foreign trade.

Mr. McConnell: Thank you, sir.

. . . . . .

Cross examination.

By Mr. McKay:

Q. Professor Brewer, is it not a fact that there have been predictions of mountains of cargo moving by air which have been made by individual government agencies, [fol. 191] by aircraft manufacturers and others, for the past decade and a half?

A. Yes, sir, it is.

Q. Isn't it true that somehow or other the movement hasn't come up to those expectations?

A. Only because they haven't had an economical aircraft.

Q. They haven't come up?

A. They haven't had an economical aircraft. They haven't come up.

Q. Isn't it a fact, Professor, that the future of air cargo lies in the economics of the aircraft?

A. Yes, sir.

Q. Those that have been put into service in the past two years and those that may be produced in the future?

A. Would you clarify the question? I am not sure I understand what you mean by the last two years.

Q. I am asking, Professor, if you agree with the sentence in the prologue of your report which reads as follows:

"We believe that the future of air cargo lies in the economics of the aircraft that have been put into service in the past two years and those that will be produced in [fol. 192] the future."

A. Yes, sir.

Q. It is true, is it not, Professor, that vast quantities of material are moved in international trade by ship?

A. Yes, sir.

Q. And most of this will continue to move by vessel for many years to come?

A. Yes, sir.

Q. That the cost of the airplane cannot in the foreseeable future compete on a straight cost basis? Yes or no, Professor, if you will, if you can answer.

A. It needs qualification very badly.

Q. I was reading from your report, Professor, page 2. I don't believe there was any qualification in your report.

A. Yes, but you are lifting something out of context.

Q. Can you tell me what I am lifting out of context?

A. When we talk about a future in air cargo we are talking about something less than 1 per cent of the total amount. When we talk about something—

Q. Pardon me. Less than 1 per cent—

[fol. 193] A. Of the total movement.

Q. —of the total amount, sea and air?

A. In terms of total ton miles, but this 1 per cent, you see, is the high value packaged goods. This still leaves petroleum and all of the low value things that move in tremendous quantities by ship.

Q. Isn't it a fact that the vast majority of export freight, tons and ton miles, were of commodities that couldn't possibly be carried by airplane?

A. The vast majority, yes, sir.

Q. As far as you can see and look into the future, they never will?

A. Absolutely right.

Q. Isn't it also a fact that only a relatively few of the many thousands of commodities that are now moved in world commerce can be considered to be candidates in the foreseeable future?

A. Yes, sir, that is right.

Q. Is it true that as of exports, the potential of the aircraft and bringing to United States imports was a very small percentage of the total?

A. Oh, yes, that is absolutely right.

Q. At page 58 of your report, Professor, there is a chart printed which summarizes the total ton miles of imports [fol. 194] to the 14 customs districts of the United States from specified areas, and you show for the various areas that go to make up Latin America figures there detailed, and I think you have a total of 151 billions. Would you care to have the report in front of you? Perhaps it might make it a little easier for you.

A. It could.

At page 58, you say?

Q. Page 58. I was pointing out, if I am correct, that you have a total figure of 151 billions as representing the total movement from Latin America to the 14 customs districts.

A. When you talk about Latin America are you adding up the northern South America, southern South America, west, east South America? You have added it up. It isn't added in the table.

Q. It is approximately in excess of 151 billions?

A. Yes, sir.

Q. At page 80 of your report, Professor, you listed a total ton miles of traffic moving to those same customs districts from Latin America, which is valued in excess of 70 cents per pound, is that correct?

A. This is from Latin America to the United States?

[fol. 195] Q. Yes.

A. Right.

Q. And this gives—you arrive at a total import traffic value in excess of 70 cents per pound—of some 336 million ton miles, is that correct?

A. Assuming that this adds crossways. This is east

coast, south coast, west coast, southern North America and northern South America.

Q. Isn't it true, Professor, that according to your own survey the potential air traffic in the import trade between the United States and Latin America is only approximately one-fifth of 1 per cent of the total traffic?

A. That is at the present time, yes, sir.

Q. Is that the present or is that the potential, Professor?

A. We did this analysis of commodities that moved in 1955. So when you forecast out, why, this is something different, and this is what we are thinking about in terms of present rate.

Q. Professor Brewer, have you made any study of the future of the surface cargo, steamships, on a long haul basis?

A. Well, we have forecast this growth, roughly. We—

[fol. 196] Q. Have you made any study of it, Professor? I am talking about you personally, Professor. Have you participated in or have you made a study, as you did of international air cargo? Have you done that with the international surface cargo?

A. Well, may I clarify this just a little bit?

Q. Surely.

A. I don't like to be in the position of not answering your question directly, but when we look at these things here, we are looking at steamship movements. You see—

Q. Present or future?

A. We are looking at the present, and then the only basis of forecast is by correlating this thing to the growth in the economy, and if you will notice in here, we did this kind of correlation study and we found that there was almost perfect correlation between the growth of gross national product, for example, and growth in foreign trade. So, in forecasting out to 1975, for example, we know that at present there is something like a trillion three hundred million ton mile of cargo moved, by that time we increase this by 85 to 90 per cent.

[fol. 197] Q. My question, really, is simple, Professor. At least I intended that it should be. It is this: You have forecast future for air cargo.

A. Yes.

Q. You based that on bigger and better airplanes, more economic—

A. Yes.

Q. —in freight, at least.

A. Yes.

Q. Have you given any consideration to more economic ships in the future?

A. We have given some consideration.

Q. Will you point in your report to where that consideration was given?

A. No, I cannot point to it in this particular report. We have done that in another report we are working on at the moment.

Q. It is not taken into consideration in this report?

A. No, sir, we haven't.

Q. Is it true, Professor, that accurate data as to historical trends in the United States air cargo movement is deceptive and difficult to interpret?

A. It is very difficult to interpret.

[fol. 198] Q. Is it not also true, Professor, that steamship rates on quantity movements are far below attainable cost for moving freight by air in the foreseeable future?

A. Yes, way below.

Q. Is it not also the fact, Professor, that intense competition between air cargo carriers will develop as more of these planes become available?

A. It will depend on what areas of the world you are talking about.

Q. It will develop in some areas.

A. Oh, my, yes. We see intense competition developing right now.

Q. Isn't it true that there are many factors that will hold back rapid development of air cargo movements in addition to the right kind of airplane?

A. We see this is one of the major limiting factors in the potential growth, development of terminals, airports.

Q. So there are other factors in addition to getting the right kind of airplane?

A. Oh, yes, my, yes.

Q. I believe on direct examination, Professor, you stated, and if I am wrong, you correct me, that the international

[fol. 199] forecast presented a rosier future for air cargo than the domestic forecast, and I would like you to be a little more specific, if you can.

A. I would like to explain that because it isn't understood. When we look at movement, we see one of the plain advantages of the speed of the airplane in terms of distance. The greater the distance the greater the advantage, obviously. So that when we look at a forecast and we reduce these things to a ton mile basis, to get it down to a common denominator, why, we are looking at these distance factors, and where we talk about domestic movement, and maybe we can talk about an average length of haul of, perhaps, a thousand miles, we look at an average length of haul in the international market of 2,000, 2,500, 3,000. For the purpose of explanation, let us look at 2,000 miles so that if we move one ton of cargo 1,000 miles, why, you have 1,000 ton miles. If you move that same ton of cargo 2,000 miles, you have 2,000 ton miles. So that we say, in terms of ton mile growth, we see a more rapid acceleration of that growth simply because the distance factor is somewhat greater.

Q. Don't you run into cost factors on the short as distinguished from the long haul?

[fol. 200] A. Well, yes, and once again, in the—historically, you see, the airplane has been a relatively short haul carrier. So your extremely short haul costs are considerably than they are in the longer haul in the domestic market. In the international market distance has been especially a limiting factor because the carriers of the past or airplanes in the past had not been able to fly sufficient range to get over the water. They had to either stop at an island some place to refuel or they had to leave off payload in order to carry enough gasoline to get over there. These airplanes coming out in the future are long range so they can fly non-stop these distances with full payload.

Q. Perhaps I didn't make my question clear. What I was talking about is the cost to the shipper, as distinguished from the short to the long haul. It is very expensive, for instance, to ship a commodity that could move, forgetting about emergency shipments now, from New York to Valparaiso by steamship than it would be by air? It would be

uneconomical to do so, would it not, if there was no emergency involved?

A. I think we have to define terms. It isn't a question that I could answer yes or no.

[fol. 201] Q. Are you familiar with rates charged by air carriers for freight moved from, say, the U.S. Atlantic ports down the west coast of South America as contrasted with steamship rates?

A. No, sir. No, this isn't anything that we have looked at.

Q. And I think in answer to one of Mr. McConnell's questions on direct examination you said you made no particular study or concentration on the west coast of South America?

A. That is correct.

Q. I think you testified, Professor, that a turbine aircraft may be more economical in carrying cargo than in carrying passengers in about 1961 or 1965, is that correct?

A. No, sir. I said, I suggested that this would be out, maybe, in 1964, 1965, something like that. I don't think it is going to happen that fast, although it might, I mean.

Q. You just don't know? It could possibly happen?

A. In 1961, 1962?

Q. Yes.

A. Oh, yes, if people got the orders in.

[fol. 202] Q. What aircraft particularly were you referring to, Professor? Did you have anything particular in mind, any particular aircraft?

A. The things that we have analyzed in detail are such things as the Boeing—if you want the commercial version, it is called the Boeing 735, another that is being operated by the military at the moment.

Q. I was talking of commercial.

A. Yes. That is the designation of it, 735. Douglas has a similar airplane. Convair has a similar airplane. I am told, but not my knowledge, that Convair has a Convair C-34 that is being offered to the operators at the moment. There are a number of different airplanes.

Q. They are on the drawing boards at present?

A. I would say that they are more than on the drawing boards.

Q. Just what status do they have at the present time, best you can tell us?

A. Airplanes are born in families, as a general proposition, and the airplane that Boeing, for example, is flying, 707, which we must forget, just because it has in operation-

Q. That is passenger.

[fol. 203] A. Well, there are several versions of this thing. The one that is in operation at the moment is called 707-20, and it is a relatively small airplane. Pan American, for example, will take delivery of what they call the larger intercontinental version, called 320, within the next few months, and it is this larger intercontinental version that Boeing Company is talking about putting larger doors in, increasing the floor strength, and this airplane will lift 50 tons of cargo at a time.

[fol. 204] Q. And you say Boeing is talking about doing that?

A. They have offered them to the operators.

Q. Who have they offered them to, do you know, Professor?

A. Well, I am not qualified to testify to this because it would be purely hearsay. I have talked to their salesmen. They tell me that they have talked to Pan American, they have talked to Flying Tigers, they have talked to most of the operators that they think are vitally interested in cargo.

Q. This is not the plane, however, that you are talking about that can operate at costs of 4 cents a ton-mile?

A. Yes, sir, it is.

Q. It is.

A. Yes, sir.

Q. With regard to your testimony on this 4 cents, that on long-range turbine aircraft there will be costs of 4 cents a ton-mile, is this the all-out costs conformable to a shipping rate?

A. No, this is direct operating costs that we are talking about.

Q. Just direct operating costs?

[fol. 205] A. Just direct operating costs.

Q. It doesn't include loading or unloading or any of the other costs?

A. No, these are direct costs.

Q. Professor, you listed certain factors for Mr. Metcalf that might induce or incline a shipper to choose air transportation. Can you tell us what factors there are that might lead a shipper to choose surface or sea transportation?

A. Yes. Costs primarily.

Q. That is a big factor, is it not?

A. That is a big factor.

Q. In view of the big differential?

A. If you are going to move freight in large quantities, this is the big thing. If you are moving package freight, this is something else.

Q. If you are moving package freight, Professor, if you are in no hurry, there is no emergency, isn't it more economical to move it by sea?

A. By all means. There is just no question about it.

Q. Can you name any other factors, Professor, that might incline a shipper towards sea rather than air?

[fol. 206] A. I am sure there are many.

Q. They just don't come to mind.

A. I don't know what they are offhand. I think that maybe some people might like to keep their inventory tied up for weeks at a time, for example.

Q. Professor, I understand the purpose of your report to be setting forth what could be the potential growth of air cargo transportation over the next six or seven years; is that correct?

A. I would have to answer that no, if I were asked to answer yes or no.

Q. What is the purpose of your report?

A. To forecast what is obtainable.

Q. What is obtainable?

A. What we think is going to happen in this field.

Q. It is a prediction?

A. It is a forecast.

Q. This was made at the request of the Boeing Airplane Company?

A. We had a contract from the Boeing Airplane Company to do this study. We contract with many, many firms to do studies of this nature.

[fol. 207] Q. Is it a fair summary of your report, Professor, that you first state the volume of U. S. imports and exports in ton-miles as being roughly one trillion ton-miles?

A. Something like this, yes.

Q. Per year?

A. Per year.

Q. And then you assume that commodities having a value of 70 cents per pound can stand to pay for air movement; is that correct?

A. That is not quite correct, no.

Q. Could you correct me on that?

A. Yes, sure. I would be delighted to.

When we looked at values of commodities, we were looking at gross weights, and we were dividing these gross weights into the values that were given to us by the Department of Census.

Well, in so doing we had to say to ourselves: Well, inasmuch as these are gross weights, they include weight of packaging. If you were to move these same items by air you would probably have a much lighter pack, and we looked at studies that the Department of Commerce and other people had made and found out that these gross [fol. 208] weights inflated shipping weights by as much as 30 per cent.

We also looked at the rising spiral of inflation somewhat realistically and said that prices are going up, that by 1965 we will have some inflation. If we strip this packaging off of these things, this 70-cent value that we are talking about becomes a value of approximately a dollar a pound.

This isn't really scientific because you are talking about thousands of items. If you analyze it one by one you might come up with an average of something more than that or something a little less, but it is about a dollar a pound.

Q. Just how did you arrive at this figure, Professor, the 70 cents or the dollar per pound? What mechanics did you go through? Was it by a sampling process?

A. The Department of Commerce—I am not sure that we documented this. The Department of Commerce had a major study on the extent to which packaging inflated weights in the ocean shipping industry. This was a factor.

And, if we can use a figure of 20 per cent, which is a median type figure, why we can say that 100 pounds of material, [fol. 209] shipping weight, becomes 120 pounds.

So that, if we divide this into the total value of the thing, you see, the shipping weight tends to deflate the value. So that we had to throw this factor in there.

Then we had to look at average increases of price over a period of the last six or seven years, and we indicated that there would be some increases in price in the next few years. And this is the way we arrived at it.

Q. At the 70 cents?

A. Well, we determined that this 70 cents was actually about a dollar a pound we are talking about.

Q. That is what I want to determine, Professor, if you can tell us. Just precisely how did you arrive at the 70 cents or the dollar? You do mention the 70 cents per pound as possible potential candidates for air movement, anything 70 cents or over.

A. Can we talk about a dollar?

Q. May I ask, Professor, one question? Why don't we talk about 70 cents? I just want to get clear in my own mind. You do in your report speak of the 70-cents-per-[fol. 210] pound item as being a possible potential candidate for air movement. I don't understand the objection to the 70 cents. I am willing to go to the dollar, but I would like to understand why.

A. Well, perhaps I should explain it again. When you look at shipping weights in air and sea commerce, you will admit as a shipping man you have to put a lot heavier pack for ship movement than you do in air movement.

Q. You may or may not, Professor.

A. So that the added weight tends to—and of necessity we have to deal in broad averages when you are looking at the total world movement. This tends to deflate the actual value of the material because of the added weight.

So we are talking about something that has to be on an average more than 70 cents, and the present time it is probably—we thought in terms of this being 90 cents at the present time and a dollar a pound the actual value of the material in 1965. This is what the shipper looks at, and he says—and once again we have to—you can criticize me

for being too general when you want to get down to specific [fol. 211] cases, but I have done work for a very substantial number of shippers as a freight traffic consultant, and we know that their average distribution cost, their average freight cost runs from, oh, values of one per cent of the value of the product up to 50 per cent of the value of the product.

Q. Believe me, Professor, I don't mean to be critical with you at all. I am trying to understand this. This 70-cent figure you use, or take your dollar figure, that is a more-or-less figure; it could be off. It is a rough approximation, the best one you could make in this difficult area?

A. That's right.

Q. If it was off, say, 5 per cent one way or the other, what effect would that have on the forecast you made, on the possible potential candidate items for air movement? It would have a very great effect, would it not? If you moved that 70 cents one way or another by, say, 5 cents, that would affect your prediction, would it not?

A. I don't think so, not at this moment of time. It might have at that time. But we have decided that there is so much potential in self-generated traffic in air that wasn't [fol. 212] even considered in here that these things may be way low.

Q. Quite apart from the things that you did not consider, Professor, it would make a difference. I am asking you to consider the things that you considered at that time. Following the formula that you—

A. You see, the only things we looked at here were the things that were moving by ship that were possibly potential, and—

Q. I want you to keep looking at that, Professor.

A. We didn't look at anything that was moving by air or anything that the aircraft was generating.

Q. I want you to keep looking at what you were looking at, Professor.

A. Fine.

Q. If your 70 cents were 65 or 75, that would have a major effect on the prediction that you made.

A. I am not sure that it would make a major difference because we—

Q. How much of an effect would it have? Could you tell us?

A. We saw that the potential was so tremendously vast, and the things we were predicting for the future were [fol. 213] so very small as compared to that, that if we are talking about a potential of 60 billion ton-miles or some such matter and we are only predicting an achievable of two billion, you have to throw these factors into it.

Q. We can agree it would affect your prediction?

A. If we were off 10 per cent and we say that we thought that the potential was 60 billion, and we are off 10 per cent, this means that the potential is only 54 billion. Out of that we thought that the achievable that is in this area was in the ability of the air carrier to absorb or develop additional traffic. It had nothing to do with the potential particularly.

Q. Is it a fact, Professor, that your ultimate conclusion is that between one and 2 per cent of the total traffic might be called an air potential, given the right circumstances?

A. That is what we said, yes.

Q. And by the right circumstances—I think we have been over that—that is, given the right plane, the right airports, right terminal facilities and all the other factors that [fol. 214] enter into air cargo movement in the future.

A. If they could possibly achieve this 2 per cent, why, we would be talking about a total movement in excess of 100 billion ton-miles by 1970 and we are predicting something around 30 or 40 billion ton-miles.

Q. But still only 2 per cent at the rosiest?

A. The rosiest is 2 per cent. We are thinking in terms of achievement in terms of 7/10 of one per cent.

Q. Professor Brewer, is it your belief that in the foreseeable future this one per cent will come about?

A. No, sir. I have forecast to 1975, and at that time I am looking at 7/10 of one per cent.

Q. Professor, do you know whether or not your report has been used by Boeing in any of its sales promotions? Has it been distributed to customers, potential or otherwise?

A. Well, my recollection is that they have had requests for over a thousand copies of this report. It is the kind

of report that would be of interest to customers or potential customers.

Mr. McKay: That is all.

. . . . . .

[fol. 215] Redirect examination.

By Mr. McConnell:

. . . . . .

[fol. 225] By the Court:

Q. My recollection is that you said that your forecast based upon your studies is that, looking into 1975, there will be about 8 billion dollars revenue by the airplane companies and of that 50 per cent you estimate would be from cargo.

A. Yes, sir.

Q. Do you have any figures or have you been able to determine what percentage of the total tonnage that is now, say, imported into the country is represented by such bulk commodities as oil and ore and lumber perhaps?

A. We find that of the total tonnage moved in and out something less than 10 per cent is what we call a dry freight package freight, and the rest of it is bulk, when [fol. 226] we talk about ton-miles.

Q. So it roughly is 90 per cent of this bulk merchandise?

A. Yes, sir, on a ton-mile basis.

The Court: Thank you.

Mr. McKay.

Recross examination.

By Mr. McKay:

Q. Professor, am I correct that the basic assumption of your report is that the higher valued merchandise is more likely to go by air? Is that your basic assumption?

A. That is one of the basic assumptions, yes, sir.

Q. What basis have you for that assumption, Professor? Do you anywhere demonstrate that assumption in your report?

A. In the international report?

Q. Yes, sir. I am trying to find out how you substantiate that.

A. I am trying to think back to this particular thing.

Q. And do you do so in your report?

A. My only answer to it has to of necessity be—

[fol. 227] Q. Pardon me?

A. My only answer to it has to of necessity be that this was demonstrated in the first part of the report which we call "Air Cargo—The Next Ten Years," where we show how much of the total traffic and what kinds of traffic moved by truck as compared with forwarders, as compared with rail carload, and so forth. So we saw that the faster means of transportation tended to move greater quantities of the high-value commodities.

Q. And you say that is substantiated in the first part of your report?

A. Yes.

Q. Could you point to where that is substantiated, Professor, in the report that is in front of you now?

A. No, sir. The part I am referring to is the one that—

Q. The Air Cargo?

A. Yes, sir.

Q. Can you point to it, Professor, if I show you a copy?

A. I will be delighted to.

(Document handed to witness.)

[fol. 228] A. This material is scattered pretty well throughout here. One of the places that we show this is that—

Q. Could you refer me to the page?

A. Page 48. We show the extent to which the motor vehicle has grown in terms of the total intercity ton-miles. We show the growth from 1939 through 1955. We show that this percentagewise has grown in terms of the total. We show that the air-carrier has grown in terms of the total. We show in other parts of the report that on an average basis motor carrier rates are considerably higher

than the rail rates and that here there is an apparent need for the faster forms of transportation and that these faster forms of transportation—the shippers are willing to pay higher rates for the faster forms of transportation for the service that they get.

Q. Steamships, Professor, also carry high-value commodities, don't they?

A. Yes, they have.

Q. So it is only where there is an emergency or a hurry to get the product from one point to another that you might use air. I know there are other factors, but the cost [fol. 229] of transportation, lack of emergency and what not would not necessitate, require or perhaps even make practical shipping by air, isn't that true, quite apart from the value of the commodity? The value of the commodity in and of itself, in other words, does not dictate to a shipper that he ship by air.

A. Well, depending upon what you mean by cost. If you talk about freight rates, you are talking about one thing. If you are talking about total cost, you are talking about something entirely different.

Q. Take either one, Professor.

A. If we compare ocean freight rates with air freight rates at the moment, why, there is little to compare. But when you start talking about savings in packaging costs, savings in inventory, savings in capital costs from having these things tied up in transit, why, we are talking about costs of an entirely different nature.

Q. Professor, isn't it a fact that your predicted growth of air cargo, namely, 4 billion dollars, as I recall it, is in part based upon your prediction of an increase in the gross national product?

[fol. 230] A. All forecasting has to be based on forecasts of economic growth.

Q. And if your prediction is correct on an increase in the gross national product, that would have a similar effect on sea cargo, would it not?

A. Oh, by all means, surely. We see direct correlation between sea cargo and gross national product.

. . . . . .

RAYMOND A. NORDEN, called as a witness on behalf of the Government, being first duly sworn, testified as follows:

Direct examination.

By Mr. Peters:

Q. Mr. Norden, will you state to the Court your occupation, please, sir?

A. I am the president of Seaboard & Western Airlines.

Q. How long have you been in this position?

A. Almost 13 years.

* * * * * * *

[fol. 232] Q. Now to get back to the Seaboard & Western certificate, under your certificate to what places do you operate.

A. We operate from New York to Gander, to Shannon in Ireland, and we serve some 19 cities in the British Isles, France, Belgium, Holland, Germany and Switzerland.

* * * * * * *

[fol. 235] Q. Turning to your practical operation as a cargo carrier, how do you set about—first, let's name it. Can we name a few of the commodities which you carry presently on your international route between the United States and Europe?

A. Well, we carry literally thousands of commodities. They come under a general classification of all kinds of manufactures and semi-manufactures, and some foodstuffs, generally processed foodstuff, not foodstuff of grain and so on, and we carry significant volumes of live animals.

Q. Have you ever considered carrying iron ore or oil?

A. No, sir. We excluded that 12 or 15 years ago from our—

Q. Do you think there is any possibility in the future there will be any such volume of carriage of these commodities by air?

A. Well, sir, I could not look that far in the future. I wouldn't plan on it.

Q. Are there various products which probably you can carry which cannot be carried for one reason or another by ships?

[fol. 236] A. (No answer.)

Q. Let me rephrase the question. You have just testified that there are certain areas of bulk commodities, oil, minerals, etc., which are carried by ship which the airplane would not be interested even in attempting to go into that particular market. Is there a market, on the other hand, which might be considered the exclusive domain of the airplane as opposed to the ship?

A. Well, I think that is a fairly elastic domain, as you have made reference to it. Certainly there exists today certain kinds of highly stylized goods and articles. Take, for example, newsreel film and so on. It has a value of only X hours of life. I would say that it certainly could be carried on a boat too but it would not be productive to ship it and spend 12 or 14 days waiting for it, not today. Perhaps it would have 20 years ago. But the quantities today are those particular items which come to one's mind would not today be significant—volumes would not today be significant.

Q. Then can you state, Mr. Norden, that in between these extremes that there is an area composed of commodities for which there is an intense competition between [fol. 237] the air and sea?

A. Yes. I would say, again, the intensity of the competition would have to be a little bit qualified. It covers the whole range, I would say, of the manufactured and semi-manufactured goods. These are very substantial elements in what might be more generally described as dry cargo, and this whole field, in my opinion, is going to be subjected to intense competition. It is a gradual, developing intensity. We have been developing it in the last 12 years. I think, certainly, in our planning, the intensity of the competition is going to become much more severe in the next two to three years.

Q. Can you state, Mr. Norden, the relative value of this in between area, these manufactured and semi-manufactured goods or dry goods, the relative value as opposed to the bulk or the tonnage shipped?

A. Well, sir, we made a number of studies in developing our material for certificate process. It is hard to average values, in my opinion, because there is such a wide

range of articles that come within the heading of manufactured or semi-manufactured goods, and one has to be a little more specific, I think in the—at least this is the way we view it in our business. For instance, there are [fol. 238] textiles which are not sold by the pound and they are not valued by the pound. They are valued by the square yard.

And one has to develop on his own initiative, as a competing company, what the weight of a square yard is of a particular textile or group of textile products in order to arrive at a value per pound. These can vary widely.

We did some work in trying to establish a sort of a reasonable yardstick on a value per pound basis in our certificate case, and, if my recollection is good, I believe that we went as low as 50 cents per pound, and that was based on 1947 and 1948 data, which we upgraded to 1951. To a 1951 basis on general economic factors that we employ.

Q. Getting into the general economic factors a little bit more, as between air cargo and ocean carrier, can you describe to us the factors which you take into consideration in going after the transportation of various products or of a given product?

A. The major factor, of course, we take into account what it costs us to carry, and we do that on the basis of ton mile at a 100 per cent load factor. That is one of the ingredients that we inject into it.

[fol. 239] Then we study the economics of, say, an industry or an industry group, an association of marketers, or importers, exporters and so on, and we study the economics of the particular product that they are dealing in. We study the value of the product; we study the present mode of transportation which, in our international business, is always primarily ocean, but it almost always involves some surface transport to inland points.

We study the cost of that surface transportation from the point of origin, say, to the port of export. We study the actual cost of a shipment in terms of the shipping company's charge for carrying from port to port, and then we study the inland transportation costs from port of entry to point of final destination, and these include, that is, charges I was speaking of, that would include such

things as loading, unloading ports, drayage, perhaps, to a rail center, or two, perhaps, if it is going by surface by long haul trucker, the final destination.

There are multiple handlings involved. There are customs and documentation charges, so on.

In the case of surface transport we find that, as articles are shipped, to interior points, they may be crossing many [fol. 240] international boundaries and we find that in such surface transport there are multiple handlings required, multiple sets of documentation and that sort of thing. So there are many additive actual bill charges to a shipment, for instance, that may be originating in an interior point in middle Europe and destined to a point in Cleveland or some such place in the United States.

Then we take into consideration, if we are at or near a point where we think that a sufficient volume of business could be attracted to air on a regular basis, we study the warehousing costs, we study the insurance charges, etc., which are not part of the direct shipment necessarily but have to be part of the structure of the exporter or importer.

When these things are added together, we then find out what we call landed cost, that is the expression we use, and this is the real charge that the customer is paying for, and this is what we are competing against in terms of price, we in the airplane business.

Q. In connection with this landed charge, are you familiar, generally, with the way a steamship company derives its charges on dry goods commodities?

A. Well, in a general way, yes.

[fol. 241] Q. Would you state?

A. Well, charges are very often on a basis of so many dollars per ton, and they might vary. I am more particularly familiar with reference to the Atlantic area than any other area.

Q. I understand.

A. Charges might vary from $25 to 40, 50, $60 per ton.

Q. What does that mean? Does that have any effect on the kind of commodity that is transported?

A. Yes, it does. It has a significant factor.

Q. What effect?

A. Because those charges are assessed in many cases

on the basis of weight or measurement and what would appear at a very rough glance to be a price with which one might say he could never compete, that is, an airplane could never compete, when it applies to a particular product, the density of the article in question is such that it does not qualify for paying for just one ton.

I believe in the Atlantic conference—at least in the Atlantic conference—a ton, for rating purposes, is equal to 40 cubic feet, and the ton of which I speak if a long ton, that is, 1,000 kilos, and if you do the arithmetic on it, [fol. 242] you will find that every pound has to weight 56—every cubic foot has to weigh 56 pounds, and this is pretty generally the area of things like coal, and I am—some of the ores, anyway, that range in that area of having a density of that type, but there are many, many items in the manufactured and semi-manufactured field, literally thousands of them, that do not qualify on the basis of poundage for the simple ton charge. For instance, the textile business is one of our very big fields. The density of textiles, in clothing and footwear and that sort of thing, taken as a sort of composite group, would be such that it would take four to five times the quoted tonnage rate if you were to move a full ton of them because they would occupy about four or five times as many cubic feet as is permissible for the long ton.

Q. When you are calculating for a product, the transport of a particular product, do you take into consideration the actual price it will be then to the shipper?

A. Oh, yes.

Q. Rather than the $40?

A. Yes.

Q. That you gave?

[fol. 243] A. Yes, and actually, when we make the studies on an industry basis or an association basis, as we have done, they examine the files, they do the examination, and they tell us and so on.

Q. You testified a moment ago that the airplane is not competing against a steamship rate as such but against the landed charge. Do we take from that that the actual steamship rate is not so particularly important?

A. Well, it doesn't have the import that one would attribute to it if one hadn't made a real examination of it.

To put it another way, I think generally speaking, in the air industry, the large part of the air industry has not, in prior years, studied and determined the more limited importance which we attribute to the low ocean shipping rate as such.

Q. What is your recommendation along that line? What is your suggestion?

A. My suggestion?

Q. What is your opinion with respect to this more or less oversight?

A. Well, suggestion along the line of—

Q. Yes, where is the error? What is the basis of this error?

[fol. 244] A. I think it is one that has not been made consciously. It is just the overall impact. Even people in trade, even traffic managers themselves, have assumed, quite arbitrarily, well, the airplane that they—50 cents a pound to fly freight from New York to Europe, this couldn't possibly be a good idea for him because he could get it shipped for $50 a ton, if he had it to ship, and it is the wide variance between air freight rates, as we have known them, and shipping rates, as we know them, that has been so startling that people really haven't thought it was worthwhile examining, and it isn't until you examine into it that you find a good part of the trade doesn't, in fact, go at $50 a ton on the surface, it goes at 150, and it goes at 200 and, in some cases, $250 a ton.

This immediately narrows the gap between the surface ship, in the field of commodities to which I have reference, and the airplane because the cargoes that are now being charged for at $200 a ton, and I am speaking now of a measurement ton, are not as widely separated in basic transportation charge from the air rates, many of which are in the vicinity of $800 a ton today on the Atlantic.

Q. Let us see if we can expand a little bit here in terms [fol. 245] of weight. We seem to be emphasizing, as you noticed, from the first witness the idea of weight, a ton mile. Does it appear that, as far as the ton miles carried, that the air carrier will ever take up a large share of the market measured in ton miles?

A. I could answer your question: Ton miles in our busi-

ness, as such, are an interesting statistic but that's all. We don't measure, ourselves, in terms of ton miles.

Q. What is your measurement?

A. Well, our measurement is in tons. This may be our own fault, I am speaking now of the industry; speaking internationally, but, to be truthful, we have to think, really, in terms of the tons, or pounds, kilos, or weight measurement, because we are unable to associate ton miles on any basis of what the international air carriers are doing, as that would serve as an index to progress in increasing the air share of the surface ton mileage traffic. The reason is that we don't report origin, destination of traffic. It is a jealously guarded secret and the industry doesn't report it.

So if we had all the ton miles of all the international carriers, why, we would be in overlapping areas and we [fol. 246] would not—we would have just an interesting statistic, so many ton miles carried, but it wouldn't reveal—

Q. What is your yardstick?

A. We stick to the tonnage, and we so report, and the industry. For instance, on the north Atlantic, I think, there are 16 air carriers, including Seaboard, we report total tons, kilos, pounds, numbers of passengers, etc., that fly over the Atlantic, but no one reports how far over the Atlantic they flew, or where they got off or where they got on.

Q. Now, in connection with this measure of pounds which you fly as measured to the total amount of pounds or tons carried by ships and the total pounds carried by air, that figure is ridiculously low, is it not?

A. Yes, sir, it certainly is.

Q. Are we using the proper—are we using the proper measurement in using this figure of weight to measure the competitive effect between air and sea?

A. No, I would say not. I think the competitive effect comes into revenue.

Q. In revenues?

A. Yes.

[fol. 247] Q. How do you go about measuring the competitive effect in connection with revenues, or what is your analysis of the competitive effect as measured in terms of revenue between air carrier and ocean carrier?

A. Well, I could say, generally, that the competitive effect will be—the adverse competitive effect on steamship operators would be disproportionate to the effect one might deduce by examining the tonnage loss from surface to air. I have not made a study of that.

Q. Well, let's see. This area of competition in dry goods, which you have already set forth, is measured in terms of high value, is it not?

A. Yes, and my interpretation of high value is, as I understand it, when I say yes, is the kind of values that have been talked about, 50, 70 cents a pound, that sort of thing, and in our view these are high values as compared to the values of the bulk, of the bulk goods, which are the ores and the oils, and grains, and that sort of very heavy cargo, which are carried by the bulk carriers.

Q. Can you tell us whether or not in your opinion the shipper is interested in the dry goods market—

A. Dry cargo market.

[fol. 248] Q. Dry cargo market.

A. Yes, very definitely.

Q. Would you have any idea as to what relation that plays to the bulk market?

A. No, sir, I don't, because when we first started our studies, 1946, we just eliminated the chorse of looking into that volume of bulk cargo carriage. I just don't know what it is. We have never looked at anything except what I generally refer to as the dry cargo potential.

Q. Drawing your attention now, Mr. Norden, to the development of aircraft—

The Court: Excuse me. If this is a new subject, maybe it would be appropriate to adjourn now for lunch.

Mr. Peters: All right. Thank you.

The Court: 2:15. If it makes any difference, there is a judges' meeting today at 4, so we will have to adjourn at 4 o'clock.

(Recess until 2:15 P.M.)

[fol. 249] Afternoon Session

2:15 P.M.

RAYMOND A. NORDEN, resumed.

Direct examination (continued).

By Mr. Peters:

Q. Mr. Norden, will you please state for the Court the range of products which Seaboard and Western carries in air cargo transportation?

A. Yes, sir, if I may refer to a listing that I made.

Q. Yes.

A. Carried live animals, foodstuff, furs, skins, leather goods, tobaccos, essential oils, textiles, clothing, footwear, silverware, cutlery, aircraft, aircraft engines, aircraft parts, surface vehicles and surface vehicle parts, heavy machinery and heavy machinery parts, business and office equipment, electrical equipment and electrical appliances, machines and machine tools, hand tools, ceramics and glassware, synthetic stones, chemicals, drugs, pharmaceuticals, cosmetics, newspapers, scientific instruments, dental and surgical instruments, musical instruments, radios, phonographs, phonograph records, microscopes, spectroscopes, optical goods, newsreel films, watches, clocks, jewelry, toys, handbags, furniture, household goods and personal effects. [fol. 250] Q. You had reference back there to surface vehicles. What does that term include?

A. Well, that includes all kinds of surface vehicles, whether they be automobiles, trucks, self-propelled ground power units, tow trucks, that sort of thing, the kind of vehicles you find in warehousing operations.

The Court: Excuse me. What was the total tonnage, the payload? How much does that weigh? In your Super Constellation what is the maximum load you carry?

The Witness: 18 tons, sir.

By Mr. Peters:

Q. Among this range of products which do you carry in significant proportion?

Mr. McKay: Your Honor, I would like counsel to explain what he means by "significant proportion."

The Court: Well, somebody is going to explain it. Let's try this answer first.

Do you understand the question?

The Witness: Yes, I understand the question.

The Court: What products or what merchandise?

The Witness: As I mentioned earlier, textiles is a product of which we are very much aware. Textiles, cloth and [fol. 251] clothing, that general group we carry in what we consider to be substantial volume.

The Court: In other words, you meant by "significant" substantial.

The Witness: Yes, sir.

By Mr. Peters:

Q. Can you state the significance in terms of dollar value or, if not in dollar value, by pound value? I mean in terms of number of pounds carried, say.

A. Yes, I could more easily state it that way. I would say our volume—and I am speaking now of Seaboard's volume, not the total volume in the air—in that group approximates 600,000 pounds a year.

Q. Of each of these products?

A. Well, this general group of which I spoke. Household furniture and personal effects I would say is very close to a million pounds a year that we carry.

Q. Are these same products carried by the ocean carriers?

A. Oh, yes.

[fol. 252] Q. Who carried the products before you started to carry them?

A. Well, in our business there were only boats between the United States and Europe.

Q. Could you state to us, Mr. Norden, some of the advantages about air cargo transport over ocean carriage?

A. I think the biggest single factor is the factor of time and that in itself produces a number of advantages. With the shorter transit time, let us say, a day or two days, compared to 14 to 18 days, in our area, it makes possible reduction in warehousing facilities. These are physical properties that have to be maintained, leased, owned and

depreciated and have with them, have associated with them, labor cost for personnel to run them and so on.

Reduction in time reduces the need for warehousing facilities.

The reduction in time results in a significant reduction in the dollar value tied up in the pipeline, the importer's or exporter's dollar which is tied up in his surface moving pipeline for a greater number of days. This can reflect itself in his ability, by using air, of doing many times the [fol. 253] volume of business that he can do if he uses surface with the same capital. Also reduces the cost of capital, cost of interest of the capital that is tied up, and so on, for the longer period.

Another advantage is the question of insurances, which must be borne somewhere, either by the exporter or the importer. Insurance by air is, as the air has developed—is significantly lower than the cost of insurance by ocean primarily due to the pilferage problems, I would say, on the order of—ocean shipment methods would carry insurance rates that are four to five times as high as air rates.

Those are some of the advantages that come immediately to mind.

The Court: You explained the different advantages that flow from the saving in time. Are there any other advantages like time that you can relate?

The Witness: Yes, it is a very significant matter, which is the ability of the customer to measure its market more nearly at the time that his market is turning from a projection into a reality.

With the use of air as a method of distribution, the customer can, as a regular basis of distribution, the customer can tailor his requirements more nearly to the conditions [fol. 254] as they actually pertain, more or less of a concept that it is easier to predict tomorrow's weather than it is the weather a month from tomorrow or six months from tomorrow.

Those are significant, especially in terms of wholesale and retail trade, because they have to project their requirements to a future market and they run two risks, which are calculated risks, one, when the market actually takes place, they may have considerably less on hand than

they could sell and, two, they could have much more on hand of the wrong kind of article and are unable to sell, which result in post-season sales, and all that sort of thing, where they attempt to just get their actual cost out of the goods that are excess to the market requirements.

Q. Mr. Norden, I would like to turn your attention a little bit to the future. I believe you have referred to a recent period of the history of the air cargo transportation as the developmental period. What are the prospects for round the corner?

A. Well, I am very bullish. I think the prospects of the next—of the period in from two or three to five years are very substantially greater than, I think, anyone has ever envisioned.

[fol. 255] Q. Would you state the basis of this opinion?

A. Well, my basis for it is that all the years that we have been developing this air cargo to attempt to make it into a business we have been fighting the fact that we have to use vehicles that were not intended, were not designed and, therefore, have none of the features that make them really desirable or adaptable for the carriage of cargoes. This has been a period in which we have had to make do the vehicles that result as a by-product of the passenger airplane, we will say.

Many of the airplanes that had been in prior years used in the airplane freight business were in fact just converted from passenger airplanes into freight, and whilst they did a job of carrying, they did so at a very high cost. This is expressed in various terms but most commonly in terms of ton mile cost.

Q. In a comparison of your present airplane with the new airplane, in respect to this cost per ton mile, what is your present cost on your Constellations?

A. On our routes our direct costs, I will put it on that basis for comparability, would be between 10 and 11 cents per ton mile, per available ton mile, and our indirect costs [fol. 256] would be about 5 cents, something slightly less than 50 per cent of our direct costs per available ton mile.

Q. So that the projected cost per ton mile will be reduced—what would be reduced?

A. You mean with the kind of airplanes which the industry is examining today?

Q. Yes.

A. And so on?

Q. Yes.

A. Well, I think there is a range of airplanes, certainly three or four, five, that we have examined in considerable detail and, broadly speaking, they all can be operated at a direct cost of between three and a half and four cents per available ton mile.

Q. What do you predict to be the significant result of this reduction in cost per ton mile?

A. Well, the big significance is, of course, that the air carriers can, with a vehicle that operates at these much lower costs, can set in a rate structure that is considerably lower than the one that pertains today with the vehicles we operate today, and with the lowered rate structure we have no doubt at all about the penetration that can [fol. 257] be made in surface moving cargoes.

Q. I believe in response to the Court's question awhile ago you stated that the available tonnage of your present airplane was around 18 tons?

A. Yes, sir, on our routes we can operate—

Q. Can you project a little bit into these airplanes which you refer to as their tonnage capacity?

A. Yes, sir, the airplane which we have examined we have examined on the basis of putting them in operation on our routes, and on our routes, the different airplanes will carry from about 34 tons to 50 tons, or slightly over 50 tons, depending on which airplane is in question.

Mr. Peters: You may examine.

[fol. 258] Cross examination.

By Mr. McKay:

Q. Mr. Norden, how long has Seaboard & Western been in business?

A. Since the fall of 1946, and our first revenue flight was in May of 1947.

Q. Approximately 12 to 13 years.

A. Yes, that's right.

Q. I think you and Mr. Peters referred to your operation as being in a development stage?

A. Yes, sir, that's true.

Q. Would you regard it, Mr. Norden, as being in the experimental stage?

A. The first nine years, I would say, we were in the experimental stage. I don't regard it as being in the experimental stage any longer. We are in the development stage now.

Q. You are aware of the fact, however, are you not, Mr. Norden, that the Civil Aeronautics Board just a month or two ago has said that "scheduled trans-Atlantic air freight transportation is in the experimental stage"?

A. I believe they said that.

Q. You disagree with them?

A. Yes, sir.

[fol. 259] Q. When you say you believe they said that, are you familiar with the Board's decision in Seaboard & Western Airlines' application, the decision dated April 7, 1959?

A. Very much so.

Q. You have no doubt that they did say it. I can show it to you if you have.

A. Oh, I didn't mean to—yes, I know they said it.

Q. Thank you. Mr. Norden, where does Seaboard & Western derive their income from? What are the various sources of their income? Breaking down this general cargo, have you any passenger business at all?

A. We are not authorized and never have been to engage in the carriage of passengers. We have—

Q. Pardon me.

A. I have to amplify the answer.

Q. Surely.

A. We have from time to time and in very small volumes carried passengers pursuant to special exemptions which the Board has from time to time granted. For instance, in the movement of some of the what is generally termed refugee movements and that sort of thing, we have en-

[fol. 260] gaged in very limited, not significant volumes of that pursuant, in each case, to special exemptions.

Q. Could you subdivide, if you will, the income? In other

words, do you carry cargo for the military under contract to the military?

A. Under contract? You mean as contract carriers?

Q. Do you carry military cargo, Mr. Norden?

A. Yes.

Q. And do you do that under contract with the Government?

A. Oh, we do it under charter. Is that what you mean?

Q. Charter?

A. Yes.

Q. Is that the only way you do it, Mr. Norden?

A. That's all.

Q. And then you have commercial cargo.

A. We have commercial cargo.

Q. Have you any other sources of income?

A. Yes.

Q. What are they?

A. We have for many years engaged in what is termed [fol. 261] wet lease operation for other airlines.

Q. You lease your planes to other airlines?

A. Wet lease.

Q. Would you please define that term for me?

A. Yes, sir. Perhaps a better definition can be found in the CAB orders, but roughly it means that you operate the airplane, you furnish the gas and oil, the maintenance, the flight crews, all the enroute services and so on to the vehicle for which you are paid a price. The airline to whom you so lease the property and facilities furnishes all the traffic, whether it be cargo or passengers and so on.

Our wet lease operations have been primarily in the passenger field, to other airlines on the North Atlantic.

Q. Do you lease these planes under a wet lease, as you call it, Mr. Norden, because of a lack of cargo business of Seaboard & Western?

A. I can't subscribe to your terminology.

Q. Has Seaboard & Western an excess of planes?

A. No, sir.

Q. Could you explain to us, Mr. Norden, why you wet lease your planes rather than use them in the air cargo business? Is it more profitable to wet lease them than [fol. 262] carry air cargo? Or what is the reason? That is what I am trying to get at.

A. In a development business such as we are in and have been in it is necessary to maintain a certain structure in a far-flung route system. In order to give proper service to your essential business, which in Seaboard's case is freight, to do so in a developing business you can take two roads: You can amass a great amount of capital and keep spending your capital and concentrate solely on the development of the freight, taking the losses as they come as a part of your capital cost of investment; or, if you don't have that very substantial volume of capital, you can engage in other activities which are economic and which contribute, make a significant contribution to the burden, the cost, the size of the structure, minimum size of structure that is necessary in order to service your basic business. That is why we have engaged in wet lease operations.

Q. Certainly, Mr. Norden, you would not, as a prudent business man, lease, wet lease or otherwise, your planes if you had air cargo to move, would you?

[fol. 263] A. That's correct.

Q. If you had use of those planes to move your air cargo?

A. That's correct.

Q. In fact, Mr. Norden, isn't it true that Seaboard & Western at times has found it necessary to cancel flights and to cancel various points of call because of a lack of air cargo?

A. I think that's true. I think it is generally true in the airplane business.

The Court: Even passenger planes?

The Witness: Oh, yes, certainly.

By Mr. McKay:

Q. How frequently have you found it necessary to cancel flights or points of call because of a lack of air cargo? I know it is hard to give a precise figure, but can you say it occurs frequently, occasionally or very seldom?

A. I would say that up until the last year it has occurred occasionally. During the last year it has occurred to a much lesser degree.

Q. And prior to that?

A. To a more substantial degree.

Q. Is that what occasioned the Civil Aeronautics Board [fol. 264] to call Seaboard & Western's performance a poor performance in this decision that I have referred to?

A. I don't know.

Mr. Peters: This witness cannot know what is in the mind of the Civil Aeronautics Board.

Mr. McKay: He is familiar with the application that the company made.

The Court: You did ask him as to whether he knew the reason why somebody said something. They might have been mad at him.

By Mr. McKay:

Q. Do you agree with the Civil Aeronautics Board when they state that Seaboard & Western's performance has been a poor one?

A. Sir, I don't know what they are talking about there. If you will let me read it, I will refresh myself. I haven't looked at that.

Q. Have you seen that before?

A. Oh, sure. I was interested in the end of it.

(Document handed to witness.)

Q. To save you time, Mr. Norden, as far as I am concerned, you may read the whole decision, but I am referring [fol. 265] only to that one sentence, and I would like to know whether you agree with their description of Seaboard & Western's performance or not.

A. Well, I think what they were referring to there was a particular period of time. If I recall correctly, it was a period of about two months or something like that.

Q. It is your understanding that—

A. Occurring in 1958, and that—

Q. It is your understanding with reference to this Board's decision that, when they characterized Seaboard & Western's performance as an poor one, they were referring to only two months in early 1958?

A. Yes, I believe so.

Q. I see. Let us take the year 1957, Mr. Norden. Isn't it a fact that Seaboard & Western lost $401,000?

A. Whatever we lost is in the annual statement, sir.

Q. You don't know?
A. I haven't looked at it lately.
Q. Do you know?
A. Somewhere like that, yes.
Q. Approximately.
[fol. 266] A. That's right.
Q. Isn't it a fact that Seaboard & Western ended the year 1958 by incurring substantial operating losses?
A. Yes, sir.
Q. Staying with the year 1957, Mr. Norden, what percentage of Seaboard & Western's business was with the military, approximately?
A. I would have to refresh myself with an annual report.
Q. If I were to tell you that your annual report shows it was 47 per cent, would that refresh your recollection?
A. If it is in the annual report, it is accurate.
Q. Do you know what percentage of Seaboard & Western's business in 1957 was commercial cargo?
A. As a percentage?
Q. Yes, sir.
A. I don't recall whether we so described it in the annual report.
Q. If I were to say that it was approximately 30 per cent, would that be roughly accurate?
[fol. 267] A. If it is in the annual report, it is absolutely accurate.

The Court: That leaves me in the dark.
Mr. McKay: I know, your Honor. We will obtain a copy.

By the Court:

Q. Can't you say now from your recollection as president approximately what was the revenue, your gross revenue from commercial cargo?
A. Well, sir, this is a statistic which, if I may explain why, I can tell you—
Q. The answer is no, you can't say?
A. I can't say with preciseness related to the percentage figures because this is a statistic which some years ago the SEC insisted we put in in an offering prospectus, and it is a constructed statistic, and they have asked in 10-Ks

and other required reporting forms that we continue to do it, and it became a habit. It really has no significance in the management of the company and in the affairs of the company. It is a statistic, and we have been putting it in because it was required by the SEC.

Q. You are not able to give an estimate as president of the company as to what percentage of your revenue [fol. 268] came from commercial cargo?

A. I don't believe that is—I don't believe that is the percentage statistic.

By Mr. McKay:

Q. What would you say, Mr. Norden, is your best estimate as president of the company?

A. We did about a little over $7 million in cargo in 1957.

Q. Military and civilian or just civilian?

A. Both combined in cargo. I don't believe our military cargo in 1957 was very significant. I doubt if it was a million dollars.

The Court: Well, you just told the lawyer that your military cargo represented about 47 per cent of your revenue.

The Witness: I don't believe that is what the statistic—that is a conclusion, I believe, sir. I believe that refers to total revenues, and in 1957 we did many millions of dollars in revenues for the military in the carriage of dependent personnel across the Atlantic in both directions.

* * * * * * * *

[fol. 269] Q. Are you familiar, Mr. Norden, with the fact that four domestic cargo carriers have described their condition as critical and have applied to the Civil Aeronautics Board for a subsidy?

A. Yes, sir.

Q. One of the witnesses here yesterday, Mr. Giles of Riddle, explaining his company's critical condition, described it as due to mismanagement. Would you say that [fol. 270] your losses have been incurred by reason of mismanagement?

A. No, sir.

By the Court:

Q. Prior to getting your certificate, you never got any subsidies from the Government, did you?

A. No, sir, we get no subsidy from the Government even now, sir.

Q. Even now, carrying mail?

A. No, sir. That green order that counsel referred to specifically sets it forth; not eligible.

* * * * * * *

[fol. 271] Q. What do you carry for the military, Mr. Norden?

A. All manner of routine resupply items that military forces need in the field and routine—

Q. Could you give us some examples, Mr. Norden?

A. Sir, the best way I could cite it to you is to say that, if you went to a department store, you would see everything that we carry to the military.

Q. Do you carry household effects for the military?

A. Yes, sir. We carry everything you can buy in a drug store, everything you can buy in any bargain basement or clothing, spare parts for radios, radio equipment. Everything you could find in any general merchandise store we carry for the military as a routine resupply job.

I might say, sir, that's exactly the kind of item which the military send on Government bills of lading on ocean vessels and surface rail and truck freight. We are unique in the air business that it is grouped together and handled [fol. 271a] in the agency within which it is handled. This does not occur within the military organization in any other military department except the Air.

This kind of volume in all the statistics of rail, freight and ocean carriers is all regarded as freight. It is not distinguished from commercial shipments.

[fol. 272] Q. I inquired of you, Mr. Norden, concerning the year 1957. Can you tell the Court today what percentage of your business is with the military, and what percentage is civilian, and what percentage is leasing—whether leasing or otherwise, currently speaking.

A. Our business has undergone considerable revamping in the last year. Some very significant matters occurred.

During part of 1957—of 1958 and a month and a half of 1959, at various times; we did have a right to carry mail pursuant to an exemption. At other times court actions intervened and the order of the Board was rendered null and void for temporary periods. In those periods we did not carry mail. This inability to carry mail, even though it was temporary, caused us to shift more of our vehicles into air freight service as such. That, plus the fact that the military procurement concepts underwent another of a long series of changes last year, and the business to which I alluded a little bit ago; namely, the carriage of passengers for the military, which was a very substantial volume in almost every one of our—of the past four or five years.

Q. Seaboard Western did carry military personnel at [fol. 273] least four or five years?

A. That was pursuant to contract for carriage of passengers.

Q. You could say the Seaboard Western was very dependent on its military contract, wouldn't you?

A. Sir, Seaboard & Western is dependent on all the business that it can do.

Q. Without the military contract, on the shifting of Seaboard & Western to civilian cargo movement your losses would be much greater than they are, is that not a fact?

A. If we maintained the identical structure that we maintain, having such business, you are correct.

Q. You could always—

A. Arithmetically it could be arrived at.

Q. You could always sell off the company's planes and what not and reduce your company down to a few planes just to contain the civilian cargo, is that what you meant, if you kept the same structure, planes not necessary for the movement of military personnel and cargo?

A. It isn't only the cost of the airplane, sir. It is, for instance, the cost of maintaining equipment. These are very, very substantial to do the job properly. The main- [fol. 274] tenance, installation, all by itself, has to be a very sizable proportion to do it effectively and render service.

Mr. McKay: Will the Court bear with me for a moment?

(A pause)

Mr. McKay: That is all.

Mr. Peters: A couple of questions.

Redirect examination.

By Mr. Peters:

Q. Mr. Norden, how is the stock of Seaboard & Western distributed?

A. Well, our stock is registered and traded regularly on the American Stock Exchange. I believe we registered it, I think, in 1952. It is traded daily. We have about 4,000 shareholders in every state of the Union—perhaps in excess of that, there being so many—

The Court: I think he wanted to know how many shares were outstanding.

The Witness: Is that what you are asking?

Q. How are they distributed?

The Court: Keep your voice up so everybody can hear you.

A. You mean how many shares of stock are outstanding? [fol. 275] Q. Yes.

The Court: Yes.

A. Just short of a million shares.

Q. Do you know what the going rate of that stock is on the Exchange?

A. I think it is probably between thirteen or fourteen dollars. Somewhere like that.

Q. Do you think, Mr. Norden, that Seaboard & Western is a going outfit?

A. Yes, sir.

Q. Do you have any knowledge of whether or not Grace Line gets a subsidy from the Federal Government?

The Court: Let us get on here. Haven't shipping companies, since they started building ships, gotten something?

Mr. Peters: I suppose so. I was just going to ask the witness whether he thought- -

The Court: I know what they get. They are doing all right.

Q. How about the National—

Mr. Peters: Well, all right.

Mr. McKay: Your Honor, I am advised by my associates that we looked at the 1957 annual report of the American Stock Exchange. We haven't got a copy available.

[fol. 276] The Court: I think counsel agreed you could offer it in evidence.

Mr. McKay: I was wondering whether Mr. Norden would supply us with a copy? Ours is in the American Stock Exchange.

The Witness: Gladly.

Mr. McKay: Thank you.

Q. Do you know whether or not, Mr. Norden, Panagra lost money last year?

A. I would be guessing. I don't really know.

Q. Do you know whether or not Panagra has applied for a six million dollar subsidy?

A. Yes, I know.

Q. Would you say that was because of the mismanagement of Panagra?

A. No, sir, I would n't say that.

The Court: All right, next witness.

(Witness excused.)

Robert Stossel, called as a witness on behalf of the Government, having been first duly sworn, testified as follows:

[fol. 277] Direct examination.

By Mr. McConnell:

. . . . . .

[fol. 278] Q. Are you familiar with the developments made by Lockheed in cargo planes?

A. I think so, yes.

Q. Using the chart, could you explain to the Court what Lockheed has done in the way of payload ranges? Does Lockheed have a large cargo plane in operation at the present time?

A. Yes, Lockheed a Super Constellation in operation at the present time commercially and it has the Hercules C-130 in operation militarily.

• • • • • • • • •

[fol. 279] Q. Have you developed another plane?

A. We have developed the C-130, originally designed in California by the same people as designed the Super Constellation and then put into production in our Georgia Division and over 200 of those are now flying with U.S. Force and also with the Royal Australian Air Force.

Q. None of those planes are in commercial use at the present time?

A. None as yet, no.

Q. Can you describe in detail some of the problems which you solved when you made this plane?

A. I think one of the biggest problems, and one that we wouldn't have been able to solve, nor would, I think, anybody in the industry have been able to solve 15 years ago was the ability to have an end load airplane with a door, [fol. 280] maximum door and width of cargo compartment and still have it pressurized. That was a structural job which was almost beyond, I think, in fact beyond the state of the art 15 years ago.

Q. Is this a picture of the plane that you are referring to?

A. That is right, the picture of the back end of the plane showing the big door.

Q. What is the payload of that plane?

A. The military airplane is not on those charts, but the commercial derivative is the red line and, for international operation, which means with international equipment, etc., it is 42,000 pounds to about 2,200 statute miles.

Q. Have you gotten this plane, the Hercules, into advanced state of production, advanced state of development?

A. Yes, I think so. It is in advanced state of production, as this military version, and the commercial is in advanced state of design.

Q. What else does Lockheed have as plans for the future?

A. We also have the Super Hercules, which was announced, as a matter of fact, in Las Vegas about two weeks [fol. 281] ago, and it is shown on that chart with the designation GL, for Georgia Lockheed, 207. That airplane has been stretched both as regards increasing the length of the fuselage and as far as increasing the wing area and the fuel capacity, and it is an intercontinental type of airplane.

Q. Payload 80,000?

A. That is right, 78,000 pounds to about 1,700 miles.

Q. Part of this line, this point, is 1,500 miles?

A. That is the point at which the maximum take-off we think has been attained, and any additional fuel required to make a greater distance at that point must be loaded on at the expense of payload.

Q. In other words, this is for a flight of 6,000 miles, is that correct?

A. 6,000 is what we call the theory range of distance which it can carry a verbal message.

Q. Is this plane specifically designed for commercial cargo?

A. That plane is designed specifically for commercial military logistic support or commercial— ;

[fol. 282] Q. Commercial cargo. Are you familiar with what the other manufacturers are doing at the present time?

A. Yes, I believe we are. We try to keep up to date.

Q. What is Douglas—I don't want to get you into a competitive situation. They have made great advances, have they not?

A. Douglas is one of the manufacturers who is proposing an intercontinental air freighter, yes.

Q. Is Convair doing the same?

A. Yes.

Q. Boeing doing the same?

A. Yes.

Q. How long do you think it will be before this fleet is in actual operation in commercial cargo?

A. You mean the large airplane; the 207 type or all of these?

Q. The first is going to be the Hercules that is going to break through?

A. That is right, and that would be delivered the last part of 1960, and the Super Hercules can be delivered in the last part of 1961.

Q. By how much do you think the putting into operation [fol. 283] of the Hercules and similar planes will increase the carriage of air cargo?

A. I would have to run a check, if I may

I would judge 20 to 25 fold because of the decrease in rates which can be afforded with that airplane.

Q. That is the Super Hercules?

A. That is right.

Q. How about the Hercules that is coming in just now?

A. That is about five times. This is the estimate of one forecaster and forecasters have variations in their manner of making estimates.

* * * * * * * *

[fol. 289] Q. So that how much do you think the Super-Hercules will decrease or the Hercules family will decrease the indirect costs?

[fol. 290] A. The indirect costs, that portion or those portions attributable to documentation and loading, will be decreased by a system such as this mechanized loading, and I really think that all in all we will get our indirect costs down to about half of the present values. We estimate 2.5 cents per available ton-mile.

Q. So that would make a total ton-mile of the Hercules of about 7 cents?

A. About 8 cents or 8½ cents in the Hercules and about 6½ cents—

Q. Six and a half cents?

A. —on the Super-Hercules, yes.

Q. Ten years ago what would have been the cost of the airplanes and the operation at that time?

A. Well, 10 years ago you had the C-54, about 10 cents per ton mile.

Q. That is just the direct?

A. That is the direct.

Q. And combined with the indirect?

A. I think the indirect in that case, with the magnitude of the movement of freight, was at least 6 cents per available ton-mile, so that would have been a total operating cost, at 100 per cent load factor, of at least 16 cents per [fol. 291] ton-mile.

Q. And in that time you are now going to reduce it to around 8 cents a ton-mile?

A. And even less than that with the Super-Hercules.

Q. With the Super-Hercules?

A. Six and a half cents with the Super-Hercules compared with 16.

Q. And you feel that with these new vehicles the tonnage of air cargo carried will increase twenty-fold?

A. I think it will. According to the data which our own people have worked up, it will increase twenty to twenty-fivefold compared with the tonnage today with the DC-6As and the Super-Constellations.

. . . . . .

[fol. 359]

New York, May 18, 1959,
10.30 a.m.

. . . . . .

S. Robert Mitchell, resumed.

Cross examination.

By Mr. Mallory:

Q. Mr. Mitchell, in your long experience in the Government in your economic and statistical positions have you ever had occasion to engage in research or economic study relating to international air transportation before this case? [fol. 360] A. No, sir, not on a very extensive basis.

Q. Before we get into questions relating to specific exhibits of yours it might be helpful to put your statistics into some proper perspective. In that connection I believe you quite candidly acknowledged in your direct testimony that Exhibits 32 through 66 were not completely accurate; is that correct?

A. I don't think your word "accurate" is quite right. I don't know whether that is quite what you mean to say. I presume they were collected accurately by the Immigration

and Naturalization Service. I have no knowledge that they were incorrectly—inaccurately collected by that agency. What I have indicated in my statement is what they purport to show, but I presume they are accurate.

Q. Do you have a copy of your testimony, Mr. Mitchell?

A. Yes, I have.

Q. Would you turn to page 31 of your testimony, Mr. Mitchell.

A. Yes, sir.

Q. Question in the middle of the page, referring to the statistics:

[fol. 361] "Q. Are they completely satisfactory, Mr. Mitchell?

"A. No, they are not completely satisfactory."

Is that your testimony, Mr. Mitchell?

A. Not completely with respect to the Immigration and Naturalization statistics.

Q. All right.

A. That was a statement with respect to—

Q. That is all. I have finished my question.

A. I haven't finished explaining what my answer referred to.

Q. That is responsive to my question.

A. No. The only question was was that what you said on page 31.

Q. Would you turn to page 32 of your testimony, Mr. Mitchell?

A. Yes, sir.

Q. You were describing on page 32, I believe, Mr. Mitchell, the limitation of the OD series used by you in your statistics, were you not?

A. Yes, sir.

Q. Would you turn to page 33 of your testimony, Mr. Mitchell?

[fol. 362] A. Yes.

Q. At the bottom of that page you state, I believe, Mr. Mitchell—you may correct it if you wish now—that the coverage of INS statistics is larger than the OD series and that therefore it may slightly overstate the position of Pan American and Panagra when you use these statistics; is that correct?

A. No, sir. I submitted a correction of that sentence to all the defendants in which the word "larger" should be changed to "different" and the word "overstate" should be "affect."

Q. How does it affect the statistics, Mr. Mitchell?

A. The coverages of the two series are different. In one way it may affect it upward. In another way it may affect it downward. There are compensating effects.

Q. And does that make for complete accuracy, Mr. Mitchell?

A. The series as individually reported are accurate to the best of my knowledge and belief, yes, sir.

Q. Completely accurate?

[fol. 362a] A. To my knowledge they have been collected accurately by the CAB and the Immigration and Naturalization Service.

[fol. 363] Q. Now, on page 34 of your testimony, Mr. Mitchell, you say that the results would not be significantly different than you would get from an elaborate detail than costly study, that there may be a few percentage points either way; is that correct?

A. That was with reference to the use of both I.N.S. and CAB figures in combination with each other.

Q. You mean comparing the two?

A. No, using them together. I wouldn't say I am comparing the two, no. I am using them in conjunction with each other. If you were to prepare the statistics from one source rather than from two, where different collection procedures are used, there may be a little difference in the result because of the difference in the collection procedures.

Q. There is a difference in the collection procedures in the two series.

A. Yes, sir.

Q. Then, do you now state that to the best of your knowledge, your figures, these statistics, are completely accurate?

A. Oh, no, sir.

Q. All right. Now, let us look at your Exhibit 32 for the [fol. 364] moment, as an example. You compare their March and September figures for U.S. flight carriers; is that correct?

A. From the O.D. survey of the CAB I show March and September figures.

Q. And for the I.N.S. statistics for foreign flag carriers, you average or make a monthly average from the entire year's figures, do you not?

A. That is correct.

Q. Did you make any tests, Mr. Mitchell, to determine whether March and September are representative months for flag travel, air travel, between the United States and South America?

A. You said "flag travel"; do you mean—

Q. Air travel?

A. Did you mean U.S. flag travel?

Q. Air travel of any kind?

A. I only used March and September for the U.S. flag airlines, as is clearly shown in the exhibit.

Q. I repeat—

A. (Continuing) There are not available from the O.D. survey, except for March and September—

The Court: The question was whether you made an independent search to determine whether March and Septem-
[fol. 365] ber were the correct months to show the good average?

The Witness: It is a little hard to make a comparison when figures are not available.

The Court: The answer is no?

Q. Mr. Mitchell—

A. I will say this:—

Q. I think you have answered the question, Mr. Mitchell, and I take it your answer is that you did not make any test to determine whether March and September were representative months—

A. That is not—

Q. —for air travel between the United States and South America as a whole; is that corerct?

A. That is not completely correct.

Q. What tests did you make?

A. I could not make any test based on the O.D. survey or the CAB, but I did compare statistics for the I.N.S., for the months of March and September, with the O.D. figures for the months of March and September, and I can give you those results right here.

Q. Mr. Mitchell—

A. (Continuing) I have not completed my answer to that question.

[fol. 366] The Court: No, but so far it is not responsive. The only thing that counsel seems to be interested in is whether you made an independent search to determine whether March and September were the reasonable average months for air traffic?

A. I made some study, yes.

Q. What study did you make?

A. All right. I compared statistics from the Immigration and Naturalization Service, U.S. flag total for the year, divided by 12, which would make a monthly average, with the monthly average for the two months, which may be compared with the average for the two months of March and September.

Q. Did you compare the March and September I.N.S. statistics for foreign flag carriers with your average monthly statistic for foreign flag carriers in your GS32?

A. Yes, I did. For the—

Q. What is the result of that comparison?

A. For the months of March and September the Immigration and Naturalization figures for foreign flag traffic show an average per month between the United States and South America of 8,074 passengers.

Q. As opposed to the statement in your statistics of the [fol. 367] 7,126; is that correct?

A. That is correct.

Q. That would be a percentage of variation of roughly 10 per cent or so, wouldn't it?

A. That is correct.

Q. Again, let's use Exhibit 53 as an example, Mr. Mitchell. You compared there, as I understand it—

A. Excuse me. Did you say 53?

Q. Yes, GS53, traffic between the United States and Argentina.

A. Yes, sir.

Q. You compared there O.D. statistics for U.S. flag carriers, which showed true origin and destination, with I.N.S. statistics for foreign flag carriers, which do not

show true origin and destination necessarily; is that correct?

A. That is basically correct, yes, sir.

Q. Now, did you make any statistical studies to determine the exact extent of the variation caused by this comparison of I.N.S. statistics with O.D. survey statistics?

A. Yes, I have figures on that. They may not be right at my fingertips here. The O.D. survey figures are much [fol. 368] more reliable than the I.N.S. statistics. So therefore, I use them for the United States flag carriers, inasmuch as they show a more accurate reflection of the traffic actually moving to Argentina; whereas the foreign flag figures only show the passengers who flew on the same plane all the way to Argentina.

Q. Do they even show that, Mr. Mitchell, if the passenger made a stopover of several days before resuming his journey?

A. I said all the way, so it would not include stopover, no, sir.

Q. You mean he had to stay on that plane all the way down?

A. He had to—at least he was manifested on that plane all the way.

Q. Well, the result of comparing O.D. statistics for United States flag carriers with I.N.S. statistics for the foreign flag is to result in an over-statement, or to put it conversely, an under-statement of U.S. flag traffic between the United States and Argentina, isn't it?

A. Would you repeat that last about an under-statement? I didn't get that.

[fol. 369] Q. Of foreign flag traffic between the United States and Argentina?

A. You say foreign flag traffic is under-stated?

Q. That is—yes, that is my question to you.

A. It depends on what you mean by "traffic". Now, these O.D. survey figures do include some foreign traffic that moved between the United States and some segment of a trip of a passenger going all the way to Argentina. The comparison I was making here was to build up a total, U.S. and foreign flag total, against which Pan American and Panagra's position could be compared with the overall

total. You would not be including in that total all the passengers unless you counted those who had stopovers, and that is why I used the O.D. survey figures.

Q. For the U.S. flag traffic you used O.D.

A. And I also—

Q. So that you included stopover passengers?

A. And they also included stopover passengers, who used foreign flag carriers where they participated on part of their trip with U.S. flag carriers.

[fol. 370] Q. But comparing OD statistics for U. S. flag carriers with INS statistics for foreign flag carriers, you included stopover passengers in your U. S. carrier figures—

A. And also on foreign flag traffic, yes.

Q. And also some—

A. There is some foreign flag traffic in the U. S. flag carrier figures as explained in my statement—

Q. Yes, all right.

A. —at the beginning of my report.

Q. Let's take the person, then, who goes on Pan American from New York to Buenos Aires; he stops over at Port au Spain for a couple of days and at Rio for a couple of days before continuing his journey. He is included in your OD statistics in Exhibit 53 as a United States-Argentine passenger, is he not?

A. Yes, sir.

Q. Let's take the same passenger, but instead of having him go on Pan American he goes on Aerolineas Argentina, a foreign flag carrier, from New York to Buenos Aires. He stops off at Port au Spain for a couple of days and at Rio for several days before continuing his journey to [fol. 371] Buenos Aires. Is he included in your INS statistics—

A. He is included—

Q. —as a foreign flag traveler?

A. He is included in the OD survey figures if he took a U. S. flag airline for part of his trip.

Q. Please use my example. I had him on Aerolineas Argentine on the whole way down. And my question to you

is: Is he included in the INS statistics as a foreign flag passenger?

A. If he had a stopover, he is not.

Q. So, if he had gone Pan American, he would be included in the OD survey statistics, whereas if he took Aerolineas Argentine he is not included in the foreign flag statistics; is that correct?

A. No, sir. He is included in foreign flag if he participated with a U. S. flag carrier.

Q. Please use my example.

A. You should have said INS statistics.

Q. He was on Aerolineas Argentina the whole way down. Is he included in the INS statistics as a foreign flag passenger?

A. If he had a stopover?

Q. He had two stopovers, one at Port au Spain and one at Rio.

[fol. 372] A. He is not included in the INS statistics, no.

Q. Let's take the same passenger coming from Buenos Aires to New York, on Pan American first. He stops off at Montevideo, Rio and Jamaica before coming on to New York. He is included in your OD statistics as a Pan American passenger, isn't he?

A. Yes, sir.

Q. Take the same passenger, again coming north on, say, Aerolineas Argentina the whole way, making the same stopovers. Is he included in your INS figures as a foreign flag passenger?

A. No, sir, he is not.

Q. And you made some studies, you say, to determine the variation caused by this different reporting system between INS and OD survey statistics?

A. The only information I had—

Q. Did you make any studies, Mr. Mitchell? That's my question.

A. I discussed the problem with—

Q. Did you make any studies, Mr. Mitchell? Please answer my question.

A. What do you mean by "study"?

Q. Did you make any statistical or economical studies [fol. 373] by yourself or with people working under your

supervision to determine the variation in the statistics caused by this different reporting method?

A. No study could be made because I know of no information that would provide the basis for making such a study. I used what was available.

Q. That answers my question, Mr. Mitchell. I wish you would just respond and not go beyond it.

Then my question to you, Mr. Mitchell, is: Do you know the exact percentage variation that is caused by this different reporting method between OD statistics and INS statistics?

A. Yes, I think I can show you the effect of the two.

Q. Good. Between the United States and Argentina.

A. I am sorry, I don't have that readily available, but I can show you what the difference is—

Q. That's all right. You have answered the question.

A. —for U. S. flag to South America.

Q. I think those statistics will be in the record, Mr. Mitchell.

Again take Exhibit 53 as an example, Mr. Mitchell. [fol. 374] Would you tell us again what you mean by PAA participation?

A. It means that Pan American carried these passengers on the entire trip between the United States and, in this case, Argentina or carried the passenger part of the way on that trip, as reported in the OD survey.

Q. Then, if the passenger took Pan American from, say, Buenos Aires to Montevideo, a distance of about 125 miles, and took Varig, a Brazilian carrier, the rest of the way to New York, the passenger would be included in the Pan American statistics as an Argentine-United States passenger on Pan American; is that correct?

A. With Pan American participation.

Q. If the same passenger flew on Varig from Buenos Aires to Montevideo and then took Pan American the rest of the way to New York, would he be included in your statistics as a—

A. Would you repeat the points? I was a little confused on that.

Q. All right. Take the same passenger flying on Varig from Buenos Aires to Montevideo and then taking Pan

American the rest of the way to New York. First my ques-
[fol. 375] tion is: Would he be included in your statistics as a Pan American passenger from Buenos Aires to New York?

A. Yes, sir.

Q. And my next question is: Would he be included as a foreign flag passenger from Buenos Aires to New York?

A. Would you repeat the legs of that trip so I can answer your question correctly?

Q. All right. He is on Varig from Buenos Aires to Montevideo.

A. Yes.

Q. Then he took Pan American the rest of the way to New York. You have answered that he would be included in the Pan American statistics as a passenger from Buenos Aires to New York even though he got on the Pan American plane at Montevideo.

A. In the OD survey series, yes.

Q. Now my question to you is: Is he also included in your foreign flag statistics as a Buenos Aires-New York passenger on Varig or on a foreign airline?

A. Not on that particular trip, no, sir.

Q. So that again makes for some discrepancy in your
[fol. 376] figures, doesn't it?

A. There are minor differences. You would have to count those passengers to see how important they are.

Q. What tests have you made to determine the extent of the inaccuracy caused by this method of counting PAA participation and not foreign flag participation?

A. I have a little table here which explains what the effect is, and I would like very much to give you the result.

Q. All right. I would like to hear the result for United States or Argentine traffic.

A. I don't have it for the individual—

Q. All right.

A. I can show it to you for certain other—

Q. All right. You have answered my question.

A. I can work that up.

Q. You testified, Mr. Mitchell, I believe, that Pan American is the largest international air carrier in the world by any measure; is that correct?

A. I don't think I quite said that. Can you recall the page where I said that?

[fol. 377] Q. No. You don't know whether it is or not, I take it, by any measure.

A. In terms of route miles—

Q. Just please answer my question.

A. Well, I thought I was. I am sorry.

Q. I say by any measure do you know? Let me rephrase that. Do you know whether Pan American is the largest carrier in the world, using any measure?

A. I don't think it is.

Q. All right. Indeed, it is not even the largest United States carrier that engages in international air transportation, is it, Mr. Mitchell?

A. In international operations I believe that it is.

Q. Did you make any studies as to how large Eastern, TWA, United or American are?

A. In their international operations?

Q. No. How large they are.

A. I know how large they are, yes.

Q. Considerably larger than Pan American, aren't they?

A. Not in international operations, no, sir.

Q. They are considerably larger than Pan American, [fol. 378] aren't they?

A. Including their domestic operations, yes.

Q. And they do engage in international air traffic, don't they?

A. To some extent; not to the extent that Pan American does.

Q. Pan American doesn't engage in domestic transportation, does it?

A. That is right. I believe that is correct, yes, sir.

Q. You testified at page 40 of your testimony, Mr. Mitchell, that the great bulk of international traffic is on one plane for the entire international route; is that correct?

A. I did not say the same plane there. I said the same airline or I implied the same airline, not the same plane.

Q. Same airline. All right. I will take that correction.

A. That makes a big difference in the statistics.

Q. Did you make any test to determine the difference?

A. Yes, sir.

[fol. 379] Q. As to whether it was the same plane or the same airline?

A. Same airline.

Q. Take again your Exhibit 53, United States-Argentina. Did you make any tests or studies to determine the exact percentage of traffic which flies on the same carrier on that entire international flight?

Mr. Kenney: I am sorry. May I have that exhibit number?

Mr. Mallory: 53.

A. Yes, sir, I did. I did with respect to the month of September.

Q. The month of September?

A. Yes, sir.

Q. Of what year?

A. 1957.

Q. What was that percentage?

A. Would you just wait a moment, please?

Q. Oh, yes.

A. You were referring to U. S.-Argentina traffic?

Q. Yes, I am.

A. This is almost the same, Mr. Mallory. It is based [fol. 380] on the OD survey of the CAB, and it is between the United States and Buenos Aires. Will you accept that?

Q. I will take it.

A. Pan American did not participate with any other international air carrier in carrying about 60 per cent of that traffic. Now another 6 per cent approximately was carried by Panagra with another U. S. airline but with no foreign carrier. Another 4 per cent was carried with another U. S. airline and with a foreign flag airline. Pan American participated with a foreign airline but no other U. S. airline in carrying about 31 per cent of the traffic.

Q. Weren't there CAB studies, Mr. Mitchell, that show that approximately 25 per cent of the passengers fly on more than one carrier on a voyage between the United States and Argentina?

A. I don't know what studies you are referring to.

Q. You did not examine any studies?

A. I may have, but I don't know which one you are referring to.

Q. I am just asking you if there are any studies of the CAB which would show that.

[fol. 380a] A. I couldn't answer that.

Mr. Mallory: All right. That completes my cross.

[fol. 381] Q. Mr. Mitchell, on your direct testimony you were asked the following questions and gave the following answers:—

A. Would you give the page, please?

Q. 69:

"Q. Panagra just started its cargo service in 1957?

"A. That is right.

"Q. In July.

"A. These figures are for 1957, and Grace only started its all cargo operation in the middle of that year."

Are you not aware of the fact, Mr. Mitchell, that Panagra started cargo operations in 1948?

A. Oh, yes, sir, but they suspended them after that.

Q. Do you know why they suspended them, Mr. Mitchell?

A. (No response)

Q. Yes or no, Mr. Mitchell?

A. No; in detail, I don't.

Q. Are you familiar with the decision of the Civil Aeronautics Board, where they found that all cargo operation by Panagra was not reasonably required?

[fol. 382] A. I have seen that statement, yes, sir.

Mr. McKay: That is all.

Cross Examination.

By Mr. Kiernan:

Q. Mr. Mitchell, will you turn to your Exhibit GS2 for a moment, please?

A. Yes, that is the map.

Q. That is the map. And in that map you have defined western South America as a portion of Colombia, Ecuador, Peru, Bolivia, Chile; and is that a portion of the Argentine,

or does that include the whole of the Argentine, your definition of western South America?

A. It includes all of Argentina, actually, but there is practically no traffic between the United States and Argentina, other than to book Buenos Aires. So for practical purposes, whether it is in or out makes no difference. However, Panagra is certificated to fly into points in Argentina other than Buenos Aires.

Q. Well, for purposes of this map, as I understand it, you have taken as your definition of western South America only that portion of South America served by Panagra?

A. It is the area of effective competition in which Panagra operates.

[fol. 383] Q. You have excluded in your definition of western South America those portions of South America which are served by Braniff, but which are not served by Panagra; is that correct?

A. To the right of this line that divides western South America from eastern South America, that is correct. Within western South America I included all points where they are served by Braniff, Panagra or anybody else.

Q. Well, the test of that was laid down by you in arriving at your definition of western South America, as indicated on your Exhibit GS2, was whether or not the area was served by Panagra; isn't that so?

A. I don't believe that is stated in this exhibit.

Q. No, but I am talking about what the result of your exhibit is.

A. The result of my exhibit is the area of effective competition in which the defendant Panagra operates.

Q. So that anything, any area of South America which is served by one of its competitors, namely, Braniff, which is not also served by Panagra, has been excluded by you from—

A. It hasn't been excluded if it is within this western [fol. 384] South America, the geographic area that I have set up here.

Q. I think we are arguing around the corner.

A. Why don't you make a specific example and I can say yes or no?

Q. What I am trying to bring out is, the theory upon which you constructed this map, so as to define western South America, is to take only those areas which are served by Panagra and not all of the areas served by Braniff?

A. That is quite true. And with respect to anywhere that Braniff serves, you mean?

Q. That's right.

A. That is correct, yes.

Q. And, thereby you have excluded Bogota and Colombia from western South America.

A. Yes, sir.

Q. And you have also excluded Paraguay.

A. Yes, sir.

Q. And Uruguay.

A. Yes, sir.

Q. Now turn to Exhibit 10, will you, please? You notice there that you arrive at a percentage total of Pan America [fol. 385] Panagra under average per month percentage of total, and isn't the figure 84.2 there?

A. Pan America and Panagra combined, yes, sir.

Q. Now do you notice the figure, Panagra participation, 79.6 per cent?

A. Yes, sir.

Q. Do you know to what extent that percentage figure would be varied if you included all of Braniff's competition in South America?

A. Yes, I think I do. I assume you are referring to the areas in which—

Q. No, I am asking you whether if you included all of the passengers carried by Braniff into South America?

A. Well, I don't have information for Braniff separately, sir, but I do have information how much was carried between the United States and the different countries of South America by these categories of carriers that I have listed in the exhibit.

Q. You don't have the information then that I have asked you about, to what extent that percentage, 79.6, would vary if all of the passengers carried by Braniff into South America were included in your computations?

[fol. 386] A. I don't have figures for Braniff, no, sir.

[fol. 387] Redirect examination.

By Mr. Kenney:

Q. Mr. Mitchell, will you turn to page 31 of your testimony?

A. Yes.

Q. And will you explain what you meant when you said that the figures referred to therein were not completely satisfactory?

A. Well, Mr. Kenney, I only had a limited time in which to compile these statistics for this trial. Up until late in January there was talk about settling this case. I was not authorized by the antitrust division to bring any of these statistics up to date until his Honor made a ruling on that settlement matter and set a trial date for May 4th.

Between that time and May 4th is a very short length of time in which to put together figures covering a period of four or five years. I could only use the available sources. I did not have the time. I could not, even with the financial resources, go into an exhaustive study to get exact statistics like I would like to have had them for preparation, for presentation at this trial.

I used, therefore, just what was available, recognizing [fol. 388] that some statistics are compiled in different ways by different agencies. Some agencies collected information on U.S. flag participation, while other agencies collected information on foreign traffic, but in a different way.

I think that all I could under the circumstances, unless we wanted to delay the trial, was to present what was available, explaining how it was compiled, and let the results speak for themselves.

Q. Do you feel that your statistics are accurate?

A. The basic statistics I used are accurate.

Q. Now you have referred to INS and OD statistics; could you explain what they are?

The Court: Well, hasn't he?

Mr. Kenney: Well, I think he does in his exhibit, your Honor.

The Court: Yes, I thought so.

Q. Do you feel that the OD statistics are the more accurate of the two, Mr. Mitchell?

A. Oh, very definitely. Anyone recognizes that.

Q. Have you had occasion to examine any of the defendants' statistical exhibits?

A. Yes, I have, some of them.

Q. Do you know whether they also use INS figures?

[fol. 389] A. Oh, yes, they do. In fact, they use INS statistics for U.S. flag as well as foreign flag. I used the better figures for U.S. flag. I used the OD survey figures.

Q. And they used the INS figures for both?

A. In some exhibits I have seen they used them for both, yes.

Q. Now, why did you use the figures of March and September in your calculation, Mr. Mitchell?

A. Those were the only months which were reported in the OD survey of the CAB. There is no other period covered except those two months.

Q. And have you supplied statistics for the total 12-month traffic in certain years between United States and South America?

A. What type of statistics, Mr. Kenney?

Q. Well, you used the March and September; did you also prepare total figures for the years 1957, '56, '55, and so on?

A. Yes, I did do that on a yearly basis, using the Immigration and Naturalization statistics, but I could not use it from the OD survey.

Q. Now, could you tell us, Mr. Mitchell, if you can, what the difference is between U.S. flag to South America when [fol. 390] you used OD figures and INS figures?

A. For the year 1957, by my Exhibit 32, it shows that Pan American—excuse me. Were you referring to U.S. flag or Pan American-Panagra's participation in the total traffic?

Q. Pan American-Panagra's participation?

A. My Exhibit 32 shows that Pan American-Panagra carried 47 per cent, that is, participated in 47 per cent of the U.S. and foreign flag traffic.

Now, if you use strictly March and September for the INS, rather than for the whole year, and you use the CAB

for March and September you will get a Pan American-Panagra participation of 45 per cent, or roughly 2 percentage points less.

Q. A slight difference; is that right, sir?

A. A slight difference.

Q. Now, Mr. Mitchell—

A. (Continuing) But if you were to use the Immigration and Naturalization figures for U.S. flag for the year and divided that by 12, and then you compared Pan American and Panagra, as reported by the CAB in the two months, divided by 2, in other words, putting all the figures on a monthly basis, Pan American-Panagra participated in car-
[fol. 391] rying 51.7 per cent of the total.

Q. So—

A. (Continuing) However, the series are not completely comparable, and I didn't feel that I was justified in using U.S. flag totals from one source, and another source for CAB. So I think I was a little conservative when I reduced the figures to 47 per cent, using the OD survey exclusively for U.S. flag.

Q. In one instance it is a little below, and in one instance a little above your figures.

A. Above, and I used the in between figures.

Q. Mr. Mitchell, do you know whether the Civil Aeronautics Board uses March and September as representative months?

A. They were established many, many years ago, and were, according to information that I received from people that are there now, that they were generally conceded to be representative months. I could not actually put my finger on the man that selected those two months. I think perhaps the airlines themselves had something to do with it. But I do know that counsel for Pan American has stated to antitrust officials that they are considered to be repre-
[fol. 392] sentative, so that—at least that was done in a conference one time in the antitrust offices in Washington, a few years back, by counsel for Pan American.

* * * * * * *

[fol. 403] R. G. Ferguson, called as a witness by defendant Pan American World Airways, Inc., being first duly sworn, testified as follows:

Direct examination.

By Mr. Peck:

Q. Mr. Ferguson, by what company are you employed?

A. Pan American World Airways, Inc.

Q. And what is your position with that company?

A. I am the treasurer of the company.

Q. How long have you held that position?

A. Since 1949.

Q. Did you have experience with the company prior to that year?

A. Yes. I actually joined the company in 1929.

[fol. 404] Q. And would you tell us, please, the work you have done and the positions you have held since 1929?

A. From 1942 until 1949 I served as the assistant treasurer of Pan American. Prior to that I served as the division accountant of our trans-Atlantic division, and prior to that served in financial and accounting matters in Brownsville, Texas for a period of about three and a half years during the early days of Pan American's operation through Mexico and Central America.

Q. How long have you been stationed here in New York in the general offices?

A. About 18 years.

Q. What do your duties encompass?

A. I am responsible for fiscal management, including banking and corporate finance, preparation of budgets and economic studies, preparation of economic and financial data, traffic data in connection with CAB proceedings, economic material and cost material having to do with the making of rates, both CAB-wise and in so far as IATA determination of commercial rates are concerned, and finan-

[fol. 405] cial and fiscal forecasts in connection with contracts and the negotiation of contracts.

Q. You might tell us what the IATA is, Mr. Ferguson.

A. The IATA is an international air transport association which has to do with regulation of international car-

riers. One of its primary functions being the determination of rates by conferences, somewhat similar to steamship rate conferences.

Q. Are you called upon frequently to prepare and support estimates of traffic markets, the distribution of traffic between the carriers and estimated financial results?

A. Yes, particularly for the CAB in both rate cases and route cases covering applications for new routes. My department is saddled with the responsibility for preparing and presenting such cases before the Civil Aeronautics Board, and I believe we probably prepared some 40 cases in the last 18 years, possibly more, having to do with economic phases of air transportation.

Q. Have you appeared as an expert witness in such matters?

A. Yes, I have.

[fol. 406] Q. Now, did your preparation of the data and your testimony include the proceeding known as Docket 779, which was the 1943 investigation of Panagra's routes?

A. Yes, sir.

Q. By the CAB?

A. It did.

Q. Did it likewise include Docket 325, in which Braniff was certified in Latin America?

A. That is correct.

Mr. Peck: Certificated, I should say, not certified.

Q. Did you assist, Mr. Ferguson, in the preparation and negotiation of the 1946 through flight agreement between Pan American and Panagra?

A. Yes, I did, particularly with regard to the various financial provisions of the agreement, distribution of advertising costs, compensation for use of aircraft and ground facilities, and maintenance work which we were to do for Panagra. This also entailed the determination of investment on which Panagra would be paid a return.

Q. In your connection with your preparation of budgets and forecasts and your presentations to the CAB and the [fol. 407] IATA contract negotiations, do you maintain familiarity with the company's policies and procedures re-

specting such matters as contracts of sales procedures and other operations?

A. I do. I try to keep up with them.

Q. Now, I hand you this group of exhibits under one binder, PS for Pan American statistical Exhibits 1 through 23, and ask you if these exhibits were prepared by you or under your direct supervision?

A. They were.

Q. And do they correctly reflect the material which is included in them?

A. I think they are true and correct.

Mr. Peck: Would you please mark them in evidence? You need not do it now, as I understand, but you can do it later.

If your Honor please, may I hand you a set?

Counsel for the Government and for the other defendants have a set.

Mr. McKay: Your Honor, may we have the same understanding as with the Government exhibits this morning?

The Court: Yes.

Mr. McKay: Thank you.

[fol. 408] By Mr. Peck:

Q. Mr. Ferguson, would you describe generally the relationship with the Pan American and Panagra route structures in Latin America?

A. Yes. I think it might be well to refer to our Exhibit No. PA22, which is in the binder of exhibits, which shows a map of the Pan American routes and the Panagra routes. I have a large chart here, which was the chart from which the exhibit has been made.

As you will see from the chart—

Mr. Kenney: Would you please talk louder, sir?

The Witness: I will try.

A. (Continuing) As you will see from the chart, the Pan American routes are primarily east coast routes and the Panagra routes are west coast routes, both winding up at Buenos Aires. These routes and also at Canal Zone or Panama City.

Other routes of Pan American serve other areas of Latin America, including the Caribbean, Central America, Mexico, et cetera.

If you will look at the map you will find no duplication of route at all. On the contrary, the two routes actually [fol. 409] feed each other with traffic, providing a single integrated service.

Q. Would you give us some fuller picture of the feeding of one system and the other?

A. Yes. Pan American's routes, looking at the north coast of South America and the area north of that, feed traffic to Panagra at the Canal Zone, and this comes from several directions. The most important route is the Miami-Canal Zone sector, which feeds traffic from the northern part of the United States through Miami to the Canal Zone. This operation closely integrates the Pan America and Panagra operations.

In addition to that, you will find service from New Orleans down through Central America through the Canal Zone. You will also find service from Houston through Mexico City, and you will find service from San Francisco and Los Angeles, all coming into the central point, Panama City, and providing traffic at that point for the west coast of South America.

In addition, the route across the north coast provides service from Caracas, Curacao, Maracaibo, Barranquilla and Kingston, and even the Kingston-Barranquilla service is a collection point from which passengers can get from the island between Cuba and Puerto Rico into the Panama [fol. 410] City connecting point.

We have made a check of the amount of this traffic which flows into Panama City and connects with Panagra, and from these areas, including Central America and Mexico, we have found that there are about 4,000 passengers delivered by Pan American to Panagra at that point.

Q. That is described as the feeding of Pan American to Panagra, and I take it the reverse is true, that Panagra feeds into Pan American traffic to be dispersed to the points—

A. Yes, the interchange, the interchange actually is twice that, or approximately twice that. We have taken both directions and it is approximately twice.

Q. How would you describe the services of the two carriers to Buenos Aires?

A. Well, it is an east coast service for Pan American and a west coast service for Panagra.

Q. Does that mean that the two carriers compete for that Buenos Aires traffic?

A. Well, I would say only to a minor extent.

Q. Why do you say only to a minor extent, Mr. Ferguson? [fol. 411] A. Well, first let's take Latin America as such. It is no competition for Buenos Aires traffic to points in Latin America as such. For example, Panagra cannot compete for traffic from Buenos Aires to Rio or Belem, Porto Spain, spots like that. Nor can Pan American compete for traffic from Buenos Aires to Lima or Santiago or Guayaquil, they are just not competitive.

The traffic from and to Buenos Aires of this nature amounts to 62 per cent of the total traffic carried by American carriers in and out of Buenos Aires.

Q. To make that perfectly clear, you mean that 62 per cent of the traffic carried by the two carriers to and from Buenos Aires originates, on the one hand, or has destination on the other, in some place in Latin America, not touching the United States?

A. That is correct. That is on American carriers.

Q. Yes. As to which routes there are no common points of call, just the terminal at Buenos Aires.

A. That is correct.

Q. Now, the 4,000 passengers a year that you were speaking about being interchanged, is that just Latin American traffic now, or do you include in that your 4,000 traffic [fol. 412] between South America and the United States?

A. The 4,000 passengers are the passengers from the United States, points such as San Francisco, Los Angeles, from Houston, from New Orleans.

Q. Well, pardon me. Let's see that we understand each other, and we may have some misunderstanding, I don't know, but let's get it clear in any event. You mentioned 4,000 passengers exchanged each year, 4,000 moving south, 4,000 moving north, at the Canal, between Pan American and Panagra. I confess that my impression had been—correct me if I am wrong—that that 4,000 was just Latin American passengers, in other words, passengers coming

from some place in Latin America, moving into South America, or coming from South America and moving some place in Latin America, and my impression was that the 4,000 did not include passengers either to or from the United States. Now correct me if I am wrong.

A. You are wrong. This includes passengers which would not be over the Miami-Balboa route, but would have come from New Orleans, from Los Angeles, San Francisco.

Q. Now, before that step backwards to understand that [fol. 413] figure, you had stated that 62 per cent of all the traffic of the two carriers in South America either originated in or was destined to some point in Latin America; right?

A. That is correct.

Q. What about traffic between the United States and Buenos Aires? Do the two carriers compete for that traffic?

A. Only, again, to very slight extent.

Q. Well, now, why do you say that, Mr. Ferguson?

A. Well, there are two reasons. First and foremost important is that passengers select their routings primarily to cover their stopover desires. The second reason is that for all areas other than, let's say, the northeastern area of the United States, the west coast route to BA is appreciably shorter than the east coast route, and—

Q. Well, now, let's break—well, go ahead. Pardon me.

A. (Continuing) And would naturally draw the traffic which is indifferent to routing, and the principal interest is in the best service from the standpoint of time.

Q. Let's break those two considerations down and explain [fol. 414] them each a little more fully. Explain for us, please, how the stopover requirements or wishes of a passenger determine his selection of route in most cases?

Mr. Kenney: I have to object to that question, your Honor. That is calling for a statement from this witness as to what is in the passenger's mind. I don't think he is qualified to answer it.

The Court: I will allow it.

You may tell us.

Q. Go ahead.

A. Well, I think it is perfectly clear that very few people make trips of almost 6,500 miles between the United States

and Buenos Aires for the sole purpose of purely visiting Buenos Aires and returning. They're interested also in the major cities in Latin America, such as Rio and San Paola, on the east coast, and Lima, B.A. Quito—Lima, Santiago, Quito, on the west coast. Hence the routing in effect governs the coast and the stopovers govern the coast which the passenger uses.

This is apparent if we consider the various types of travel—

Q. Yes, I was going to ask you to do that.

A. —which are involved here. We know that almost 50 [fol. 415] per cent of the traffic to and from South America is for business purposes. There are few business men who would make a trip just to B.A and return and spend about a thousand dollars on a ticket and three days' traveling time purely to do business in B.A. unless there was some very urgent matter involved. Most U.S. firms who have traveling representatives in Latin America have offices in the various major cities on the east coast and west coast, or they have affiliates or dealers or some concern with which they have to do business.

A banker, for example, who is making a trip around South America probably has correspondents in most of these cities, and he will want to make his call on these correspondents in all cities, not just in B.A.

Consequently, the business men seeks to make the maximum out of his trip and plans his routing accordingly.

Q. What about the people who are bent on pleasure?

A. In the case of the vacationer, there is no reason in the world why he would want to take a trip to B.A when he could make stops at Rio, San Paola, Lima, Santiago, without any additional cost whatsoever.

Q. Well, do you know from your experience and observa [fol. 416] tion that that is exactly what they do, make stopovers?

A. We certainly do. We have estimated that the round South America passengers account for some 53 per cent of the United States-B.A traffic. This was in 1958.

Q. What do you mean by "round South American traffic"?

A. Well, I mean they go down the east coast and make

their stops in various cities on the east coast and return via the west coast, making stops in Santiago, Lima and the various resort areas on the west coast.

Q. That is 53 per cent of the passengers, you say, that are going to BA from the United States make the circular tour?

A. That is correct.

Q. Do the two carriers, Panagra and Pan American, make a joint effort to get them to make that grand tour?

A. Oh, very definitely. We spend substantial sums of money in advertising and developing and promoting the around South America services.

Q. Is that a sizable proportion of the joint advertising? [fol. 417] A. Yes, it definitely is.

Q. Do you have some of that advertising?

A. We have included in our exhibits, in Exhibit PA23—

Q. That is the last one in this group?

A. It is the last one in the book—some samples of advertising. The last one in the book actually is a sample of the round South America advertising.

Q. Do you have some others with you?

A. Yes, we do. We have some color exhibits.

Q. I would like to see them. And is the material in this folder typical advertising material in magazines, newspapers and folders covering—

A. Yes, they are.

Q. —round South America tour?

A. Round South America. It is done in two ways. There are tour folders which we have used, and also national advertising in magazines, which are paid for jointly by Pan American and Panagra.

[fol. 418] Q. I understand that you are short of these and you don't want these marked in evidence? Is that right?

A. That's correct. We can have them reproduced if it is necessary.

Q. Well, I would just like to have the Court see them.

The Court: Don't you think the Government should have one look?

Mr. Peck: I am sure that the Government is familiar with it, but we will give them a look but not a ticket.

There is no objection to the Court having a look.

It might whet your Honor's appetite. It whets mine, I must say.

The Court: I don't know what I am going to do about mine, though.

Q. And these folders are typical?

A. They are.

Q. I believe that covers, Mr. Ferguson, the bulk of the traffic which you said is not competitive. Now would you—

The Court: May I interrupt a minute, Judge?

[fol. 419] Mr. Peck: Yes.

By the Court:

Q. You said that your estimate that 53 per cent of the passengers take this sort of round trip on both coasts?

A. Yes.

Q. That is almost very close to saying that 50 per cent go down one coast and come back the same coast?

A. Well—

Q. Isn't it?

A. No, I wouldn't say that is quite true.

Q. Well, it says in effect that 47 per cent of the people don't take the round trip.

A. Yes. That is correct. However, within that 47 per cent are those that, due to requirements for their stopovers, will use one coast or the other coming back to the stopover desires of the passenger.

Q. And what is the basis that you use to determine whether a person is traveling on business or pleasure?

A. We have used the survey which has been made by the [fol. 420] Port of New York Authority on traffic to South America going through the Port Authority's airports.

Q. Maybe I didn't make myself clear. You said that 50 some-odd per cent of the passengers—in trying to break down why they went one way as distinguished from another, you said that 50 per cent are business people.

A. Yes.

Q. And I was curious as to how you determined who was traveling for business and who was traveling for pleasure.

A. We did not make a survey ourselves. We used what

the Port of New York Authority—their survey, to determine that.

Q. They found out by their survey who was traveling for business and who for pleasure?

A. That's correct.

The Court: All right. Fine.

By Mr. Peck:

Q. Let us move now, Mr. Ferguson, to the second important consideration which you said would determine routing, and that is the relative distances and time required to go one route or the other to Buenos Aires. Would you explain that, please?

[fol. 421] A. Yes. It is a fundamental fact of geography that the South American continent lies entirely east of the North American continent. Hence the shortest route from the United States, from most points in the United States, between the United States and B.A. is down the West Coast, and this is exemplified by the fact that New York, the Canal Zone and Lima lie on a straight north-south line. The East Coast of South America, if used, would mean a substantial detour around the South American continent, and the further west or south the origin of the passenger within the United States, the greater the detour would become by using the East Coast.

Q. Can you give us some figures, for example, as to how much longer it would be down the East Coast route from San Francisco and Los Angeles?

A. From San Francisco and Los Angeles the passenger would save almost 1300 miles by using the West Coast routing as compared to the East Coast routing to B.A.

Q. Supposing he was going from Chicago or Miami?

A. Well, from Chicago or Miami via the East Coast would be something over 900 miles longer than the use of [fol. 422] the West Coast.

Q. When you move into the Northeast part of the United States, what is the differential there?

A. The mileages become much more comparable at that point. For example, New York-B.A. mileage via the East Coast is 6,267 miles, and via the West Coast it is 5,728 miles.

Q. Then what is the difference in traveling time from New York to Buenos Aires by the two routes?

A. My Exhibit No. 17 indicates that for current services the time New York-B.A. via the West Coast is 22 hours and 45 minutes and via the East Coast 25 hours and 20 minutes.

Q. And I presume that as you move west the time difference would preponderate substantially in favor of the quicker West Coast route; is that right?

A. I think that's correct.

Q. Can you give us any statistics from the Civil Aeronautics Board as to the origin and destination of passengers traveling between the United States and South America in relation to the Western part of the United States and the Eastern part?

A. Yes. We made some studies with regard to how these [fol. 423] people travel, and if you take San Francisco and Los Angeles, 60 per cent of the U. S. or the San Francisco, Los Angeles B.A. traffic uses the West Coast of South America, and 40 per cent the East Coast.

On Chicago the distribution is about 63 per cent West Coast and about 37 per cent East Coast.

Q. How about Miami?

A. On Miami it is about 67 per cent West Coast and 33 per cent East.

Q. When you are in the Northeast part of the United States how does the traffic divide between the East and West Coast routes?

A. It divides approximately equally. Our figures, based on September of '57 and March, '58 indicate that 49.4 per cent use the West Coast and 50.6 per cent use the East Coast.

Q. In view of the great distance and time advantage of the West Coast route from all areas of the United States other than the Northeast, how do you account for the fact that according to the statistics you have just given us about 40 per cent of the United States traffic from these other areas of the United States elects to use the East Coast route?

[fol. 424] A. That percentage in my opinion represents what I have been explaining before, the portion of the

traffic choosing to use the East Coast despite the greater distance entirely or primarily for stopover reasons. In other words, there is no reason for this traffic to use the East Coast except for this purpose.

It seems logical to conclude that if 40 per cent of passengers elect to use the East Coast for stopover purposes, at least an equal percentage would choose the West Coast for the same reason. So it seems to us that about 80 per cent of the U.S.-B.A. passengers select one Coast or the other for the stopover reason.

Q. Then as to the remaining 20 per cent, what is your opinion as to the extent of the competition between the two carriers for that 20 per cent of the traffic from the United States?

A. Well, I have concluded that the remaining 20 per cent consist of passengers who for family reasons or government travel or assignment desire the fastest possible service between U. S. and B.A.

Q. Then how does that 20 per cent travel, according to the figures here, from the United States other than from [fol. 425] the Northeast?

A. Well, I think that it is influenced or can be influenced to use the East Coast or the West Coast routes depending on which route provides the best service, the best departure times as far as his plans are concerned, the availability of space on the airplane when he wishes to travel, and the type of accommodations which he may desire, such as tourist or first-class service.

Q. Now are you talking in that respect just about the Northeast part of the United States?

A. No. I am talking about the entire U. S.

Q. Well, if I have understood you correctly the time factor preponderates so definitely in favor of the West Coast route for any passenger coming from the United States other than from the Northeast, that, regarding the passengers who you are now classifying as being bent on getting there and back as quickly and directly as possible, I am asking you whether that 20 per cent then, which you estimate is the percentage of such passengers, wouldn't travel the West Coast route from all parts of the United States other than the Northeast part of the United States.

A. I think that is correct.

[fol. 426] Q. Then let me ask you this: Whether as to that 20 per cent you regard the two carriers as being in competition for areas of the United States other than the Northeast.

A. May I have the question, please?

(Question read.)

A. No, I think that they are not competitive in the areas other than the Northeast, in effect.

Q. Then you come down to what proportion of the traffic do you say that they are competitive for, that 20 per cent from the Northeast?

A. Twenty per cent of the Northeast. The Northeast accounts for 54 per cent of the total U.S.-B.A. traffic, and 20 per cent of 54 per cent would amount to about 10.8 per cent of the total U.S.-B.A. traffic.

Q. And what would be, on that basis, the maximum percentage of Panagra's total traffic that could be deemed to be competitive with Pan American?

A. My analysis would indicate about 2 per cent of Panagra's total passenger miles as being competitive.

Q. Explain that for us, would you please?

A. Yes. In the year ended June 30, 1958, Panagra de-

[fol. 427] rived 16,442,000 passenger miles from the Northeastern portion of the United States between the U.S. and Buenos Aires. We have previously indicated that only 20 per cent—

Q. What is that figure, please?

A. That is the passenger mileage on—

Q. From—

A. —on U. S.-Buenos Aires traffic from the Northeast area.

Q. And that figure is what?

A. 16,442,000 passenger miles.

Q. Yes. Now go ahead, please.

A. We previously established that only 20 per cent of this traffic is competitive or 3,288,000 passenger miles. This compares with Panagra's system passenger mileage for the year ending June 30, 1958, of 162,013,000 passenger miles or 2 per cent.

Q. Tell us, please, Mr. Ferguson, what are Pan American's policies with respect to selling the two services down the East Coast and down the West Coast?

A. Well, our primary policy is to sell the service which the passenger wants. If the passenger desires the shortest [fol. 428] service or a stopover on one coast or the other, and comparable services are available, we quote both and let the passenger make his choice. There are a few passengers who fail, however, to express their desires.

Q. Does Panagra have its own independent means of acquainting the public with its services?

A. Yes, indeed. Panagra has its own advertising and publicity. Exhibit PA-19 would indicate that Panagra spends about 8 per cent of its passenger and cargo revenues for this purpose. These are substantially higher percentages than Braniff and Delta spend in selling their Latin-American services.

Pan American spends about a little less than 4½ per cent of these revenues for its Latin-American services. Panagra has a sales staff in the U. S. which contacts the Pan American offices as well as travel agents.

I think that the two groups, Pan American's district sales offices and the Panagra staff who are doing selling, cooperate very fully in their work with the agents and generally they go to call on agents as a team. However, Panagra on the other hand is perfectly free to call on agents as it will.

[fol. 429] Q. And does?

A. And does.

Q. Now we will come to a different subject, Mr. Ferguson. Paragraph 18 of the complaint in this action is addressed to the sphere of operations of Pan American and Panagra, Panagra operating on the West Coast of South America and Pan American operating on the East Coast of South America and from Miami to the Canal without duplicating services between them.

Would you please tell us what would have been the economics of duplicating services between Pan American and Panagra for these various areas over the period from 1928 to 1946?

A. Yes. First I think that we should recognize the con-

dition of development of airline operation in this early period, and I might say that that was in the early period of my connection with Pan American in the Latin-American area.

It is unrealistic to think of airline operations as we know them today at that period. We were confronted with—

Q. What period are you discussing now?

A. The period from beginning through 1938.

[fol. 430] Q. All right.

A. The equipment which was available to operate the routes was slow, short range, high cost, and had very little carrying capacity. The airports and airways which were put in were the result of a gradual development by the airlines as opposed to having these things made available to them by governments, et cetera, and were done as the developments came about and as there were funds available to put them in.

There were no established markets at that time, as you might say, with a large potential of passengers and cargo as we know traffic markets today. If we are speaking about the first decade of Latin-American operations, we just can't speak of them as just normal commercial enterprises. The economics of the situation are about what one would imagine under these conditions.

Q. Would you give us some detail, then, as to the economics of competition during that decade and then move on thereafter up to 1946?

A. Yes. I think a number of the exhibits which I have in the binder will demonstrate the type of operation which was prevalent at that time.

[fol. 431] Q. All right. As you go ahead and give us this economic picture, Mr. Ferguson, refer us as you go along to the exhibits which demonstrate your observations.

A. Well, let's refer to PS-5.

Q. Yes.

A. PS-5 indicates the frequency of operation which Panagra was able to maintain through the period we are now discussing. In the period up through 1939 frequency of operation over the Balboa-B.A. route never got higher than two frequencies a week, and that was effective from 1930 through 1939. The aircraft which were available in

the early years, some part of them were single-engine. We finally developed to the tri-motor and the Sikorsky S-38, which was an eight-passenger plane amphibian which was used where no airports were available down the West Coast. The DC-2, which was a forerunner of the DC-3, which was a 12-passenger airplane as I remember it, came in in '35, and we finally got up to the DC-3, which was the work horse of the last war, in 1937.

So that the operation on that route during that period was pretty thin.

[fol. 432] If you look a little further down, we never got to daily service, and again with DC-3s in 1943 Exhibit PS-7 shows passenger loads which were available for carriage during this period.

Q. Now you are talking, I take it, at least I want to break this up, Mr. Ferguson—let's talk about the West Coast and then talk about the East Coast and then talk about the Balboa—the Miami-Balboa segment, and I take it what you are discussing now are the economics of competition during this period on the West Coast of South America; is that right?

A. That's correct.

Q. All right. And you have talked about them—PS Exhibit 5, what was the Pan American part of that West Coast service, is that right, which was Miami-Balboa?

A. That's correct.

Q. All right. Now you are going to move over to the Panagra part of it?

A. PS-5—

Q. Which is PS-7?

A. —is Balboa to B.A. which is the Panagra route.

Q. Yes.

[fol. 433] A. Now PS-7 is also the Panagra route.

Q. Pardon me, yes.

A. From Balboa to B.A.

Q. Yes, right, right.

A. And this indicates the average passenger load per airplane mile during the period 1929 through 1945. The maximum achieved during this period on an average was slightly over 13 passengers. Such loads are well below what might be considered compensatory requirements for single

line operations. It would be impossible, therefore, on any sound economic basis, to attempt to set up competition or competitive operations over a route with as thin a market as this.

Q. Can you translate these figures into dollar figures, the economics of the story?

A. In PS-6 we have shown for Panagra in terms of dollars and in terms of cents per mile flown the various economic factors which go into arriving at the result of the operation of the route. Let's take, for example, the year 1932. In that period, 1932, the passenger load was about 3.1 passengers. Passenger revenues of Panagra amounted to $287,000 for the year or 25 cents of revenue per plane [fol. 434] mile. Cargo represented $9,000 for the full year or one cent per mile. Other revenues, and this excludes U. S. mail paid, amounted to $70,000 or 6 cents per revenue mile for a total revenue for the year of $366,000 which, in terms of plane-mile earnings, amounted to 32 cents.

The total operating expenses for that year were $1,837,000 or a per plane-mile cost of $1.60.

The next item shows the operating profit or loss again before U. S. mail paid, and this would show a loss of $1,471,000 or a per plane-mile loss of $1.28.

Under the mail contracts Panagra received in 1932 $1,618,000 or $1.41. This means that with the mail pay—contract mail paid in Panagra was able to show a profit in 1932 of $147,000 or a per plane-mile profit of 13 cents.

As you can well see, without the contract mail pay Panagra would have been in quite a pickle.

Q. If I read this correctly, the total per plane-mile revenue of Panagra from 19—from the beginning to 1938 ran from about 22 cents to 70 cents and the cost of operation per plane-mile ran from $1.26 to $2.70; is that right? [fol. 435] A. That's correct.

Q. Now, again, that would show that Panagra's commercial revenues never got more than 50 per cent of its expense; is that right?

A. On the average I think that is true.

Q. Now take the period after 1938. Up until 1945 were Panagra's revenues sufficient to break even in any of those years?

A. No, they were not, except in the year 1945 when they made one cent per mile.

Q. And your exhibit shows the subsidy that was paid, mail pay, all during those years; is that correct?

A. That's correct. Those are since 1939 mail pay was determined by the Civil Aeronautics Board on the basis of the need of the carrier and includes both the payment for the carrying of mail plus the subsidy amount. The largest portion of the payment is represented by subsidy.

Mr. Peck: Shall we move on to the East Coast now, your Honor, or shall we lunch in between?

The Court: Yes. A quarter after 2.

(Recess taken until 2:15 p.m.)

[fol. 436] AFTERNOON SESSION

2:20 P.M.

R. G. FERGUSON resumed.

Direct examination (continued).

By Mr. Peck:

Q. Mr. Ferguson, would you now please discuss the economics of competition on the east coast of South America?

A. Yes.

Q. During this period from 1929 to '38, and then on to '46?

A. Yes. I would like to refer you to Exhibit PS4, included in the binder.

This exhibit shows the frequencies of operation on the Pan American east coast route of South America. I think it should be noted that on this route prior to 1942 the top frequency which we attained was four trips a week, and not until 1942 were we able to attain a daily frequency.

I think also that you ought to know something about the operation. During this period the route was around the periphery of the east coast, all the way out to Recife, which is the farest east point in the Latin American continent.

[fol. 437] and that it was entirely, at least up until 1937, a flying boat operation. The first airplane used, the S38, was an 8-passenger airplane, and amphibian. The S41 was slightly larger. The Commodore, as I remember it, had a capacity of about 12 to 16 passengers. The S42, which finally got into operation in 1936, was about 28 to 30 passengers, as I remember it. The DC2, again, was a 12-passenger airplane; and finally, in 1940 the first DC3 was in operation.

Q. Which had a capacity of how many passengers?

A. 21 passengers.

Q. The route around the hump of South America on the east coast was used until 1942, when we started a service which operated with an intermediate point from Belem, Brazil, across the jungle to Rio.

Q. How about the passenger loads during this period?

A. Again, if we refer to the exhibits PS11, prior to 1933 our records are just not of sufficient magnitude to have come to an average load per airplane mile, and for the years '36, '39, '42 and '45 it was necessary that we take what were known as weight report summaries to derive this average load. These weight report summaries showed [fol. 438] from point to point the passengers that were carried, and I think there were some between Port of Spain and Rio, there were some 12 or 14 sectors that had to be analyzed, as well as a sector south of Rio, in order to come to these figures. It was quite a job. So we attempted to get it down by purely taking representative years to arrive at the average loads on this route.

During the period this would indicate a peak load in the year 1945 of 12.4 passengers. As far as the mail and cargo are concerned during this early period, we believe that the load shown for the Miami-Balboa route would approximate what we would have had on this east coast and that is shown on page—or PS10, where the maximum load attained of both passengers—I mean, of cargo and mail, was ninety-five hundredths of a ton.

Exhibit PS14 shows information with regard to the Latin American division as a whole, for the years 1929 to 1958, and is prepared in the same way in which we prepared the

data for Panagra in PS6, showing the dollar revenues as well as the revenues per plane mile for passengers, cargo and other, the total operating expenses and operating profit or loss before mail pay, then showing the mail pay received and the net profit or loss on the operation during [fol. 439] these years.

This shows that during this period of 1929 to 1945, only in the years 1942 and 1945 did commercial revenues cover operating expenses, and that is without regard to any return on investment.

Q. Am I correct at a glance here that even if you carried those figures through to the year 1958 that still the years 1942 and 1945 are the only years of that entire operation where the revenue equaled the expense, not including mail pay?

A. That is correct.

Q. What would you say, then, as to the feasibility all during those years—let's just take it from 1929 to 1946—of competition down the East Coast of South America?

Mr. Kenney: Your Honor, I object to that question. It calls for a man's opinion; it calls for a conclusion.

The Court: Yes, but he qualified him as an expert. I will allow it.

A. I think the answer is pretty obvious. PS-6 and PS-14 show the expensive nature of the subsidy support that is required for these operations. No airline could have operated during these years without subsidy. This situation [fol. 440] has continued, and at least for the earlier years.

The Court: Was that your question, sir?

Mr. Peck: Yes.

Q. The answer, as I got it from you, was that you couldn't stay in business except for subsidy; is that right?

A. That's correct.

Q. And that was true of one group down there, one airline, Pan American going to the East Coast; is that right?

A. Yes.

The Court: Would you read the question to me, Mr. Reporter.

(The question was read by the reporter as follows:

"Q. What would you say, then, as to the feasibility, all during those years, let's just take it from 1929 to 1946—of competition down the East Coast of South America?)

The Court: And you are satisfied with the answer?

He said in substance, as I understood him, that no line could operate without a subsidy.

[fol. 441] Mr. Peck: That's right, yes.

By Mr. Peck:

Q. And that was a subsidy during all those years to one air line which had all the business down the East Coast; is that correct? All the American flag business down the East Coast?

A. All the U. S. flag service, yes.

Q. Now, if that had been duplicated by another American flag carrier during those periods, what would have been the consequences?

A. I think the cost to the Government would have been doubled, and it might have been even more than doubled because of the splitting of traffic between two carriers.

Q. Now, can you tell us what was the Government's policy prior to 1946 with respect to subsidizing duplicate airline operations in South America?

A. Well, I think we can split that into two pieces. For the period up to 1938, which is the date of the Civil Aeronautics Act, the operations were carried on under U. S. mail contracts with the Post Office Department, and I know of no place where the Post Office issued more than one mail [fol. 442] contract for a particular route. In other words, there were no places in the international field where two contracts were issued to support competitive services.

With regard to the 1939—

Q. Those contracts were for what period? How long did they run?

A. Ten years.

Q. All right. Go right ahead.

A. From 1939 to 1945 the Board did not find that du-

plicate service on these routes was required. By the Board I mean the Civil Aeronautics Board.

Q. In other words, after 1938 the Civil Aeronautics Board had the authority and discretion about mail pay or subsidy; is that correct?

A. That's correct.

Q. And at least up until 1946 had not done anything about duplicating routes?

A. That is correct.

The Court: Were there applications for certificates which were denied in those years?

The Witness: My recollection is I do not believe that there was any denial of a certificate during that period. However, I may be wrong about that.

[fol. 443] By Mr. Peck:

Q. Would it have been possible at any time during those years for duplicate service to be established and be maintained except by at least a duplication of mail pay or subsidy?

A. In my opinion it would not.

Q. Now let's move over on to the Miami-Balboa segment, if you will, Mr. Ferguson, and indicate the economics of a duplicated service on that segment for the years 1928 to 1946.

A. Again I do not think that competition on this route was economically feasible during this period.

Q. Why not, please?

A. Well, I think we had better look at Exhibit PA-3—

Q. Yes.

A. —which shows the operations over this route. During this period and up through 1937 again the frequency of service which could be maintained was two services a week. It was not until 1942 that we got to a daily service on this route, and by the end of 1942, which I might comment is the first year of the Second World War, we were up to two frequencies a week to Balboa and that the service at that [fol. 444] point was serving the demand for communications between the Canal Zone and the United States in view of the large military installation at the Canal Zone.

Q. After the war did it fall off?

A. After the war it got back down to a daily service.

Q. All right. Go right ahead.

A. PS-9 shows the average passenger loads on this route. The maximum up through 1938 got up to 12.3 passengers per airplane-mile. During the entire period from '29 to '38 the average loads were about 6.3 passengers, and even for the period from '39 to '45, the maximum loads carried per mile were about 20 passengers and the average—I thought I had figured the average, but it would run somewhere around 16 passengers.

If you look at PS-10, which follows, you will note that in the first period we could not break out—that is from '36 to '41 and we had no statistics prior to that—the load of mail and cargo got up to a high in 1940 of 64 100 of a ton, and in the period of '42 to '45 got up to a maximum of 95 100 of a ton.

[fol. 445] You will note that the average mile load got as high as about 4 10 of a ton and the cargo load about ½ ton.

Q. What is the significance of those figures in economic terms?

A. Well, if we put it in terms of revenues based on these average loads, the passenger and cargo loads for the period '28 to '38 would have produced about 90 cents per plane mile. Operating expenses, as shown in PS-14 for this period, and we have had to use here the average expense for the Latin-American operation because there was no breakdown as to costs applicable to any particular aircraft type the average for Latin-American operation was $1.76 per plane-mile. In other words, operating revenues were slightly more than half the cost of operating the route. Obviously a route which could not half support one airline could not support two.

Q. Now will you take the period from 1938 to 1946 and discuss it in the same terms, giving your opinion as to the economic feasibility or competition between Panagra and Pan American on that route during that period?

A. Well, again, if we look at PS-3

[fol. 446] Q. Discuss that, if you will, please, first in the terms of the traffic?

A. Well, as I stated before, the average passenger load

between Miami and Balboa for the '39-'45 period was about 16 passengers. Even with this kind of a load we could not produce a profitable operation as a single carrier on the route. If you project the 16 passengers into revenues at the average yield per passenger mile, this would produce about $1.68 of passenger revenue; and if you assume about a half a ton of cargo on board, and assume also a dollar per ton mile as the cost of revenue from the carriage of cargo, you come up with a figure of about $2.18 as the revenue derived from the traffic on this route.

During the period '41 through '45 we were operating Boeing 307, four-engine aircraft, on this Miami-Balboa route, which created a cost which was somewhat higher than the divisional average. If you assume this cost with its related overhead, the cost on this route during the '41-'45 period would be about $2.53 per mile. This certainly would not be a place where an additional carrier would aid the situation at all.

[fol. 447] Q. Did Pan American break even at any time on that route for the years up to and through 1945?

A. There were two years in there in which the commercial revenues covered costs on the basis of average cost for the division. But if you take these costs based on the 307 operation, I do not believe that it would break even.

Q. Was the service subsidized all during these years?

A. Yes, it was, very heavily.

Q. Now, would you say there was any reason other than the thinness of traffic which you have detailed that would enter into a judgment as to whether competition between Pan American and Panagra was feasible on that sector?

A. Well, the fact that a carrier, confined to this route, as Pan American would have been under competition with Panagra, would make quite a difference.

Q. That is, you are assuming now, I take it, and addressing yourself to that assumption, that the Pan American service from Miami to Balboa was duplicated by Panagra, but that the Panagra service from Balboa down the west coast of South America was not duplicated by Pan American; is that right?

[fol. 448] A. That is correct.

Q. All right.

A. (Continuing) And in which case there would have been very little chance that Pan American could have survived on this route. I think we have to distinguish here between a sector of route, such as is here envisioned, and competition on such a sector, as compared to full route competition, where there is access to full traffic markets. For example, Braniff, extension down the east coast permitted full competitive operations. Each carrier had a route structure which linked major traffic points and traffic generating areas, and thus made it reasonably able to provide competitive service.

However, in the case of Pan American and Panagra, where the two services complement each other and are complementary rather than separate, the carriers are completely interdependent, one upon the other. As I explained before, the Pan American Miami-Canal Zone link meets head on with Panagra at the Canal Zone, thus providing a through service.

If, for example, Pan American were in competition on this route and we were competing for the traffic over the sector, Pan American would be at a very great disadvan[fol. 449] tage.

If you look at PS16 of our exhibits, you will note here that we have made a segregation of the amount of local traffic over the sector, and the amount of through traffic to points south of Balboa. This shows that in the year—well, it is based on the months of September, '57, and March, '58, on those two months—that of the total traffic over the sector, about 58 to 65 percent is represented by through traffic.

The question which this raises is, what would be the result if Panagra had been extended with Pan American on this route?

Q. And Pan American not extended down the west coast?

A. And Pan American not extended down the west coast?

Q. But deadended at Balboa?

A. That is correct. The result would be that Panagra would probably have taken almost all of the through traffic from over the Miami-Canal Zone sector, because it can serve it with a one carrier service from Miami to destination.

Q. One airplane, no change.

[fol. 450] A. One airplane and no change. And this would mean that Pan American would be in a position where it could, or where it might get as much as one-third of the local traffic.

Q. Well, let's see. The local traffic is about, you say, somewhere between 40, 35 and 40 per cent.

A. That is correct.

Q. Now, you wouldn't say that Pan American and Panagra would about break even on the local traffic?

A. Oh, definitely not. The Panagra, with two-thirds of the traffic, and let's just say for the moment some portion of the local traffic, would be able to build frequencies which Pan American could not match except at a very high cost in subsidies or in loss to Pan American as such. Actually, with all the traffic, all the through traffic on Panagra and a substantial portion of the local traffic, Pan American would be able to operate at a very, very meager service over the route, and even if they were to have a service which can once or twice a week, it is only the passengers that would travel on that day, which would be divided between the two carriers, and people don't wait around for one or two frequencies a week if there is a daily service on which they [fol. 451] can travel. In other words, they don't pile up a third of the traffic for the two days that Pan American is going to operate.

Q. Well, with what consequence then if Pan American was going to compete at all for the local traffic?

A. Well, the consequence would be that we might operate as much as one and a half frequencies during a week, or if we operated a daily frequency in trying to compete, we would probably have a couple of passengers aboard per day.

Q. Well, if you were going to stay in the market and have what you call competition, how many frequencies would you have had to operate?

A. Well, we would have had to operate at least a daily frequency.

Q. And what would have been the economics of that with the passenger loads you would have had?

A. Well, I think under that circumstance, Pan American would have had to abandon the route. I do not think that

Pan American could operate a daily frequency during this period between Miami and Balboa and carry two passengers per day or three and hope to have the Civil Aeronautics Board find that under honest, economic and efficient management we had operated this route. I think they would [fol. 452] have found that we had operated excessive capacity when there was no traffic to be carried, which would mean in the final analysis, in determining subsidies, that the Board would not support this service.

Q. Let's get that clear. If the service was going to be there, wouldn't the Board automatically have subsidized it to the fullest extent necessary to maintain it?

A. I don't think they would have.

Q. Why not? What is the policy of the Board and the practice in this respect?

A. Well, the Board reviews the operations of a carrier, and where they find that a carrier has put on more service than is required, their policy is not to recognize costs of such service in determining subsidy.

Q. And the alternative aside from abandonment would have been what?

A. The alternative aside from abandonment would have been that the stockholders would have paid the bill, and I don't think they would have stuck very long with that.

Q. Let us move now, Mr. Ferguson to the through flight agreement between Panagra and Pan American in 1946. Would you first please give us the principal terms of that [fol. 453] agreement, so that the Judge will have it in his mind?

A. Yes. Under the agreement Pan American leases aircraft and crews from Panagra for operation over the Miami-Canal Zone sector. The aircraft, although operated by Panagra crews, are on this sector of route providing the Pan American service between Miami and the Canal Zone. This provides for the public a one plane service from Miami, straight through the Canal Zone, to destinations on the west coast and BA. Pan American pays all of the expenses, including the overhead on the operation incurred by Panagra for flying this sector.

Q. Now, let's see. That would represent—what does that represent to Panagra, reimbursement for the cost of oper

ating the plane by its pilots and completely handling the operation?

A. That is correct. It is reimbursement for all costs which you consider as direct flying costs as such.

Q. Well, then, what does Panagra get out of this operation? That is just breaking even, isn't it, up to now?

A. That is correct. They are made whole for all costs involved in this operation.

[fol. 454] Q. How can they make a profit?

A. Well, in the first place, there is no time when they have a risk in so far as traffic is concerned. In other words, if the traffic drops below what is required to provide a profit, Panagra has no risk involved whatsoever.

In addition, Pan American guarantees Panagra a maximum return on their investment which has been found to be reasonable by the Civil Aeronautics Board.

Q. Investment in what?

A. Investment in the equipment used in this operation over the Miami-Canal Zone sector which includes the aircraft, engines, spare parts, any maintenance, ground facilities which they may have. It also provides a return on investment in funds which have been earmarked for replacement of aircraft which would be used on this route and a return on investment in the working capital which represents the cash expenses involved which they have employed in this operation.

Q. And what is that guaranteed rate of return on the investment?

A. The rate originally was set by the Civil Aeronautics [fol. 455] Board as 10 per cent return after provision had been made for taxes. In other words, the 10 per cent is a net after the taxes. This was later reduced to 9 per cent for international operations.

There is also a rate which has been employed where there is no risk involved. The Civil Aeronautics Board stated that as 7 per cent. However, in a case of this kind where there is no risk whatsoever, it would seem to me that a fair rate might have been a rate such as you would have for borrowing money, even a primary of 4 or 5 per cent.

Q. In any event, Pan American pays Panagra 9 per cent; is that correct?

A. That's correct, and that is better than they can earn on their own operation below the Canal Zone.

Q. How does it compare with what Pan American can earn on its own operation?

A. It is substantially higher than we have earned on our own operation.

Q. Are there any other costs that Pan American is required to absorb in connection with the through-flight oper- [fol. 456] tion other than the ones that you have detailed?

A. Yes. At the time that the through-flight agreement was signed we had a contract with our flight crews which we thought would permit us to use the Panagra flight crews of this sector of Pan American route. However, it finally turned out that for every crew, Panagra crew, used over this route Pan American had to have a crew standing by on the ground under the labor contract. This meant that, in other words, we were paying for the Panagra crews through the through-flight agreement and in addition were paying our own crews for not flying.

Q. What did that amount to in 1958?

A. In 1958 this amounted to $168,000.

Q. Don't you get that back through a subsidy?

A. No, we do not. The Board decided to disallow that as not being justifiable or eligible for subsidy support.

I might say that we have brought this matter up with our partners to see if we couldn't get an adjustment of some kind in this matter of payment, but our partners have not seen fit to recognize it.

Q. The question has been raised about a possible Lima [fol. 457] Rio operation for Panagra. Would you comment upon the economics of such an operation, Mr. Ferguson?

A. Yes. I think that the operations over this route have been submarginal practically from the beginning.

Q. What are the operations over at the present time?

A. At the present time Braniff has a service from Lima to Rio, and Panair do Brasil has.

Q. What has been the Braniff experience?

A. The Braniff experience—

Mr. Kenney: Your Honor, even as an expert how can this man speak of the Braniff experience? I object to the question.

Q. Do you know what the Braniff experience has been as far as how often, the frequencies with which they have operated that route?

The Court: Do you know?

A. Yes. Braniff has been operating or is now operating about three frequencies a week over the route, and average passengers per day on the route amount to about 13.2 round trip passengers per day.

As far as the—

[fol. 458] Q. What about Panair do Brasil's experience?

A. As far as the Brazilian experience is concerned, Panair do Brasil started its operation in February, 1951, with one round trip per week. The service was suspended in July due to lack of traffic and was reinstated in April, 1954, with one round trip per week.

Q. With one carrier operating one round trip a week and another three with an average passenger load of around 14 passengers a round trip, what would you say as to the economics of putting another operation in?

A. It doesn't look to me like it would support the service of an additional operator.

Q. I would like to have you now explain to the Court the exhibits which you have not already referred to during the course of your testimony, Mr. Ferguson. First PS-1, the very first one; would you tell us what that shows?

A. Well, this exhibit shows the number of aircraft which were owned by Pan American's Eastern Division and Western Division, which is the Latin-American operation, during the years through 1942, I believe.

[fol. 459] Q. This is PS-1 you are talking about?

A. PS-1.

Q. That goes through 1958, doesn't it?

A. No, it does not.

Q. It does on mine. According to the heading on my PS-1 it covers Pan American aircraft used by the Latin-American Division for the years 1929 to 1958. Correct?

A. That is correct. I was looking at Exhibit PS-2.

This exhibit summarizes the capacity and speed of various aircraft types used by Pan American's Latin-American Division from the start of operations to date. It is here

purely for informational purposes to show the characteristics of the aircraft which were used primarily during the early stages of operation in Latin America.

Q. Now PS-2. What is that, please?

A. That indicates by sectors the type of equipment used in the Latin-American operations up through the year 1942. The exhibit was initially submitted in Docket 779, and we have not attempted to bring it up to date at this point.

Q. I notice you referred to the Western Division in this. [fol. 460] What do you mean by the Western Division?

A. Well, in the early days of the Latin-American operation there were two separate divisions. The Eastern Division operated from Miami into the Caribbean to the Canal and down the East Coast of South America. The Western Division was responsible for operation to and through Mexico and Central and South America to the Canal Zone in the early stages, and in the late 1930s its operation was extended across the North Coast to Port au Spain.

Q. I think you have sufficiently covered PS-3 in your previous testimony. Tell us what PS-4 is, would you please?

A. PS-4 is a record of Pan American's operations down the East Coast of South America to which I previously referred.

Q. Yes, you have mentioned it.

A. To aid in understanding the exhibit it should be noted that from 1931 until the middle of '48 all services were operated out of Miami, and beginning in 1946 services were inaugurated from Miami through San Juan and Port au Spain down the East Coast.

[fol. 461] I think also that it might be noted that Pan American began its cargo service down the East Coast in 1946 and has continued that service throughout. The service in 1954 was transferred, however, with New York as the origin point rather than Miami.

Q. I notice you were having from New York as many as two flights day in 1947, '48, '49 I guess, and you haven't had that many since out of New York.

A. We ran into an international problem with the government of Brazil in which restrictions were put on the amount of capacity which Pan American could operate between the United States and Brazil and Rio and between

Rio and Buenos Aires. These restrictions have been in effect since, I believe, 1946 and are in effect today, as a matter of fact.

Q. Do you have any comment to make also about competition?

A. The competition on this route has been growing materially during the last—I would say the last eight or 10 years with both Brazilian carriers and Argentine carriers getting into the market in a very strong way.

Q. Do you have any comment upon PS-5, Mr. Ferguson?

[fol. 462] A. PS-5, of course, is the history of the Panagra, Balboa, B.A. services, and I would only like to note that beginning in 1947 the Pan American through-flight services were inaugurated. This has led to a very healthy growth as you will note by the increase in frequencies up to date, and also to note that the frequencies of the Panagra service from the U. S. to B. A. substantially exceed those which are provided by Pan American.

Q. On the East Coast?

The Court: Excuse me. It seems to me that from 1942 the frequency was the same.

The Witness: From '42 to—

The Court: You said it increased in '47.

The Witness: Yes. Oh, I am sorry. '49 is the first year in which there is an increase over daily except for the cargo service, one cargo service in '48. But passengerwise the frequencies were increased to nine frequencies in '49 and to 11 frequencies in '58.

The Court: Is that because of the cargo?

The Witness: No, that is passenger.

The Court: DC-14s are passengers?

The Witness: That represents tourist class.

[fol. 463] The Court: Yes. All right.

May I just interrupt? Would a tourist plane be classified under your concept of people traveling on business?

The Witness: Well, I think generally, your Honor, that business people travel first class.

The Court: I would guess. At least they charge it to business.

The Witness: That's right.

The Court: All right.

By Mr. Peck:

Q. I know you have commented pretty fully on PS-6 and 14, but I want to be sure that it is clear as to what is included in the headings here total mail pay in PS-6 and 14. You have got total U. S. mail pay.

A. Yes. In the early days of the operation, as I pointed out, through 1938 these were payments made under mail contracts. Thereafter, up to 1953, the mail pay was determined by the Civil Aeronautics Board and paid by the Post Office as a lump sum on the basis of a rate per mile flown in most cases. As a matter of fact, in all cases it was stated that way.

That included both subsidy and what is known as com-
[fol. 464] pensatory mail pay which is the pay for the actual service of carrying the mail.

From 1954 on the subsidy payment was separated from the compensatory mail paid, the Post Office paid the compensatory mail pay which was for the service of carrying the mail, and the Civil Aeronautics Board paid the subsidy amount. However, the CAB or Civil Aeronautics Board determined the level of subsidy and the rates per ton-mile to be applied in arriving at the compensatory mail pay, and the Post Office Department accepted the rates which were made by the Civil Aeronautics Board in arriving at the amounts to be paid to the carriers for compensatory mail pay:

[fol. 465] Q. So when you talk about total mail pay, you are talking about total government payment, whether by way of carrying mail subsidy or both together, and any combination.

A. That is correct.

Q. And during the early years, is it true that practically all that so-called mail pay was a subsidy, and really, very little of it related to carrying the mail?

A. That is correct.

Q. Now, what is the purpose of PS15, Mr. Ferguson?

A. Well, as I pointed out in my previous testimony, we wanted to try to get to a cost which was representative of the cost on the Miami-Canal Zone route. This exhibit shows operating costs per revenue plane mile for aircraft employed by Pan American on this route for services during

the years 1941 through 1945. In effect, this exhibit supplements PS14, which shows average division cost per mile for the period 1929 through 1938, and beyond.

Q. How about after '38? Have you been able to segregate it?

A. Actually, it is only after 1938 that we have been able [fol. 466] to segregate costs by types of equipment employed, and have come to these figures.

Q. What about Exhibits PS18 and 18-A? What are they in here for?

A. This exhibit is prepared in rebuttal to the Government Exhibit 101, GS101, which purported to show a comparison of the growth of Pan American and Panagra in terms of passenger miles for the period 1929 through 1957.

The exhibit, in the form presented by the Government, I think, is quite misleading. One thing, the period prior to the adoption of the Civil Aeronautics Act in 1938, was a period of route development.

Q. That exhibit was a map, by the way, was it not, a chart, rather. It was a chart, was it not?

A. It was a chart.

Mr. Peck: Is it here?

I thought I would like to hand it to the Court so his Honor would know exactly what we are talking about. It is this chart.

Q. All right, go ahead, Mr. Ferguson.

A. Once the route from the Canal Zone to Buenos Aires, the Panagra route, was established, it seems to me that the objective of the Panagra development was pretty well [fol. 467] established. On the other hand, much of Pan American's route pattern developed in Latin America, such as the extension down the east coast, was not undertaken until a later date, during 1931-32. Since the Pan American route encompasses a larger overall objective, and the development came later and took longer, it is our feeling that Pan American growth, in terms of passenger miles, was substantial—would substantially exceed those of Panagra's up to the end of 1938, purely from the standpoint of development of the route deal.

You start with zero as a base for the two years, and one carrier has a more extensive assignment than the other, as

was certainly true with Pan American as compared to Panagra, one carrier is bound to show substantially more growth than the other. I do not believe, therefore, the comparison made by the Government is one which actually shows the story. I think it would be much fairer to make the comparison on the basis of the two operations after this development period through '38, and at such time as the Civil Aeronautics Board, or Civil Aeronautics Act was adopted.

We have therefore made the comparison from 1939 through 1957, to see how the two companies have fared. [fol. 468] We have made one adjustment in our figures, in that we have eliminated the passenger miles which were developed on the New York-San Juan route. We feel that that route is much more in the nature of a domestic route; that there were so many items influencing the development of this route and influencing it, I would say, outside of Pan American, such as government agencies and the territory of Puerto Rico insisting that we make available very economical fares on this route in order to develop a free exchange of Puerto Rican population with the United States.

I might say that Pan American put in its first tourist service on this route at rates of about four and a half cents per passenger mile, and we also inaugurated—and that was in 1948—and we also inaugurated in 1956 the first, what is known as thrift service. Under the thrift service rate you can fly from Puerto Rico to New York, a flight of some 1,600 miles, for about $46, which, if computed out to a passenger mile rate, comes somewhere between two and a half or three cents per passenger mile. I believe it is the lowest rate in the world, actually, for air transportation on a scheduled operation basis.

The Court: I don't understand why you did that? You [fol. 469] say the government asked you to, originally?

The Witness: There was great pressure put on Pan American by the government of Puerto Rico to provide a very inexpensive service, so that the Puerto Rican people could fly from the island to the States.

The Court: You are not talking about the thrift service?

The Witness: Well, I was talking—

The Court: Of both?

The Witness: Tourist service.

The Court: But the pressure came from the Puerto Rican Government?

The Witness: The pressure came from the Puerto Rican Government, and it was supported by the Department of Interior.

We put this service in, and the amount of traffic that has been developed the route is fantastic. The San Juan—the New York-San Juan sector itself, on local service only, has amounted to better than a third of the passenger miles of our Latin American operation. I thought I had figures here, but I don't seem to. Actually, in some instances I think it was even pressing 40 per cent of the total passenger [fol. 470] miles of the Latin American operation. So that we felt that this service was not in the same category as the international service, where the development of traffic was quite a different thing, so we decided to make the comparison by the elimination of the New York-San Juan service, and on that basis, as you can see, our growth from 39 to 57 has been about 1587 per cent, as compared to Panagra's 1,717 per cent.

Q. And is that relative growth then charted on PS-18a, which is your full blown up versions on the easel there?

A. That is correct.

Q. The broken line being Panagra and the solid line Pan American; is that correct?

A. That is correct, and it is charted in terms of percentage growth by years. I might say that taking the same period, 1939 to 1957, and without the elimination—

Q. Yes, I was going to ask you, what happens if you keep Puerto Rico in?

A. If we keep Puerto Rico in and make the comparison on the basis of growth in revenues, Panagra comes up to about the same figure as they have in passenger miles, slightly less, and our figure is slightly less than the [fol. 471] figure we show for Pan American, in terms of percentage growth.

Q. You mean slightly less than Panagra or—

A. Let me state it this way:—

Q. All right. Pardon me. I don't want to confuse you. I want to be sure that we get it right, that is all.

A. Well, the Pan American percentage, as I remembered, is approximately 1500 per cent, and that includes the revenues from the New York-San Juan operation.

Q. Yes?

A. And that compares with the growth of about 1700 per cent for Panagra.

Q. I see. Now what is the purpose of PS-20?

A. PS-20, as I pointed out—

Q. No, I don't think you pointed that out before.

A. No, I have not. I have not referred to that before. I am sorry.

Q. I think that is the first reference to PS-20.

A. The Department of Justice—

Q. Just tell us why we have got PS-20 here.

A. Well, PS-20 is in here in rebuttal to an exhibit which [fol. 472] the Government has submitted, which was a letter from Mr. Clark, the vice president of W. R. Grace, which pointed out that the Pan American sales effort was selling only about three and a million dollars of revenues, and that Panagra was selling about six and a half million in its operation.

Q. Exhibit 541, that exhibit, is Mr. Clark's. All right, go right ahead.

A. We decided to take some figures of our own and see what they look like on our own records, and this shows that in 1949, which was the year covered by this

Q. Pardon an interruption, Mr. Ferguson. I would like to make one thing clear about that exhibit, to begin with. Government's Exhibit 541, which was talking about sales by Panagra for Panagra's account in South America, as compared with Pan American sales for Panagra's account in the United States. Would you make a comment as to whether those are comparable figures in any event?

A. No, they are not. Panagra's sales might not have been for Panagra. It could have been for most anybody. They could have been for connecting carriers. They could have been for Pan American; they could have even been for [fol. 473] domestic carriers, in that if they sold transportation from Lima, let's say, to New York, in 1949, they

would be selling, for example, for Pan American, they would have been selling for Eastern or National and themselves.

Q. And I have got in mind what I would assume is more important, check me, is that it would have included all the sales for Panagra's account of South American traffic which doesn't come to the United States at all.

A. That is correct.

Q. Wouldn't that be right?

A. That is correct.

Q. That must be a tremendous percentage of the Panagra traffic, isn't it?

A. I think it is quite substantial, and their local traffic on the west coast.

Q. Whereas Pan American sales for Panagra would all be sales from passengers in the United States, wouldn't it, or practically?

A. Well, they would—the sales which we segregate would be the actual sales which wound up in Panagra's revenues.

Q. But I mean, they would be passengers, wouldn't they, [fol. 474] traveling from the United States, wouldn't they?

A. No, it would be passengers, any passengers, that Pan American sold for them, whether it would be from the United States, whether it be from Latin America, whether it would be from Europe.

Q. Well, I mean, you wouldn't sell much for Panagra, would you, from Lima to—well, Lima to BA, or from any other place along the route, South American traffic that didn't come to the United States?

A. Our Rio office could very easily sell Rio-BA-Lima.

Q. Yes, but as I understood these figures, were sales in the United States by Pan American in the United States for the account of Panagra.

A. Oh, well, that is a different kettle of fish.

Q. Yes. Well, that is the comparison.

A. Well, I wasn't sure that that was true. Maybe it is.

Q. I am quite sure that it is true. Well, you accept that assumption for the moment, that you are comparing Pan American sales in the United States for the account of Panagra with Panagra's sales in South America for the account of Panagra; are they comparable at all?

[fol. 475] A. I don't think they are. I don't think the two figures are comparable.

Q. And am I not right that Pan American in the United States would not be making any appreciable sales for the account of Panagra just within South America?

A. You mean as a local flight?

Q. Yes.

A. On the west coast?

Q. Yes.

A. I think there would be very few of those.

Q. All right. Go ahead then with what you have done with PS-20.

A. Well, we have taken the—let me talk about the year 1949 first. In that year Pan American made the sales and credited to Panagra the amount of those sales, which represented travel over Panagra's route, and in that year the Panagra sales represented 49.1 per cent of Panagra's total passenger revenue.

In the years 1954 through 1958, the figures under Panagra total passenger revenue, under the figure passenger revenue sold by PAA, represent direct billings from Panagra for tickets sold by Pan American, which were picked up on the Panagra routes and then billed to Pan [fol. 476] American. So that there is no question that these amounts actually represent amounts of revenues which Panagra has derived from sales by Pan American, and the year, as you can see, the trend, '54 to '58, it has gotten up to almost 61 per cent of the total Panagra revenue which was sold by Pan American.

Q. Now, what is the purpose of Exhibit PS-21, Mr. Ferguson?

A. This exhibit shows the subsidy accruals as estimated by the Civil Aeronautics Board for Pan American's Latin American operations for Panagra and for Braniff, in their Latin American operations. I previously explained that the shift at the end of 1953, when the CAB commenced making separate determinations of subsidy requirements, for the period prior to 1954 the figures shown are taken from a study made by the Civil Aeronautics Board staff, purely for information purposes, and they have determined in these years what the estimated actual subsidy was as opposed to the compensatory mail pay.

Q. Do these figures include full year subsidy in all instances, and are they complete?

A. No, they are not. Under the Pan American heading, the year 1948 represents subsidy only for the three months, [fol. 477] and through June, 1948, and the item of fifteen hundred dollars—a million five hundred thousand dollars, for the year 1957 is for the three months, July to September, 1956.

Q. Well, how about the fact that no subsidy is shown for 1958? Does that mean that there was no need for a subsidy?

A. Not necessarily. The Pan American rates or subsidy have not been determined for the period October 1, 1956, to the end of December, 1958.

Q. Are you asking for subsidy for that period?

A. Yes, we are asking for subsidy for that period.

Q. Has the Board made any calculations in reference to it?

A. Well, in their recent order, or rather, show cause order, in which they ask Pan American to show cause why its—why the mail rates should not be closed as of January 1, 1959, they computed the amount of the need of Pan American for the period October 1, 1956, through December 31, 1958, and if deferred taxes, which are an item that is in question as to the policy which the CAB will follow in determining need, are included, they determined our need for subsidy to be for this period about $23,000,000 for the Latin American operation.

[fol. 478] Q. I notice that your exhibit here does not have anything down for subsidy for Panagra after 1956. Does that mean that Panagra isn't seeking and doesn't need any subsidy for that period?

A. No. Well, I will take that back. Let me say first that the subsidy shown for fiscal year 1955 of $1,100,000 is only for the last six months of 1954. For the period from January 1, 1955, through—well up to about October, 1958, Panagra's rates have been closed and no subsidy will be paid up to that time. In October, however, 1958, Panagra filed a petition with the Civil Aeronautics Board to reopen its rates and to establish a subsidy—establish the annual subsidy requirements for their operation.

Q. What did they say their requirement was?

A. The amount shown in their petition was approximately $6,800,000.

Q. Per year?

A. Per year.

Q. During the course of your testimony you made some comment about IATA, but I am not sure that you covered the last thing that I wanted to ask you here, the next-to-the-last. Are the rates charged by American flight carriers [fol. 479] in Latin-America governed by resolutions of the International Air Transport Association as approved by the Civil Aeronautics Board?

A. They are. Rates for Argentina, Brazil, Chile, Uruguay and Paraguay were fixed—have been fixed and set since about 1950 by IATA, and for other countries in the Western Hemisphere they have been established since about 1951.

Q. Is this all approved by the Civil Aeronautics Board?

A. The right for the carriers to participate is approved.

Q. In a resolution of the Board?

A. That's correct.

Q. My final question, Mr. Ferguson: Can you tell us what the investment of Pan American was in the Rancho Boyeros Airport in Cuba in the year 1947? What was it at that time?

A. In '47?

Q. Yes.

A. I have not got it broken down in that way.

Q. How close can you come to it?

A. Well, I would say that in 1947 it was approximately a million dollars, and up through '52, the year in which [fol. 480] the airport was sold by Pan American, we had invested $1,372,000.

Mr. Peck: I think that is all on direct, your Honor.

The Court: We will take a short recess.

(Short recess.)

Cross examination.

By Mr. Kenney:

Q. Mr. Ferguson, you testified about a number of different subjects, and the last one you finished with was IATA, and that is the one I am going to begin with.

Are you an expert in IATA procedure?

A. As far as the economics which go into rates are concerned, I am.

Q. Do you have knowledge of the way the question of setting fares is handled by IATA?

A. Generally, yes.

Q. As I understand it, and I hope you will correct me if I am wrong, these fares are supposed to be arrived at actually at the time of the IATA conventions; is that not so?

A. By a unanimous adoption of fares by the conference.

Q. There is not supposed to be any exchange of infor- [fol. 481] mation or any settling of fares between the airlines prior to the convention; is that not true?

A. I think that is correct.

Q. By the way, Mr. Ferguson, did you testify in CAB Docket No. 2423?

A. I don't recognize it by number. Maybe if you can tell me what it is.

Q. That was the through flight.

A. I did.

Q. You did testify?

A. I did.

Q. Wasn't your testimony on the subject of fares to some extent?

A. Not that I remember.

Q. You don't recall that?

A. No, I do not.

Q. Isn't it also true under the IATA rules that the fares which are arrived at at the conventions apply only to the members of the IATA?

A. That is correct.

Q. In other words, there are no provisions under IATA which would permit an IATA carrier to agree on a rate with a non-IATA carrier, is there, Mr. Ferguson?

[fol. 482] A. No, not agree if you mean together they agree, no.

Q. That's right. Do you know whether in 1953 Aerolineas Argentinas was an IATA carrier?

A. I do not remember whether they were members of IATA at that point or not.

Q. Do you know that Pan American had a rate agreement with them?

A. No, I do not.

Q. You do not know that?

A. No.

Q. Mr. Ferguson, I believe you testified that 53 per cent of the tourists go on round-South American trips; is that right?

A. No, I did not testify to that. I testified that of the total U.S.-B.A. passengers 53 per cent purchased round-South America tickets.

Q. That is the total. Of the total, 53 per cent do that?

A. That's correct.

Q. Mr. Ferguson, you were not trying to establish by your testimony, were you, that there is no competition between Pan American and Panagra?

A. I think my testimony speaks for itself.

[fol. 483] Q. Well, I will ask you if that is what you were trying to establish.

A. I was trying to establish the extent of competition in so far as Pan American and Panagra are concerned.

Q. There is competition; is that right?

A. I told you the limited extent to which it was established.

Q. Isn't it a fact that as far as Buenos Aires is concerned, that the Pan American people down there look upon Panagra as their chief competition?

A. May I have that question, please?

(Question read.)

A. To the extent that there is competition that is probably true. On the other hand you have also Aerolineas, you have Transcontinental, both Argentine carriers, and you have Braniff.

Q. Well, I am going to read you from Government's Exhibit 316 which is a memorandum dated March 30, 1951,

and it covers a meeting of the Pan American people in Buenos Aires with the Walter R. Thompson agency, and it says the primary competition is with Panagra and the secondary with Argentine airlines and Braniff. Would you agree that that condition still exists today?

[fol. 484] A. It depends on what you are talking about. It depends on the extent to which you can compete, and I think you have to measure that quantitatively.

Q. Let us put it this way, Mr. Ferguson: Isn't it a fact, although you talk about the Canal Zone, that Panagra, through the use of interchange agreements, actually has its terminal in New York and in Buenos Aires?

A. You mean with the through flight?

Q. That's right.

A. May I have the question again, please?

Q. Well, let me rephrase it. As a practical matter Panagra flies from New York to Buenos Aires, does it not?

A. That's correct.

Q. And so does Pan American?

A. That's correct.

Q. And they compete for passengers on that run; is that not correct?

A. I admitted that they competed for a certain phase of the traffic, that's true.

Q. They compete for all the traffic that goes from New York to Buenos Aires, don't they?

[fol. 485] A. No, they do not.

Q. Don't they each try to sell people going from New York to Buenos Aires and Buenos Aires to New York tickets?

A. We try to sell both services.

Q. Isn't it true, Mr. Ferguson, that if Pan American had not stopped the development of Panagra throughout the years there would be even a great deal more competition today?

Mr. Peck: I object to the form of the question.

The Court: Sustained.

By Mr. Kenney:

Q. Let's take the case of Miami. Pan American prevented Panagra from coming into Miami for a long time, didn't it, sir?

Mr. Peck: If he knows.

Q. If you know.

A. I don't know whether you would call it prevent or not. Panagra came into Miami on the basis of Pan American's permission for them to come in.

Q. Are you familiar with the CAB hearing in Docket 779? [fol. 486] A. Yes, I am.

Q. Do you know whether or not in that hearing Pan American took the position that if Panagra was allowed to come through to Miami it would be in direct competition with Pan American?

A. I know of Docket 779, and I know the basis of the case as far as that part is concerned.

Q. Are you not familiar with Pan American's position which I have just—

A. It opposed permitting Panagra to file an application for the route.

Q. Because it would put it in competition with Pan American: isn't that correct?

A. Because it would put Pan American out of business.

Q. And would put Panagra in competition with Pan American?

A. The reason for it was because it would put Pan American out of business on Miami-Balboa.

Q. It would also put Panagra in competition with Pan American, would it not, sir?

A. I don't think there would be any competition under the circumstances that I see.

Q. You are familiar with the fact that the Board has on [fol. 487] several occasions made the statement that Panagra should have been allowed to come through to Miami on its own certificate; are you not, sir?

A. I don't know the utterance to which you referred.

Q. Let's take Docket 779. Isn't it true that the Board took the position that Panagra should be allowed by its parents to come through to Miami?

A. I don't think so. I think they decided they had no jurisdiction.

Q. Didn't they later urge that the owners take some action to see that Panagra is given its own certificate to come through to Miami?

A. I don't remember that.

Q. You don't know, sir?

A. No.

Q. Well, do you know whether they urged that Panagra be allowed to come through to the Eastern United States in connection with Docket No. 525 which was a Latin-American route case?

A. No, I don't know that.

Q. You don't know those things.

A. No.

Q. You did testify about the economics of the Rio-Lima [fol. 488] run. It is true, is it not, Mr. Ferguson, that Panagra wanted to get a certificate to operate from Rio to Lima and from Lima to Rio?

A. Yes, I think they did.

Q. And Pan American didn't permit it; isn't that correct?

A. Pan American didn't think they should operate it because it was not economically feasible.

Q. And because of the peculiar way in which Panagra is set up, one of the partners can stop action by the other; isn't that right, sir?

A. Well, sometimes they don't agree.

Q. Well, you have been with Pan American since 1929, I believe you testified.

A. That's correct.

Q. Are you familiar with the early history and the formation of Panagra?

A. I know the early history through Docket 779.

Q. You were not one of the 12 young men that founded Pan American; is that right?

A. I was a young man and joined Pan American after college, poor.

[fol. 488a] Q. Do you know anything of the territorial arrangement which was agreed upon between Grace and Pan American prior to the formation of Panagra?

A. Just what I know about what the objective of Panagra

was to be which was to operate a connecting line between the Canal Zone and Buenos Aires.

[fol. 489] Q. Do you know anything —

A. It was to be to operate a connecting line between the Canal Zone and Buenos Aires.

Q. Do you know anything personally of the arrangement that was made by Grace in Pan American prior to the formation of Panagra?

A. I had nothing to do with the conversations.

Q. You do know that Pan American has always taken the position that there was a division of territory agreement which applies to the situation here?

A. I do know what the objective was in so far as Panagra was concerned, at the time that Panagra was formed.

Q. You also know that Pan American said that it wouldn't apply for routes on the west coast to South America prior to the time this case was filed, don't you?

Mr. Mallory: Could I have that question again, please?

(Question read.)

A. No, I do not know.

Q. You know nothing of the agreement on the division of territories between the parties of this case, Mr. Ferguson?

[fol. 490] A. I know what I learned in Docket 779. First-hand information with regard to the division of territories, I do not know.

Q. Well, you say what you learned in Docket 779; did you read Docket 779?

A. I listened to most of it.

Q. Well, didn't you hear the terms "spheres of operation" and "division of territories" mentioned in that hearing?

A. My primary memory of the purpose of Panagra was described in the history of the formation of Panagra.

Q. Well, don't you know, as a matter of fact, Mr. Ferguson, from listening to Docket 779, that there was an agreement between Pan American and Grace, that Panagra would operate down the west coast of South America and Pan American would operate down the east coast of South America?

Mr. Peck: I think, your Honor, I will object to this. I don't think it is proper cross-examination. I didn't ask him anything about any agreements. I don't object to having the witness testify to what he knows about something, but he has told us what he knows, and I think that there is no purpose to be served by continuing to cross-examine the witness about agreements which he has no [fol. 491] firsthand knowledge of, and which I didn't ask him anything about.

The Court: That doesn't limit the Government in its cross, because you didn't ask him. But perhaps it might cause the Government to ask the question differently. However, I will allow it.

Mr. Kenney: Thank you, sir.

Q. Now, will you answer the question if you can, Mr. Ferguson?

Mr. Kenney: Would you read the question to him?

(Question read.)

A. As to firsthand knowledge, I do not know of such an agreement.

Q. There would be others in your company who would know more about that; isn't that right, sir?

A. I am sure there are.

Q. Now, if Panagra had been allowed to fly from Rio to Lima and Lima to Rio wouldn't that have put it in a competitive position with Pan American for Rio traffic?

A. To the extent that it was competitive, yes.

Q. And we can agree certainly that during the years, if Panagra had been allowed to fly under its own certificate [fol. 492] from the Canal Zone to Miami, there would have been a good bit of competition between Pan American and Panagra.

A. Oh, no, there wouldn't have been much competition at all, because Pan American—

Q. You mean Pan American would have gone out of business.

A. —Pan American would have gone out of business on the route.

Q. So the competitive situation thus created would have put it out of business?

A. Would have put it out of business, and instead of making more competition, would make less, unless we are certificated on the west coast.

Q. Well, the Civil Aeronautics Board pretty much decides the route pattern and thinness of the market, doesn't it, sir?

A. Oh, yes, certainly does.

Q. Now in the latter part of 1956, isn't it true that Panagra wished to obtain a certificate under its own name to fly to the West Coast of California?

A. In the latter part of 1956?

Q. That is correct.

[fol. 493] A. I can't remember whether they filed an application or not.

Q. Well, I am asking you, sir, if you know whether they expressed this wish to Pan American?

A. Well, I think they made a management study, which indicated that they had an interest in the route, yes.

Q. Do you know whether Pan American flatly refused to join the Grace directors in enabling Panagra to serve this part of the country?

A. Well, I think if they had, application would have been filed.

Q. And it hasn't been?

A. It has not been filed.

Q. Now, if Panagra were to fly to the west coast of California, say to San Francisco and Los Angeles, wouldn't that also put it in competition with Pan American?

A. Very much so.

Q. Now isn't it true, Mr. Ferguson, that Pan American is soon going to inaugurate a direct service from New York Caracas-Buenos Aires?

A. We hope to do—

Mr. Peck: Can we get that question again? Would you give me the question, please?

[fol. 494] (Question read.)

A. We hope to do so by Asuncion.

Q. That would be by jet?

A. That's right.

Q. Now, will that route to be operated in that way make you nearer on a route mileage basis to Buenos Aires than Panagra is with its route down the west coast?

A. I don't believe it will. I think it would make it just about equal.

Q. It certainly won't be any longer, will it, Mr. Ferguson?

A. No, I think it will probably take up the slack in the differential between the present routings. On the other hand, my memory is that it is about two or three hundred miles involved. I think it would still be a mileage advantage via the west coast.

Q. I think you might find that it would be even a little shorter in mileage, operating that route. Now, I might be wrong about that. But in any case, the problem of Panagra having the shorter route will no longer be such a problem, will it?

A. Well, I don't, I don't frankly think that since the operation out of New York in 1955 that it really has cre-
[fol. 495] ated very much of a problem.

Q. Well, I understood you to say that one of the selling points on the Panagra route was that it was shorter?

A. Well, that is from all areas of the United States except in the case of New York, where the mileage differential is small enough that it doesn't make too much difference.

Q. It won't make much difference at all under this route, will it?

A. I don't think it will. I think we'd have pretty equal routes as far as BA is concerned, which is what seems to be so important here.

Q. Now, Mr. Ferguson, in mentioning statistics, you used the months of March and September; are those representative months?

A. I think they are.

Q. Now, Panagra has not always been happy in the past with Pan American's conduct and efforts in the sale of its tickets and its advertising, have they, sir?

A. There have been, I presume, some kicks about the Pan American service; on the other hand, it seems to me that certainly in the last eight or ten years that we
[fol. 496] have had very few problems in so far as—

Q. Well, we have a number of letters in the record here,

sir, that indicate in 1949-1950 there were still a number of complaints?

A. Well, let's take the nine years then.

Q. You say the situation no longer exists?

A. I don't think so. I think there are always differences between two partners, there is no question about that, and they are small in most cases.

Q. They are small?

A. Yes, I think they are small.

Q. These differences haven't let up much, have they, over a period of some 30 years?

A. Well, we seem to be getting along pretty well with Panagra in our sales effort, for example. I have discussed the matter with our U.S. sales manager, for example, who thinks the thing is running very smoothly, as a matter of fact.

Q. Your manager does?

A. Our manager, and he ought to know if there are complaints. We have a completely cooperative arrangement in so far as sales are concerned, where the Panagra sales people cooperate completely with the Pan American sales [fol. 497] people in the various districts over the country. They go together to call on agents, to set forth the various advantages of service, and that sort of thing, and I think as far as advertising is concerned, that there were some problems with regard to that. It is certainly my impression that the advertising programs, which are in some cases joint, and in some cases entirely separate programs, are going along very well.

Q. Panagra still doesn't have its own advertising under its control, does it? Pan American—

A. Oh, certainly does.

Q. Isn't Pan American the representative in this country that handles Panagra's advertising?

A. Panagra has perfect freedom in its advertising program. It can put as much advertising in papers or magazines as it pleases. That is up to their board of directors as to what they spend. As far as joint advertising is concerned, it is always on the basis of an agreement on the advertising to be done, and the costs are split on a reasonable basis between the two carriers.

Q. Now, I think you testified that Panagra presently had its own representatives in this country selling passages over [fol. 498] Panagra?

A. That is correct.

Q. Now, when a Panagra representative here sells a passage over his line, does Pan American get a commission on that sale?

A. That's right. We are the general agents for Panagra. As a matter of fact, as far as the Panagra representative actually making the sale is concerned, I don't believe that is quite the picture. The sales effort is almost entirely as between the passengers and Panagra—between Pan American and the passenger. The staff of Panagra is the staff which is promoting Panagra in Pan American's offices and with agents.

Q. Mr. Ferguson, I believe you testified at some length about the thinness of the market; are you familiar at all with the Board's decision in Docket 4882, the so-called Balboa Through Flight proceedings?

A. Yes, generally.

Q. Are you familiar with the fact that in that decision, which was issued in 1955, the Board stated that "The Latin America area is today the largest foreign air transportation market to which American flight carriers have access"?

A. No. I think you are relating my testimony, however, [fol. 499] to a period which is not being discussed in Docket 4882.

Q. Well, I was asking you, sir, if you were familiar with the fact that the Board so stated its decision, in its opinion, in Docket 4882?

A. And what was the quotation?

Q. "The Latin American area is today the largest foreign air transportation market to which American flight carriers have access."

A. I wonder if they would say it today?

Q. Well, they said, "Moreover, it is a market which has expanded tremendously in the past and which may be expected to continue to grow in the immediate as well as the more distant future."

A. Well, I can say it hasn't, it hasn't grown any more near, at anywhere near the rate where other areas have, such as your trans-Atlantic, trans-Pacific.

Q. You are familiar with the fact that the Board put Braniff down there in 1946, aren't you, sir?

A. Oh, yes, I am very familiar with that fact. But I also say that I don't think there is an area in the world where the competition is so keen as it is in the Latin American area.

[fol. 500] Q. Well, let's see how Pan American got started in the Latin-American area. I think you testified at some length about the fact that Panagra had to have a subsidy to get started down there. Pan American didn't make any money without mail pay in the early years either, did it?

A. Oh, it certainly has not. It hasn't made any money with mail pay either.

Q. As a practical matter, don't they all get mail pay?

A. No, not without subsidy.

Q. Isn't mail pay a form of subsidy?

A. It is not. It is compensation for doing a service.

Q. Doesn't the Civil Aeronautics Board look upon mail pay as a form of subsidy, to your knowledge?

A. It certainly does not.

Q. Are you saying that they only actually get paid for the mail they carry?

A. That's what some people get. Other people get subsidy which is identified as such.

Q. Does Braniff get subsidy?

A. Yes.

[fol. 501] Q. In addition to its air mail pay?

A. That's right.

Q. Does it today?

A. I think you will find, if you look at the Board's estimate of subsidy requirements for international carriers, that there is only one there and that is Braniff.

Q. Panagra has requested a subsidy; is that right?

A. That's correct; and so have we.

Q. And so has Pan American. Now, this through-service agreement or the through service that you talked about was approved by the Board in 1946, wasn't it?

A. That's correct.

Q. Are you familiar with that proceeding? I think I asked you that before and you said no.

A. Yes, I participated in those proceedings.

Q. You did participate?

A. That is right.

Q. You know, don't you, that the Board approves these things at certain periods of time; approves this through-flight agreement?

[fol. 502] A. I don't remember what the approvals were. It seems to me that the first one was for three years or something like that, and then it was extended.

Q. Don't you know that the last one was until 1960 or the conclusion of this case?

A. I don't remember the terms of the approval.

Q. You do know that the Board keeps some sort of control over this through-flight agreement.

A. Well, if you mean control by being able to bring it up for approval again, why, I suppose that's right.

Q. They have to approve it from time to time; is that right?

A. That's right.

Q. Do you know anything about the 1939 agreement between Grace and Pan American and Panagra?

A. Only the fact that at that time it was determined that one of the Grace directors would become the president of Panagra.

Q. Do you know whether it is your company's position that that particular agreement ratified the understanding on the division of territories?

A. No, I do not.

Q. At the time that Panagra wished to fly from Lima [fol. 503] to Rio, Panair do Brasil was not operating the route, was it?

A. As I remember it, they started the operation in '51 and then suspended, and then reinstituted it in '54.

Q. They were not doing it in 1949, were they, sir?

A. No.

Q. Or in 1950?

A. I don't think they were, no.

Q. You spoke of some difficulty with regard to Brazil. Could you tell me again what you meant by that, sir?

A. Yes. The United States has a bilateral agreement with Brazil which provides for the operation of United States flag carriers and Brazilian carriers between Brazil

and the United States. Under that agreement there are certain provisions whereby a carrier is not permitted to operate what might be considered excess capacity which would injure the airline—the national airline of the second party to the agreement, which in this case would be Brazil.

We had been operating twice daily with DC-3s and then had cut back to a DC-4 service which we had in what we [fol. 504] called a sleeperette configuration which provided for some 30 to 35 seats on a DC-4 airplane at first-class fares. We also operated those flights south of Rio in which case we picked up what might be called third-country traffic, in other words, traffic that originated in Brazil, and carried it to Buenos Aires.

The Brazilians felt that we were offering and carrying more of that type of traffic than we should carry, so they put a limitation on us both north of Rio and south of Rio as to the number of seats which we could offer for sale. This has been—this restriction has been in effect ever since, and we are limited by that.

Q. Will this new direct flight, New York, Caracas, Asuncion, Buenos Aires, help you in that respect?

A. Well, it is an improvement in service. As far as we are concerned, we will have an improvement of service when the jets are in operation, and by the same token so will Panagra when they get their jets in operation, which should be some time in 1960.

The Court: What counsel meant was you wouldn't be limited by this Brazilian limitation for the simple reason [fol. 505] that you wouldn't be stopping there.

The Witness: We would be by-passing Brazil.

Mr. Kenney: That is what I was about to ask.

The Court: Would this be a convenient time to adjourn?

[fol. 506] New York, May 19, 1959,
10.30 a.m.

R. G. FERGUSON, resumed.

Cross examination (continued).

By Mr. Kenney:

Q. Mr. Ferguson, as the treasurer of Pan American you are the chief fiscal officer of that company; is that not right, sir?

A. That's correct.

Q. As I recall your testimony yesterday, you stated that approximately 54 per cent of the traffic between the United States and Buenos Aires originating and terminating in the Northeastern part of the United States—that that percentage is correct; is that right, sir? 54 per cent?

[fol. 507] A. Yes.

Q. Now, could you tell us what percentage of Pan American and Panagra's participation originates in the Northeastern part of the United States?

A. I don't think I have that figure.

Q. Would the figure 90 per cent seem high to you?

A. I would think that would be quite high.

Q. Well, it is a much higher figure than 54 per cent, is it not, sir?

A. I think that the 54 per cent as a figure is representative in so far as all American carriers are concerned.

Q. That's right. But I am asking you now about Pan American and Panagra.

A. Well, I have no basis for stating that the amount of the traffic would be any different there than any place else.

Q. Well, isn't it a fact that at the present time Panagra has 11 weekly flights from New York to Buenos Aires?

A. Yes, sir.

Q. And Pan American has six?

[fol. 508] A. That's correct.

Q. And Braniff has one?

A. To Buenos Aires?

Q. One.

A. I thought they had more than that to B.A.

Q. Well, a Panagra exhibit which shows the operations of the various airlines operating between New York and Buenos Aires as of April, 1959, says that Braniff has one. This is Panagra Exhibit 194.

A. I am not familiar with the exhibit.

Q. And certain other foreign airlines also have a couple of weekly flights, do they not?

A. Yes, Aerolineas has, I think, two flights or three flights; I am not sure. Real—VARIG, rather, has flights down the East Coast, as does Aerolineas and—

Q. Transcontinental?

A. Transcontinental and Real and the other Brazilian airline which operates into Miami.

Q. Aerovias Peruvianas?

A. Well, I only know it as Real.

Q. And LAN, L-A-N?

A. I'm not sure about that.

Q. Well, you are not sure either that the figure 54 per [fol. 509] cent reflects the actual percentage of passengers carried by Pan American and Panagra from the Northeastern part of this country, are you, sir?

A. I am referring to the percentage of the traffic carried as shown in the CAB reports.

Q. And that is 54 per cent by all lines?

A. It is the American carriers.

* * * * * * * *

[fol. 510] Q. Mr. Ferguson, as I recall your testimony yesterday, you spoke, I think, of 40 per cent of the Pan American and Panagra passengers being stopover passengers; is that right?

A. That's correct.

Q. Now, that is an assumption on your part, isn't it, sir?

A. Well, it is an assumption which is supported by what happens in other parts of the country, and the only basis on which we can determine why passengers use various routes is the basis that, if they wanted just to go straight to B.A. by the shortest distance in the best time, take, for example, the point San Francisco and Los Angeles, they could [fol. 511] have done it without using the East Coast, for example, and we therefore assume that the 40 per cent of the traffic does select the East Coast or West Coast because of their desires for stopovers.

Q. I didn't interrupt you, Mr. Ferguson, but the fact remains that you have never made a survey to determine this, have you?

A. You mean by asking the passengers?

Q. That's right.

A. No, we have not.

Q. And so it is an assumption on your part?

A. It is an assumption which is based on fact.

* * * * * * *

[fol. 514] Q. Now, as chief fiscal officer of Pan American, you would obviously prefer for your passengers to use Pan American all the way, wouldn't you, sir?

A. Well, to the extent that they do, why, we are better off, of course.

Q. Well, wouldn't any loyal employee of Pan American want the company to receive the full fare?

A. Not necessarily.

Q. You don't think so?

A. No. I think he wants to sell what the passenger wants. In any public service, that is the way it is done.

[fol. 515] Q. You don't think that Pan American employees would be loyal enough to the company to want to realize all the money the company could for the company; is that right, sir?

A. Well, it is all the money it could. We also have an interest, as you may know, in Panagra.

Q. Yes, I have just explained that interest. You get a percentage of the fares over Panagra's lines, but you get the full fare over your line; is that right, sir?

A. Well, I don't think you are saying it right. Pan American, directly, for the service which it renders, would receive its share of a round South American fare for service rendered between New York and BA. It would also receive directly its fair share of the fare from BA to New York via the west coast over the Miami-Canal Zone sector. That is for service rendered.

Q. Yes, I understand that.

A. We also have an interest in Panagra as such, a one half interest.

Q. Right.

A. It is not a hundred per cent interest.

Q. That's right.

[fol. 516] A. It is a one-half interest. So that we do have an interest—

Q. In fact—

A. —we do have an interest also in what happens as far as Panagra is concerned.

Q. Well, I don't want to go all over this again, but the fact is that Pan American makes more money when a passenger travels on its line all the way to Buenos Aires and back than it does when he goes one way on Pan American and comes back on Panagra; is that right?

A. I think that is axiomatic.

Q. And the same thing is true when you can persuade him to come down the east coast and fly back the east coast, you get the whole income; is that right, sir?

A. That is exactly the same question.

Q. And your answer is the same.

A. That's right.

Q. It is axiomatic. Now, Mr. Ferguson, does Pan American engage in publicity efforts to sell passengers on the idea that an air trip is more pleasant than a sea trip?

A. Oh, I am sure we do.

[fol. 517] Q. Pan American goes to Buenos Aires and Rio de Janeiro; is that not right?

A. That is correct.

Q. And certain steamship companies also go to these points.

A. Yes.

Q. Do you consider that Pan American is in competition with these steamship lines?

A. Very definitely. We are both trying to get the same market.

Q. Would you also apply that thinking to Europe?

A. Oh, yes.

Q. Even more so?

A. No, I think the situation is about the same.

Q. You definitely consider that you compete with steamship lines in the routes.

A. Certainly do.

Mr. Kenney: That is all.

Cross examination.

By Mr. McKay:

* * * * * * *

[fol. 518] Q. Mr. Ferguson, as an expert in this airline business, you recognize, do you not, that one carrier service is to the advantage of the public and to the carrier itself?

A. There is no question about that.

Q. And you recognize also, Mr. Ferguson that an interchange is a poor substitute for one carrier service, do you not?

A. Well, let's say it's a substitute.

Q. It is not as good as the one through plane service?

[fol. 519] A. Well, I would say—

Q. One carrier service?

A. I would say it is the next best, and if the two parties to the interchange do a good job, they can supply quite good service all the way through.

Q. There is no question in your mind though, as far as your company is concerned, if you were offered your own route you would prefer that to an interchange.

A. I think that is correct.

Q. Are you familiar, Mr. Ferguson, with Pan American's application to come from its present terminal in Los Angeles or San Francisco into New York and the mid-western cities, in order to serve Tokyo and the Far East?

A. Yes, I am. Not, I think—

Q. Generally.

A. I think the application is to come into New York for Tokyo service.

Q. You are familiar also, are you not, that domestic carriers, flying across the United States, oppose the Pan American's application?

[fol. 520] A. They will oppose it, I think. I think that the opposition, in so far as the American carriers, however, would be primarily based on the scope of the proceeding, and I think the primary problem in so far as the American carriers are concerned is whether or not Honolulu as such will be excluded in the case.

Q. But you are familiar with the fact that Pan American

has an application to extend its present route from the Far East to the western coast of the United States.

A. That is correct.

Q. To the eastern coast.

A. In order to compete with Northwest Airlines.

Q. Pan American, if it gets that application approved, will be taking business away from United and TWA, and so forth, that fly from New York to California, would it not?

A. There might be some diversion, yes.

Q. Well, if someone wants to go to Tokyo, you say there might be some; there will be some, will there not?

A. There will be diversion to the extent that Pan American takes connecting traffic from the eastern part of the [fol. 521] United States.

Q. And you will be taking that connecting traffic, will you not, Mr. Ferguson?

A. I hope so, if we get the route.

Q. That is the whole purpose of the application, is it not?

A. In order—no, the purpose of the application is in order to provide the subject with good service.

Q. And to make money for Pan American?

A. That's right.

Q. Would you say that the present pattern, air pattern now, where a passenger leaving New York and wanted to go to Tokyo on Pan American, has to take a United or TWA plane to the coast, then trans planes on to Pan American, that that is an antiquated route pattern?

A. I think it is antiquated, and I think it will become more so when the jets come into the picture.

[fol. 522] Q. Do you know whether Panagra has jets on order?

A. Yes, they do.

Q. When do they get delivery of those jets, Mr. Ferguson?

A. My recollection is that it will be some time in 1960.

Q. Do you know whether Panagra has plans or intends to fly non-stop New York to Lima?

A. No, I do not of my personal knowledge.

Q. To get the best utilization out of a jet plane it would be desirable to fly non-stop, would it not, New York to Balboa, overfly Miami, say?

A. Yes, I think probably that is true. I think even on an interchange that could be arranged.

Q. But as you said previously, Mr. Ferguson, an interchange is not as desirable as one's own route.

A. Well, when you get into situations—

Q. Yes or no, Mr. Ferguson. If you cannot answer that yes or no, I will go to another question. Did you so testify? The answer is either yes or no.

A. Yes, I did testify.

Q. That is all. Mr. Ferguson, on direct I believe you [fol. 523] testified that prior to the Civil Aeronautics Act, which went in in 1938, subsidy was in the form of 10-year contracts awarded by the Post Office.

A. That's correct.

Q. And it was a policy of the Post Office at that time not to subsidize, if you will, to competing carriers along the same route?

A. That's correct.

Q. And then in 1938 under the Civil Aeronautics Act the CAB obtained jurisdiction over subsidies and it was within their discretion as to whether there should be one or more carriers on the same route.

A. That's correct.

Q. And isn't it true in 1946 the Civil Aeronautics Board awarded a fairly heavy subsidy to Braniff, paralleling Panagra's route in the main?

A. Yes, they did. That was a Presidential decision, not the Civil Aeronautics Board, as I remember it.

Q. Let us say the Government.

A. The Government. There are many times when, if I may complete my answer, the President, who has the final say in matters of this kind, may make decisions not based on economics but on political situations.

[fol. 524] Q. The fact is that a parallel carrier was authorized under the law?

A. That is true, but certainly not from an economic point of view.

. . . . . .

Redirect examination.

By Mr. Peck:

Q. Mr. Ferguson, I would like to clear up one thing in your testimony from yesterday. We had some discussion of a 4,000 figure, you remember, as the number of passengers which were exchanged each way between Pan American and Panagra at Balboa, and there was some question as to just what that 4,000 was, whether it was all the passengers coming into Balboa from Pan American and all the passengers going into Balboa from Panagra or something less than that.

Now, would you tell us precisely and exactly what that 4,000 figure is?

A. Yes. If you remember my testimony, I was describ- [fol. 525] ing the route structure of Pan American as such, and my first description was the description of the route connecting Balboa with Miami, Miami-Balboa. I then went on to describe the routes other than the Miami-Balboa route which feed into Balboa as such.

The figure of 4,000 passengers is the figure of the number of passengers brought into Balboa and delivered to Panagra on all routes except the Miami-Balboa route, and the points of origin of those passengers were the points that I had described in my testimony in describing the routes, including traffic from the West Coast of the United States, from Central America and Mexico, through the Houston route to Balboa, through the New Orleans route to Balboa, the route from across the North Coast into Balboa, and the routes via Kingston into Balboa.

Q. But not passengers coming over the Miami-Balboa circuit?

A. That's correct.

Q. Which would be many times 4,000 passengers a year?

A. That's correct.

Q. I want to get perfectly clear for the Court, Mr. [fol. 526] Ferguson, the IATA procedures—this is a matter of law, I guess, but you can sufficiently confirm it—that under Section 412 of the Civil Aeronautics Act the airlines are authorized within the IATA conference to agree

upon rate schedules subject to the submission to and approval of the Civil Aeronautics Board; is that correct?

A. That is correct.

Q. And the carriers do gather in these conferences and establish rates; is that correct?

A. They do, which are subject to approval of all of the governments which have airlines participating in IATA.

Q. And the decisions of IATA in that respect are incorporated in formal public resolutions?

A. They are.

Q. And those resolutions are submitted to the Civil Aeronautics Board?

A. They are.

Q. And approved, if they are approved?

A. And approved or disapproved.

Q. And, if they are not approved, they are washed out?

A. They are.

[fol. 527] Q. And, if they are approved, they become effective and official?

A. That's correct.

Q. Mr. Kenney asked you about any preliminary conferences between carriers in advance of an IATA conference, and you answered him that there were not preliminary consultations between the carriers; is that correct?

A. That's correct.

Q. Again I want to be precise about it. However, there are consultations, are there not, before an IATA conference between the carriers and the Civil Aeronautics Board, in other words, an around-the-table discussion of matters to come up at the conference with officials of the CAB?

A. That's correct. Prior to—let me start again. In recent years the Civil Aeronautics Board has adopted the practice of calling the American carriers to a conference with the—normally it is with a member of the Board and staff, to discuss the positions which the American carriers will take at the conferences. In recent years—well, as a matter of fact, from the beginning—Pan American has been a champion of low rates. We sponsored the tourist [fol. 528] rates in IATA trans-Atlantic. We then sponsored the economy class rates which were even lower than the tourist rates. These matters were discussed with the

Civil Aeronautics Board prior to our making these proposals, and with their agreement and concurrence we promoted within IATA the adoption of such rates.

There may be other matters such as the level of cargo rates which will be discussed with the Board. They are normally matters of position to be taken rather than that the rates shall be X dollars. On the other hand, there have been cases where the Civil Aeronautics Board has indicated the level which rates should take.

Mr. Peck: Might I call your Honor's attention in this connection just to typical extracts of certain exhibits in evidence, Pan American's Exhibits 308, 309 and 314?

I would like to just read to your Honor a few sentences in this connection.

Exhibit 308 is a communication from the chairman of the Civil Aeronautics Board to Mr. Trippe of May 4, 1951, which says:

"Dear Mr. Trippe: On April 4, 1951 a meeting was [fol. 529] held between the Board staff and the United States members of the IATA in order to ascertain the positions of the carriers with respect to agreements to be reached at IATA traffic conference meetings beginning May 6 in Bermuda. The Board has carefully considered the position of the carriers, the data bearing upon these positions, and their relationship both to the sound economic development of international air transportation and the level of mail pay requirements.

"Keeping in mind the objective of building a rate structure which will contribute most substantially to a prosperous industry through the broadening of the air traffic base and the maximizing of carrier revenues, the Board offers the following as its suggestions for the guidance of the U. S. flag carriers in the forthcoming IATA discussions,"

and then proceeds to discuss it.

November 9, 1951, in Pan American's Exhibit 309, from the chairman of the Board to Mr. Trippe:

"On November 9 the Board sent you a statement of its [fol. 530] position regarding the issues expected to arise at the Nice meeting of the IATA rate conference. In view of the great importance of the specific North Atlantic issues and the extended controversy that these have engen-

dered in the past the Board deems it of the highest importance that the two United States carriers primarily involved in this area work closely together to obtain conference agreement on these issues. Only through the closest cooperation between the United States carriers will it be possible to successfully achieve the necessary support for the United States position as stated in the Board's letter of November 9."

And Exhibit 314 of May 16, 1956, from the chairman of the Board to Mr. Lipscomb, vice president of Pan American:

"A meeting was held between the Board and the United States carrier members of IATA on April 17, 1958, at which the carriers presented their respective positions concerning various issues which are to be considered at the forthcoming IATA conference in Cannes. The Board under-[fol. 531] stands that the United States carriers will support its position in their negotiations within IATA."

OFFERS IN EVIDENCE

By Mr. Peck:

Q. I hand you a document under the heading "International Air Transportation Association" and ask you as to whether that is a typical minute of an IATA conference.

A. I am sure it is.

Mr. Peck: We offer it in evidence, please.

Mr. Kenney: Would it be possible to get a copy of this, Judge Peck?

Mr. Peck: The answer is yes.

The Court: What number do you suggest for this?

Mr. Peck: 428, if you please.

(Marked Pan American Exhibit 428 in evidence.)

[fol. 532] Mr. Kiernan: If your Honor please, may we arrange to substitute a copy? That document came out of our files, and we would like to substitute a copy for the original.

The Court: All right.

By Mr. Peck:

Q. In order that we may have in the record a sample copy of an order of the Board on IATA proceeding, would you identify this document as such an order?

A. This is order serial No. E5623, adopted by the Civil Aeronautics Board on August 17, 1951. The order is with regard to resolutions which were adopted by IATA.

Mr. Peck: I offer it in evidence.

This, I understand, approves the fixing of rates between the United States and various South American countries. I understand that this is connected with the previous exhibit as being the order which approves the rates reached at the conference, of which the minutes are Pan American Exhibit 428.

That will be 429.

(Pan American Exhibit 429 received in evidence.)

Q. Now, Mr. Kenney asked you, at page 482 of the min-
[fol. 533] utes, yesterday, as to whether you knew whether in 1953 Aerolineas Argentinas was a IATA carrier, and you said you did not know. Have you looked it up overnight to see whether or not Aerolineas Argentinas was a IATA carrier in 1953?

A. Yes, they were. As a matter of fact, they have been members of the IATA since at least 1947.

Q. And he asked you whether you knew that Pan American had a rate agreement with Aerolineas Argentinas, and you said you did not know.

Mr. Kenney: I don't believe I asked him that, sir, did I?

Mr. Peck: Well, page 482, yes, you said:

"Do you know that Pan American had a rate agreement with them?

"A. No, I do not.

"Q. You do not know that?

"A. No."

Q. Will you tell us what you know this morning on the subject?

A. Yes. We reviewed the situation in Argentina, and

also the IATA resolutions which have to do with rates of exchange. In traffic conference No. 1, which represents the whole western hemisphere, including North and South [fol. 534] America, rates are quoted for all countries in terms of dollars. In selling in foreign countries, however, the sales may be made in terms of local currency. In the case which I believe Mr. Kenney is talking about, we had a problem, because—

Mr. Peck: Well, in order that we will know exactly what we have assumed Mr. Kenney was talking about, it is Government's Exhibit—

Mr. Kenney: 666.

Mr. Peck: Is that what this is?

Mr. Kenney: Yes.

Mr. Peck: Yes, Mr. Kenney is good enough to confirm that we were right in our supposition as to what he was talking about, which is Government's Exhibit 666, which is a memorandum from Mr. Juan Homs.

Q. Where was he, from the Latin American Division of Pan American?

A. That is correct.

Mr. Peck: (Continuing) To the division traffic sales manager, and he had this to say, under date of March, 1951:

"Negotiations to induce Aerolineas to raise their tariffs to the level of Pan American Airways has been successful, [fol. 535] and as from the beginning of March we have equal rates. Formerly they were using 9.02 pesos per dollar rate against our 14.03 pesos per dollar. In this case we are regaining a number of lost clients."

Q. Now, will you explain this exhibit in reference to the IATA proceedings?

A. Yes. Under IATA resolutions, as I stated, all rates are in terms of dollars. At the conferences—and specifically I will talk about 1951—the rates for local currency purchase of tickets, which are normally stated in dollars, are set forth. However, if due to changes in the rate of exchange of local currency to dollars, and assume, for ex-

ample, that the rate went from 9.02 to 14 pesos to the dollar, the IATA resolutions provide for the carriers who are serving that particular country to get together and determine what change should be made in that local currency rate. There should be unanimous agreement.

However, it always—not always happens, and in this case all of the carriers, except Aerolineas, who was a member of IATA, agreed to increase the rate from 9 to 14 pesos to the dollar. Now, there would be no reason in the world why we shouldn't continue to work with Aerolineas to ask them to get in line in so far as their sales are con- [fol. 536] cerned, and to come up to meet the rates which all other IATA carriers were charging.

The purpose, the whole purpose of IATA as such, is to provide an orderly manner of developing business for all carriers in IATA, and if we had, everybody had different rates for the same service, the thing would eventually turn into chaos and nobody would make any money, and we would find a very unhealthy industry. So that there was nothing out of line here. This was done under the resolutions of IATA, to try and get agreement between the carriers who were serving that country with regard to that rate.

Q. I asked you—

A. May I finish?

Q. Pardon me. I am sorry.

A. I might say this is not a single instance. The situation in Brazil has been fantastic. The rates in the last three or four years—

Mr. Kenney: Well, now, your Honor, we were talking about Argentina, and now we have gotten to Brazil.

Mr. Peck: All right, we won't have him go to Brazil.

A. (Continuing) All I wanted to do is to show that this [fol. 537] is not a specific instance.

Mr. Kenney: We would be glad to have more instances of it if you have them, sir.

The Witness: Well—

Mr. Kenney: I mean in writing, like the one we have here.

The Witness: I don't have any on hand.

By Mr. Peck:

Q. Mr. Ferguson, you were asked yesterday about the Grace suggestions of a Lima-Rio route for Panagra; when was that suggestion made, according to your knowledge?

A. To my recollection it was '49 or '50.

Q. Do you have any recollection of any renewal of that suggestion within the last several years?

A. I have not any information with regard to it.

Q. Would you have been likely to hear of it if there had been such a suggestion?

A. I think so.

Q. Was an application for such a route included in the application filed by Grace in CAB Docket 8511, in the year 1957?

A. No, it would not.

Q. You were asked something this morning about the west coast route coming east; how long has Pan American [fol. 538] been operating its service out of the California gateway to the Canal Zone?

A. I think since 1948.

Q. Since when?

A. 1948.

Q. What is the current frequency of that service?

A. We operate five times a week.

Q. Have you ever considered operating more often than that?

A. Yes. As a matter of fact, we would like to have a daily service.

Q. Why don't you have a daily service?

A. Just because there isn't enough traffic to justify it.

Q. I want to touch for a moment on an interchange, raised by Mr. McKay. It is quite obvious, as he pointed out, that an interchange doesn't produce as much revenue for a carrier as having its own route all the way, but I want to ask you about the passenger. So long as a passenger is getting upon an airplane at one point and going to his destination on the same plane, does he care whether it is an interchange, a through flight or a single route, the passenger now?

A. No, if the personnel on board remain the same, and [fol. 539] so on.

Mr. Peck: Pardon me for just a moment.

Q. Has there been any discussion at any time between the domestic carriers, going to the west coast, and Pan American about any interchange arrangements between the Pan American Pacific flights and the domestic carriers' American flights?

A. I do not know of my own knowledge of any.

Q. So fa. as you know, the subject hasn't come up?

A. That is correct.

Mr. Peck: That is all.

• • • • • • •

[fol. 554] Redirect examination.

By Mr. Peck:

Q. Mr. Ferguson, this agreement or discussion between representatives of Pan American and Aerolineas Argentinas in 1951, was that part of an IATA conference?

A. Well, it is part of the IATA procedures, and it is perfectly normal for carriers serving a particular country [fol. 555] where there has been a substantial change—as a matter of fact, the IATA resolutions say that if there is a 5 per cent change in the exchange rates that they can get together and unanimously decide to adopt a new rate of exchange.

In Brazil in the last two or three years the matter has been a very serious one with the exchange rates changing from somewhere around 25 and a fraction up to 170 to the dollar—cruzeiros to the dollar, and actually the meetings of the group serving Rio have been practically monthly in order to keep the rates in line with the change in the rate of exchange, and, as I said before, in so far as Aerolineas was concerned, they did not go along and there was no unanimous action taken. All other carriers did go along with raising the exchange rate from the 9.02 which was the

rate at the time of the resolutions to the 14 and a fraction pesos.

Mr. Peck: All right.

Mr. McKay: I have but one brief question, your Honor.

Recross examination.

By Mr. McKay:

Q. Mr. Ferguson, one of the exhibits that you sponsored, [fol. 556] Pan American Exhibit PS-7, which shows the average passenger load per plane-mile flown on Panagra's route, that was a period up to 1945; and Exhibit PS-9, that was a period up to 1945, as well as PS-11. Would you please tell me why the exhibits terminate with the year 1945, if you know?

A. My testimony has been primarily covering the period up to the end of the war and the early developments. I believe that the exhibits of Professor Cherington will cover the period beyond that.

Q. Beyond '45?

A. Yes. I may be mistaken about that; but I think they will.

* * * * * * *

[fol. 560] Redirect examination.

By Mr. Peck:

Q. Mr. Kenney asked you about the percentage of Pan American-Panagra traffic to Buenos Aires which originated in the northeast part of the United States. You said when you were on the stand that you couldn't supply that information. Have you checked up on it during the recess?

A. Yes, I have.

Q. What is that percentage, please?

A. The percentage is 57 per cent.

* * * * * * *

[fol. 563] PAUL W. CHERINGTON, called as a witness on behalf of the defendant Pan American, having been duly sworn, testified as follows:

Direct examination.

By Mr. Peck:

Q. Professor Cherington, what is your occupation?

[fol. 564] A. I am a professor of business administration at the Harvard Business School, and I am also a director and consultant to United Research, Incorporated, Cambridge, Massachusetts.

Q. What degrees do you hold?

A. I hold a BS from Harvard, and a Doctor of Business Administration from the Harvard Business School.

Q. Do you have some particular area of specialization?

A. I do. I specialize in transportation, air transportation in particular, and the area of business and government.

Q. And how long have you specialized in that field?

A. Well, including time as a graduate student, approximately 20 years.

Q. Have you written for any professional publications in this field?

A. Yes. I published a book on airline price policy, a report on the status of the financing program for the airline jet aircraft, and I was editor of a study on Air Force logistics, general supervisor of a study on international air cargo, and I have written various miscellaneous [fol. 565] articles.

Q. Over what period of time have these been done?

A. Oh, this would be over the last ten years.

Q. What are your duties at Harvard University?

A. Well, my duties are divided approximately equally between research and the area of aviation and air transportation and teaching, either in the area of business and government, or in the area of transportation.

Q. And what is your connection with United Research?

A. I am a director of United Research and a consultant on a continuing basis and a part owner.

Q. Tell us what is United Research?

A. United Research is a group of approximately 50 people in Cambridge, which specializes in economic research and technical research in the instrumentation area. It draws some of its professional staff on a consulting basis from either Harvard University or Massachusetts Institute of Technology, and it is a successor organization to the Aeronautical Research Foundation.

Q. Have you personally conducted studies in the field [fol. 566] of air transportation?

A. Yes, sir.

Q. And has United Research, while you have been associated with it, conducted such studies?

A. Yes, sir.

Q. Will you describe some of the studies which have been made by United Research, of this nature?

A. Well, a good deal of our work is in the air transportation area, and either under United Research or under the Aeronautical Research Foundation. I would say that our principal studies include a fairly extensive study on international air cargo, that Aeronautical Research did for U.S. Air Force. We did a long run forecast for the President's special assistant on aviation facilities, General Curtis, on national aviation activity. We have done, just completed, a fairly detailed study on mail rates for local service carriers. We have done a series of studies for a number of airline or aircraft manufacturing or other industrial clients, having to do with air transportation. We have also done some work in the railroad area.

Q. Could you give us the names of some of the organizations in whose account United Research has prepared [fol. 567] reports or studies in the field of air transportation?

A. In the field—yes, the U.S. Air Force, the U.S. Navy; the Executive Office of the President; ALTA, the local service carrier group; the Air Transport Association; three good sized manufacturing companies, including North American Aviation; a number of airlines, Bonanza, North Central, Allegheny, and of course, Pan American.

Q. Have you testified as an expert witness before?

A. In administrative proceedings at the CAB, yes, sir.

Q. On many occasions, or several occasions?

A. Not many. As I recall, it is either three or four.

Q. Were you requested by Pan American to prepare certain studies in connection with this lawsuit?

A. Yes, sir; we were. We were asked to essentially look at the situation in South America as it was affected by the competitive status there, to make an examination of the strength of the market down there, the operating results in terms of financial return that had been obtained by the [fol. 568] carriers. We were also requested to take a look at the influence of foreign flag carriers on the competitive situation; and finally, we were asked to make two studies in the past decade as to what the South American routes would have looked like under somewhat changed conditions, as to carriers and certifications.

Q. What source material did you have available for these studies, Professor Cherington?

A. Generally speaking, we relied on public sources. These includes the Form 41 reports, filed by our carriers with the Civil Aeronautics Board. These are fairly extensive and elaborate financial, accounting and statistical reports, which show balance sheet information; income statements, various breakdowns by accounts. They also show station analysis and traffic handled at stations, and so on.

We also used the Board's origin and destination traffic surveys, which are, for the period we are dealing with, were made in March and September of each year, except for 1951. We use the official guide for the schedules. We use the Immigration and Naturalization statistics. In some instances we also used the ICAO data. That is the International Civil Aviation traffic data, and in some instances [fol. 569] we relied, we requested information from Pan American, from the Pan American organization.

OFFERS IN EVIDENCE

Q. Have your studies been incorporated into a number of exhibits?

A. Yes, sir. Our studies are incorporated in Exhibits PS-101 through PS-129.

Q. Put together in the folder which I now show you?

A. Yes, sir.

Q. And were these exhibits compiled under your direction?

A. Yes, sir; they were. A great deal of the work on them was done by the staff at United Research, including Mr. Nathan Simat, who is a transportation economist, but under my general direction.

Q. And are the figures from the sources indicated here correct?

A. To the best of my knowledge and belief.

Q. And to the extent that they represent judgment or estimates, do they represent your best judgment as an expert in this field?

A. Yes, sir.

Mr. Peck: I offer them in evidence. The material is in the hands of the Government counsel and other defense [fol. 570] counsel, your Honor, although, as Mr. Kenney said, only recently in their hands.

The Court: Well, he used a different word. He said "last night."

Mr. Kenney: No, yesterday, sir.

Mr. Peck: I think you did have some of it earlier, didn't you, but not all of it?

May I hand one to your Honor?

Let those be marked, if you may, PS-101 through PS-129 marked at your convenience.

(Defendant Pan American Exhibits PS-101 through PS-129 received in evidence.)

By Mr. Peck:

Q. What is the period covered by your study in these exhibits, Professor Cherington?

A. Generally speaking, it is the post-World War II period, from 1947 down to the present time that these were being prepared. 1957 was, generally speaking, the last full year for which data was available.

Q. Now, you have told us, I think, generally, what these studies are, but I'd like to get it sort of 1, 2, 3. Just what are the subjects of this study?

A. The subjects are, in the first instance, in Exhibits 101 to 106, what we call the economic profile of the routes in

[fol. 571] South America, that is, their economic strength in terms of likelihood that they will generate traffic, and these exhibits compare the economic strength of these South American routes and points with other routes and other points elsewhere.

The second set, the second compartment in these exhibits, 107 and 8, show the financial operating results for the three U.S. carriers, Pan American, Panagra and Braniff, in South America, essentially in the post-war period.

The third set of exhibits, Exhibits PS 109 to 113, show the effect of foreign flag competition in the South American markets. The two studies that I made are included in Exhibits PS-114 to 129, and these studies were based on two assumptions, dealing with routes. The first route assumption was that Panagra would have been given and would have operated in the years 1952, and again in 1957 its own route from Balboa into Miami, with essentially the other routes left as they are. The second—and it shows the economic consequences, to the best of our judgment, as to what would have happened under that route assumption.

The second study indicates or assumes that Panagra would have received a route from Balboa into Miami, [fol. 572] and that simultaneously, Pan American would have been given a competitive route down the west coast of South America, paralleling Panagra, and the second—and the economic consequences of that kind of route alteration are also shown in the study.

Q. Now we will come first, then, to your Exhibits 101 to 106 which I believe you said are the economic profile of air transportation on American flag lines between the United States and South America. Correct?

A. Yes, sir. And this set of exhibits here runs from PS-101 to 106. The PS-101—

Q. Have you told us sufficiently what you mean by an economic profile of this route pattern?

A. It is essentially the strength of the routes in terms of traffic.

Q. All right. Now, take up PS-101 and tell us what that exhibit shows and what the figures therein are and indicate.

A. PS-101 compares what we call route density for various classes of operation with the Pan Am, Panagra and

Braniff routes in South America. By route density we mean the number of passenger miles per route mile on a daily [fol. 573] basis. In other words, this is the number of passengers essentially flowing over the route on a daily basis, and it includes traffic both going and coming.

The domestic trunk lines, which are the larger carriers—

Q. Pardon me just a moment. To get clear, what is a revenue passenger-mile?

A. A revenue passenger-mile is simply a single passenger carried one mile. So that, if the distance from here to Boston, let's say, is 184 miles, and you make a one-way trip, that would be 184 revenue passenger-miles.

Q. And is that the accepted way of measuring the density on an air route?

A. That is the accepted way of measuring the volume of traffic. The density would be the revenue passenger-miles per route mile.

Q. All right. Go right ahead now with 101.

A. Generally speaking in transportation, in order to have a strong system, there has to be a fair amount of density on a route, and this is true not only in airlines but also in railroads or truck lines or any other form of transportation.

The last column in 101 there compares the route densities [fol. 574] first of all for the domestic trunk lines which have a fairly high density, even though there is considerable competition among them, of 917 revenue passenger-miles per route mile per day.

Very much smaller than that is the figure of 80 for the local service carriers in this country. Now, the local service carriers are designed by the Civil Aeronautics Board in laying out their certificates to be essentially non-competitive, and they are supposed to serve the smaller communities and feed traffic in from the smaller communities to the larger centers.

The local service carriers have been and are at the present time very heavily subsidized and, as you can see, their traffic density is comparatively low.

The next item is all of our foreign and overseas operations with the exception of the Pan Am, Panagra and Braniff routes in South America, and these have a density of 142 revenue passenger-miles per day.

Then we come to the various operations involved in this proceeding, and the figures there, whether measured on the Pan Am figures within South America or within South [fol. 575] America plus Miami Balboa, indicate that that route density is pretty much on a par with the density of the local service lines and is considerably below the foreign and overseas operations and of course very much weaker than the domestic trunk operations.

The Panagra figure of 84.6 is approximately on a par, and the Braniff routes, either south of Balboa or for the whole international division, are very low.

Q. What is your interpretation—

The Court: Excuse me.

Will you tell me again what domestic trunk operations means?

The Witness: The domestic trunk lines, your Honor, are the 12 larger carriers operating within the continental United States. They are American, United, TWA domestic, Eastern, National, Capitol, and so on.

The Court: But within the territorial limits of the United States?

The Witness: Yes, sir.

The Court: Yes, I see. Thanks.

The Witness: There are 12 of those trunk lines, and then [fol. 576] there are 12 local service lines such as Alleghany, Mohawk, and so on.

By Mr. Peck:

Q. What is your interpretation of the figures in PS-101, Professor Cherington?

A. My interpretation is that the route density of these South American routes is extremely light, and this seems to raise serious doubts as to the degree of competition that either should or can be supported over those routes.

As I indicated for the local service carriers that have a comparable density, they are specifically designed to be non-competitive, and, generally speaking, of course, the effect of competition is to reduce the density since the traffic that is available has to be shared.

Q. Does the traffic flow in column 3 include one-way traffic, or is that round trip?

A. Well, it represents traffic moving in both directions over the route. In the case of within South America, Pan American is 71.2 in both directions; and, if you assume the flow is balanced, it would be 35 passenger-miles per route mile per day in each direction.

[fol. 577] Q. All right. Let's move to 102, please, and tell us what that exhibit shows and what its significance is.

A. PS-102 is essentially supplemental to the preceding exhibit. It shows the same type of information, but here the local service carriers, which as we saw in the preceding exhibit have comparable route densities, are broken out individually and compared with the three carriers in South America.

You will notice that five of the local service carriers have densities considerably above those of either Pan Am, Panagra or Braniff.

One indication of the general policy of the Board on these light traffic density, local service routes is that in some cases they have decertificated or suspended service by trunk line carriers in order to give the local service carriers essentially a monopoly of some of the smaller points.

For example, American was suspended across Southern Michigan, their route there serving local points, and North Central was given that route on a non-competitive basis, and this exhibit simply supplements 101 along the same lines, that the South American routes are pretty light [fol. 578] density routes.

Q. Why are these local carriers so heavily subsidized, Professor?

A. In part because of their light traffic densities and in part because of the short-haul nature of their operations.

Q. All right. Let's take up Exhibits 103 and 104 and tell us, please, what they are and show.

A. Exhibits 103 and 104 show traffic at individual points within South America, and these two exhibits I would like then to compare with Exhibit 105.

103 is on the basis of emplaned passengers. By emplaned passengers I mean everyone who is loaded aboard an American flag carrier at one of these cities listed down

the left-hand side of the sheet. These people are emplaned or loaded for all destinations, not only to and from the United States but also locally, let's say, within South America.

The second column, the number of U. S. carriers serving, indicates the total number of carriers presently offering [fol. 579] service. In a few of the cases where there is only one carrier shown the asterisk at the very left-hand side of the table indicates that the Board has certificated, for example, a second carrier in Quito but the carrier is not offering service at the present time.

Generally speaking—well, in the case of Balboa and B.A., Buenos Aires, Pan Am and Panagra are treated here as one carrier. Essentially this shows that the first 15 points, generally speaking, have two carriers either serving or authorized, and then below that number there is only one carrier authorized or serving.

In terms of daily passengers emplaned, Asuncion, for example, at 3705 passengers emplaned, this is about 10 a day or five passengers a day emplaned per airline, and this is getting to be fairly light traffic.

I should mention the case of Balboa which is, I think, probably high in terms of the actual emplaned passengers. This is a statistical problem. The through-flight passengers are remanifested again at Balboa on Panagra, so they are essentially double counted in some instances at Balboa.

[fol. 580] Q. Take 103 here for the moment. I take it that the number of passengers there from any point are passengers that took off on a plane from that city to go anywhere.

A. That's correct.

Q. So for Buenos Aires, for example, that means 37,000 passengers in a year that took an American carrier to go any place in South America, Latin America, United States.

A. Yes, sir. That is approximately a hundred a day on Pan Am, Panagra and Braniff.

Q. Together?

A. Together.

Q. Let's turn to 104 which is traffic exchanged between the United States and South America on United States carriers; is that right?

A. That is correct. And here arriving passengers and departing passengers are counted, provided they move between the city named and the United States.

Q. So let's take that Buenos Aires figure, for example, of 19,116. What does that mean as to how many passengers came and went between the United States and Buenos Aires a day on all the American carriers?

[fol. 581] A. Well, it means that approximately slightly less than 30 came and 30 went on the average on the three carriers, and if this traffic broke down equally there would be 10 a day coming and 10 a day going on each carrier.

Q. Now turning to 105, have you sufficiently explained that, Professor Cherington?

A. This 105 compares some of these points in South America with points, international points, elsewhere in the world in terms of the passengers exchanged, either arriving or departing to the United States, and breaks this down on a number-of-passengers-per-carrier basis.

Take the top line. For example, Nassau and the Bahamas is served by two carriers, and each carrier has an average of 86,000 passengers per year to and from the United States.

I think that it is clear that the South American points tend to fall well towards the bottom of the table, indicating that these two carrier points in South America are relatively light density.

It may be pertinent to point out that in a good many [fol. 582] places, international points, the Board has seen fit to certificate only one carrier. For example, at Milan, there is only one carrier with about 12,000 passengers; Munich has pretty close to 12,000; Zurich, 10,400, and so on. But as far as we could see, in terms of the multi-carrier, two carrier or more points, the Latin-American cities tended to fall well down the line relative to those in Europe and elsewhere.

Q. And what conclusion would you draw in that respect of 105, Professor Cherington?

A. This, again, goes to what we regarded as the basic thinness, if you like, of the South American points and the South American routes either in absolute terms or relative to other points on our international air network.

Q. Now turn to Exhibit 106, please, and tell us what that shows and why you did it the way you did.

A. The prior exhibits essentially went to the traffic which had been developed by the three carriers in South America. We wanted to get some measure of whether the developed traffic represented a reasonable amount of the potential, [fol. 583] and for this reason we ran out PS-106 which essentially compares on a gross-national-product basis South America with Europe and Australia and Asia.

Gross national product, as far as we could see, was perhaps the best single indicator of the wealth or economic potential in a country, and if there were a good many passengers per million dollars of gross national product this would indicate that a high proportion of the traffic potential had been developed; and, as you can see, in South America the potential is pretty well developed, 7.3 as against 3.7 for Europe. This, of course, don't go to the absolute size of the potential but to the relative degree to which what potential there is has been developed.

I think, again, what this leads to is the conclusion that these South American points and routes are weak by and large, but to the extent that they have any economic strength the carriers have developed air transportation over them to a reasonable degree; in fact, to a greater degree than in the other two areas involved.

Q. Would this comparison be any different if Panama and the Canal Zone were excluded from the South American statistics?

[fol. 584] A. Yes. The figure would be reduced to 5.7, I believe. But, even so, this would have been well above Europe or Australia, Asia.

Q. I notice you use Immigration and Naturalization figures here. Why do you use those figures and not O and D in some respects?

A. Well, we were talking here about the total air travel picture between the U. S. and these various countries. The Immigration and Naturalization Service figures cover the departures and arrivals of both aliens and U. S. citizens on foreign flag and U. S. flag carriers. The CAB's origin and destination figures do not cover passengers traveling on foreign flag carriers, who go all the way on a foreign flag carrier and who originate at one of the so-called gateway points in the United States, such as Miami, New York, and the like.

Q. So to get comparable and consistent figures you have to use the same source for both foreign flag and American flag; is that correct?

A. Yes.

Q. Now, taking Exhibits 101 to 106 together, which you have said—

The Court: I am just wondering, Judge. It is almost [fol. 585] one o'clock.

Mr. Peck: If you will give me just one question, it will be a perfect break, if your Honor please.

Q. 101 and 106, you have said, present the economic profile of this South American market. Now, having looked at it, summarize, please, your conclusions on that profile.

A. As far as we can see, these routes and points are relatively thin, but to the extent that potential traffic does exist, it seems to have been pretty well developed by the carriers.

Mr. Peck: Very good. May we then adjourn?

The Court: We will adjourn until 2:15.

(Recess taken until 2:15 p.m.)

[fol. 586] AFTERNOON SESSION

2:15 P.M.

PAUL W. CHERINGTON resumed.

Direct examination (continued).

By Mr. Peck:

Q. Let us now take up Exhibits 107 and 108, Professor Cherington, and I will ask you to explain them to the Court.

A. These two exhibits essentially go to the financial operating results of the three U.S. carriers, Pan American, Panagra and Braniff, in their operations in the post-war period. The first, PS-107, deals with, shows the operating ratios of the three carriers, separately and combined, and compares these operating ratios with those of the domestic trunk lines. The operating ratio is essentially the extent

to which operating expenses absorb total operating revenues, and generally speaking, a low operating ratio is better than a high one, indicating that the margin remaining after operating expenses is greater.

In the case of Pan American, Panagra and Braniff, for most of the years—well, subsidy is included in the operating expenses of those carriers, to the extent that it was paid. [fol. 587] For the domestic trunk lines, of course, subsidy is also included, but by and large most of the trunk lines were all subsidy after about 1951.

The Pan Am, Panagra and Braniff subsidy figures are set forth in PS-21, that Mr. Ferguson talked about yesterday.

Q. In other words, in the operating revenues for Pan American, Panagra and Braniff are included the subsidy?

A. Yes, sir.

Q. And the operating ratio shows the ratio of expense to revenue, including subsidy?

A. That is right, yes, sir.

Q. Well, now, what is Exhibit 108? Tell us.

A. Well, just, if I may, I think it is clear from the operating ratio figures that by and large the three South American carriers have had fairly high operating ratios over this period. This is particularly true of Pan Am and Braniff, and it is also true of the three combined, and these high ratios are reflected in the relatively low rate of return on their investment which these carriers earned, and which are shown in PS-108.

The rate of return is usual profit on total investment. [fol. 588] Generally speaking, the Board has found that for international carriers a 9 per cent rate of return is a reasonable rate of return. There is some indication that the Board's staff in the domestic passenger fare investigation will urge a somewhat higher rate of return for international operations, but 9 per cent is the present standard of reasonableness, if you like.

The figures show that Pan Am almost got 9 per cent one year, but one year only. Panagra earned 9 per cent, or better in three years, and Braniff in one year. But for the rest of the period they were considerably less than 9 per cent, and the averages of course over the period of time

are substantially less, ranging from a loss operation for Braniff, to Panagra's 4.8.

The Court: Excuse me. When you computed the net profit, did you include the subsidy?

The Witness: Yes, sir.

The Court: Thank you.

Well, if you didn't include it, what would be the rate of return on the investment?

The Witness: It would be disastrous, your Honor. I don't think we made that computation, but I think I am [fol. 589] correct in saying that for the period all three carriers would have a substantial negative return. But these figures here do include the subsidy, so that the low rate of return is including that.

By Mr. Peck:

Q. Would you express an opinion, Professor Cherington, as to the economic satisfaction, if we might call it that, in returns of this kind in the operation of airlines?

A. Well, these are pretty low rates of return in the airline business. The Braniff operation of course is particularly poor, but the Pan Am and Panagra are far from being what could be regarded as satisfactory earnings.

The Court: Excuse me. Do railroads get a return as high as these?

The Witness: No, sir—well, I think they tend to get a return as high as these, perhaps, but generally speaking, the fair rate of return in the railroad business is considerably less than it is in the airline business, by virtue of their very heavy investment, and usually their very heavy fixed charges.

The Court: Is risk one of the elements in determining [fol. 590] a fair rate of return?

The Witness: Yes, sir; that would be an element.

The Court: Thank you.

By Mr. Peck:

Q. Have you made an investigation, Professor Cherington, of post-war competition in South America between United States flag and foreign flag carriers?

A. Yes, sir. We took a look at that, and the results of our examination are set forth in PS-109 through 113.

Q. All right. Would you take us through those exhibits, explaining each one, please, as to its showing and significance?

A. PS-109 shows for the various overseas areas a breakdown of total air passengers moving to and from the United States and shows the split between aliens and citizens, and generally speaking you can see that the South American area, that is continental South America including the Canal Zone and Panama, has the highest percentage of aliens moving.

Q. What is the significance of that?

A. 52.3 per cent. Generally speaking, in air transportation it is usual for aliens to travel on foreign flag carriers [fol. 591] more heavily than on U. S. carriers. I think that this is true for a variety of reasons. Foreign governments tend to route their government traffic via foreign flag carriers; there is a good deal of business pressure to travel in this way, and so on. But as we will see presently a higher percentage of aliens travel on foreign flag carriers than of U. S. citizens.

Q. Does this exhibit give you some indication as to the comparative extent of the tourist trade between the United States and the geographical areas which are listed in PS-109?

A. This plus the other exhibits do, and we know from the Port of New York Authority study that was mentioned yesterday that the proportion of total air passengers who are traveling for business as against non-business reasons is higher in South America than it is, let's say, across the Atlantic. The figure on that is that 44.8 per cent total air travelers traveling to South America are traveling for business across the Atlantic. That comparable figure is only 31.4.

In terms of our own citizens—not citizens but U. S. residents who are traveling for business purposes, 55.8 per [fol. 592] cent of U. S. residents going to South America are traveling for business, and this compares with 26.8 per cent in the Atlantic.

So that I think you can deduce from that that there is a relatively smaller number of tourists in the South American market, and this I suppose is as you would expect by virtue of the fact that there aren't anything like the number of tourist attractions down there that you would find in, let's say, Europe.

By the Court:

Q. What is the basis of these last two percentages you gave? Is that the Port Authority survey?

A. That is the Port Authority survey, and they interviewed and had questionnaires filled out by travelers leaving New York and arriving in New York, both U. S. carriers and foreign flag carriers, and one of the questions they asked them was what the purpose of their trip was: was it business or other than business.

Q. I suppose for tax purposes they would answer it differently. In any event, it is not your study?

[fol. 593] A. No, sir.

By Mr. Peck:

Q. But I take it you do find a relation between those figures and the figures in 109. In other words, the high percentage of aliens traveling to South America in relation to other geographical areas indicates business travel more than tourist travel.

A. Yes, sir. Going on into PS-110, this exhibit essentially shows that the percentage of aliens in the Latin American or South American market has stayed relatively constant in terms of percentage in the last decade, so that the 52.3 per cent figure that is given in PS-109 is not unusual. It has been typical of the post-war period.

In PS-111, this table breaks down the alien travelers moving between the U. S. and South America by whether or not they used a foreign flag carrier, and this indicates the rise of the use of foreign flag carriers in the post-war period.

Essentially this reflects the growing strength and improved service of some of the South American carriers and also reflects what we believe to be the natural tendency

[fol. 594] of foreign nationals to travel on the airlines of their country. But obviously this alien traffic, which is a large percentage of the South American market, is increasingly using foreign flag carriers.

By the Court:

Q. Isn't there another factor other than nationality which would cause them to use their own flag ships? Isn't currency one of the big things?

A. Currency would be definitely one of the reasons.

By Mr. Peck:

Q. What about the other side of the picture, the Americans using American carriers or foreign flag carriers?

A. This is set forth in PS-112, which shows that the percentage of U. S. citizens using foreign flag carriers to and from South America has been growing since or during this decade. It is not as high as the aliens, but it is still an increasing percentage of the traffic. This, again, I think, reflects the fact that at least in some countries in South America, particularly recently, some carriers have begun to give very good service, which was not true in the im-[fol. 595] mediate post-war period. So that, for example, Aerolineas has greatly improved service; VARIG, a Brazilian carrier, advertises a very deluxe service, and so on.

This general trend of where U. S. citizens tend increasingly to use foreign flag carriers I think can also be noted in the Atlantic where something in the order of 67 per cent of the total passengers are U. S. citizens, but our carriers have only approximately 40 per cent of the total traffic, indicating a substantial number of U. S. citizens in the Atlantic also use foreign flag carriers.

Finally, in PS-113 we show some of these figures, and to the extent that breakdowns are available in the Immigration and Naturalization Service statistics we show separate figures for the Argentine and Colombia. This indicates the wide variation that there is in some of these countries which tends to be obscured in the total figures. For example, between U. S. and Argentina in the last six years the percentage of traffic that our carriers have han-

dled has dropped from 81 down to 58.9, indicating essentially improved service by the foreign flag carriers.

[fol. 595a] In Colombia the percentage has been continually fairly low in this period of time from '53 to '58, indicating the relatively strong position of Avianca in that market.

[fol. 596] Q. Well, I notice that between the United States and South America as a whole the showing isn't so bad, the decrease in percentage of U. S. flag carriers. Would you comment upon that in relation to the relatively bad showing or lessening showing between U.S. and Argentina?

Well, of course a number of countries in South America don't have what could be described as competitive flag carriers as yet. The general trend seems to be that these will, will in many cases ultimately be established. It won't—so that it may, the pattern may ultimately look more like the U.S.-Argentine pattern.

Q. Well, now, taking these exhibits overall, from 109 through 113, what is your conclusion as to the position of the United States flag carriers in the South American market, vis-a-vis foreign flag carriers?

A. I would say that it was—that there had been some decline in recent years. Generally speaking, the U.S. carriers thus far have maintained a reasonable share of the traffic, but this may very well, and I would guess probably would be threatened as the foreign flag carriers become increasingly competitive. So that I would say, prospectively, [fol. 597] we could expect a diminishing share of the market in South America.

Q. Why have you used Immigration and Naturalization Service figures here in PS-113?

A. Well, here again, as we mentioned before lunch, the Immigration and Naturalization figures permit you to pick up the passengers who fly on foreign flag airlines all the way to their destination, or from their point of origin, and who disembark or embark at a gateway point, such as New York and Miami, and those passengers would not be picked up in the CAB origin and destination surveys.

Q. Why didn't you use the O and D figures for the U.S. carriers?

A. Well, we wanted to make these comparisons between

U.S. flag and foreign flag carriers, and this would essentially have been comparing apples and oranges, as between the two sets of figures.

Q. So in order to get a true comparison you had to use the same figures for both foreign flag and American flag.

A. Yes, sir.

Q. Now would you tell us, Professor Cherington, what the next set of exhibits are?

[fol. 598] A. As I indicated before lunch, we made two studies, where we essentially made differing route assumptions than what actually was the case in the last decade.

Exhibits 114 to 129 set out the results of these studies and they are summarized on Exhibit 114.

As I indicated, what we were trying to get at here was the economic consequences of two different route patterns in South America. We have expressed them in, for this study, in PS-114, as the amount of increased subsidy that would be required under the two route assumptions, and we essentially did this because under Section 406(b) of the Civil Aeronautics Act, we believe that if these two route assumptions had been in effect in the last decade, the Civil Aeronautics Board would have been required to have supported them with subsidy. If they hadn't, then the increase need set forth here would either have been met by the public in the form of higher fares, or it would have been met by the stockholders and owners of the carriers through losses or even lower earnings; or it would have been met in part by subsidy, in part by the public and in part by investors. But essentially, what we have [fol. 599] tried to show here is the economic impact of changes under the two assumptions we made.

Q. Now what are those assumptions?

A. Assumption number 1 is that Panagra would have operated a route from Balboa to Miami, and they would have operated the through service themselves over this segment and would have continued it north into New York with an interchange at Miami.

Braniff would have essentially operated its own routes, and Panagra—and Pan American would have continued to operate its present Miami-Balboa route for essentially local traffic. That was essentially assumption number 1, and

the results of that study for the impact on Pan American and Panagra, and in total, in terms of increased need for subsidy, and these—the net figures are set forth in PS-114.

We used two years for both sets of assumptions, 1952, which is about in the middle of the period we were looking at, and 1957, which was—well, which was the last year for which we had complete figures.

Q. Now, what is assumption number 2?

A. Assumption number 2 again includes a Panagra route from Balboa up into Miami; no change in Braniff; Pan American operating its Miami-Balboa route, and then [fol. 600] extended down the west coast, essentially paralleling Panagra, all the way to Buenos Aires, and the impact on Pan Am and Panagra, and the total, in the two years we studied, again '52 and '57, are set forth in PS-114.

Q. All right. Would you tell us what those figures are, and say something about the significance of it?

A. Yes, sir. Under assumption 1, which is the extension of Panagra into Miami in 1952, we estimate that Pan Am would have needed two million approximately seven hundred thousand dollars in additional subsidy; Panagra would have needed 1.3 million and a total increase subsidy requirement or economic impact, if you prefer, would have been $4,000,061.

Under the same assumption, five years later, the same figure would have been $4,708,000.

Now under assumption 2—and this is the assumption where Pan Am is parallel down the west coast—the Pan American subsidy requirement and that additional subsidy requirement in 1952 would have been a shade over four million, four million eighty thousand; Panagra's requirement would have been two million one and the total bill would have been six million one eighty three.

Coming down to 1957 these requirements would have [fol. 601] been slightly increased, Pan American's four million seven six four; Panagra's two million two one three; and the total bill, almost $7,000,000.

And as I indicated before, this can be regarded either as increased subsidy requirements or as overall economic impact.

Q. That is, these are the amounts which these carriers would have required over and above all present income and subsidy.

A. Yes, sir.

Q. To get a return on their investment, their added investment for the services, at the accepted rate of 9 per cent; is that right?

A. That is correct; yes, sir, the net additional requirement.

Q. Would you say that these additional subsidy requirements, as you have put them, or economic impact, significant in amount?

A. I would say that they were significant in amount. I think they are fairly large as airline subsidies go. They are relatively large as compared to the subsidies that had been paid, as set forth in PS-21. I think they are particularly large when you consider the amount of increased or [fol. 602] improved service that would have been offered to the public under these route extensions.

Q. That increased service being what?

A. Well, it would essentially added a—under assumption 1, it would have added a third service, largely local in character, between Miami and Balboa, over and above the two services that already would be operating there. In the case of assumption 2—

Q. And which I take it could easily and amply take care of all the local traffic, couldn't it?

A. Yes, sir.

Q. Is there any question at all, Professor Cherington, that if you had two carriers conducting a through service and also conducting a local service, that there is absolutely no need or use whatever for a third carrier conducting really a local service?

A. I think that is correct.

Q. All right, go ahead.

A. And under assumption 2, you would be essentially laying down a third, a third carrier in along the west coast, in South America, over and above two carriers which are now providing what appears to be a perfectly adequate service. So that in terms of the net gain to the [fol. 603] traveling public, I think these increased subsidy

requirements, or the economic impact of these new authorizations would be pretty steep.

Q. Now perhaps you have sufficiently explained the meaning of the subsidy requirement, I am sure you have as a measure, but I would just like to get clear as to whether this is an amount which the Government would have been compelled to pay?

A. Well, let me—not being a lawyer, I don't know whether they could legally have been compelled, but I think that clearly, under the language and spirit of Section 406(b), that if the Board and the President had certificated either the new routes under assumption 1 or the new routes under assumption 2, there would have been a strong presumption and moral obligation that the Government would have had to have met the need of the carriers in this respect.

[fol. 604] Q. Yet they don't always do it, do they?

A. No, sir, they do not.

Q. But the CAB does take into consideration, does it not, the reasonable use of frequencies in relation to the number of passengers to be carried?

A. They do. On the other hand, where there is an existing certificate they, generally speaking, expect the carrier to offer at least a minimum service, and in competitive situations, if you expect the carrier to compete, this may be a somewhat larger number than if there was no competition, if the carrier wants to stay in the market at all.

Q. As you have explained your calculations are for just two years, 1952 and 1957. Would you comment as to whether they have a similar significance or not in respect to other years?

A. I believe they do. These are essentially, as I indicated, the net additional figures, and as far as we can see these are pretty much typical of the early and middle part of the period, and 1957 is pretty much typical of the more recent period in terms of this increased subsidy need.

Q. Looking ahead, what would you anticipate the sub-
[fol. 605] sidy requirements, as you have phrased it, would be, more or less than these figures?

A. Well, I think you will probably have two trends here operating in different directions. One would be the build-up

in traffic over the next few years which would have the tendency probably, if it built up fast enough, of producing these needs. On the other hand, you have coming in the larger jet aircraft which might very well, as you split up and chop this available traffic finer and finer, lead to increased needs under a minimum frequency pattern.

Q. Explain a little more fully what the impact of the jet is in a market.

A. Well, the jets for the most part have a capacity that is roughly twice of the existing planes in terms of seats, and although their seat-mile costs are hopefully going to be about the same, their total plane-mile costs are considerably in excess of the present airplanes. So that you would immediately be putting on to this relatively thin route competitive jet service, and we would expect that unless traffic built up very fast, that the load factor, that is, the percentage of seats occupied, would drop very, very sharply.

[fol. 606] Q. Reducing the need for frequencies.

A. Reducing the theoretical need for frequencies, but under competition it is a little difficult to see how far down you could cut the frequencies.

Q. But, as the frequencies are maintained, unless the traffic develops in proportion to the increased seat capacity, it means seats empty, doesn't it?

A. Yes, sir, and this would tend to send the subsidy requirement up.

Q. Now, what are Exhibits 115 to 129, Professor Cherington?

A. These essentially are the back-up for the conclusions of the studies as set forth in PS-114 dealing with the various rules or assumptions that were made for the study, the traffic estimates, and the revenue calculations, the cost and the return on investment calculations.

Q. Would you take us through them as simply and as quickly as you can so that we will understand what the steps were in your study?

A. Yes, sir. In PS-115 we set forth for the two route assumptions the rules that we made or the assumptions that we made for making the study, and these deal with [fol. 607] both the question of routes as set forth on page 1

of 115, schedules as set forth on page 1, and thereafter. There is considerable detail here so that it is possible to follow these assumptions. The station codes on pages 3 and 4 are interpreted with a station decoding sheet on page 5.

I might say that under the scheduling assumptions we have included under assumption 1 a daily round trip for Pan American between Miami and Balboa in both 1952 and 1957. This would compare with the 10 Panagra trips in 1952 and the 14 in 1957. We felt that if Pan Am was going to stay in this market at all that seven trips a week would essentially be the minimum service pattern, particularly when Panagra was operating more trips and Braniff was operating an equal number or more trips.

As I indicated, 115 gives the assumptions.

In 116 we essentially took the traffic in 1952 and 1957 under the route assumptions and redivided it under the two route studies, and it is basically divided in accordance with schedule frequencies. So at the conclusion of these tables you get estimates as to the number of revenue passenger-miles which shift back and forth from one car-
[fol. 608] rier or another.

Q. With Panagra being assigned all the through traffic which is now carried by Pan American/Panagra; is that right?

A. Yes.

Q. And dividing the local traffic on the basis of frequency of service?

A. That is correct.

Q. Go right ahead, please.

A. That is under assumption 1.

And under assumption 2 the through schedules south of Balboa are split and the traffic is essentially split.

In PS-117 we essentially convert the changes in revenue passenger-miles to passenger revenues by assigning or by multiplying by their estimated yield per passenger-mile, and the footnotes essentially indicate the basis for that estimated yield. So we now have the passenger revenue side of the picture under these two assumptions.

When then want to adjust this for non-passenger revenue, and this is done in PS-118 on a factor basis, and this

is the revenue for cargo, mail, excess baggage and the like. [fol. 609] So that completes the revenue side. Those figures taken together complete the revenue side of the picture.

In PS-119 we start in on the costs, and we start in by setting forth the airplane miles that will be flown under the various assumptions. I might mention that the figure for assumption 1, the change in plane-miles, is two lines up from the bottom in the tables, Miami-Balboa footnote 2, and then the assumption 2 changes are given in the total which do not include that Miami-Balboa footnote 2 figure, but this gives us the change in plane-miles under each of the assumptions in the two years.

And these in PS-120 are broken down by aircraft types in view of the fact that different airplanes have different cost characteristics. That is shown in PS-120. Certain aircraft operating costs for Pan Am and Panagra in the two years are shown in PS-121.

These are ultimately used in the summary tables that we will come to in a moment to get the expenses of these operations to the extent that they relate to aircraft operations.

PS-122 sets forth our estimates as to the additional city [fol. 610] ticket offices that we believe Panagra would be required to establish under either assumption 1 or under assumption 2. We feel that, if they were going to go it alone, they would want to establish their own sales offices essentially in Boston, New York, Los Angeles, San Francisco, Chicago, Miami, Dallas and Washington.

Furthermore, under assumption 2 we feel that they would want to, if they were in competition with Pan Am down the West Coast, have an independent office at Rio, Montevideo and Caracas.

We essentially got our office size and our annual rentals by making a survey of rental costs in these various cities. The employees are essentially related to the expected traffic that could be generated, and the other expenses are a factor to the employees. So that would be an additional cost item for the two assumptions in the two years.

Under assumption 2 in PS-123, furthermore, we believe that—well, we were sure that Pan Am would have some

additional station expenses down the West Coast, and this exhibit essentially shows the calculations for those Pan Am stations.

Finally, in Exhibit 124 we show in summary form but [fol. 611] with explanatory footnotes the actual calculations for the two assumptions in 1952, and those are the figures that are essentially transferred back to PS-114, the summary sheet.

The footnotes to these tables in 124 and again 125 give the basis for the various dollar estimates in the cost area. This takes us on through PS-127.

Then in PS-128 we present our estimates to either the increase or decrease in investment that would be required under the two alternatives for Pan Am and Panagra and in total. Some of this is in aircraft and spare parts, some in ground equipment, and some in the area of net working capital.

And finally in PS-129 the rate of return estimate is set forth for the various assumptions.

Those figures, as I indicated, are all essentially the back-up or the detail or the summary, PS-114, where these are all added up.

Q. Mr. Mallory has suggested to me that it may not be altogether clear yet what this 9 per cent is on to get the required subsidy. What we are talking about getting 9 per cent on is only the additional investment which would be [fol. 612] required for these extensions that you are talking about under assumptions 1 and 2; is that not correct?

A. That is correct.

Q. In other words, we are not talking about going back and making up a 9 per cent return on their present investment which neither Panagra or Pan American has been fortunate enough to make 9 per cent on very often?

A. I am sure they would be happy to get it, but for these purposes we just showed 9 per cent on this additional investment arising under assumption 1 or 2.

Q. And PS-114, I think, as you say, is the summary statistical table which reflects all of the calculations which are in Exhibits 115 to 129.

A. Yes, sir, that is correct.

Q. Coming down, as you have described it, to the addi-

tional subsidy requirements or at least the economic deficit that somebody would have to make up—is that a fair way of putting it?

A. Yes.

Q. —either the Government or the traveling public or the stockholders of these companies.

A. Yes, sir.

[fol. 613] Q. Separately or in some combination.

Now, just a final question: Would you comment, please, and express your opinion as to the effect of the creation of these services under assumption No. 1 or No. 2 on the traveling public, the taxpaying public and the carriers involved, meaning their stockholders?

A. In terms of the carriers I think that the effect on Pan American under either assumption 1 or assumption 2 would be serious; it would entail substantial either loss or increased subsidy requirements. As far as we can see the same thing is true of Panagra: the effect would be bad. The effect on either the taxpayers or the traveling public in our opinion would be much heavier than the benefits that they would be apt to get out of this increased competitive service.

Q. And as far as Panagra alone is concerned, do you see any possible advantage to Panagra on either of these assumptions?

A. If they got all of this money from the Government in the form of subsidy you might make the argument that they would like this in view of their desire to get into [fol. 614] Miami. But as an economic proposition I can't see that it would improve their position.

Q. I think I detected while going through here there was one slight mistake on a footnote.

A. Yes, sir. I would like to mention that on 116, PS-116, page 6 of that table, in the heading of the table where it says "Actual Revenue Passenger-Miles," then there is a footnote 1, that footnote 1 symbol should be struck out.

Q. You mean there is no footnote 1—should be no footnote 1 on PS-116 on page 6?

A. Well, there shouldn't be the symbol. You shouldn't refer—the symbol 1 should be struck out there in the heading of the table.

Q. And where should it be?

A. Well, it is back on a preceding page.

Q. I see, on a preceding page.

A. All the way back on page 1.

[fol. 615] The Court: I got lost on that. Should footnote 1 be there with that caption?

The Witness: Yes, but this little one up here should be struck out.

The Court: And what would the note refer to?

The Witness: That refers all the way back to page 1, these ones here.

The Court: The footnote number 1 on the bottom of page 6 of Exhibit 116 refers generally to the entire exhibit?

The Witness: No, it refers to three numbers all the way back to page 1 of the exhibit.

By Mr. Peck:

Q. Would you be prepared then to adopt the statement, Professor Cherington:

"We are convinced that the available traffic potential in South American will not warrant the subsidy support of three such services and that their existence would lead to 'a waste of public money or private investment'"?

A. Yes, sir.

Mr. Peck: I am quoting, your Honor, from the CAB's decision in the Balboa case.

[fol. 616] Q. Now one thing more, Professor Cherington, and I will be finished. Mr. Kenney read to Mr. Ferguson from the decision of the Board in Docket No. 4882 the following quotation:

"The Latin American area is today the largest foreign air transportation market to which American flag carriers have access. Moreover, it is a market which has expanded tremendously in the past and which may be expected to continue to grow in the immediate as well as the more distant future. The importance of this market and the

rapidity of its growth is illustrated in the table set forth below"—

and that table below shows travel by air into Latin America of 928,157 passengers in the year 1951.

Now, would you comment upon that in the light of the testimony you gave about the relative thinness of the South American market and the high degree of development of that market?

A. I think, sir, that essentially the problem here is that we have to differentiate between the South American routes and points which we were talking about, which include the points and routes within the continental limits [fol. 617] of South America, plus the Canal Zone, and what the Board is referring to there as "Latin America," which includes the Caribbean, Central America, Mexico and, if I recall correctly, Bermuda, a great deal of traffic, let's say, moving between the States and Havana, and if my memory serves, out of that figure of nine hundred and—

Q. 28,000.

A. —28,000, the South American portion of that, that we have been talking about, amounts to some—to only about 140,000.

Q. Well, let's see. I hand you what I believe are supposed to be the exact figures of the breakdown on that. Verify it if you will and give it to us, as to how that 928,000, which makes up the total Latin American market, is broken down by various countries?

A. Well, these—

Q. Or categories of countries?

A. These, to the best of my belief, are the Immigration and Naturalization statistics for fiscal 1951, that is, the year ending June 30, 1951, and the total, as described "Latin America", is 928,157. Then included in that total, and what it is, I am not sure, Canada and Newfoundland, [fol. 618], 26,071; Bermuda, 103,492; South America and the Canal Zone, 141,669; Central America and the Caribbean area, 656,926.

Now of that last figure that I read, 656,926, 387,723, or a little more than a third of Latin America, moved between the States and Cuba, and 166,230 moved to the British West Indies, Jamaica, and so on.

So that out of the 928,157 figure that you mentioned, only 142,000 roughly, concerned the traffic that I have been talking about in my testimony.

Mr. Peck: Very good. Thank you.

* * * * * * *

[fol. 619] Cross examination.

By Mr. Kenney:

* * * * * * *

[fol. 620] Q. Now, Professor, you mentioned some figures early in your testimony, having to do with people taking trips on business, and tourists, and first you mentioned the figure 44-8/10 per cent as business travelers. Is that to South America?

A. Yes, as I recall.

Q. And that would mean that 55.2 per cent would be tourists; is that correct, sir?

A. That's right—well, not tourists, but all other.

Q. All other?

A. All non-business.

Q. Now breaking it down to American travelers, I believe you said that 55-8/10 per cent of the Americans that went to South America traveled there on business.

A. Yes, sir.

Q. Would that mean that the other 44-2/10 per cent would be tourists, or would it include different classifications?

A. No, sir; there are only two breakdowns in the survey going for business, going for everything else, so they would [fol. 621] be going for everything else, including tourees.

Q. Do you know what the figure on tourists would be?

A. No, I do not.

* * * * * * *

[fol. 626] Mr. Mallory: We have no objection to 1125, 1126 and 1127, and I understand the Government will stipulate that Pan American had not seen these prior to the [fol. 627] time the deposition of Mr. Faucett was taken.

Mr. Kenney: I so stipulate.

(Marked Government Exhibits 1125, 1126 and 1127 in evidence.)

[fol. 628] Mr. Kenney: Yes.

I intended to offer in evidence a series of communications between Pan American and Grace and Panagra in November, 1956, January, 1957, and a board meeting of January, 1957, of Panagra, and a further letter of January 11, 1957, together with a survey report prepared by Panagra in connection with a proposed West Coast United States service.

Mr. McKay: No objection.

Mr. Kenney: Do you want to see these?

Mr. Mallory: I would like to, yes.

Mr. Peck: Mr. Kenney, would you tell us who prepared this survey?

Mr. Kenney: I think it was prepared by Panagra.

Mr. Peck: We would be interested in learning what individuals prepared it.

[fol. 629] Mr. Kenney: I don't know. It was obtained from their files.

Mr. Kiernan: I think I can state it was prepared under the supervision of Mr. Farrell.

Mr. Mallory: Could you identify him directly?

Mr. Farrell: If it please the Court, the route study and the recommendations were prepared under the general supervision of Mr. Shea who is president of Panagra, and I as assistant to Mr. Shea was directly involved in the preparation of it with Panagra officers, Panagra personnel, and some Grace personnel who did some statistical work.

Mr. Peck: Could we just identify in addition to the Grace personnel who did the statistical work, and the identity of Mr. Shea and Mr. Farrell with Grace? Then that would be sufficient.

Mr. Kiernan: Mr. Shea, of course, is president of Panagra and he is also executive vice president of W. R. Grace and Company.

Mr. Peck: Does Mr. Farrell have any connection with Grace?

Mr. Farrell: I am a director of Panagra, Judge Peck, and a vice president of Panagra.

[fol. 630] Mr. Peck: And are you an officer of W. R. Grace and Company?

Mr. Farrell: I am not an officer of W. R. Grace and Company.

Mr. Peck: Do you have any connection with W. R. Grace and Company?

Mr. Farrell: I am employed by W. R. Grace and Company.

Mr. Peck: In other words, your total salary comes from W. R. Grace and Company, is that it?

Mr. Farrell: Reimbursed in part by Panagra; that is correct.

Mr. Mallory: It can go in subject to a motion to strike.

(Marked Government's Exhibits 1131 through 1139 in evidence.)

. . . . . .

[fol. 634] New York, May 22, 1959, 10.30 a.m.

The Court: Did you want to cross examine the professor?

Mr. McKay: Yes.

Mr. Peck: Professor Cherington.

PAUL W. CHERINGTON, resumed.

Cross examination.

By Mr. McKay:

Q. Professor, as I understand it, you are a director of and a consultant with the United Research Corporation?

A. Yes, sir.

Q. Is the predecessor of United the Aeronautical Research Institute? Is that a predecessor company?

A. Not, I guess, in the strict legal sense, but the group [fol. 635] is the same. The Aeronautic Research Foundation, it was.

Q. And you and your company, United, were retained by Pan American to make certain studies in this case?

A. Yes, sir.

* * * * * * *

[fol. 636] Q. To your knowledge, has United made any previous studies for Pan American?

A. No, they had not.

Q. Has Aeronautic Research, to your knowledge, made any previous studies for Pan American?

A. No, sir.

The Court: You don't make a distinction between the word "studies" and collection of data or something. I understood you to say that one of your clients, prior to your testifying, was Pan American.

The Witness: Well, we have done—since we took on this assignment for this case we have done some other work in unrelated areas for Pan American.

The Court: Nothing previously?

The Witness: No, sir.

* * * * * * *

[fol. 638] Q. Did you hear Mr. Ferguson testify here earlier this week, I believe, in this case?

A. I am not sure that I heard all of it. I certainly heard the bulk of it.

Q. Have you examined the exhibits that he sponsored as a witness, that is, Pan American's Exhibits 1 through 23?

A. Generally speaking, yes.

Q. Did you have anything to do with the preparation of those exhibits?

A. No, sir.

Q. You had seen them prior to their being introduced in evidence here.

A. Yes, sir.

Q. Professor, do you recall three of those exhibits, namely, Pan American's Exhibits PS-7, 9 and 11, which set out figures representing the average passenger load per plane-mile for Panagra's routes, Pan American's Miami-Balboa route and Pan American's East Coast route?

A. Not specifically.

Q. Have you got a copy?

A. I have a copy. 7, 8 and 9?

[fol. 639] Q. 7, 9 and 11. You perhaps might recall that I inquired of Mr. Ferguson why the statistics compiled in those exhibits terminated with the year 1945, and he testified that he believed that your testimony and exhibits would cover the subsequent period. Do you recall that?

A. Yes, sir, I do.

Q. Your exhibits, Professor, PS-101 to 106 relate to density of air traffic in the year 1957 and for no other year; is that correct?

A. That is correct.

Q. And having examined Mr. Ferguson's exhibits, if I may refer to them as such, PS-7, 9 and 11 show average passenger load on several routes for a number of years, the last of which is 1945; is that correct?

A. As far as I can see, that is correct.

Q. Now, Professor, is it possible to compare the passenger density figures contained in your Exhibits 101 to 106 for the year 1957 with the information set forth in Mr. Ferguson's Exhibits 7, 9 and 11 for the year 1945 and earlier years?

A. I believe not directly.

Q. Well, do you believe that Mr. Ferguson's method of approaching the question of traffic density is as valid as [fol. 640] the method you have followed? As I understand it, Mr. Ferguson uses passengers per plane-mile while you use revenue passenger-miles per route mile per day.

The Witness: Would you read the question again, please?

(Question read.)

A. I believe, frankly, that our figures on route density are somewhat more meaningful in terms of getting a measure of the overall strength of a route.

Q. Professor, could you explain to us what you mean by more meaningful?

A. It essentially takes into account the overall miles and the total traffic moving over those miles rather than simply related to the plane-miles operated, so that it relates directly to the economic strength of the route itself.

Q. Professor, looking at Mr. Ferguson's Exhibits 7, 9 and 11 and your Exhibits 101 to 106, is it possible to determine what change has taken place in the density of traffic during that period, namely, 1945 to 1957?

[fol. 641] A. Looking at his exhibit?

Q. And yours. In other words, Mr. Ferguson ends with the year 1945; your exhibits relate solely to the year 1957. Isn't it a fact that it is impossible to determine, by looking at those exhibits, what change, if any, has taken place in the density of traffic?

A. Except in a most general way I would say the two figures simply are not comparable.

Q. Did you in connection with the study made for Pan American make any investigation of the development or change in traffic density over Pan American and Panagra's routes during the period since the war?

A. I really don't recall whether we ran it out for every year or not. We certainly looked at the general—

Q. Did you run it out for any year other than for 1957?

A. In terms of our density figure?

Q. Yes, sir.

A. I don't think so, no.

Q. Do you know of any reason for not doing so, Professor?

[fol. 642] A. You mean in order to get the trend of the growth?

Q. Yes, sir.

A. We were trying to essentially take a look at the current density of the route in comparison with those of other routes.

Q. But you did not think it necessary in connection with this study to make a study of the changed density of traffic between the years 1945 and 1957 or '58.

A. I think, not in view of the low density at present.

Q. Professor, let me refer to the quotation from the Civil Aeronautics Board opinion in Docket 4882 which was put to you the other day by Judge Peck.

So the record may be clear, the opinion was that of November 23, 1954, released on Apr. 20, 1955, and the quotation appears at pages 5 to 6.

The Civil Aeronautics Board statement was as follows:

"The Latin-American market is today the largest foreign air transport market to which American flag carriers have access. Moreover, it is a market which has expanded tre-
[fol. 643] mendously in the past and may be expected to continue to grow in the immediate as well as the more distant future. The importance of this market and the rapidity of its growth is illustrated in the tables set forth below."

The table referred to by the board compared total travel by air with Latin America in the year 1951 with such travel in the year 1938. Do you recall that generally, Professor?

A. Generally, yes.

Q. Judge Peck asked you to comment on that statement in light of your testimony concerning relative thinness of the South-American market. In commenting upon the testimony you did not address yourself to the factor of growth noted by the CAB but rather to the definition of the Latin-American market as including within a number of areas other than South America. Do you recall that?

A. I do.

Q. Can you tell us now, Professor, whether you have any information or opinion with respect to the extent of the growth which has taken place in air travel between the United States and South America during the period 1945 to 1957?

[fol. 644] A. Oh, I think it has increased, beyond doubt.

Mr. McKay: Your Honor, we have made a number of calculations here which I would like to present to the professor. I would like to have this marked for identification, if I may. I think the number is on there, 174, I believe.

(Marked WRG-174 for identification.)

By Mr. McKay:

Q. Professor, I have handed you a copy of Grace's Exhibit 174 for identification, and I think it will assist you in following certain of the questions I am about to ask.

It is true, is it not, that you testified that the air travel between the United States and South America and the Canal Zone in 1951 was 141,669 passengers based upon INS statistics? Is that correct?

A. That's what I recall.

Q. It is also true, is it not, that your Exhibit PS-110 shows that the total air travelers between the United States and South America similarly defined in 1957 was 272,059 and that in 1958 it was 342,859; is that correct?

[fol. 645] A. I believe so, yes.

Q. That means, does it not, that total air traffic between the United States and South America almost doubled between 1951 and 1957 and substantially more than doubled between 1951 and 1958? Is that correct?

A. That is correct.

Q. I would like to turn, now, Professor, to the specific sector between Miami and Balboa to which much of your study was directed.

It is true, is it not, that revenue passenger-miles is the accepted way of measuring volume of traffic?

A. That is correct.

Q. And comparison of revenue passenger-miles in various years would indicate the change in volume of traffic, would it not?

A. But not necessarily density.

Q. Change in volume?

A. Yes.

Mr. McKay: Please mark this as 175.

(Marked Exhibit WRG-175 for identification.)

[fol. 646] By Mr. McKay:

Q. Professor, if you will turn to Mr. Ferguson's Exhibit 9, that gives the Pan American passenger-miles over the Miami-Balboa sector as 20,928,000, does it not?

A. That's correct.

Q. It is true, is it not, that the Pan American revenue passenger-miles for 1952 over the sector can be derived by totaling the third column on page 1 of your Exhibit 116?

A. Yes, I believe so.

Q. And if you will accept the figure, we have totaled them up subject to correction, that figure is 42,880,000.

Now it is also true that with respect to 1957 Pan American's revenue passenger miles over the Miami-Balboa

sector can be obtained by adding the figures in the third column on page 2 of that exhibit; is that correct?

A. Yes, sir.

Q. And, if you will accept this sum subject to correction, it is 68,284,000.

That means, Professor, does it not, that the volume of [fol. 647] Pan American's traffic over this sector somewhat more than doubled between 1945 and 1952 and that it more than tripled between 1945 and 1957? Is that correct?

A. Assuming these figures are correct, yes.

Q. Well, if you find any error in them, Professor, advise us.

Professor, I would like you to consider your analysis of traffic density in 1957 as shown in your Exhibit 101.

(Marked Exhibit WRG-176 for identification.)

Q. Professor, I have handed you a copy of Grace's Exhibit 176 for identification to assist you in the following question:

You show, Professor, do you not, the revenue passenger-miles flown, the route miles operated, and the revenue passenger-miles per route mile per day for Pan American within South America plus the Miami-Balboa sector? Is that right?

A. Yes, sir.

Q. Professor, you don't give any indication in this exhibit, however, of these figures with respect to the Miami-Balboa sector alone, do you?

A. No.

[fol. 648] Q. It is true, is it not, that the revenue passenger-miles flown for this section, according to your figures on that exhibit, can be obtained by deducting the figure for within South America from the figure you set forth for South America plus the Miami-Balboa sector?

A. That is correct.

Q. And by the same process it is possible for us to obtain the route miles operated over the Miami-Balboa sector?

A. That is correct.

Q. Once these two figures are obtained it is possible to derive the revenue passenger-miles per route mile per day in accordance with the formula revenue passenger-

miles flown divided by the product of 365 times route miles operated; is that correct?

A. Yes, sir.

Q. And that gives us a density figure, Professor, of 161.5 revenue passenger-miles per route mile per day over the Miami-Balboa sector, does it not?

A. Yes, sir.

Q. Isn't it true, Professor, that this route density is more than twice the average density on Pan American's [fol. 649] routes within South America as shown by your Exhibit 101?

A. That is correct.

Q. Isn't it also true, Professor, that this figure is substantially in excess of the average density for foreign and overseas operations generally as shown by your Exhibit 101?

A. Well, I wouldn't say substantially, but it is somewhat above that, yes.

Q. Isn't it also true, Professor, that the figure of 71.2 representing the revenue passenger-miles per route mile per day on Pan American's routes within South America is an average figure?

A. In the sense that it covers all the traffic and all the routes, yes.

Q. And isn't it true that the density on Pan American's routes within South America varies widely above and below the 71.2 figure?

A. I would imagine so, yes.

Q. And isn't it true, Professor, that some of the routes on which Pan American provided service had a density substantially less than 71.2 revenue passenger-miles per route mile per day?

A. Well, I don't know that I have seen the figures showing the dispersion around this average.

[fol. 650] Q. Your answer is you don't know?

A. I don't know.

Q. Professor, turn to the figures shown on your PS Exhibit 101 for foreign and overseas operations. That is the figure for all foreign overseas operations on all types of routes excluding only Pan American's Latin-American Division, Panagra and Braniff; is that correct?

A. That is correct.

Q. In arriving at this density figure you relied, as your exhibit shows, upon the monthly report of air carrier traffic statistics for December, 1957, issued by the Civil Aeronautics Board, did you not?

A. I believe so, yes.

Q. Now turning to Grace's Exhibit 176 for identification, a copy of which you have before you, as indicated on that exhibit that report gives certain figures for the foreign and overseas operations of Northwest Airlines which indicates a traffic density of 53.6 revenue passenger miles per route mile per day, does it not?

A. Yes, it does.

Q. That figure is substantially below the figure for [fol. 651] foreign and overseas operations shown in your exhibit, is it not?

A. Yes, it is.

Q. Is it not the fact, Professor, that the principal international route of Northwest is its route to Japan?

A. Yes.

Q. Isn't it also a fact, Professor, that Pan American has applied for a route which would substantially, if not precisely, parallel Northwest's route?

A. So I understand, yes.

Q. Now, Professor, you do not in any of your exhibits, as far as I can see, that is, with respect to the density of traffic, compare the situation in 1957 with the situation at the beginning of the period you have said was covered by your study. I think you said the post-war period down to 1957. Is it correct that none of your exhibits cover that period but only relate, as you previously testified, to the year 1957?

A. That is correct.

(Marked Exhibit WRG-177 for identification.)

[fol. 652] By Mr. McKay:

Q. Professor, with Grace's Exhibit 177 for identification before you, is it not a fact that from your Exhibit 101 it is possible to derive the density of traffic for the Miami-Balboa sector? We just went over that earlier: is that correct?

A. Yes.

Q. And we found that to be 161.5 for 1957.

A. That's correct.

Q. I would like to bring your attention to the traffic density in 1945 on the Balboa-Miami sector. We can obtain this, can we not, by taking the passenger-miles flown in that year, as shown by Mr. Ferguson's Exhibit PS-9, the route miles operated in 1944 as shown by Mr. Ferguson's Exhibit PS-12, and they may be assumed to be substantially the same as the '45 figure, I would think; wouldn't you, Professor?

A. Yes.

Q. Do you agree that with these figures we derive a density figure of 47.7 for 1945 on the Balboa-Miami sector?

A. That is correct, and the mileage difference I, believe, is one stop somewhere along the line at Camaguay.

[fol. 653] Q. That would be a minor difference, though, wouldn't it, Professor?

A. Well, that, as I recall, is the difference in the mileage.

Q. Doesn't that indicate the density on this sector has more than tripled between 1945 and 1957?

A. Yes, it does.

* * * * * * *

Q. Professor, I would like to turn to the criterion employed by Mr. Ferguson in the exhibits sponsored by him which do not go beyond the year 1945 and see if we can't bring the figure up to date.

(Marked Exhibit WRG-178 for identification.)

By Mr. McKay:

Q. Professor, with Grace's Exhibit 178 for identification before you, it is true, is it not, that the average passenger load shown by Mr. Ferguson's Exhibit PS-9 for Pan Amer-

[fol. 654] ican's Miami-Balboa sector in 1945 is 17.6?

A. I believe so, yes.

Q. You show, Professor, in your Exhibit 120, the aircraft-miles for 1957 over this sector, do you not?

A. Yes.

Q. And we have previously derived from your exhibits the passenger-miles over this sector in 1957, have we not?

A. Yes.

Q. It appears, then, Professor, does it not, that in 1957 the average passenger load was 39.3?

A. I would imagine so.

Q. This represents a doubling over the last figure provided by Mr. Ferguson, does it not?

A. You mean the 17.6?

Q. Yes.

A. Yes.

Q. Professor, turning to your Exhibit 102, there is one figure of revenue passenger-miles per route mile per day for North Central that I just can't follow through. I wonder if you would help me. See opposite North Central.

[fol. 655] A. I would imagine that there was a typographical error in their revenue passenger-miles. I would be glad to check that.

Q. Well, what my trouble was: I was wondering whether someone forced a balance here. If you were to divide 24,355 and the figures you have of 10,350,000, you don't come out with 120.4, do you, Professor?

A. No, you do not.

Q. You come out with a 12.04.

A. That is correct. On the other hand, from what I know of North Central, they have a good deal more traffic than what we show here. In other words, they would have many more than 10,000,000 passenger-miles.

Q. More like 110,000,000, wouldn't it be, Professor? I was just wondering how you got the 120.4.

A. I would have to check that.

Q. Well, I have checked it, Professor, and it is 110,743,000 revenue passenger-miles and 2,355, and that comes out to 117.2. Do you accept that correction, Professor, subject to check?

A. Yes.

Q. This Exhibit 102, Professor, compares the Pan American Latin-American Division, Panagra and Braniff with [fol. 656] the so-called local service carriers in accordance with your criterion of traffic density, does it not?

A. That is correct.

Q. Isn't it true, Professor, that this exhibit, like Exhibit 101, fails to show the density on the Miami-Balboa sector?

A. Well, as you can see, it shows it in two ways. One was for the whole system within South America plus Balboa-Miami, and one within South America, but it does not show Miami-Balboa separately.

Q. You did not think it was necessary to show that separately, Professor. That is the 161.5.

A. That's right.

Q. Isn't it true that the density of 161.5 revenue passenger-miles per route mile per day on this sector is comparable to the highest density shown on that exhibit?

A. Yes, it is.

Q. It is also your testimony, Professor, is it not, that these Exhibits 101 to 105 are designed to show what you referred to as the economic profile of these routes in terms of traffic; is that correct?

[fol. 657] A. That is correct.

Q. Professor, aren't there other factors which are relevant to what you call the economic profile of a route?

A. There may be, yes. Length of haul would be one which I would be able to mention.

Q. The difference between a short-haul operator and a long-haul operator; that is one factor, isn't it?

A. In terms of traffic density, this factor doesn't enter into it.

Q. You testified, Professor, that the local service carriers have been heavily subsidized, and I quote, "in part because of the short-haul nature of their operations." Is that correct?

A. That is correct.

Q. Referring to the book that I believe you wrote, "Air Line Price Policy," which was published in 1958—

A. Yes.

Q. —at page 442 you state, and I quote:

"It is generally agreed that costs per passenger mile for such traffic"—and by traffic there you are referring to short-haul traffic—"are relatively high compared to those for long-haul traffic."

[fol. 658] Is that correct?

A. Yes.

Q. And you also state in general, and I quote, "There seems to be little doubt that the short-haul market is under

today's operating procedures less attractive than long-haul traffic." Is that correct, Professor? And you believe those statements to be true, do you not?

A. As they have an impact on cost of operation, which is what I was talking about in that section, as I recall.

Q. It is true, Professor, that a route segment of 1,166 miles, such as the sector between Balboa and Miami, is a long haul and not a short haul?

A. That is correct.

Q. Is it your expert opinion that a meaningful comparison can be made between short-haul carriers, such as the local service carriers listed on your Exhibit 102, and international carriers, such as Pan American and Panagra, simply in terms of traffic density on their respective routes?

A. I think that is very significant, yes.

Q. You think that is a meaningful comparison.

A. Yes, I do, in terms of traffic density.

[fol. 659] Q. I would like to turn to your Exhibit 103. In that exhibit with respect to Balboa and Buenos Aires you state the two U. S. carriers are serving those points by considering Pan American and Panagra as one with Braniff being the second carrier; is that correct?

A. That is correct.

Q. It is a fact, Professor, as you know, that Pan American, Panagra and Braniff are each separate, certificated carriers?

A. Yes.

Q. There is, then, is there not, three-carrier competition rather than the two-carrier competition as your exhibit implies?

A. Well, this exhibit goes to the number of carriers serving. By no means all of these would necessarily be competitive ones.

Q. Well, Professor, there are three carriers, Pan American, Panagra and Braniff, are there not?

A. Yes, and we recognize this with this footnote.

Q. Why was the footnote necessary, Professor? Why did you combine Pan American and Panagra?

A. Essentially we combined it because of the through-
[fol. 660] flight agreement, the joint ownership involved in

Panagra. It is a little hard to tell whether you should count it as 2 or 3 or 2½.

Q. Was this your own idea, Professor?

A. Yes, sir.

Q. Professor, I would like to turn to your Exhibit 105 in which you list the volume of air passenger traffic between the United States and foreign cities served by two or more U. S. flag carriers for the year 1957. Have you that before you, Professor?

A. Yes, I do.

Q. Let me ask you whether there are any other foreign points not listed on your exhibit which in that year were served by two or more U. S. carriers, if you know?

A. I think that we tried to put them all in in here.

Q. To the best of your knowledge and belief all such cities are in there.

A. I believe so, yes.

Q. According to your testimony, Professor, the right-hand column on that exhibit breaks down the number of passengers on a number-of-passengers-per-carrier basis; is that a fact?

[fol. 661] A. That's correct.

Q. And in your testimony you took as an example the first line with respect to Nassau and the Bahamas; is that correct? Do you recall that?

A. Right.

Q. And you stated that each of the two carriers, and I quote, "has an average of 86,000 passengers per year to and from the United States." Do you recall that testimony, Professor?

A. Yes.

Q. Do you know that two U. S. carriers were serving Nassau in 1957, Pan American and Mackey Airlines?

A. Yes.

Q. Do you mean to imply that the traffic was divided equally between Mackey and Pan American?

A. No, I don't believe I so stated.

Q. Do you know what the division of the traffic was?

A. At Nassau? Not offhand, no.

Q. What did you mean to imply by this 86,000? Was it just an arbitrary division by two?

A. Essentially, yes.

Q. Professor, your Exhibit 106 is designed, is it not, to [fol. 662] show the comparative development of air passenger traffic between the United States and South America and between the United States and other areas in the world; is that correct?

Q. Isn't it true, Professor, that there are many other factors besides gross national product which might be used to measure the comparative development of air passenger traffic?

A. Yes, there are certainly others.

Q. Can you name some of these other indicators, as I think you referred to them?

A. Well, I suppose that if you did enough adjusting, for example, of types of commodities there would be some correlation perhaps between foreign trade and passengers. But this would have to be pretty carefully adjusted and either in terms of tonnages, which certainly isn't too meaningful, or in terms of dollars which may not be too meaningful either.

Q. Have you any other indicators that you could specify besides foreign trade?

A. As an indicator of the number of passengers?

Q. Yes. To be used along the lines that you used the gross national product.

A. I suppose that you might run this out on the basis [fol. 663] of resident aliens in the United States or first place of birth of the naturalized citizens to get some kind of a relationship.

Q. Any other indicators, Professor?

A. None that occur to me offhand.

Q. Isn't it true, Professor, that gross national product fails to take into account important factors affecting the potential air passenger traffic which may be developed in certain areas? Yes or no in the first instance, Professor, if you can answer it yes or no.

The Witness: Could you read the question again?

(Question read.)

A. Well, aside from the point of tourist attractions—

Q. First, Professor, can you answer it yes or no?

A. I don't think I can, no.

Q. Would you say, Professor, that the gross-national-product criterion, as you use it, takes into account all important factors?

A. All of the basic economic factors.

Q. Is that the only standard or criterion that takes in all such factors, in your opinion, Professor?

[fol. 664] A. I think it is probably the best single economic indicator.

Q. Professor, is gross national product an adequate standard, for example, in measuring the traffic potential of the Bahamas which your Exhibit 105 indicates to be a top traffic generator?

A. You mean because of the tourists?

Q. I am just asking the question, if you would please respond to it, Professor.

A. I think not, no.

Q. For example, Professor, doesn't gross national product fail to take into account the closer ties and greater community of interest between the United States and South America as compared with other areas of the world?

A. The closer ties to South America?

Q. And the greater community of interest between the United States and South America as compared with certain other areas of the world.

A. Well, I am not at all sure the ties are closer or the community of interest greater than with some of the other areas.

Q. Does it take into consideration, however those two [fol. 665] factors?

A. Probably not.

Q. Professor, would not the amount of American investment abroad been an appropriate measure of the potential passenger traffic between the United States and various areas, in your opinion?

A. It would be one indicator.

Q. Would not the total amount of trade moving between the United States and a particular area be an appropriate measure of potential passenger traffic?

A. Not in gross, no.

Q. Pardon me?

A. Not either in gross dollars or gross tons, I would think.

Q. In any respect, Professor.

A. If you analyzed it down to particular types of trade and particular commodities, you might get a pretty good correlation.

Q. Professor, when you used this standard or criterion, gross national product, did you have to make any adjustments? Or does that automatically apply and get the result?

You were indicating previously that you might use this indicator or that; you have to make certain fine adjustments. Did you have to make any adjustments when you [fol. 666] used the gross national product?

A. No, I believe not.

Q. You just used it as an absolute.

A. As I recall, yes.

Q. Professor, would you think that the gross national product might be a good standard to be applied to countries such as India which has a very high per capita?

A. For measuring potential air traffic?

Q. Yes.

A. I think it would be reasonably good, yes.

Q. Do you know what the average income is? Have you any idea of the average income of the people of India?

A. It is low.

Q. It is very low, isn't it, Professor?

A. Yes, it is.

Q. But you regard this class of very low income traffic as potential passenger traffic on international routes?

A. We aren't talking about per capita income here. We are talking about gross national product.

Q. But you do say that the gross national product standard would be, in your opinion, the standard to be [fol. 667] applied in the case of a country like India?

A. I think it would be a good indicator, yes.

Q. The best you know?

A. Probably.

Q. Have you any doubts, Professor?

A. No.

Q. Professor, I have handed you a copy of Grace's Exhibit 179 for identification. This exhibit sets out the total export and import trade moving between the United States and the three areas listed in your Exhibit 106. The figures contained in this exhibit have been taken from the statistical abstract of the United States for the year 1958, and the figures are for the year 1957. If we were to take total trade as a measure of potential passenger traffic, wouldn't this exhibit demonstrate that air passenger traffic between the United States and South America is comparatively less developed than the traffic between the United States and Europe and that it has reached approximately the same stage of development as the traffic between the United States and Australia and Asia in your exhibit?

[fol. 668] A. If you wanted to make this comparison this way, but your trade with South America is a very different kind of trade than it is with Europe, with most of the imports from South America being bulk commodities such as petroleum, ores and one thing or another, which I would say is not at all comparable to the type of freight that we have with Europe.

Q. In other words, Professor, is it your testimony that the only standard or criterion that you can use absolutely, without considerations of various factors of type of trade, is the gross national product?

A. I would say that that was the best single indicator.

Q. Without any adjustments being required or refinements such as you have indicated in certain of the other standards or criterion?

A. Generally speaking, yes.

Q. Professor, in your Exhibits 101 and 102 you have made some comparisons between the United States carriers serving South America and the domestic local service carriers; is that correct?

A. That is correct.

Q. Would you turn to your Exhibit 107 which compares the operating ratio of the domestic trunk line carriers with [fol. 669] the United States carriers serving South America —is that correct?

A. Yes.

Q. Your Exhibit 107, Professor, gives no indication of

the operating ratio of any of the domestic local service carriers, although you considered the traffic density on their routes relevant in the earlier exhibits, namely, 101 and 102; is that correct?

A. That is correct.

(Marked Exhibit WRG-180 for identification.)

Q. Professor, with Grace's Exhibit 180 for identification before you, I would like to point out that it compares with the figures contained in your Exhibit 107, the operating ratios in 1956 and 1957 for the five domestic local service carriers which, according to your Exhibit 102, had the greatest density of traffic on their routes. Do you see that, Professor?

A. That's right.

Q. It is true, is it not, Professor, that the operating ratio of these five carriers is very substantially above the operating ratio in 1956 and 1957 of Panagra?

[fol. 670] A. That is correct.

Q. This difference would indicate, would it not, Professor, that factors other than traffic density are of importance in comparing the economic strength of carriers?

A. Of carriers, yes.

Q. It is also true, is it not, Professor, that local service carriers are very heavily subsidized?

A. That is correct.

Q. In preparing your Exhibit 107, Professor, did you at any time ascertain what the operating ratio was for the local service carriers?

A. Not that I recall, but we knew—from my general knowledge I knew it was high.

Q. You decided not to explore that and put that in your Exhibit 107?

A. I did not think it was particularly pertinent.

Q. Professor, let us turn to Exhibit 108 where, in comparing rates of return, you have eliminated not only the local service carriers but the domestic trunk line; is that correct?

A. That is correct.

[fol. 671] (Marked Exhibit WRG-181 for identification.)

By Mr. McKay:

Q. Professor, with Grace's Exhibit 181 for identification before you, I would like to point out that that exhibit takes the rates of return shown in your Exhibit 108 and compares them with the rates of return for domestic trunk lines and local service carriers, this as reflected in the quarterly report of the air carriers' financial statistics for the CAB for December, 1957.

Now, Professor, it appears, does it not, the rate of return in 1956 and 1957, even for the domestic, even for the domestic trunk lines with their very high traffic density, is on the order of that shown by you for the Pan American Latin-American Division and Panagra? Is that correct, Professor?

A. According to these figures I am not sure whether these particular trunk operations reflect the adding back of interest or whether they are as reported.

Q. All right, Professor. Apart from that one factor, can you answer my question, or with that reservation?

[fol. 672] A. That is correct.

Q. Did you at any time, Professor, in preparing the material appearing in your Exhibit 108, consider the rates of return for the domestic trunk lines and domestic local service carriers?

A. In connection with 108?

Q. Yes. Did you consider?

A. I think not, no.

Q. Professor, is the net profit in investments shown by you with respect to the Latin-American Division of Pan American necessarily or indeed in fact the same as that considered by the CAB for subsidy purposes, if you know?

A. I don't know what they would consider.

Q. Do you know what you considered, Professor?

A. Yes.

Q. What is included in that investment figure?

A. It is explained on the footnote on the following page. The average quarterly balance is of net worth, long-term debt and notes payable, and in the case of divisional carriers which have various divisions the total system investment has been prorated on the basis of divisional operating expenses.

Q. Now, Professor, as an expert in this field you know, [fol. 673] for instance, that the Civil Aeronautics Board will not take into consideration equipment which they regard as affording excess capacity, do you not?

A. That is correct.

Q. And there are many other items covered by company investments which the CAB has from time to time disallowed?

A. Yes.

Q. Professor, would you turn to that Exhibit 108, page 2. The second footnote refers to a decision of the Civil Aeronautics Board in Docket No. 1706 as finding that a 10 per cent return was reasonable with respect to the operations of Pan American. Do you see that?

A. Yes.

Q. You know, do you not, that the decision established a 10 per cent rate only for the period until December 31, 1953; is that not correct?

A. That is correct.

Q. And thereafter the rate established by that decision was not ten but, rather, 9 per cent?

[fol. 674] A. That is correct, and I believe I so testified.

Q. Your exhibit does not so show, however, does it, Professor?

A. No, sir.

Q. Aren't you also aware, Professor, that the reason for reducing the rate for the more recent years was, in the Board's own words, and I quote, "the lesser risks of the more mature, well-established international industry," if you know, Professor?

A. I don't recall.

[fol. 675] Q. Professor, would you turn to your Exhibit 115 where you describe the route structure and schedules assumed in connection with your Exhibits 114 through 129. Have you those before you, Professor?

A. Yes.

Q. I note, Professor, that under Assumption 1 in paragraph B in Exhibit 115 there is assumed the extension of Pan American to the west coast of South America in accordance with the application it has made in Docket No. 8597. Do you see that, Professor?

A. That is correct.

Q. Are you aware of the fact, Professor, that W. R. Grace and Co. has filed an application on behalf of Panagra in Docket Nos. 8511 and 8512 for an extension of Panagra's route from Balboa to New York and from Balboa to Los Angeles and San Francisco?

A. I am generally familiar with that, yes.

Q. The extension applied for in behalf of Panagra is not that which has been assumed in your exhibit, is it, Professor?

A. I am sorry?

Q. I say the extension applied for on behalf of Panagra by W. R. Grace and Co. is not the extension you are talking about, the application you are talking about in your As- [fol. 676] sumption No. 2.

A. No, we just covered the extension of Panagra from Balboa to Miami.

Q. And your Assumption No. 2 was the extension of Pan American down the west coast of South America; is that correct?

A. That is correct.

Q. You made no third assumption, did you, Professor, in any of your studies?

A. No.

Q. Were these route pattern assumptions which are set forth in 115 made by you, or were they determined or suggested by Pan American?

A. As I recall, we proposed them and we discussed them with the Pan American people.

Q. When you were retained, Professor, did a representative of Pan American explain to you what this antitrust case was about, what the issues were?

A. I already knew of the pendency of the case. I don't recall that they explained the issues.

Q. Well, is it your understanding that there is as an issue in this case Pan American's application for an extension of its route down the west coast of South America? [fol. 677] A. Pending in this case?

Q. Yes.

A. No, I don't think it is.

Q. Professor, why did you make Assumption No. 2? You said you proposed it to Pan American, had a discus-

sion, and then you went forward with your study and you prepared these exhibits or they were prepared under your general supervision. I am asking you why you proposed Assumption No. 2 to Pan American.

A. We wanted to show essentially the effects of additional competition within this general ar[illegible] of South America.

Q. And you just used this as one possible example, is that correct?

A. That is correct.

Q. Did you at any time, Professor, consider using as a basis for an assumption, either a third, an additional one or not, the extension of Panagra's route from Balboa to Miami and to New York?

A. In running up these studies?

Q. Yes, Professor.

A. We may have. I am sure we didn't seriously consider them.

Q. When you say "We may have," Professor, give your [fol. 678] best recollection.

A. My recollection is that we considered it and picked out as Assumption No. 1 Balboa-Miami.

Q. You did consider, however, the extension of Panagra's route from Balboa to Miami to New York, or did I mishear you?

A. Well, I really—

Mr. Peck: May I interrupt for a moment, Mr. McKay, to find out whether you understand that Assumption No. 2 includes the extension of Panagra from Miami to Balboa? You understand that, don't you?

Mr. McKay: I do, Judge Peck.

Q. Proceed, Professor, if you will.

A. I really don't recall the extent to which we considered this doing our study on the basis of the Miami-New York extension as well as Miami-Balboa.

Q. You do not recall.

A. I don't recall that, no, sir.

Q. Have you any recollection, Professor, that you considered the extension of Panagra up the west coast of the United States in accordance with the application filed on its behalf by W. R. Grace and Co.?

A. We had not considered that.

Q. Now, Professor, in this Exhibit 115 you made certain [fol. 679] scheduling assumptions, did you not?

A. That is correct.

Q. Did you determine those assumptions, or did Pan American?

A. We did.

Q. And would that hold true as to the assumptions regarding routing?

A. Yes.

Q. Professor, I would like to have you focus your attention on Assumption No. 1 for the moment, that is, the extension of Panagra's route to Miami. Is it not true that the route pattern assumed here as a major assumption that Pan American would institute seven round trips a week?

A. They would operate seven trips a week between—round trips between Miami and Balboa.

Q. Professor, is it your expert opinion that Pan American could not operate on this route without having seven frequencies a week?

A. Well, operationally they could have more or less. This was our best judgment as to what they would offer if they were going to stay on the route and compete for the local traffic.

Q. If they were to stay on the route and compete, is it [fol. 680] your opinion that they could not have less than seven frequencies a week?

A. It was our opinion they could not have less than seven frequencies and still maintain any kind of competitive strength against Braniff and Panagra.

Q. They would go out of business if they did not have seven frequencies a week?

A. They would tend to lose whatever local traffic there was and to which they were entitled as they scaled down their frequencies. At what point it would pay them or make it necessary to give up the route altogether, I really don't know.

Q. You can't say that they couldn't operate with six or five.

A. We think they could not from a competitive standpoint.

Q. Isn't it true, Professor, that there are instances in which a carrier offers less than seven frequencies in a route on which it faces U.S. flag competition? If you know, Professor.

A. There may be such cases.

Q. Do you know of any?

A. I don't think of any offhand, no.

[fol. 681] Q. Isn't it true, Professor, for example, that on your own Exhibit 115, if you will turn to page 4, that there are many competitive points between which Braniff offers only two frequencies a week?

A. Is this page 3 you are speaking of?

Q. 4, Professor.

A. Under the assumptions or under the present?

Q. Under the actual, Professor.

A. Yes, that is true. But this is quite different traffic that we are talking about here than the local traffic between Balboa and Miami.

Mr. McKay: I move to strike the latter part of the answer, your Honor.

The Court: It doesn't matter.

Q. Professor, it is true, is it not, that the assumption that you made, and it is your own assumption, of seven frequencies per week for Pan American is a substantial factor in your projection of subsidy needs?

A. Yes, it is.

Q. And it is correct, is it not, Professor, that the statutory criterion for the award of subsidies, as set forth in Section 406(d) of the Act, is the need of a carrier "under [fol. 682] honest, economical and efficient management to develop air transportation"? Is that correct, Professor?

A. That is correct.

Q. Under that statutory criterion the Board has on many occasions eliminated expenses incurred by carriers as, for example, in the operation of excess capacity; is that correct?

A. Usually not right after they have certificated a third carrier.

Q. That is correct, Professor, if you will be responsive to my question. Have they or have they not?

A. Made disallowances?

Q. Yes, yes.

A. They have.

Q. I would like to refer again, Professor, to the Civil Aeronautics Board decision in Docket 4882. You are aware, are you not, that the Board said in that decision, at page 33, that if traffic volumes did not increase substantially air service capacity can and should be reduced so that an economic load factor will be obtained. Do you recall that?

A. I don't recall it specifically, no.

Q. Do you disagree with it?

[fol. 683] A. Do I disagree that they said it?

Q. No, do you disagree with the thought behind the statement?

A. As applied to that particular instance, probably not.

Q. To the particular instance in that docket?

A. That is correct.

Q. The CAB went on to say:

"We hereby stress the need for a careful monitoring by all carriers of schedules and services to be flown to South America, for we have been forced several times in the past to refuse to underwrite with subsidy support large amounts of excessive capacity operated by the South American System of Pan American."

Do you recall that statement?

A. No, I don't.

Q. Do you recall Mr. Ferguson's testimony in this case that, if Pan American had operated on a daily frequency between Miami and Balboa, the Civil Aeronautics Board would have found that Pan American "had operated excessive capacity" and that "the Board would not support this service."? Do you recall his testimony to that effect?

[fol. 684] A. I don't recall the period. I don't know that I do recall that testimony now.

Q. Do you agree with Mr. Ferguson's statement, Professor?

A. You would have to give me the year or the period.

Q. Let me show you the transcript, Professor. Read that question and answer at the bottom of page 451 to the top of page 452.

I was just referring to that one particular question and answer, Professor, at the bottom of 451 and going over to 452.

A. Yes. Well, I was trying to identify this with what period he was talking about and in what connection.

Q. It is my understanding, Professor, he was talking about the period covered by his exhibits up to 1945.

A. Without any competition, if there is no competition over the route, and the loads are very light, then I think probably the Board might very well have disallowed them. If the Board itself has certificated competition, it seems to me to change the facts quite a bit.

[fol. 685] Q. Professor, what about the period from 1945 up to the present time? Your study has covered, as I understand it, while your exhibits don't portray the results of those studies except for one year, 1957—

A. And what is the question?

Q. Well, would Pan American, in your opinion, if it operated the daily frequency that you assume that it would, namely seven frequencies a week, in competition with Panagra—

A. And Braniff.

Q. —and Braniff, be subsidized by the Civil Aeronautics Board?

A. For those seven trips? I think that is a reasonable assumption.

Q. Isn't it true, Professor, that, if Pan American had either instituted a lesser frequency on this sector or if it had abandoned that service, the consequences you predict under Assumption No. 1 would no longer follow?

A. They couldn't abandon without the Board's permission.

Q. Obviously, Professor, if they had abandoned it with the Board's permission.

A. Well, we would have to rerun the numbers to see what [fol. 686] the effect would be.

Q. It would be in your opinion, would it not, substantially different, Professor?

A. I think, if you simply substitute Panagra for Pan Am on the route, the results would obviously be quite different here.

Q. Your study does not show, Professor, does it, that there would be any economic detriment either to Panagra or to the general public if Panagra was substituted for Pan American on this route?

A. And Pan Am's certificate was lifted or suspended?

Q. Yes, Professor.

A. We didn't go into that.

Q. It is true, Professor, is it not, that the bulk of the traffic presently moving on the Miami-Balboa sector is through traffic moving to and from points served by Panagra?

A. A considerable volume is, yes.

(Paper marked Defendant W.R.G. Exhibit 182 for identification.)

Q. Professor, with Grace Exhibit 182 for identification before you, this summarizes certain figures which were derived from your Exhibit 116. It is true, is it not, that [fol. 687] that exhibit, Grace's Exhibit, correctly shows that in the year 1957 the local traffic between Balboa and Miami was between eighteen and nineteen million revenue passenger miles, whereas the through traffic was somewhat in excess of 49 million revenue passenger miles? Is that correct?

A. That is correct.

Q. Do you agree with Mr. Ferguson, Professor, that, if Panagra secured its own route between Miami and Balboa, it would have been impossible for Pan American to secure any significant amount of this through traffic?

A. We made that assumption. I think probably they would get a little.

Q. Not a significant amount.

A. That is correct.

Q. Did you, Professor, take into account in your Assumption No. 1 that Pan American, in offering local service between Balboa and Miami, might adopt routes which would enable it to serve points intermediate between Miami and Balboa?

A. No, we did not.

Q. You know, do you not, that until 1953 Pan American operated flights which were routed Miami, Camaguey, [fol. 688] Kingston and Balboa?

A. Yes, I am generally familiar with that.

Q. And in 1955 Pan American operated flights routed Miami, Kingston, Balboa.

A. I will take your word for it.

Q. And that presently Pan American is operating a flight which is routed Miami, Managua, San Jose and Balboa. They are taken from the official Airline Guide, Professor, in May, 1959.

If Pan American adopted one or more of these routings for some or all of its Miami-Balboa service under Assumption No. 1, that might increase its passenger traffic and passenger revenues, might it not?

A. I would guess that with the through flights by Panagra and Braniff they would then lose the share of the local traffic that we have given them.

Q. Professor, you said you guessed. Have you any basis for your opinion? Are you able to give us your opinion rather than a guess?

A. My opinion is they would lose a substantial amount of the local traffic, that is, the local Miami-Balboa traffic.

Q. But they would pick up other passenger traffic, would [fol. 689] they not?

A. Presumably.

Q. And you are not able to say whether they would come out ahead or not, are you?

A. No, I am not.

Q. Professor, turning to your Exhibit 114, which summarizes your conclusions with respect to Assumptions 1 and 2, it indicates, does it not, that for the year 1957 under Assumption 1 you conclude that Panagra would have suffered an "added operating loss" of $319,000? Do you see that, Professor?

A. That is correct.

Q. That exhibit further indicates that your conclusion is that this operating loss combined with a $400,000 loss of interchange income and a $256,000 added requirement for return on investment would have required an addi-

tional subsidy for Panagra of $975,000 for that year; is that correct?

A. That is correct.

Q. Turning first to the item designated "Return on investment," this figure is based, is it not, on a 9 per cent return on the additional investment which you estimate Panagra would be required to make in order to provide the [fol. 690] additional service under Assumption 1?

A. That's right.

Q. Professor, isn't it true that this 9 per cent return is more than three times the return which Pan American has actually earned on its investment during the period 1947 to 1957 as shown by your Exhibit 108?

A. 9 per cent is higher than the actual return, yes.

Q. And the actual return was what, Professor? My figures show it was more than three times.

A. Well, the actual return is 4.8 over the 1947 to 1957 period, so 9 is a little more than twice 4.8.

Q. You say it was 4.8 for the period 1947 to 1957? I was talking of Pan American.

A. Oh, Pan American. I am sorry, yes.

Q. It is more than three times, Professor, the 9 per cent.

A. That is correct.

Q. Isn't it also true, Professor, that this 9 per cent which you have used is nearly twice the return which Panagra has earned on its investment during that same period as shown by your Exhibit 108?

[fol. 691] A. That is correct.

Q. Professor, why do you assume that Panagra and Pan American must earn on the new investment, which would be required under your assumptions, more than they are earning on their present investment?

A. Because, generally speaking, the 9 per cent return has been declared by the Board to be a reasonable rate of return for this kind of operation.

Q. So you have used this 9 per cent rather than the actual rate experienced by Pan American and Panagra.

A. That's right.

Q. Solely because the Board as found it to be a reasonable rate of return.

A. That's right.

Q. Professor, turning to what you call the added operating loss of $319,000 which you conclude Panagra would have suffered, isn't it a fact that Panagra made an operating profit in the year you were talking about, 1957? I am puzzled by your description of "added operating loss." It had been my understanding, and Mr. Ferguson so testified, that in that year Panagra had an operating profit.

[fol. 692] A. Well, I think that is correct.

Q. That is an error in your exhibit, then, Professor?

A. If you wish to interpret it so, yes.

Q. So, if your estimate is accurate, Professor, it would rather be a reduction in operating profit, would it not?

A. You might phrase it that way, yes.

Q. You wouldn't object if it was phrased that way, Professor, would you? How else could it be phrased, Professor?

A. Change in operating result.

Q. There is nothing wrong in referring to the word "profit," is there?

A. No.

Q. Isn't it a fact, Professor, that the accuracy of your estimate depends on the accuracy both of the operating revenue estimate set out on your Exhibit 127 and also on the accuracy of each of the operating expenses set out in that exhibit?

A. The 319 figure depends on that, yes.

Q. Turning first to your estimate of revenue for Panagra in 1957 under Assumption No. 1, have you taken into account the increase in total traffic which might be expected [fol. 693] to result from the operation of additional competitive services?

A. I am sorry; I don't know that I understand your question.

Mr. McKay: Would you read the question back, please?

(Question read.)

A. I think not, no.

Q. Professor, you assume, do you not, that Panagra under this Assumption No. 1 would establish additional sales offices throughout the country at a very substantial expense? Is that not correct?

A. That is correct.

Q. Have you taken into consideration in connection with this assumption that the addition of these sales offices and the additional promotional activities might result in an increase in traffic?

A. No. We have—

Q. Yes or no, if you can, please.

A. No.

Q. Are you familiar, Professor, with the statement of the Civil Aeronautics Board in Docket 4882 where, in discussing the desirability of a Braniff/Eastern interchange providing service between western South America and New York, [fol. 694] they stated:

"The stimulas derived from more effective competition should in this instance have a promotional effect on total traffic carried by these carriers, so that the overall effect of our action may not be merely to transfer traffic from one carrier to another but to increase the total traffic of both and thus to decrease total mail pay support for both carriers."?

My question, Professor, is whether or not you are familiar with that statement.

A. No, I am not.

Q. Do you agree with the statement, Professor, generally speaking?

A. I don't know that I would agree with that, no.

Q. You would disagree with it, Professor?

A. I think I would, yes.

* * * * * * *

[fol. 695] Cross examination (continued).

By Mr. McKay:

Q. Professor, turning now to the non-passenger revenues in your Exhibit 118, that exhibit indicates, does it not, Professor, that you have used Braniff's experience ratio of non-passenger to passenger revenues in determining what Panagra's non-passenger revenues would be?

A. That is correct.

Q. Your source, Professor, for the Braniff ratio was indicated in PS-118 to be the Form 41 reports to the CAB; isn't that true?

A. That is true.

Q. Isn't it a fact, Professor, that Panagra's filed Form 41 indicates that the ratio of non-passenger revenue to passenger revenue in 1957 was 26 per cent?

A. I don't know.

Q. You never checked it, Professor?

A. I beg your pardon?

Q. You never checked it?

A. I didn't, personally. As far as I know—

Q. Did any member of your staff, who worked under your close general supervision, Professor, check it?

A. I would—yes.

[fol. 696] Q. Pardon me?

A. Yes.

Q. You know that to be a fact, Professor?

A. Yes.

The Court: Do I understand the import of your question, Mr. McKay, that the actual 41 report filed by Panagra showed—

Mr. McKay: 26 per cent.

The Court: And not something like 16?

The Witness: Oh, I'm sorry. I thought you asked about Braniff.

Q. No, Panagra.

A. Well—

Q. You used the Braniff ratio, as indicated in their Form 41 report; you said yes; is that correct?

A. That is correct.

Q. Now, I asked you if you had checked, or any member of your staff checked Panagra's Form 41 to see what its ratio was?

A. I am sure they did.

Q. Did you, Professor?

A. I did not.

Q. Did any member of your staff do it?

A. Yes.

[fol. 697] Q. You know that to be a fact?

A. I believe it to be a fact.

Q. You don't know what ratio was shown in Panagra's Form 41, however?

A. I don't know.

Q. You have no idea?

A. No. We used this because of Braniff's—the fact that Braniff operates both north and south of the Canal.

Q. Well, accepting, if you will, Professor, the 26 per cent figure, and you can check that from the work sheets of your members of your staff whom you say did look at Form 41 for Panagra, it is true then that Panagra's experience ratio was 50 per cent higher than Braniff's?

A. South of the Canal, yes.

Q. And this reflects Panagra's greater volume of freight and domestic and foreign mail, does it not?

A. Foreign and domestic mail?

Q. Yes.

A. Foreign and U.S. mail moving overseas?

Q. Yes.

A. I don't know whether it would be greater or not.

[fol. 698] Q. Professor, if you had used Panagra's actual experience rate, its non-passenger revenues would have been $421,000 more than those shown for 1957 in your Exhibit 118, would it not?

A. If that would have been an applicable figure to this Miami-Balboa sector. We felt that the Braniff experience was somewhat more applicable.

Q. Professor, turning now to your computation of expenses on Exhibit 127, it shows for 1957, under your route assumption No. 1, a flying operation expense of $1,539,000; correct?

A. Correct.

Q. And that was computed by multiplying the increased mileage required by the proposed route extension by the per mile flying operation expense for Panagra for DC-6s and 7s, as set out in your Exhibit 121.

A. That is correct.

Q. Now Exhibit 12 indicates, doesn't it, Professor, that you have assumed that it would cost Panagra 88.14 cents per revenue mile to operate 6s in '57, whereas it would

only cost Pan American 75.88 cents per revenue mile to operate the same plane over the same route in the same year; isn't that correct?

[fol. 699] A. That is correct.

Q. Professor, what is your basis for assuming that the flying operation expense for Panagra would be substantially in excess of that for Pan American for the same plane over the same route, for the same year?

A. Our figures in PS-127 are based on Panagra's reported costs in '57.

Q. Well, now, Professor, in computing these flying operation costs per revenue mile for Panagra, have you taken into account the difference in cost between operations over the Miami-Balboa sector, and operations within South America?

A. Well, the basis that we had to go on was Panagra's reported cost, as I indicated.

Q. I ask you, Professor, if you had taken into account the difference in cost between operations over Miami-Balboa sector and operations within South America? I would think you could answer that yes or no.

A. We had no basis for using any other figure than the purported cost.

Q. The answer then, Professor, is no; correct?

A. Correct.

[fol. 700] Q. Thank you. Did you take into account, Professor, the difference between, say, the cost of gasoline in South America and the cost in Miami?

A. We had no basis on which to—

Q. Professor, will you please answer that yes or no, unless you say you cannot answer it yes or no? Did you or did you not?

A. We considered that.

Q. Did you take it into account?

A. We did not.

Q. Isn't it also true, Professor, that in Exhibit 121, in computing maintenance costs for operating DC-7s, you have assumed that it would cost Panagra 69.58 cents per mile, but that it would cost Pan American only 50.91 cents per revenue mile for the same planes over the same route; is that correct?

A. We did, based on Panagra's experience.

Q. And if I were to ask you the same questions as to whether you took into account various other factors on the difference in costs and operations on the west coast of South America as distinguished from the Miami-Balboa, would your answers be the same, Professor?

A. We considered some upward and some downward [fol. 701] adjustments in these costs, and concluded that we should use Panagra's experience, because we had no firm basis for making these adjustments.

Q. Even though, Professor, you appreciate that there are differences in cost in operation within South America as distinguished from operations over the Miami-Balboa sector?

A. And for this segment, some of those are increased and some of those are decreased costs, as against the present situation.

Q. And you weighed them, the increases and the decreases, and you did make that study, Professor?

A. Yes.

Q. Of those computations. Can you tell us now just how you came out, what those computations were?

A. Well, the principal ones are between the gasoline on the Miami-Balboa segment, and the station expenses at Miami and Balboa.

Q. Any others?

A. Not that I recall. Those were the principal ones, and these apparently would just about awash. In other words, the gasoline would be somewhat cheaper when bought at Miami. On the other hand, there would be increased station expenses at Miami and Balboa, and we [fol. 702] essentially washed one against the other and relied on Panagra's reported experience.

Q. What about the difference in cost and maintenance in South America as distinguished from Miami; did you take that into consideration, Professor? Yes or no?

A. No.

Q. Professor, turning next to the item of $968,000, which you show as added reservation and sales cost for Panagra 1957, under route Assumption No. 1, that is Exhibit 127, that is, that figure is based on the assumption, is it not, that

Panagra would replace its sales agency arrangement with Pan American with an extensive ticket office program; which would result in a projected expense of $1,169,000; is that correct?

A. Less the commissions they now pay Pan American.

Q. Now, Professor, if Panagra either continued its sales agency relationship with Pan American, or entered into a similar arrangement with some other air carrier, such as National or TWA, this expense would not be incurred? Isn't that a fact?

A. That is correct. That is the net figure.

Q. They would not incur this additional expense, Pro-
[fol. 703] fessor; is that correct?

A. The additional over and above the commissions.

Q. Yes, Professor, is that correct?

A. That is correct.

Q. Thank you. Would you say the choice of sales arrangement is a matter solely within the business judgment of Panagra's board of directors, whether to set up this elaborate sales office program, that you assumed they would, rather than to enter into an arrangement similar to the one they have with Pan American and some other airline?

A. I think the board would make you set these up or make you set up some different kind of arrangement than what you have now.

Q. Do you know whether the board would so require, Professor?

A. No, but generally speaking, where competitors are involved, they don't permit these general sales agency arrangements.

Q. Would you say that TWA is a competitor of Panagra?

A. A competitor of Panagra?

Q. Yes.

[fol. 704] A. No.

Q. Thank you. Turning next, Professor, to the item of $411,000 for additional advertising, isn't that based on your assumption that Panagra will spend, in addition to its present advertising expense, the same percentage of its new revenues which it now spends of its present revenues?

A. It certainly is.

Q. Isn't it quite possible that Panagra's board of direc-

tors will not choose to spend this percentage of its new revenue for advertising?

A. We feel they would be foolish to so choose.

Q. That is your personal opinion, Professor?

A. Yes, sir.

Q. Professor, since the proposed route extension is over a route which Panagra is already serving and advertising, isn't it quite possible that Panagra might find it necessary to spend little if any additional money on advertising in connection with this proposed route extension?

A. We felt that if they wanted to generate this traffic, that they would essentially maintain the percentage level of their advertising as applied to this new revenue.

[fol. 705] Q. Now, Professor, with respect to general and administrative expense in Exhibit 127, that exhibit indicates, does it not, that you have assumed this category of expense would have increased for Panagra in '57 under Assumption 1 by some $453,000; correct?

A. Correct.

Q. That is based on the assumption, is it not, that this expense would maintain the same percentage relationship to total cash expenses as it has in the past.

A. That is correct.

Q. Isn't it likely, Professor, that many of the expenses under this category will not increase at all by a change from a through flight operation to an operation by Panagra over its own route between Miami and Balboa?

A. We felt otherwise, based on what seems to be the general trend in the industry, that as volume and so on builds up, this expense ratio tends to be pretty much constant.

Q. Well, you will agree with me, Professor, would you not, that each of the items of expense in Exhibit 127 is based on a series of assumptions; correct?

[fol. 706] A. On assumptions and Panagra's reported experience.

Q. And these assumptions that you made, they may not correspond with actual experience under the proposed route extension; you will agree with that, will you not, they may not correspond with actual experience under the proposed route extension?

A. That is correct.

Q. Professor, it is true, is it not, that your Exhibits 114 through 129 relate to only one possible route extension of a number for which Panagra might apply and which might be granted to it.

A. That is correct. The other seemed even less attractive from an economic point of view, as far as we could see.

Q. Did you, Professor—I believe I asked you this earlier—did you make any studies of the proposed route extension of Panagra up the west coast of the United States?

A. Not a detailed study, no.

Q. Professor, can you say in your expert opinion that there is no possible route structure which might be offered, which would result in Panagra's coming to the United States and which would not require additional subsidy?

[fol. 707] A. All other things being equal?

Q. Yes, Professor.

A. At the present time, I think it is hard for me to conceive, conceive of this.

Q. But you couldn't say and give your expert opinion that there is no possible route structure which might be offered, which would result in Panagra's coming to the United States, and which would not require additional subsidy?

A. At the present time, I think not.

Q. Professor, as I understand the ultimate conclusion to which these Exhibits 114 through 129 are directed, is that the particular extension of Panagra's route which you have considered would not be economically desirable; is that correct?

A. That is correct.

Q. But you do not suggest that it would be economically impossible, do you, Professor?

A. With additional subsidy?

Q. With or without?

A. With additional subsidy, I think it would be possible.

Q. Would you say it was economically impossible without [fol. 708] additional subsidy?

A. I would say so, yes.

Q. Professor, you recognize that the Civil Aeronautics Board and the President have exclusive jurisdiction in awarding routes and needed subsidy support, do you not?

A. Yes.

Q. You also recognize, Professor, do you not, that since the enactment in 1938 of the Civil Aeronautics Act, competing routes may be and have been authorized, although this required additional subsidy?

A. Yes.

* * * * * * *

[fol. 711] PAUL W. CHERINGTON, resumed.

Redirect examination.

By Mr. Peck:

OFFERS IN EVIDENCE

Q. Professor Cherington, would you refer to Grace Exhibit 176 which was introduced on your cross-examination.

The Court: It was marked for identification.

Mr. Peck: Yes, it was marked.

Mr. Kenney: For identification only.

Mr. McKay: I will offer them in evidence. I marked them for identification merely as an aid or for assistance to the witness, the Court, and myself. I am willing to offer them in evidence, if there is no objection. Otherwise I will leave them for identification, if there is objection.

Mr. Kenney: No objection from the Government.

Mr. Peck: It doesn't make any difference to us one way or the other.

Mr. McKay: I will offer them in evidence.

The Court: Let's consider them in evidence, and the Clerk will mark them later.

(W.R.G. Exhibits 174 to 182 for identification received in evidence.)

[fol. 712] The Court: Do you want the witness to look at Exhibit 176?

Mr. Peck: Yes, I would like the witness to look at 176, if your Honor please.

A. Yes, sir, I have it.

Q. I would like to call your attention to the item of revenue passenger miles per route miles per day for Northwest

Airlines, that figure of 53.6. I want to ask you whether that figure, 53.6, represents the density of traffic over that route, and by the route I mean between the United States and the Orient.

A. Well, it does not include the Pan American traffic which is carried on the route at present.

Q. And what is the Pan American traffic on that route? Can you tell us that?

A. No, sir, I don't have that figure. But it is my understanding that Pan American has as much or, if not, a good deal more traffic than does Northwest.

Mr. McKay: Judge Peck, would you permit one interruption which perhaps is an error on our part? When we were referring to Northwest, we were referring to Northwest Airlines. We should have inserted that word. I don't know whether that will clear up the situation. It may not. But—

[fol. 713] Mr. Peck: I understood that you were referring to Northwest Airlines, yes.

By Mr. Peck:

Q. In other words, that represents the density on Northwest's route alone; is that correct?

A. So I understand, yes.

Q. And has no regard to the fact that Pan American goes out there and has a greater density.

A. I believe that is correct, yes.

Q. Now some question was raised as to whether Pan American was seeking to duplicate the Northwest route. Pan American is already there, is it not?

A. Yes, sir.

Q. And was there, I take it, before Northwest was there, was it not?

A. Yes.

Q. What is this application that Pan American has in so far as that route is concerned across the Pacific?

A. My understanding is that under the existing Pan American certificate between the west coast of the United States and Japan, for example, Pan American is required to stop at Hawaii, and I believe that their present applica-

tion is to get non-stop rights from the west coast to Japan [fol. 714] which would give them, via the Great Circle, operating rights approximately equivalent to those which Northwest has.

Q. The only difference is over flying Hawaii, is it not?

A. Yes, sir.

Q. On a route which is otherwise established for Pan American.

A. Yes, sir.

Q. Mr. Mallory suggests to me that you do have there some place the figure of the density over Pan American's trans-Pacific route.

The Court: Let's not keep it a secret. Why don't you tell him?

A. I think it is 110.2.

Q. 110.2.

Now, if you are going to consider the economics of a route and the economic justification of competition, you would have to take into consideration the traffic of all carriers, would you not?

A. Yes, sir.

[fol. 715] Q. Now next I want to refer you, please, to Grace Exhibit 180, which was introduced to add to figures which you hadn't in your Exhibit 107, figures ending with the operating ratio for domestic trunk lines and U.S. local carriers, and first I will call your attention to the operating ratio of the local carriers for the years '56 and '57, respectively, of 103.3 and 100.4, and ask you to comment upon those figures in relation to the other figures which you have?

A. As has been mentioned several times, those local service carriers are heavily subsidized by the government. During the period of '56 and '57 a substantial number of them were on what is called open rates, that is, their final subsidy for the period had not yet been determined, so that what they were receiving was essentially temporary subsidy payments; and generally speaking, the Board has pursued a policy of paying the local service carriers that were operating on temporary rates only enough subsidy to break them even on their operating expenses without incorporating any rate of return element.

Now, I don't recall exactly how many carriers were on open rates during this period, but my recollection is that [fol. 716] it was a considerable number of the local service carriers.

Q. Does it sound right to you, 11 out of 13?

Mr. McKay: I object to the form of the question, your Honor, whether it sounds right to the witness.

• • • • • • •

Q. Let me ask you this: Do you know or don't you know that more than half of them were on an open rate?

A. More than half were on an open rate.

[fol. 717] Q. And does that mean that in the course of time there is going to be a recalculation of subsidy and that they are going to get more?

A. Yes, sir.

Q. Now reverting to the domestic trunk line corresponding figures of operating ratios for the year 1956 of 92.1 and 97 for 1957, would you comment, please, upon those figures?

A. Well, the operating ratio of 97 in 1957 is undoubtedly much below—it is very, very—it is a high ratio. This essentially reflects the deteriorating position of the domestic trunk lines during 1957 due to increased capacity, increased costs and so on. As a result of this, their general poor condition, the Board early in 1958 granted them a passenger fare increase, and there was a good deal of discussion in the industry as to what could be done to help these carriers get back on a more profitable basis. The Board gave them a second fare increase late in 1958. The White House exhibited enough concern about this problem so that it had a study made of the situation; and generally speaking, I think this operating ratio is certainly not typical of the recent experience of the domestic trunk carriers.

[fol. 718] Q. And it is an operating ratio without subsidy, is it not?

A. Virtually without subsidy.

Q. I will ask you to refer to Exhibit 181, and along the same line address your attention to the rate of return for the domestic trunk carriers for the years '56 and '57 of 3.2 per cent and 2.4 per cent respectively, and I will ask you

first whether those years are representative years of the experience of the trunk carriers?

A. No, sir. I would say that they were substantially below the experience of, let's say, the last ten years, where—

Q. All right, will you tell us what the experience has been of the domestic trunk carriers, year by year, for the last ten years?

A. Well, generally speaking, the rate of return for the trunk lines has been, since 1948 or '49, has been somewhere in the vicinity of 10 per cent. All years since 1949 have been above 10 per cent, with the exception of 1949, 1956 and 1957.

Q. And then what comment would you make, and further comment, in relation to this return for the year 1957?

[fol. 719] A. Well, it is untypically low.

Q. And does it enter accordingly into the observation that you made about the high operating ratio in 1957, leading to a rate increase?

A. Yes, sir.

Q. And as far as the Pan American and Panagra figures are concerned in these exhibits, both of operating ratio and rate of return, they include subsidy, do they not?

A. Yes, sir; they do.

Q. Will you now turn to your own set of exhibits, 114—

Mr. Peck: Could I have those?

Q. Turn, please, to Exhibit 114, about which there was some discussion by Mr. McKay and you about the added operating loss figure of 319,000 for Panagra under Assumption No. 1. I want to get it perfectly clear as to what that is and what you have described it as you have.

A. Well, we believe that this language was clear in the context of the exhibit. This was the operating loss resulting from operating over this additional segment. It can be regarded either as being an additive to other losses [fol. 720] or deducted from profits, if there were any. But there was a loss in the operating account in each of these categories, and we thought that this was a reasonable way of describing it.

Q. Now counsel asked you this morning, Mr. McKay,

about added competition by Panagra, including opening of Panagra's sales offices throughout the United States, as to whether that would not generate additional traffic; would you comment a little more fully upon that, Professor Cherington?

A. Well, we felt that it would probably not. Eventually, what you were doing here was to put in the sales offices for Panagra, but at the same time you were, through the termination of the general agency agreement with Pan American, taking away their effort in this field. This is applied—the sales effort would be applied to a route which has had competition for a number of years between—with Braniff, and we felt that it would be impossible to trace any additional traffic arising from these new sales offices, and that this was essentially a substitution of Panagra's somewhat reduced effort by Panagra, as against the agency effort by Pan Am.

Q. Yes, I was going to ask you, what is this added competition that we have been speaking about?

[fol. 721] A. It is for the local traffic essentially between Miami and Balboa.

Q. In other words, there would be no more through carriers then there are now; is that right?

A. That is correct.

Q. The through carriers now are Braniff and Pan American and Panagra, the combination.

A. Yes.

Q. And the through carriers, under your assumption, would be Braniff and Panagra, all the way.

A. That is correct.

Q. And the only difference in the situation would be Pan American competing on a local basis.

A. That is correct.

Q. And in sum, is it your opinion that that change in the competitive pattern and the introduction of additional independent Panagra offices would make any change in the traffic?

A. No, we think not.

Q. Now, would you comment, please, as to what you regard as the relative merits and the likely action of prudent management, assuming an independent Panagra carrying

through from Miami to the west coast of South America, as regards establishing offices at various locations, or turn-
[fol. 722] ing their sales over to another airline like the TWA?

A. Well, I have a good deal of difficulty with the assumption that if the general agency agreement with Pan Am were terminated, that Panagra would be—would enter into an agency agreement with TWA, which has no knowledge of the area, no particular interest in the area or anything else. They are pretty busy with their own routes, which are essentially quite different. I think it was our general approach that if Panagra were to operate this Balboa-Miami route, they would essentially have to get into their own independent sales activity and it was for this reason that we added these traffic offices.

[fol. 723] Q. You were asked also this morning as to whether maintenance costs would be cheaper on the Miami-Balboa sector because the maintenance would be performed in the United States instead of South America. What is your comment on that, please?

A. The maintenance costs, as I indicated this morning, are the reported costs. They are the maintenance work, or they reflect essentially the maintenance work done in Miami at the present time, and we assume no change in this.

Q. I think the only other comment I would like to have you make in reference to this morning's cross-examination is in regard to your Exhibit 118 concerning your use of the Braniff experience on the ratio of non-passenger to passenger revenue rather than the Panagra experience below the Canal.

Would you comment further on that, please, and add the significance of it one way or the other.

A. As I tried to indicate to Mr. McKay, we had the Braniff experience which covers their routes both north and south of the Canal, we had the Panagra experience south of the Canal, and we had no figures or data for this factor on Pan American between Miami and Balboa.

[fol. 724] The indications are that as far as we can make out south of Balboa there was a substantially higher proportion of non-passenger revenue to passenger revenue than there is or would be between Miami and Balboa. Part

of this, as I recollect, is cargo, part of it is foreign mail which is handled, and so on.

So that the Braniff figure of 16.1 or 16.6 is the best approximation that we could get for this ratio as it might apply to the Miami-Balboa segment. It seemed inappropriate to use the existing Panagra ratio, and, as I indicated, we had no figure for Pan American.

Q. I am going to ask you some questions, Professor Cherington, about the route study, Government Exhibit No. 1139, which I shall refer to as the Grace study.

Are you familiar with that study, Professor Cherington, Government Exhibit 1139?

Mr. Kenney: Your Honor, may I make a point? It appears to me we are getting outside the cross-examination here.

Mr. Peck: Yes, I would say that that is possibly so, but I wouldn't suppose it made any difference one way or the other.

[fol. 725] The Court: No, I don't suppose so either. You can go through the formality of asking me whether or not you couldn't cover something that you forgot.

Mr. Peck: Well, you see, it is something which was put in by Mr. Kenney after I had finished the examination of the witness.

The Court: Yes. All right.

By Mr. Peck:

Q. Was that exhibit available to you during the preparation of the exhibits which have been offered under your testimony?

A. Yes, sir.

Q. And are you generally familiar with its contents?

A. Generally.

Q. Are you aware that that exhibit forecast a profit for operations by Panagra on the Miami-Balboa route in 1957 as contrasted with the loss shown in the exhibits which were offered on your examination?

A. Yes.

Q. In summary will you tell us whether you consider the

figures in the route study of Grace or in your forecast the more accurate and reliable?

A. We prefer our figures.

[fol. 726] Q. Now let us get down to the difference between them. What are the principal differences between the two studies?

A. Well, there are two principal areas of difference. One is that the Panagra-Grace study does not include any return element, whereas our study includes a rate of return on the additional investment required of 9 per cent; and since this is what essentially the return is now, we considered it reasonable to include this. This is the return that Panagra gets from Pan Am.

The second area of difference essentially is in the operating expenses, and here there are differences of about $650,000 in direct operating expenses and about $625,000 in the indirect areas.

So far as I can see the revenue figures, although there is a slight difference between passenger and non-passenger revenues, are about equal.

Have you put in exhibit form a comparison of the estimated financial results contained in Pan American Exhibit PS-114 through 129 with the estimates contained in the Grace study?

A. Yes, sir.

Q. And are these documents which I hand you such [fol. 727] comparisons?

A. Yes, sir.

Mr. Peck: I offer them in evidence, if your Honor please, as Pan American Statistical Exhibits 130 and 131.

(Marked Pan American Exhibits 130 and 131 in evidence.)

Q. Now would you run through these exhibits with us, please, Professor Cherington, and summarize what they show?

A. Well, I should explain first that on January 1, 1957, the Board's accounting system was somewhat altered and our study was run out on the basis of the new accounts, whereas the Panagra-Grace study was run out on the basis of the old chart of accounts.

Basically the changes that the Board made in its accounting system included the consolidation of direct and indirect maintenance into one account, the consolidation of ground and aircraft depreciation into one account, the spreading of expenses related to personnel out of general administrative expenses and through the functional accounts, and some rearrangement of the indirect expense accounts as between aircraft and traffic servicing and res- [fol. 728] ervations and sales as against the previous system.

So that we have done our best here to put the Panagra-Grace figures and our own figures on a comparable basis in terms of this revised chart of accounts which, as I indicated, went into effect January 1, 1957.

But with that adjustment, and this is essentially an internal accounting problem, we believe that the right hand column here, the amount of difference, shows the comparison between the two studies and shows that in the revenue field we were very close, $97,000 apart; in the expense field, as I previously mentioned, we were higher than the Panagra-Grace study by $658,000; and in the indirect expense area by $626,000.

These are the broad areas of difference.

Q. And do both estimates include the loss of interchange returns?

A. Yes, sir, they both do. But ours goes on and includes the return on additional investment.

Q. Now take the first difference between the two estimates, that of direct expense. Would you please discuss those differences?

[fol. 729] A. Well, there are two areas essentially. One is in flying operations where the difference is $374,000. As I indicated this morning, we base our estimates essentially on the actual reported experience of Panagra in 1957. The Panagra-Grace study, in running out their estimates for flying operations and maintenance, used a number of different bases for flying operations. They used the first 11 months of 1955; for direct maintenance they used the calendar year 1955; and then in estimating their results for their existing system they used still a different base, which was the first three-quarters of 1956, blown up to a full

year by adding the highest of the first three-quarters of 1956.

We couldn't find any explanation as to why they used these varying bases, and as far as we could see the basis they used wholly failed to take into account the inflationary trends that were going on during this period.

Q. Can you give us some examples as to the comparative expenses for the years 1955, 1956, and 1957?

A. Yes, sir. In 1955, for example, DC-6B flying operations were 77 cents a plane mile, by 1957 these had increased to 83 cents, and it was the 83-cent figure that we [fol. 730] used converted to a revenue plane mile basis.

Similarly in 1955 the DC-6B direct maintenance expense was 21 cents a plane mile. By 1957 it had increased to 27 cents.

There were similar increases in the DC-7B operating accounts: Flying operations from 84 cents to 87 cents, and direct maintenance from 31 cents to 36 cents.

So that there were significant cost increases down to 1957 from the base periods that Panagra-Grace appears to have used in their study.

Q. And are the differences in such costs a primary reason for the $600,000 difference in direct expense shown between the two studies?

A. With one exception they are, yes.

Q. What is the exception?

A. The exception is in this question of gasoline that we got into this morning.

Basically, as I indicated, we used 1957 system experience. We had no real data to go on as to what the gasoline cost to Panagra might be on the Miami-Balboa segment. I think it is probably fair to say that it would have been somewhat less. It conceivably might have been as high as [fol. 731] $200,000 a year, but we think it probably would have been somewhat less.

Q. By virtue of what, buying gasoline in Miami or Balboa as distinguished from buying it in South America?

A. South America, where the cost presumably is somewhat higher than it is at Miami and Balboa.

Q. Now you say that difference as a maximum would be how much?

A. Well, it might be as high as $200,000; but, again, we had no real data for making this estimate, so we used their experience.

Q. Well, if it were as much as $200,000, would that put your expense estimates out of order by that amount or have them overstated to that extent?

A. We think not because there are some other estimates where essentially the numbers run the other way; that is, we have essentially under-estimated, and those occur basically in the station expenses that Panagra would experience at Miami and Balboa if they were to get into this operation.

Q. What kind of expenses are station expenses?

A. Well, this is the cost of employees and so on to run the station, fuel the aircraft, and the like, and they are [fol. 732] included in indirect expenses in aircraft and traffic servicing, whereas, it will be noted, we are under Panagra-Grace's estimate by $174,000.

Q. That is, the estimate in the Grace study for these expenses is how much?

A $458,000.

Q. And you have used what figure?

A. $284,000.

Q. So that at that basis you have understated by $174,000.

A. Yes, sir.

Q. In the area of station expenses which you were not able to identify.

A. That is correct.

Q. All right. Now what is the next principal area of difference between your study and the Grace study?

A. As I indicated, there are differences in the various indirect expense accounts, the first one on the exhibit being in the area of reservations and sales.

Q. When you talk about the exhibit, you are talking about PS-130, is that right?

[fol. 733] A. PS-130.

Q. All right. Go ahead.

A. Where we show expenses of approximately $318,000 more than the Panagra-Grace figures, and this is essentially a reflection of the ticket office costs we previously mentioned minus the commissions that are now being paid to Pan American.

Q. Those are expenses which are run out in detail in your Exhibit PS-122; is that right?

A. Yes, sir.

Q. Now, what about the rest of the difference?

A. There is a difference in the advertising expense of $161,000. The Panagra-Grace study indicates that their ratio of advertising expense to commercial revenues, at the time they drew up their figures, was seven and a half per cent. They reduced this for the Balboa-Miami segment down to, I believe, five per cent, on the grounds that they were better known between Miami and Balboa than they were south of Balboa. We were unable to go along with that kind of reasoning, and we essentially based our estimates on their actual 1957 figure, which I believe was 7.7 per cent, on the ground that they would have to put as much advertising effort into this new segment as they were [fol. 734] in their present system.

Next, the—

Q. Further in that connection have you an opinion as to whether Panagra's selling facilities and personnel, entirely independent from Pan American advertising, publicity and the like, whether wise and prudent management would require at least the amount of expenditure which had previously been incurred by Panagra, or if anything more? Would you express an opinion on that?

A. Well, we felt that if they were to go on their own in this segment their advertising ratio would have to be at least as high as their current experience.

Q. Now, is there any other category of expense difference?

A. Yes, sir. There is the category of general and administrative expenses. Apparently the Panagra-Grace estimates are founded on the belief that they could take over the Miami-Balboa segment and operate it themselves for very little increased general and administrative expense. It was our feeling that essentially this expansion in their routes and operations, amounting to roughly a third in [fol. 735] terms of plane miles and traffic, would essentially create a substantial pool of additional G & A expense, and we based our figures on their '57 experience of a ratio of 9.7 per cent for the general and administrative expense

account to total cash expenses. Now this seems to, generally speaking, bear out the experience of the industry. As carriers grow larger their expense ratio tends to be maintained. Whether this is because of Parkinson's law or something else, we don't know. But for example, between '56 and '57 Northwest international's operations increased in terms of volume by about three million dollars, and their ratio went from 9.94 to 10.04. Braniff's international operations increased from, oh, roughly, 20 per cent, and their ratio of G & A to total cash expenses went from 8.65 to 8.74. And generally speaking, although in theory the bigger the operation, the lower the ratio of overhead, it just doesn't seem to work this way in the airline industry.

Q. Are there any services which are performed by Pan American for Panagra at the present time in this field of G & A that would have to be picked up anew by Panagra?

A. Yes, sir. As I understand it, Panagra would have to [fol. 736] set up its own revenue accounting setup for this segment. It would have to set up its own revenue collection setup, and I believe there are some others.

Q. Now, is it your conclusion overall, Professor Cherington, that Panagra could have operated the Miami-Balboa sector in 1957 without incurring a substantial loss?

A. I believe they would have incurred a substantial loss.

Q. I want to get as briefly as possible some other aspects of the Grace study which goes beyond Miami and Balboa. Have you considered the portions of the study relating to the proposed Miami-New York route and the proposed Balboa-California route?

A. In general terms. Our own study of course focused down on the Balboa-Miami segment, because at the outset it appeared that this was the more attractive, or the most attractive of the three. It also was the segment where most of the controversy has been over the past few years.

When we saw the results of our analysis on the Miami-Balboa segment, it didn't really seem to be necessary to work out detailed analysis and the kind of thing we did [fol. 737] for Miami-Balboa; for either the New York-Miami or the west coast of the U.S.-Balboa routes.

Q. Well, let's see if you can make some comments at least on the Miami-New York segment. Could you com-

ment, for example, on the estimated results, as set forth in the Grace study, dealing first with the matter of revenues?

A. Is this the New York-Miami segment?

Q. Yes.

A. Well, the revenues look, look pretty optimistic to us. In the first place, the Panagra-Grace study assumes a passenger load factor of 71 per cent for this operation, which would essentially involve two round trips a day between Miami and New York. We don't have any segment load factors for the—or for the domestic carriers that now operate, but we know, for example, in the case of National, a very high percentage of their traffic consists of this New York-Miami traffic, and in 1957 National's load factors were 59.7, and 56.1 in 1958. Northeast, which is the newest carrier in the route, had load factors in 1957 of 47.4, and they just held their own at the same level in 1958. Eastern, of course, has a much more extensive system, but a con-
[fol. 738] siderable proportion of their traffic is involved in the New York-Miami run, and their load, system load factors, were 59.5 and dropped to 52.8 in 1958.

So frankly, we have a good deal of difficulty in seeing how Panagra, with two round trips a day, originating down in South America as against the 50 or 60 one-way trips that there already are in this market from domestic carriers, could reasonably hope to obtain a 71 per cent load factor.

Q. Does the Grace study assume something in regard to increases in international first class traffic and the tourist traffic?

A. Yes. They assume—the Grace-Panagra study assumes that over, if I recall, over the New York-Miami segment, international first class traffic would increase by 20 per cent in the year from 1956 to 1957, and that coach traffic, international coach traffic, or tourist traffic, would increase by 30 per cent in the same period. This compares with their estimated increase over the Miami-Balboa segment of only 10 per cent.

Q. You think there was realism in this assumed increase?

A. It seemed to us that this was fairly optimistic, in
[fol. 739] view of their general position in this market.

They also included 50—about 35,000, as I remember, New York-Miami passengers, or 53 per cent of the total number of passengers that they planned to handle, and I think that we have some—we have serious reservations about their getting this much domestic traffic.

Q. I want to make that clear. In other words, they figure that 53 per cent of the passengers that they carried over this projected route would be passengers who would not be through traffic to South America or into Central America, but would be domestic passengers between New York and Miami and between Miami and New York; is that correct?

A. That is correct.

Q. Now, what are your reflections about the likelihood of their realizing any such hope?

A. Well, we believe that their traffic would have been considerably less, but we did not make any detailed estimate of this.

Q. Do you think there would have been any likelihood of their getting the right to carry any domestic traffic at all?

A. Well, the Board has had this issue with respect to [fol. 740] Pan Am before it on two separate occasions, one, in the domestic route case in 1945 or '46, when Pan Am had an application in for this route and was turned down; and more recently in the New York-Florida case, where Pan Am had an application and the Board awarded the route by a 3 to 2 vote to Northeast, the other two members voting for Delta.

So I think that we certainly have reservations or real doubts as to whether it is realistic even to assume that Panagra would get certificated.

Q. Do any international carriers carry any domestic traffic?

A. Any pure international carriers?

Q. Yes. I mean, which come into a market then and pick up some domestic traffic on their international routes?

A. Not at the present time, but those carriers that operate, of course, in both areas.

Q. TWA, for example?

A. Yes.

Q. Now, do you have some observations on the cargo estimates in the Grace study?

A. Well, it is going to be pretty crowded in the cargo holds, as far as we can see. They assume that they will [fol. 741] be carrying somewhat more than 3,200 pounds of cargo southbound, as I recall, on each flight, some of which, approximately 40 per cent of which, will be domestic cargo. They also include some mail, and of course excess baggage.

As far as we can see, this is fairly optimistic again, in fact, very optimistic. The cargo business is essentially a 10 P.M. to 3 A.M. business, that is, when the cargo arrives at the terminal, and at least, according to the present schedules, Panagra takes off a good deal earlier on most of its flights.

Q. How many all purpose carriers are there on the New York-Miami route at the present time?

A. All purpose?

Q. Yes.

A. There are three.

Q. And is there any other all cargo carrier on the route?

A. Yes, sir. There is one all cargo. Riddle is an all cargo carrier, certificated on that route.

Q. What about expenses in the Grace study? What are your observations about them?

A. We did not do a detailed analysis of all their expenses. I believe it is fair to say that by and large our— [fol. 742] if we had done one, it would have come out essentially in the same general direction as our detailed comparative cost study on the Miami-Balboa route.

Q. You think their estimates are unrealistically low?

A. Yes.

Q. In your opinion, would such a route make money or lose money between Miami and New York?

A. Well, the Panagra-Grace estimates indicate a profit on the route of $81,000. We believe that this would, in fact, if you made realistic assumptions and estimates for revenue and for expenses, we believe it in fact would result in a loss operation.

Q. Turn now to the proposed Mexico-California extension; what is your opinion as to the economic feasibility of such additional service by Panagra?

A. As far as we can see, again, this is not a promising route, from an economic standpoint, either for Panagra or for the public in general.

Q. Why not?

A. Well, turning in the first place to one of their basic assumptions, the question of whether they would be able to get traffic rights in Mexico City, without those rights their [fol. 743] load factor on that run would be 44 per cent, as I recall. Our aviation relations with Mexico have had a long and very trying career. Western Airlines was certificated from Los Angeles into Mexico City in 1946, and due to difficulties with the Mexican Government they didn't actually begin operating until, well, either late '57 or early '58, I don't remember which. I think that it is very unlikely that the Mexicans would permit a second U.S. carrier on the Los Angeles-Mexico City route, and I am not even sure that we would at the present time ask them for a second carrier.

Now, without the Mexico City stop, the route is very substantially weakened. Pan American has had an operation from Los Angeles to Guatemala City, and then down toward Balboa, and in some cases beyond. They got that route, as I recall, about 1950, and because they couldn't stop in Mexico City on the route, they have only been able to build up, I think, five schedules a week over the route.

Q. How many frequencies is proposed in the Grace study?

A. Three trips weekly, one operating through to Buenos Aires and two, as I recall, terminating at Lima.

[fol. 744] Q. And after you excluded the Mexico traffic, what would that leave as the load factor?

A. It is my recollection it is 44½ per cent.

Q. Could that possibly be a compensatory operation?

A. No, I think it clearly would not be.

Q. Do you have any other comments with respect to the manner in which study has been prepared?

A. Well, one aspect of the study is that within the revenues which the Panagra-Grace study shows for the route, they have included some revenues south of Balboa, and this—their net transfer, in other words, from their existing routes onto this new route segment, were $646,000. In other words, they now pick up south of Balboa some traffic which

is turned over to them by Pan American or foreign flag carriers, which they assume they would handle on these new trips, and they have transferred from their existing system this net revenue of $646,000. The effect of this is essentially to strengthen the Balboa-Los Angeles route and to reduce somewhat the strength of their present routes.

Q. Now, you have been discussing the individual parts of the Grace study; will you now summarize your conclusions [fol. 745] as to the total effect that the projected extensions would have on Panagra?

A. Well, our general conclusions are that either the Miami-Balboa route or the three proposed routes, Miami-Balboa, Miami-New York and Balboa-Los Angeles would essentially have a weakening effect which, if not up through subsidy, would certainly weaken Panagra. So that it is essentially either bad for Panagra or bad for the taxpayer, or conceivably bad for the travelers if it was taken out in increased fares.

Q. Does the Grace study lead to any different economic conclusion on your part than that reached in the study which you have sponsored?

A. Not, we believe, when properly analyzed.

Q. Does the Grace study include any evaluation of the effect of its projected operations of Panagra upon Pan American subsidy needs or any other carrier's needs or effects?

A. No, sir.

Q. Would you comment on that, just to the significance of it, please?

A. Well, as I think is made clear from our Exhibits 114 [fol. 746] to 129, with respect to the Balboa-Miami route, the impact of this on Panagra—on Pan American, or the impact of a Panagra route on Pan American, is fairly critical. In the case of Balboa-Los Angeles, we believe there would be a similar impact upon Pan American's existing Los Angeles-Guatemala City-Balboa route.

Q. With a consequence of further requirement of subsidy there?

A. Yes, sir.

Q. And are any other carriers involved here, who would be affected by extensions of the Panagra routes?

A. Well, of course, Panagra could in fact get a Mexico City-Los Angeles route, Western would be seriously affected, and on the east coast, Riddle, Northeast, National and Eastern would be adversely affected.

Q. And does that bear upon your opinion as to the likelihood of Panagra getting such routes?

A. Yes, sir. I think it makes it less likely.

Q. Do you have an opinion as to whether there would be any passenger benefits out of these extensions?

A. We don't really see any, no, sir.

[fol. 747] Q. And you have concluded that such extension would represent an economic loss to Panagra on all routes.

A. Yes.

Q. And increased losses and requirement for subsidy on the part of Pan American and certain local carriers, whose names you have mentioned; is that correct?

A. Yes, sir.

Mr. Peck: All right, that is all.

• • • • • • •

[fol. 751] Recross examination.

By Mr. McKay:

• • • • • • •

[fol. 752] Q. Would you say, Professor, that the estimates on revenue passenger-miles in that study could be considered as fairly conservative, or didn't you run that out?

A. I think I have already indicated that the revenue passenger-mile figures on New York-Miami are optimistic.

Q. What about the Miami-Balboa?

A. Generally speaking, if I recall, we don't quarrel too much with those.

Q. In fact, actual experience, as shown from your exhibits, shows that the figures were conservative and the projection was less than was actually experienced in 1957; isn't that correct?

A. I think that is approximately correct.

• • • • • • •

[fol. 754] Q. Professor, you testified in answer to Judge Peck's questions that with these added offices that I think

will cost us some million dollars under your assumption it wouldn't generate any new traffic; am I correct?

A. That's right.

Q. Why would a company invest a million dollars in new ticket offices if it wouldn't generate any new traffic?

A. Because they were giving up their general agency agreement with their present sales force.

Q. I know we went over this on cross. Do you say it is impossible for Panagra to work out an arrangement with TWA or some other non-competitive carrier and do just as well as they are doing today with Pan American, or [fol. 755] haven't you got an opinion on that?

A. My opinion is, if they work out an arrangement like that with a carrier like TWA, they would do less well than they do now.

Q. What about National, the company that they are interchanging with at the present time? Is your opinion the same?

A. Give up the Pan American general agency agreement and go with National?

Q. Yes, sir.

A. I think they would do less well.

* * * * * * *

[fol. 756] Q. I know we have covered this, Professor, I will be very brief, but I just want to make it absolutely clear. As I understand your testimony, the basis used by you for operating and maintenance costs for Panagra under assumption No. 1 is Panagra's experience over its present system in South America; correct?

A. Correct.

Q. And these costs are higher than those experienced by Pan American.

A. That is correct.

Q. However, when you consider the non-passenger versus the passenger revenue ratio, you take Braniff which is less than the Panagra experience ratio; correct?

[fol. 757] A. Correct.

Q. The result of your choice in both cases is to reduce Panagra's revenue and increase its expenses; correct?

A. That is right.

Q. You testified, Professor, I think in answer to one of Judge Peck's questions on redirect, that you doubted very much whether the government of Mexico would approve of this proposed route extension in the Panagra study. Are you familiar with the thinking of the government of Mexico in aviation matters?

A. I followed our aviation relations with Mexico since I was with the Board.

Q. And you keep current?

A. Generally speaking.

Q. And can you say today that you are very doubtful the government of Mexico would approve the route extension?

A. I can.

Q. And, if so, on what basis?

A. On the grounds that to permit this second carrier in the Mexico-Los Angeles route would be essentially a reversal of the position that they have adhered to for a [fol. 758] long time.

Q. It wouldn't be the first time a government reversed itself, however, would it, in matters of policy?

A. No, it would not.

Q. One last question, Professor. This study that you referred to as the Panagra-Grace study, have you seen any Panagra-Pan American study along the same lines proposing route extensions for Panagra?

A. For Panagra?

Q. Yes.

A. No, I haven't.

Q. Do you know, Professor, whether Pan American has submitted any study to the board of directors of Panagra proposing route extensions?

A. Not that I know of.

• • • • • • • •

GOVERNMENT'S EXHIBIT 1

December 1st, 1927

Mr. Richard F. Hoyt,
25 Broad Street,
New York City.

My dear Mr. Hoyt:—

On behalf of Atlantic, Gulf & Caribbean Airways, Inc., I wish to confirm my understanding of the informal agreement between yourself, representing Keystone Aircraft Corporation, holding notes and/or other similar obligations of Huff Daland Dusters, Inc., and the writer, representing Atlantic, Gulf & Caribbean Airways, Inc., as follows:

1. No effort will be made, at this time, to combine, or affiliate, by formal contract, or otherwise, Huff Daland Dusters, Inc., and the Holding Company, Atlantic, Gulf & Caribbean Airways, Inc.

2. Huff, Daland Dusters, Inc., will attempt to negotiate and acquire, with privilege to transfer advantageous concessions for commercial air operations, including actual contracts for the transportation of mail by air from the Governments of Chile, Peru and Ecuador and, possibly, Colombia.

3. Atlantic, Gulf & Caribbean Airways, Inc., shall assist Huff Daland Dusters, Inc., in securing such concessions, through such contracts as they now have or may acquire, with the United States Government.

4. Atlantic Gulf & Caribbean Airways, Inc., shall assist Huff Daland Dusters, Inc., in framing said contracts and concessions, with the end in view of having said contracts return at least sufficient revenue to cover scheduled operating costs, and over a period of years, the maximum net revenue to the Company.

5. When any or all concessions as outlined above shall have been secured, then the Stockholders and/or Directors

of Atlantic, Gulf & Caribbean Airways, Inc., and Huff Daland Dusters, Inc., shall merge the two interests, through an equitable exchange of stock, the consideration in each case being the actual market value of the aircraft and other fixed equipment of each Company, at the time the merger or consolidation shall have been effected.

If this arrangement is in accordance with your understanding, will you please initial and return this letter, retaining the enclosed carbon for your files.

Yours very truly,

J. T. TRIPPE.

GOVERNMENT'S EXHIBIT 2

F-O

Private #5538

No. 10

LIMA,
April 10th, 1928

NEW YORK HOUSE

AVIATION.

In reference to your letter #5906 there has been efforts on the part of German interests and American interests to secure a concession from the Peruvian Government for the establishment of an Air Service on the Peruvian Coast and from Peru to Panama.

As we were anxious to find out what was going on we have been in touch with Mr. Woolman, Vice President of the Huff Daland Dusters, who has represented the American interests, acting in behalf of his Company. You may be aware that this Company for the past few years has had contracts with cotton interests here to spray the crops.

For a while Mr. Woolman was worried that the Germans would secure the concession but has recently told us that the President personally advised that it had been definitely decided to grant the concession to the Huff Daland Dusters.

The working arrangements and details of the service have not been divulged and we are inclined to think nothing concrete has been decided on up to the present, the main object being to secure the concession.

G006733

In order to keep Mr. Woolman interested in giving us information we advised him that no doubt the service could

GR-4
10-26
D.L.A.

[fol. 3] be worked to advantage in combination with Grace Line steamers, our idea being that a passenger by a Grace Line steamer, in order to have more time in Lima, might take a plane from Talara to Lima and board the steamer again on her arrival at Callao. Also, we pointed out to him that with our organization on the Coast it might suit him to appoint us Agents and have us work on a commission basis.

As previously advised this was more to keep Woolman talking as we had nothing definite to work on and could make no headway on any sound arrangement.

In regard to commercial justification for our entering into the establishment of such a service we consider it a risky business. In the first place mail from Peru is carried by steamers free of charge in return for Government concessions on lighthouse dues. Whether the Government would pay a large amount for quicker service when they now pay nothing is doubtful. With reference to the passenger end, the Peruvian Coast for flying, on account of heavy fogs and the Andes coming pretty close to the sea is not too safe. If a Company gave good service with no accidents for a reasonable period there might be a fair traffic. On the other hand, a few bad accidents would kill the project. There might be occasions which would cause passengers to necessitate a quick trip to New York but we do not think that the Grace Line at least for the immediate future would suffer from Aeroplane competition.

G006734

For your information, Mr. Woolman advised us that GR-5
[fol. 4] his Company is part of a strong group in the United States and that some of their connections had already progressed in the establishment of a service from New York to Panama, which is no doubt the Company you mention in your letter and points to the fact that the service is intended to be extended to Valparaiso. One of the Companies he mentioned was the Keystone Aircraft Corporation.

We advised him that it might be well for his people to talk the matter over with yourselves and we trust this information will give you something to work on. Meanwhile we will keep you posted of any new developments at this end."

Yours very truly,

p. p. W. R. GRACE & Co.,

Major H. A. Dargue, U.S.A.,
Office, Chief of Air Corps,
War Department,
Washington, D.C.

Dear Major Dargue:—

Referring to our conversation in Washington, last week, we would be very glad if you could prepare for us as comprehensive a report as you can on air transport route from Colon to Valparaiso.

As I told you, I think the best way to write the report is to put yourself in the position of one who is going to

seek to establish such a service and then muster all possible data, conclusions, recommendations, etc.

I would like to get it at as early a date as is practicable and will greatly appreciate your doing this and will be glad to compensate you for the time you put into it.

I may be in Washington next week, in which event I will call you up, but meanwhile would thank you to advise me if you will proceed with it.

With kindest regards, I am,

Very truly yours,

G006726

GOVERNMENT'S EXHIBIT 5

Peruvian Aerways

New York, May 23, 1928.

MEMORANDUM FOR MR. IGLEHART

MEMO OF CONVERSATION WITH R. H. HOYT OF HAYDEN, STONE & CO.

Mr. Hoyt who is Chairman of the Wright Aeronautical Engine Co. and who also has a substantial interest in the Keystone Aircraft Company said that the Pan-American Airway Co. was organized with the idea of developing a service through-out Latin America and that his idea was to obtain the participation and co-operation of the principal steamship concerns in each region, i.e., United Fruit in

Central America, Agwi in Cuba, Porto Rico, Colombia, etc., and Grace on the West Coast of South America. He said he felt that one large company could do the job better than a number of separate and smaller concerns.

He said he had intended to approach Grace & Co. as soon as plans had been further matured. It is his understanding that the Post Office Department will soon advertise for bids for mail services from Cuba to Colon via Central America and later will advertise for bids on a mail contract from Colon to Valparaiso. An appropriation of $1,750,000. for carriage of the mails to foreign countries is provided in the urgent efficiency bill which is expected to pass Congress this week.

I told Mr. Hoyt that we regarded aviation as simply a new development in transportation and as we had always been interested in transportation to the West Coast of South America we were following the matter closely and had had some studies made of the problem of providing air transport for mail and had discussed the matter with the Post Office Department. He said that he recognized that we were in an advantageous position which was the reason why he hoped he would co-operate with the Pan-American

[fol. 9] Aerways, but that if we were disposed to go ahead on our own, he would be inclined to stand aside and not compete as he felt we would be in better position than anyone else to undertake it. He was especially interested to know that we were active with regard to coffee and further to Panama Mail in Central America. He had not realized this before.

He confirmed the information which we already have from Lima that the Huff Daland Dusters outfit was seeking to buy a Peruvian concession of air transport between Peru and Panama, but had added that he did not know whether they were going to be successful.

We have separate information that the Post Office Department has asked South American Governments not to give any exclusive franchises for any air transport.

Mr. Hoyt said that as soon as the Post Office Department advertises the Havana and Colon route for bids; the Pan-AMERICAN Airways will require about $2,000,000 capital and he proposes to invite various interests in the Caribbean, such as Agwai, United Fruit, etc., to participate.

On the "technical" side his idea is that passenger business should be developed along with the mail, that multi-motored planes be used and that flying be confined to daylight hours.

By reason of his having been closely identified with the Wright Aeronautical Engine Co. ever since it started and with the Keystone Aircraft Co., Mr. Hoyt appears to be in a pretty strong position in the foundation situation. He is also a participant in the company which has employed Lindbergh in the trans-continental air transport company and he stated he has an option on Lindbergh's services as an advisor in the development of South American air routes.

GOVERNMENT'S EXHIBIT 6

No. 71

Ministry of Government & Police

Lima, May 29, 1928

The Huff Daland Dusters, Inc.

On May 28 the following Supreme Resolution was issued.

In view of the petition presented by the Huff Daland Dusters Inc. which Company was incorporated in the State of Louisiana, United States of America, to establish an air service between Peru and the United States under the conditions it outlined; and in view of the reports issued and considering the proposal convenient, it is hereby resolved to grant permission for the establishment of said air service under the following conditions:

1. This service to include the air transportation of mail, cargo and passengers.

2. The service shall commence at the earliest possible date which shall not be later than one year from the date of this resolution.

3. The Company will have full freedom in the selection of its employees and pilots who will be subject to all of the obligations imposed by law for the residence of the Republic, and that the Company shall agree to use the largest possible number of employees of Peruvian nationality, bearing in mind the class of service which it is required to render in accordance with this Resolution.

4. The Company waives all rights to diplomatic intervention and all differences which may arise under this agreement shall be dealt with by the courts of the Republic.

5. Authorization is granted for the landing of the Company's aircraft at any airport of the State.

[fol. 11]

6. The Company agrees to cover by insurance all risks in connection with the aircraft, mail, passengers and cargo.

7. The postal service shall be established by the Company in mutual agreement with the Post Office Department of Peru.

8. It is understood tariffs and other necessary conditions in connection with this service shall be approved by the Government, and that the official correspondence shall be carried free of charge, which mail will receive preferential treatment for transportation.

9. In the event of serious internal disturbances, epidemics, or any other public calamity, the aircraft supplies and personnel of the Company will be placed at the disposition of the Government free of charge.

10. In the event of internal war aircraft and supplies of the Company will become the property of the State.

11. The Company shall at an early date submit its articles of incorporation.

12. The Company is required to deposit with the "Caja de Depositos y Consignaciones" within ten days from this date, the sum of One Thousand Peruvian Pounds (1,000 Peruvian pounds) as a guarantee for the fulfillment of its obligations.

13. The Company in view of the nature of the services it is required to perform, will receive preference in clearances over land transportation companies, in the customs houses, post offices and immigration departments of the Republic.

14. Any conditions which may not be covered by this Resolution will be contemplated separately.

To be registered, communicated, and filed.

Seal of the President of the Republic.

Private. #6300

6215
Valpo-2261

LIMA,
June 13th, 1928.

NEW YORK HOUSE:

AERIAL SERVICE - PERU/UNITED STATES.

Referring to our private letter #6215 of the 6th. inst. on the above subject we enclose herewith copy of legal report on the concession secured by the Huff Daland Dusters Inc. for an aerial service between Peru and the United States. The report in question is in Spanish and we have

not had an opportunity of making a translation but presume you will be able to arrange this at your end.

Referring further to the subject of the aerial service we enclose herewith clipping from the West Coast Leader from which you will note that the same concession as granted to the Huff Daland Dusters Inc., has been given to the Cia. Aviacion Faucett, S.A., and to Sr. Rodolfo Beek, special representative of the Netallbauten G. M. B. H. Friedrickshafen, about which we wrote you in our previous letter. From this you will see that none of the Companies have a sole concession and should you want to start a service, as far as the Peruvian Government is concerned we do not think there would be any difficulty in getting the same concession as given to the three Companies above mentioned.

For your information Mr. Woolman of the Huff Daland Dusters Inc., advised us personally that he had made an agreement with the Marconi Co. to carry air mail from

G 325

GR-12

10-19-54 PJS

[fol. 13] Peru and on the Peruvian Coast. Naturally if this is the case the other two Companies will not be able to carry mail which means that they will not secure this revenue for their line. However, we have had no official confirmation on what Mr. Woolman says and will naturally keep you posted with any interesting developments with regard to the Aerial Service in this country.

Yours very truly,

p. p. W. R. Grace & Co.,

Harris

Mr. J. T. Trippe,
Atlantic Gulf & Caribbean Airways, Inc.,
New York City.

Dear Mr. Trippe:

In accordance with Mr. Hoyt's desires, I confirm the following understanding between Huff Daland Dusters and Atlantic, Gulf & Caribbean Airways, Inc.

1. That Huff Daland Dusters will grant to Atlantic, Gulf & Caribbean in return for the sum of $4,000 paid to Huff Daland an option upon the concession for air mails with the Peruvian Government for a period to run until June 1st, 1929.

2. In addition to the $4,000 to be presently paid to Huff Daland Dusters, it is understood that if the option shall be exercised by Atlantic, Gulf & Caribbean that they will pay to Huff Daland Dusters the actual cost of securing this concession, and in addition if at that time the situation warrants it a proper profit to be determined by Messrs. Hoyt, Trippe and Gott, and that this profit shall be added to the above mentioned amounts.

Very truly yours,

HUFF DALAND DUSTERS, INC.

By Edgar N. Gott
Pres.

U.S. ARMY PAN AMERICAN FLIGHT

July 7, 1928.

Mr. R. H. Patchin,
Manager, W. R. Grace & Company,
P.O. Box 286,
Hanover Square,
New York, N.Y.

Dear Mr. Patchin:

Under separate covers I am mailing you the following:

(a) Study on a proposed commercial air line between Colon and Valparaiso, with Exhibits "A", "D" and "E" (large envelope)

(b) Exhibit "B" (large roll of maps)

(c) Exhibit "C" (large envelope of maps)

This is the report you asked me to prepare and I regret that I have been unable to get it to you sooner but interruptions and correspondence to the Pacific Coast, as well as considerable research that I felt necessary, have taken up the time since you made your request.

There is much more detail that might be added and I should be glad to help further in this respect but consider work on additional data can better proceed after preliminary decisions by your company to go ahead on the organization of the air line have been made. I have left out all consideration of costs in accordance with your verbal instructions.

Trusting I may be of further assistance and assuring you of my earnest desire to hear that W. R. Grace & Company have decided to establish the "Grace Air Line", I am, with kindest regards,

Very truly yours,

/s/ H. A. DARGUE

GOVERNMENT'S EXHIBIT 10

July 20, 1928

Keystone Aircraft Corporation
Bristol, Pa.

Attention: Mr. Edgar N. Gott, President

Gentlemen:

Referring to your letter of June 25th and our acknowledgment thereof under date of the 26th:

Enclosed herewith please find your invoice, dated June 25th, 1928, in the amount of $4,000.00 and our check for a like amount, in full payment thereof.

We would confirm in detail, the transaction between Huff Daland Dusters, Inc. and Atlantic, Gulf & Caribbean Airways, Inc., referred to in the attached invoices as follows:

1. Huff Daland Dusters, Inc. grants to Atlantic, Gulf & Caribbean Airways, Inc., in consideration of the sum of $4,000.00, attached herewith, an option for the period through June 1st, 1929, on the concessions for Air Mail already held or presently to be acquired by Huff Daland Dusters with the Peruvian Government.

2. In addition to the $4,000.00 being paid Huff Daland Dusters, Inc. referred to above, it is understood that if the option is exercised by Atlantic, Gulf & Caribbean Airways, Inc., they will pay to Huff Daland Dusters, Inc., the actual cost of securing the concessions in question. Furthermore, if the situation warrants it, at the time such options are taken up, a proper profit to be determined by Messrs. Hoyt, Trippe and Gott shall be paid, and this sum added to the costs of securing the concessions.

In connection with paragraph one above, it is understood that the "Concession for Air Mails" includes all aviation concessions covering the operation of Commercial Aircraft other than dusting, and in particular all contracts between

Huff Daland Dusters and the Peruvian Government and/or the British Marconi Company, having to do with the carrying of mails by air.

Yours very truly,

ATLANTIC, GULF & CARIBBEAN AIRWAYS, INC.,

J. T. Trippe
President

AVIATION CORPORATION OF THE AMERICAS

MINUTES OF SPECIAL MEETING OF BOARD OF DIRECTORS

JULY 18, 1928.

* * * *

Upon motion duly made and seconded, and after consideration, the following resolution was adopted:

RESOLVED, that the proper officer or officers of this Corporation be and they hereby are authorized, empowered and directed to cause to be organized under the laws of Peru a corporation having as its general objects and purposes the conduct, management and/or supervision of aviation activities, said corporation to have such authorized capital stock as shall be determined and designated by Messrs. Richard F. Hoyt, C. V. Whitney and J. T. Trippe, and that upon the completion of the organization of such Peruvian corporation, the proper officer or officers of this Corporation be and they hereby are authorized, empowered and directed to subscribe and pay for the capital stock of said Peruvian corporation up to but not exceeding the amount of $10,000, and to transfer or cause to be transferred to such Peruvian corporation the options and concessions for aviation activities in Peru heretofore obtained by Huff-Daland Dusters, Inc., and here-

tofore transferred to Atlantic, Gulf & Caribbean Airways, Inc. and included in the assets and property of said Atlantic, Gulf & Caribbean Airways, Inc., recently acquired by this Corporation.

[fol. 20]

GOVERNMENT'S EXHIBIT 13

MEMORANDA

August 1st, 1928.

Mr. Trippe:

I lunched with Mr. Iglehart, Mr. Patchin, Mr. Garney; all vice-presidents of W. R. Grace and Company. These gentlemen are very much interested in the proposed West Coast Air Mail Line but feel it would be a great mistake to make it a passenger line primarilly. (Of course this would interfere with their passenger traffic.)

They talked at length regarding the small Peruvian operation as a starter and mentioned the fact that they would probably be interested in putting in about $25,000 to be matched against $25,000 of A. C. A. money, in order to try out the Peruvian line for a few months. Incidentally they feel, or rather Mr. Iglehart expressed the belief that it would not be desirable to form a Peruvian Company for this work but that an American Company should be formed. He thought that a transfer of mail contracts two or three times would simply be a waste of time and energy and he also feels that with international expansion an American company would be very much better. They also talked at length about putting in more capital right away and operating a through line from Panama to Calla, the idea being to purchase two Loening Amphibians similar to the one Mr. Hoyt is now using. These two planes to be used in conjunction with planes already arranged for in Peru.

The advantages of associating with Grace & Company are of course, self evident particularly in view of the fact that they have good political backing in the various coun-

tries involved and in addition have already established necessary agencies for the sale of air mail stamps and air passenger tickets. Also the various port facilities as well as wireless service could be made available to us without requiring special investment for such equipment.

A press report states that the Germans have made the first flight on an air-mail to Guayaquil from Colombia and that this will be a regular mail route.

(sgd) HAROLD R. HARRIS

GOVERNMENT'S EXHIBIT 14

EXHIBIT "A"

August 13, 1929.

DRAFT MEMORANDUM

WEST COAST OPERATIONS

It is proposed to undertake development work leading up to the installation of a regular tri-weekly service between Cristobal, Canal Zone and Valparaiso, Chile, and or Buenos Aires, Argentine Republic, as follows:

1. Aviation Corporation of the Americas, hereinafter known as A.C.A., to advance Harold Harris, as Trustee of the Peruvian National Company now being organized, the sum of $25,000. This sum later to be transferred to the new Peruvian Company and to cover A.C.A.'s subscription to $25,000 of its capital stock.

2. The Grace Steamship Company and/or an affiliated Company, hereinafter known as Grace, to subscribe to

$25,000 of the new Peruvian Company's stock, such subscription to be dated August 15th, 1928, and to carry interest at the rate of 6% until called.

3. Harold Harris to purchase and ship to Lima, through Huff Daland Dusters, Inc., and for the account of the new Peruvian Company, one Fairchild Cabin Monoplane, with necessary spares.

4. The Board of the new Peruvian Company to consist of five Directors:

.....
.....
.....
.....
.....

The Officers of the new Peruvian Company to be:

President	(A. C. A. nominee)
Vice President & General Manager	(Harold R. Harris)
Secretary	(Grace nominee)
Treasurer	(" ")

G066043

GR-11215

[fol. 22] 5. The new Peruvian Company to purchase from A.C.A. for the sum of $4.000.00, the option to the Peruvian Concession and mail contracts negotiated by Huff Daland Dusters, Inc., the new Peruvian Company to reimburse Huff Daland Dusters, Inc., for the expenses actually incurred in securing concessions and mail contracts through September 1st, such sum not to exceed $.....

6. The new Peruvian Company to take up this option from Huff Daland Dusters, Inc., and have transferred to it said concessions and mail contracts. In transferring said concessions and mail contracts from Huff Daland Dusters, Inc., a foreign corporation to the new Peruvian Company, a domestic corporation, said concessions and contracts to be broadened and improved with the help of A.C.A. and

the local Grace interests. In general, A.C.A. Draft B concession to be used by new Peruvian Company as a model in seeking to improve said concession and mail contracts.

7. Service between Lima and Paita to commence on October 1st, under the direction of Mr. Harris. The Fairchild Cabin Airplane and one dusting Airplane, to be chartered from Huff Daland Dusters, Inc., to service as equipment. No passengers will be transported for the first month and or until the service has been found to be technically feasible and safe.

8. For the first six months operations shall be restricted to one round trip weekly between Lima and Paita. The estimated results for this period are outlined in Exhibit "A" attached herewith.

9. A.C.A. will forthwith hand over to Grace its draft "B" model concession, together with other economic data already compiled, having to do with the proposed air transport service on the West Coast, Grace will forward copies of its documents to its agents on the West Coast for study. As soon as practical, an attempt will be made by their agents in Ecuador and Chile to secure such concessions in the name of ..... Corporation or Pan American Airways, Inc., a New York corporation. All such concessions to carry the privilege of transfer to another entity with the consent of the Government concerned.

10. Pan American Airways, Inc., to attempt to acquire operating rights and legal standing in Colombia, either in its own name or in the name of a local national Company formed to hold them. (These rights will be required in connection with the proposed extension of Pan American Airways, Inc., service along the North Coast to Trinidad and the Guianas).

11. A.C.A. and Grace to consider the local situation in Bolivia and the Argentine and to jointly select individuals to negotiate concessions in these countries.

G066044

12. Mr. Harold Harris is to devote the first two months of his time after arriving in Lima to the organization and

installation of the Lima-Paita service. As soon as the one GR-11216
[fol. 23] round trip weekly service is in regular operation, Mr. Harris is to devote considerable time to the survey of technical conditions on the West Coast, commencing with the section between Cristobal and Lima, that he be in a position to recommend proper equipment to extend the initial service following the contemplated acquisition of a United States mail contract.

13. The A.C.A. traffic department to map out a survey covering estimated passenger, mail and express service, including international Northbound air mail, for the territory between Colon, Lima, Valparaiso and Buenos Aires. Mr. Harris with the cooperation and help of local Grace agents, to conduct such traffic survey and have same completed before November 1st, 1928.

14. Messrs. Trippe and Patchin to continue negotiations with the United States Post Office Department toward the early advertisement for mail service from Cristobal South, via Valparaiso to Buenos Aires. Messrs. Trippe and Patchin to advise the Post Office Department that they would be interested in a contract which would permit of their retaining an option to inaugurate service contingent on the securing of proper operating rights and legal standing in the countries concerned. Also, contract which would permit of a year within which to commence service, following official notice of award, and which, in general, would be placed in operation section by section from Cristobal South as "operating conditions will permit and economic conditions justify". There is some doubt as to whether or not the Comptroller will pass for payment mail contracts made by the Post M-G. under the May 8th Foreign Mail Act. It is believed that the contract for same under the existing legislation, along the general lines indicated. Also that the contractor would be amply protected against loss through permission, obtained in supplementary letter, to defer separations to inaugurate service pending enactment

of clarifying retroactive legislation at forthcoming short session.

15. Negotiations with any European Transport Companies in which the proposed West Coast operations are concerned would be deferred until the matter of the selection of the Corporation which would undertake the West Coast service had been agreed upon by A. C. A. and Grace.

16. No attempt to include data on financial requirements, operating costs or estimated revenue, has been made.

In general, the round figure of $250.00 per airway mile for three-times-a-week service by multi-engined 2,000 pound payload airplanes, will be of value.

Operating costs including all proper indirect charges should be under $2.00 per airplane mile. With a proper load factor and under efficient management, the cost figure should approach $1.60 per airplane mile.

GOVERNMENT'S EXHIBIT 15

August 31, 1928.

Aviation Corporation of the Americas,
100 East 42nd Street,
New York City.

Attention: Mr. J. T. Trippe

Dear Sirs:—

This will confirm arrangement under which we will associate for the commencement of an airplane service in Peru with the view of ultimately inaugurating a through mail service from the Panama Canal to Valparaiso, Chile.

A corporation will be formed under the laws of Delaware with a capital stock of $50,000, of which $25,000 will be

subscribed by yourselves and $25,000 by ourselves. This corporation will pay to Huff-Daland Dusters, Inc. the sum of $15,000 for an assignment which will convey all of the rights of that company under its present Peruvian mail contract and concession. As soon as possible after the assignment has been completed, operations will be started by this company in Peru and every effort will be made to put the business there on a paying basis.

We will in the meantime cooperate with you in studying the costs of operation on the route from the Panama Canal to Valparaiso and also the advisability of requesting the U. S. Post Office Department to advertise for a mail contract on such route and the terms of such advertisement.

If you determine that it is advisable to bid on a contract for carrying the mails between the Panama Canal and Valparaiso, the Delaware corporation above referred to will be used in such service either by an increase in its capital stock to an amount sufficient to operate on the whole route or as a subsidiary operating in Peru. In either event our subscriptions to the stock of the Delaware Company shall be credited at their full amount in the capital setup of the corporation operating the through service. We shall also have a reasonable time after a study of the estimated costs of such operation to determine what interest, if any, we will take in the company making the bid in addition to our initial investment of $25,000, such interest not to exceed, however, more than fifty percent of the total capitalization.

You will have charge of the operation of the service

G 4351

GR-27
10-25-54 PJS

[fol. 25] from the Canal to Valparaiso and our houses on the West Coast of South America will be the agents of the company on a reasonable compensation basis, such agency to continue during the life of transportation contracts undertaken by the company.

The details of carrying out the above must, of course, be worked out as we go along. We believe, however, that we have stated broadly the basis of our understanding.

Very truly yours,

W. R. GRACE & Co.

COGSWELL
Assistant Secretary

[fol.26]

GOVERNMENT'S EXHIBIT 16

Private # 8196

3.15

New York, Sept. 4, 1928.

W. R. Grace & Co.,

Lima, Peru.

Dear Sirs:

We have entered into an arrangement with the Aviation Corporation of the Americas (which owns all the stock of the Pan-American Airways, Inc.) to form a Delaware Corporation under the name of Peruvian Airways Corporation, of which we will each own 50% of the stock. This Corporation will operate a weekly air service between Callao and Talara. For your private information, the ultimate purpose is to use this Corporation, if the operation justifies it, as a nucleus for the inauguration of an airmail service between the Canal and Valparaiso, for which our West Coast houses will act as agents.

The officers of the Corporation are to be: President, J. T. Trippe; Vice-President and General Manager, Harold H. Harris; Vice-President, R. H. Patchin; Secretary, William F. Cogswell.

We should like to have a member of the Lima Office act as Treasurer as Mr. Harris intends to spend considerable time studying aviation conditions on the Coast and it will be necessary to have someone to disburse the company's funds during his absence. We will accordingly elect Mr. Bush to such position but if for any reason this is not agreeable, we will elect another Treasurer at your cabled request.

Mr. Harris, who is to have charge of the operation of

G 4341

GR-29
10-22-54
WAK

[fol. 27] the Company, is proceeding to Callao on the next voyage of the S/S "Santa Luisa". He will first arrange for the assignment to the new company of the Mail Contract and concession now held by Huff Daland Dusters Inc. and for the commencement of the service as soon as possible. We should appreciate any assistance you can give him in this connection and in seeing that the company is legally qualified to do business in Peru. ((We will make payment for the assignment when you advise us by cable that it has been effected and that it carries with it the equity of $4,000. in security which was deposited by the Huff Daland Co. with the Peruvian Government.))

We will send you next week a copy of Mr. Harris' power of attorney and further details as to the method of putting Mr. Harris in funds. Our present idea is to send you a credit note for the account of the Airways Co. which Mr. Harris can draw upon as the necessity arises.

While Mr. Harris will have to work out the details of the schedule to be maintained, it is our idea that a plane will pick up the mail from the Grace Line ships southbound at Talara and carry it to Callao and northbound catch the P.S.N.C. and C.S.A.V. ships at Paita. While the flying time will be only one day less than the steaming time, it may well be that by use of the air service a whole week's time will be gained. For example, the P.S.N.C. and C.S.A.V. boats leave Callao northbound the day after the Grace boats arrive southbound. There would seem to be very

little opportunity to have a reply to a letter arriving on the Grace boat go forward on the P.S.N.C. or C.S.A.V. boat

G4342

GR-30

[fol. 28] the next day. On the other hand, if the letter should be taken off at Talara and carried by plane to Callao, there would probably be sufficient time to have the reply go forward on one of those boats two days later, and an additional day would be added by having a reply carried to Paita and placed on the northbound ship at that port.

Northbound the Grace boats leave one day and two days respectively after the arrival of the P.S.N.C. and C.S.A.V. boats southbound. There would be an extra day to reply to letters arriving on the southbound ships if it should be carried by plane to Talara.

The success of this operation naturally will depend on keeping expenses at a minimum and obtaining as much business as possible. It is the intention for the present to concentrate on air mail and express and not carry passengers at least until the line has been in operation for several months. We trust that our houses in Peru will use every effort to stimulate interest in this business and be of all assistance possible. Of course, when they act as agents in any of the cities, they will receive reasonable agency fees which should be along the lines of those paid by the steamship company, and we should like to have your ideas as to what would be a reasonable charge. You would probably be in a better position, however, to determine this after operations have been commenced.

Very truly yours,

W. R. GRACE & Co

COGSWELL
Assistant Secretary

Received at N.Y.
Sep 10, 1928

W. R. Grace & Company,
10 Hanover Square,
New York City.

Attention Mr. William F. Cogswell

Dear Sirs:

We beg to confirm the arrangement set forth in your letter of August 31st.

Supplementing paragraph four, however, we would point out the fact that in the event you decide not to take up a substantial interest in a jointly owned Company, organized or to be organized for the purpose of submitting a bid on the contract for carrying mails between Panama Canal and Valparaiso, then, and in that event, we would prefer to bid on the contract through the medium of Pan American Airways, Inc., or some other wholly owned subsidiary.

If this were done, we would arrange to allow you, if you desired, to take a further stock interest in Aviation Corporation of the Americas, in addition to the $25,000. referred to in paragraph five.

Our Directors are delighted that we are to be associated with your firm in the development of air transportation on the West Coast of South America, and we look forward to a most pleasant and profitable relationship.

We would appreciate your advising us if this letter, in connection with yours of August 31st, covers your understanding of our arrangement.

Yours very truly,

AVIATION CORPORATION OF THE AMERICAS

GOVERNMENT'S EXHIBIT 19

PERUVIAN AIRWAYS CORPORATION

September 7, 1928.

Mr. Harold R. Harris,
Vice President and General Manager,
Peruvian Airways Corporation,
100 East 42nd Street,
New York City.

Dear Sir:

In taking up your duties and responsibilities as Vice President and General Manager of the Peruvian Airways Corporation, you will follow, in general, the program hereinafter set forth.

1. You will proceed to Lima, from either New York City or New Orleans, in time to make connection at the Canal Zone, with the Grace Line steamer leaving New York City on Thursday, September 13th.

2. Upon arriving in Lima, you will call on Mr. Charles G. Bush, one of the Managers of the local Grace house. Cooperating with him and other local Grace officials,

you will transfer the Air Mail Contract, granted to Huff Daland Dusters, Inc., by the Peruvian Government, to the Peruvian Airways Corporation.

3. Coincident with this transfer, you should attempt to improve the general concession, by having inserted as many as possible of the additional privileges set forth in the Model B concession, attached herewith. Those paragraphs having to do with the right to sell Air Mail Stamps directly, of course are not essential, inasmuch as Peruvian mails are handled by a private Corporation.

4. While transfer of the permits and contracts is being completed, you should arrange, if possible, for desk room and office service, at reasonable charges, at the local Grace house.

G006708

GR-38
10-26-54
SLA

[fol. 33] 5. You will endeavor to negotiate agreements with W. R. Grace and Company at Lima, whereby the various Grace Company houses in Peru will represent Peruvian Airways, Corporation, as General Agents, to handle the solicitation of mail, express, and possibly later passenger traffic. At Talara, you should attempt to negotiate similar contracts with the International Petroleum Company. It is possible that you will have time to close this matter en route to Lima. A letter of introduction to the local official in charge is being handed you.

6. You should qualify this Company to conduct business in Peru, and for this purpose there is being handed you certified copy of its charter, properly attested by the Peruvian Consul.

7. You will arrange to have transferred from Huff Daland Dusters, Inc., to Peruvian Airways Corporation, the Fairchild cabin monoplane, purchased by them, as agent. As soon as this transfer has been completed,

cable me, that funds advanced to Huff Daland Dusters, Inc., by Aviation Corporation of the Americas, covering the purchase of this ship may be remitted by Peruvian Airways Corporation to Aviation Corporation of the Americas. Payment will be made out of the New York City funds of the Company. Upon receipt of proper vouchers, covering the purchase and shipment of certain spares for the Fairchild Airplane, by Huff Daland Dusters, Inc., and upon delivery of same to you in Peru, same should be paid by you out of local funds.

8. Upon completion of the transfer of the air mail permit and contract referred to in paragraph two above, you will cable me, in order that payment of $15,000. to Huff Daland Dusters, Inc., and $4,000. to Aviation Corporation of the Americas, as provided for under existing agreements, can be made.

9. Following the transfer referred to, you should arrange to operate the Lima-Tafara route as nearly as possible under the budget you submitted to me with your letter of July 26th, 1928, copy of which budget is attached herewith. Until such transfer has been completed, no air mail operations should be attempted by Peruvian Airways Corporation, either directly or through another Company for its account. Local commitments and disbursements should be deferred as much as possible until transfer has been made.

G006709

GR-39
10-26-54
SLA

[fol. 34] 10. After Air Mail operations commence, every effort should be made by you to keep costs of operation to a minimum and you should seek to develop other possible sources of revenue, not only from mail and express, and later from passenger traffic, but also from all other forms of aerial service.

11. Such insurance as you consider advantageous to the Company's interests, should be taken out.

12. Negotiations should be entered into with the officials of the Peruvian Post Office (The British Marconi Co.) in an attempt to secure their special assistance in connection with Air Mail shipments, by some method of increased revenue to the Post Office Department.

13. No passengers should be carried on the Air Mail flights until the line has been completely organized. At such time as you consider the operations have advanced to a point to warrant carrying passengers, please cable me for authority to proceed. The matter will then be considered by the Board of Directors.

14. Additional flying equipment can be purchased or leased from outside Companies on such terms as you consider most advantageous to the interests of the Peruvian Airways Corporation.

15. At such time as the Lima-Talara Line is operated to your satisfaction, you will commence a survey of the airway between the Panama Canal Zone and Talara. Later, this survey should be extended South to Valparaiso.

16. A record of all disbursements and all income should be kept, and a monthly report covering same should be forwarded to me at the New York Office of the Company—Room 2327, 100 East 42nd Street.

17. All correspondence on Company business should be official correspondence, bearing serial numbers. The correspondence should be divided into two series; first, the regular series bearing the serial numbers 1, 2, 3, etc., and, second, a private series, bearing the series A, B, C, etc. Letters of the private series will not be

G006710

GR-40
10-26-54
SLA

[fol. 35] opened by anyone but Mr. Cogswell or myself. Similarly, you should advise persons having to do with the receipt of correspondence addressed to you that all letters bearing the caption "Private Series" on the envelope, should not be opened except by yourself or such other person as you might designate.

All cable correspondence between New York and Lima will be handled through the courtesy of W. R. Grace & Company, under their private code. Where this is impractical, Bentley's Complete Phrase Code (Reprint of First Edition).

Regular serial letters should be addressed to me—Room 2327, 100 East 42nd Street—and there should be attached a carbon copy with each letter. Furthermore, the second carbon should be addressed to Mr. W. F. Cogswell, Treasurer of the Company, 10 Hanover Square, New York City.

18. There is being prepared, and will be forwarded you shortly, a general program to be followed by you, in mapping out the technical and traffic survey, referred to in Paragraph 15. Also, copies of ticket forms and general information, with reference to passenger solicitation and the legal liability in connection therewith, are being prepared and will be forwarded shortly. The question of passenger liability and the ticket forms being forwarded, of course, should be cleared with your local attorney. For your information in this connection, in many Latin American countries, releases are binding, not only in the event of accident, but also any properly drawn release precludes an estate from collecting damages in the event of death.

19. Funds will be advanced from time to time, to the Grace house at Lima, against whom you can draw. This matter is covered in your Power of Attorney, being handed you today. There is also being advanced to you, as an advance against traveling expenses and other proper disbursements, the sum of $1,000.00.

20. The technical surveys referred to in Paragraph 15 are being conducted with the end in view of establishing passenger, mail and express service between Canal Zone, Callo and Valparaiso, subject to the acquisition, by an affiliated Company, of a United States Mail Contract over this route. The general plans of this

[fol. 36] Corporation and its affiliated interests, contemplate delegating to you the supervision of all flight operations, following the inauguration of the proposed through service.

21. I will keep you informed as to developments, in connection with the acquisition of the United States Mail Contract.

Wishing you every success in the installation and operation of the Transport Service in Peru, I remain,

Very truly yours,

PERUVIAN AIRWAYS CORPORATION

By .....
J. T. Trippe
President.

GOVERNMENT'S EXHIBIT 21

Private No. 8292

Aviation
Corr wi West Coast House

September 12, 1928.

W. R. Grace & Co.,
LIMA

Dear Sirs:

Referring to our private letter No. 8198 of September 4th, we beg to confirm our cable of September 10th, as follows:

"110s Our 98 - 16th to 28th word with them we have formed Peruvian Airways Corporation Incorporated here Harris will arrive Lima 'Santa Luisa' writing fully".

The Aviation Corporation of the Americas, which owns all the stock of the Pan American Airways Inc., and which, in turn, has a contract for carrying the United States mails from Key West to Colon and from Key West to Perto Rico, is further advanced than any other concern in this country

in the matter of carrying foreign mail by air and we felt it highly advisable to accept their invitation to associate with them in a company to develop the concession of the Huff Daland Dusters, which will be taken over by the Peruvian Airways Corporation which has just been formed.

The purpose and policy of Peruvian Airways Corporation is set forth in the enclosed letter of instructions from Mr. J. T. Trippe, President of the Pan American Airways and of Peruvian Airways Corporation to Mr. Harold R. Harris, Vice President and General Manager, who is leaving this week from New Orleans for Colon where he will embark on the "Santa Luisa".

Mr. Harris appears to have an excellent knowledge of flight operations and to be earnest and reliable, but he has not had extensive general business experience and, possibly, may not realize the extent of the preparation and investigation required before any transportation enterprise

GR-43
11-16-54

G006703

[fol. 39] can be inaugurated in a country like Peru. You will note from the instructions that it is understood he will work closely with you and is to appoint you as general agents for the airways service all along the Peruvian coast. The general idea is that W. R. Grace & Co. will be the agents, not only in Peru but wherever it may be extended. If it is extended a new and larger company will be required in which the extent of our participation remains to be determined.

Mr. Bush has been elected treasurer, with the idea, on our part, that he is the one in your organization most familiar with the problems that will arise and can most effectively assist the development of this service.

Mr. Harris appears to attach high value to Grace assistance in every direction and as he seems to be of a frank and candid nature we have no doubt he will carry out his intention to keep you fully informed of all his work. If he does not please advise us. We feel strongly that you should be closely associated with the enterprise in order

that you, as well as we here, may become well informed in the general technique of air transport.

The U. S. Post Office Department is desirous of inaugurating air mail service at an early date from the Canal south to Valparaiso. We do not wish to hurry into bidding on such a contract but we feel that we should make as rapid progress as possible towards the point where we can decide whether or not a service can be established from Colon to Valparaiso that can pay, or nearly pay, expenses at $2.00 per mile on the southbound voyage, which is the maximum now obtainable under U. S. foreign air mail contract, plus such mail, freight and, ultimately, passenger revenue as is obtainable on the northward operations. Lines which have daily flights in this country operate at a total cost, including capital, depreciation, etc. of 78/80 cents per mile. That is operation but as a West Coast service would hardly fly more than twice a week at best, it is doubtful whether the line could be operated for the $2.00

GR-44

G006704

[fol. 40] mile of the outward voyage payable under mail contract, which makes an average of $1.00 a mile for round voyage. The postal revenue under a United States contract is the only assured, certain, large income in sight. Therefore, the commercial feasibility of the service would seem to depend on the additional revenue obtainable from other sources and the first purpose of the Peruvian Airways is to develop these possibilities in Peru.

We would like you to cooperate with Mr. Harris in obtaining the assignment of the Huff Daland concession to the Pan American Airways and if possible, broadening the concession. The press reports that Mr. Faucett recently received a concession to carry the mail from Callao to Talara, but we have no knowledge of the details.

If it is decided to bid on a through mail contract a pretty large organization will be required. One of the difficulties and heaviest items of expense will be to get competent personnel. It occurs to us that, in the event of a through service being established, it might be possible to work out

some plan of absorbing Faucett's company on a reasonable basis, if it has assets or personnel of value. This is, however, a matter to be approached pretty carefully and the subject was purposely omitted from Harris' instructions. He told him we thought you would be in a better position than he to develop this possibility.

The Huff Daland Dusters incurred considerable legal expense in getting their concession which ought not to be repeated in having it broadened, as indicated on the instructions to Mr. Harris.

Very truly yours,

W. R. GRACE & Co.

GOVERNMENT'S EXHIBIT 23

AVIATION CORPORATION OF THE AMERICAS

BOARD OF DIRECTORS

SEPTEMBER 17, 1928.

"Upon motion, duly made and seconded, the following preamble and resolution were adopted:

WHEREAS, certain officers of this corporation heretofore purchased 250 shares of the capital stock of Peruvian Airways Corporation, a Delaware corporation, at the aggregate price of $25,000.00.

RESOLVED, that the purchase of the aforementioned shares of said Peruvian Airways Corporation be and the same hereby is ratified, approved, confirmed and adopted.

On motion, the following preambles and resolution were adopted:

WHEREAS, this corporation heretofore loaned to Huff-Daland Dusters, Inc. the sum of $11,800.00 for the purpose of enabling said Huff-Daland Dusters, Inc. to purchase one FC-2 Type of Fairchild Cabin Monoplane upon the understanding that said Huff-Daland Dusters, Inc. would, if requested by this corporation, transfer said plane to a corporation proposed to be organized to undertake certain aviation operations in Peru whereupon such loan from this corporation to said Huff-Daland Dusters, Inc. would be cancelled and deemed repaid: and

WHEREAS, Peruvian Airways Corporation has been organized for the purpose of conducting such aviation activities in Peru and has made an agreement with this corporation whereby this corporation will request said Huff-Daland Dusters, Inc. to transfer said plane to Peruvian Airways Corporation upon the agreement by said Peruvian Airways Corporation with this corporation to pay to this corporation the said sum of $11,800.00,

RESOLVED, that the aforementioned agreement between this corporation and said Peruvian Airways Corporation be and the same hereby is ratified, approved, confirmed and adopted, and that the proper officer or officers of this corporation be and they hereby are authorized, empowered and directed to request said Huff-Daland Dusters, Inc. to transfer the aforementioned plane to said Peruvian Airways Corporation upon the condition that said Peruvian Airways Corporation pays to this corporation the sum of $11,800.00 upon the delivery of the possession of said airplane to Peruvian Airways Corporation and the execution and delivery by said Huff-Daland Dusters, Inc. of a bill of sale to said Peruvian Airways Corporation covering said airplane."

[fol. 43]

BOARD OF DIRECTORS

NOVEMBER 19, 1928.

"Mr. Trippe thereupon outlined the progress being made in the development of the company's plans for operations along the west coast of South America. He also reported briefly upon the activities of Peruvian Airways Corporation, a subsidiary of this corporation, the development of foreign competition in Chile, Argentina and Brazil, anticipated domestic competition, and the discussions had with W. R. Grace & Co. relative to the policy to be adopted on the west coast of South America.

On motion, duly made and seconded, it was

RESOLVED, that the President or Vice-President be and he hereby is authorized, empowered and directed to cause to be organized under the laws of Delaware, or such other state as may be advised by counsel, a corporation for the purpose of carrying on operations in South America, with an authorized capital stock of $2,000,000.00, and to subscribe on behalf of this corporation for one-half of such authorized capital stock of said corporation, and to offer to W. R. Grace & Co. for subscription, or purchase, the remaining one-half

of such authorized capital stock in accordance with the agreement between this corporation and said W. R. Grace & Co., dated August 26, 1928."

BOARD OF DIRECTORS

DECEMBER 20, 1928.

"On motion, duly made and seconded, the following resolution was adopted:

RESOLVED, that Mr. J. T. Trippe, the Vice-President of this Corporation, be and he hereby is authorized and empowered to cause to be organized under the laws of the State of Delaware a corporation to be known as Chilean Airways Corporation, or such other name as may be selected by said Vice-President, with a total authorized capital stock of $50,000.00, and to cause the proper officer or officers of said corporation to offer one-half of such total authorized capital stock, namely, $25,000.00, to W. R. Grace & Co. for subscription, pursuant to an existing agreement between this Corporation and the said W. R. Grace & Co., and that the said Vice-President or the Treasurer of this Corporation be and he hereby is authorized and empowered to purchase and pay for the remaining one-half of the authorized capital stock, namely, $25,000.00, of said proposed corporation."

[fol. 44]

BOARD OF DIRECTORS

FEBRUARY 21, 1929.

"On motion, duly made and seconded, the following preambles and resolution were adopted:

WHEREAS, Pan American-Grace Airways, Inc. has been incorporated under the laws of the State of Delaware, with an authorized capital stock consisting of $1,000,000, divided into 10,000 shares of the par value of $100. each, for the purpose of engaging in aerial transportation; and

WHEREAS, said Pan American-Grace Airways, Inc. contemplates the submission of a bid or proposal to the United States Government for the transportation of mail by air over a certain route from Cristobal, Canal Zone, to Santiago, Chile, and return; and

WHEREAS, this corporation desires to subscribe for 50% of the authorized capital stock of said Pan American-Grace Airways, Inc.; and

WHEREAS, W. R. Grace & Co. have agreed to subscribe for the remaining 50% of the capital stock of said corporation,

RESOLVED, that the proper officer or officers of this corporation be and they hereby are authorized, empowered and directed to subscribe for a total of 5,000 shares of the capital stock of said Pan American-Grace Airways, Inc. at the aggregate price of $500,000, payable in cash, and to make payment for such shares of stock out of funds of this corporation when and as required.

On motion, duly made and seconded, the following resolution was adopted:

RESOLVED, that the proper officer or officers of this corporation be and they hereby are authorized, empowered and directed forthwith to sell, assign, transfer and deliver to Pan American-Grace Airways, Inc. the 250 shares of the capital stock of Peruvian Airways Corporation, owned by this corporation, at the aggregate price of $25,000.00 cash, to be paid on or before the 15th day of March, 1929, and also to sell, assign, transfer and deliver to said Pan American-Grace Airways, Inc. the 250 shares of the capital stock of the Chilean Airways Corporation, owned by this corporation, at the aggregate price of $25,000.00 cash, to be paid on or before the 15th day of March, 1929, and to endorse and deliver, in the name and on behalf of this corporation, to said Pan American-Grace Airways, Inc. the certificates representing the aforementioned shares of capital stock."

[fol. 45]

BOARD OF DIRECTORS

MARCH 26, 1929.

"Mr. J. T. Trippe, the Vice-President of the Corporation, thereupon reported briefly on the present status of the proceedings before the United States Post Office Department with reference to the protest heretofore filed against the recent award to Pan American-Grace Airways, Inc. of the air mail contract for the Route along the west coast of South America."

BOARD OF DIRECTORS

MARCH 31, 1931.

"Mr. Trippe reminded the Board that, for some time prior to the negotiation of the above mentioned agreements, the operating companies of the Pan American Airways System had enjoyed the cooperation of Scadta, and that this cooperation had been of the utmost value in securing operating rights for Pan American Airways, Inc. on the north coast and for Pan American-Grace Airways, Inc. on the west coast of Colombia; that Scadta was the oldest successful commercial air transportation company in the world, having been established in 1921; that throughout its operation it had made a remarkable record as to earnings; that it enjoyed to a marked degree the confidence and the cooperation of the Colombian Government and people; and that it operated its own air mail service in Colombia and between Colombia and certain adjacent countries, held long term air mail contracts with the Colombian Government under which it enjoyed the right to sell its own stamps, as well as mail contracts with the governments of Panama, Ecuador and Venezuela, and had recently been recognized as the

Translation of Supreme Resolution, dated 26th of November 1928, transferring Huff Daland Dusters, Inc. concession to Peruvian Airways, Inc.

Ministry of Government
and Police.

Lima, 28th of November, 1928.

Mr. Harold R. Harris,
Representative of the Huff Daland Dusters, Inc.

On the 26th of the present month the following Supreme Resolution was issued:

"In view of the petition presented by the Huff Daland Dusters, Inc. by which it requests that permission be granted to transfer to Peruvian Airways Corporation, Inc. the authorization given it by Supreme Resolution of the 28th of last May, to establish aerial service in the country:— And in accordance with the report made by the Administration of the services of Mails and Telegraphs, by the General Aeronautical Inspection and the Military Cabinet:— It is Resolved:— To grant the permission requested by the Huff Daland Dusters, Inc. to transfer to Peruvian Airways Corporation the authority given by the Resolution of the 28th of May, last, to establish an air service for the transportation of mails, cargo and passengers in the country.—Register, communicate and file.—Rubrica of the President of the Republic.—SALAZAR".

GOVERNMENT'S EXHIBIT 25

MINUTES OF FIRST MEETING OF INCORPORATORS

—of—

SOUTH AMERICAN AIRWAYS CORPORATION

....

The first meeting of incorporators of

SOUTH AMERICAN AIRWAYS CORPORATION

was held on the 25th day of January, 1929, at 9:30 A.M., at the office of the UNITED STATES CORPORATION COMPANY, No. 19-21 Dover Green, in the City of Dover, Delaware, pursuant to a written waiver of notice signed by all the incorporators, fixing said time and place.

The following incorporators were present in person:

Name	*No. of Shares*
E. E. Craig	4
A. L. Raughley	3
M. S. Cook	3

being all the incorporators of the company.

On motion, E. E. Craig was elected Chairman, and A. L. Raughley was appointed Secretary of the meeting.

[fol. 48] The Chairman reported that the Certificate of Incorporation of the company had been filed in the office of the Secretary of the State of Delaware, on the 25th day of January, 1929, and a certified copy thereof duly recorded in the office of the Recorder of Deeds of the County of Kent, on the 25th day of January, 1929, and presented a copy of said Certificate of Incorporation. A copy thereof was ordered to be inserted in the minute book.

The Secretary presented a code of By-Laws for the regulation of the affairs of the company, which was read, article by article, and unanimously adopted.

Messrs. RICHARD F. HOYT
J. T. TRIPPE
R. H. PATCHIN
W. F. COGSWELL

were nominated for directors of the company, to hold office for the ensuing year.

No other nominations having been made, a ballot was duly taken, and all the incorporators having voted, and their ballots duly canvassed, the Chairman declared that the above-named persons had been elected directors of the company by the unanimous consent of all the incorporators.

[fol. 49] Upon motion duly made and seconded, it was

RESOLVED, that the directors be and they hereby are authorized to issue the capital stock of this company to the aggregate amount of ONE MILLION DOLLARS ($1,000,000) for money, labor done, personal property, real estate or leases thereof, or any of such considerations, as they shall from time to time deem advisable.

The Secretary presented the following transfers of subscriptions:

From	*To*	*No. of Shares*
E. E. Craig	W. R. Grace & Co.	4
A. L. Raughley	W. R. Grace & Co.	3
M. S. Cook	W. R. Grace & Co.	3

and upon motion duly made and seconded, the same were approved.

The meeting thereupon adjourned.

/s/ A. L. RAUGHLEY
Secretary of the Meeting.

CERTIFICATE OF INCORPORATION

—of—

PAN AMERICAN-GRACE AIRWAYS, INC.

FIRST: The name of the corporation is

PAN AMERICAN-GRACE AIRWAYS, INC.

SECOND: The principal office of the corporation in the State of Delaware is located at No. 19-21 Dover Green, in the City of Dover, Kent County. The name and address of its resident agent is the United States Corporation Company, No. 19-21 Dover Green, Dover, Delaware.

THIRD: The nature of the business, or objects or purposes proposed to be transacted, promoted, or carried on, are:

(a) To carry, convey, transmit, or transport, as, when and where lawful, goods, freight, express, articles of merchandise of every nature and description, securities, passengers, mails and intelligence by means of air craft.

(b) To design, manufacture, assemble, build, repair, maintain, operate, own, lease, let, purchase, sell and deal in air craft of every kind and description, by whatever power actuated and by whatever agency or method sustained or stabilized including (without limitation) balloons, dirigibles, aeroplanes, hydroplanes, hydro-aeroplanes, and all kinds and types of vehicles, mechanisms and devices now known or which may hereafter be discovered or invented for navigating the air, for purposes of pleasure, commerce, warfare or otherwise.

(c) To build, acquire, maintain, own, operate, let, lease, sell and otherwise dispose of air navigation facilities of every nature and description, including (without limitation) terminal landing fields, emergency landing fields, aviation fields, hangars, land lighthouses, storage space, systems of radio, communications, air craft repair stations, mooring masts, landing buoys, air ports, either land or water, plants, works, [fol. 54] stations, depots, and all equipment incidental to the proper maintenance thereof, and all other conveniences and appurtenances appropriate to any of its business.

(d) To design, manufacture, purchase, sell and trade in, and to install upon air craft, weapons and armor or other protective coverings, apparatus for measuring height and distance, determining location and direction, and for signalling or communicating in any way, and all apparatus, equipment and devices designed for use in connection with the navigation of the air.

(e) To conduct experiments on its own account and for others, to apply for, obtain, purchase, or otherwise acquire, patents, licenses, trade marks, trade names, processes, improvements, inventions, formulae, and the like, and to sell, mortgage, pledge, let or otherwise dispose of, or deal in, and to use, exercise and develop, grant licenses and other rights and privileges in respect to, and to experiment upon, test or develop any process, improvement, invention, patent, or patent right, or the like.

(f) To purchase, lease, hire, or otherwise acquire, hold, own, develop, operate, improve, sell, assign, transfer, exchange, mortgage, pledge or otherwise dispose of, or turn to account and convey, and to aid and subscribe toward the acquisition, development or improvement of, real and personal property and rights and privileges therein of every nature whatsoever, whether tangible or intangible, in the State of Delaware, and in all other states, territories, districts, colonies, and dependencies of the United States of America and in all foreign countries, including the good will of any,

corporation, copartnerships and/or individuals, suitable or convenient for any business of the corporation; and to acquire, take, hold, own, construct, erect, improve, manage, and operate, and to aid and subscribe toward the acquisition, construction or improvement of, buildings, mills, storehouses, warehouses, factories, machinery, apparatus, equipment, locomotives, cars, and other rolling stock, roads, bridges, docks, piers, wharves, ships, vessels, boats, dry and floating docks, marine railways, trucks, wagons, cars, and other vehicles, engines, motors, conveyances, rolling stock and other works, property or appliances which may appertain to, or be useful in, the conduct of any business of the corporation but only to the extent authorized by the laws of the State of Delaware.

(g) To acquire by purchase, subscription, or other- [fol. 55] wise, and to hold, sell, assign, transfer, exchange, lease, mortgage, pledge, or otherwise dispose of, any shares of the capital stock of, or voting trust certificates for any shares of the capital stock of, or any bonds or other securities or evidences of indebtedness issued or created by, this corporation or any other corporation or association organized under the laws of the State of Delaware or of any other state, territory, district, colony or dependency of the United States of America, or under the laws of any foreign country; to pay therefor in cash or property or to issue in exchange therefor shares of the capital stock, bonds or other obligations of this corporation; and, while the owner or holder of any such shares of capital stock, voting trust certificates, bonds or other obligations, to possess and exercise in respect thereof any and all rights, powers and privileges of individual holders, including the right to vote on any shares of stock so held or owned (provided, however, that this corporation shall not use its funds or property for the purchase of shares of its own capital stock when such use would cause any impairment of its capital, and provided further that shares of its own capital stock belonging to this corporation shall not be voted upon directly or indirectly;) and upon a distribution of the

assets or a division of the profits of this corporation, to distribute any such shares of capital stock, voting trust certificates, bonds, or other obligations, or the proceeds thereof, among the stockholders of this corporation.

(h) To organize subsidiary corporations and to convey and assign all or any part of the assets to any such subsidiary corporation or corporations in exchange for shares of the capital stock or other securities of such subsidiary corporation or corporations.

(i) To acquire, from time to time, in exchange for shares of the capital stock of this corporation as herein fixed or as may hereafter be increased, such property or shares of the capital stock of any other corporation or corporations, as the Board of Directors shall deem of advantage to this corporation, at such valuation of the property or shares so acquired as in the judgment of said Board of Directors shall be fair and just.

(j) To purchase, lease or otherwise acquire, in whole or in part, the business, good will, rights, franchises, and property of every kind, and to undertake the whole or any part of the assets or liabilities of any person, firm or association or corporation, engaged in or authorized to conduct any business authorized to be conducted by this corporation, or owning property neces- [fol. 56] sary or suitable for its purposes, and to pay therefor in cash or in stock or bonds, or any other evidences of indebtedness of this corporation or otherwise; to hold or in any manner dispose of the whole or any part of the business, good will, rights, franchises, or property so acquired and to exercise all the powers necessary or incidental to the conduct of such business.

(k) To borrow or raise moneys for any of the purposes of this corporation, issue bonds, debentures, notes or other obligations of any nature, or in any manner, for moneys so borrowed, and to secure the payment thereof and of the interest thereon, by mortgage upon, or pledge or conveyance or assignment in trust of, the whole or any part of the property of this

corporation, real or personal, including contract rights, whether at the time owned or thereafter acquired, and to sell or pledge such bonds or notes or other obligations of this corporation for its corporate purposes.

(l) To aid, in any manner, any corporation or association any of whose shares of stock, bonds, or other evidences of indebtedness are held by or for this corporation, or in which, or in the welfare of which, this corporation shall have any interest, and to do any acts or things designed to protect, preserve, improve or enhance the value of, any such shares of stock, bonds or evidences of indebtedness, or the property of this corporation.

(m) To guarantee the payment of dividends upon any shares of the capital stock of, or the performance of any contract by, any other corporation or association in which, or in the welfare of which, this corporation has an interest, and to endorse or otherwise guarantee the payment of the principal and interest, or either, of any bonds, debentures, notes, securities, or other evidences of indebtedness created or issued by any such other corporation or association.

(n) To carry out all or any part of the foregoing objects as principal, factor, agent, contractor, or otherwise, either alone or in conjunction with any person, firm, association or other corporation, and in any part of the world; and in carrying on its business, and for the purpose of attaining or furthering any of its objects, to make and perform such contracts of any kind and description, to do such acts and things, and to exercise any and all such powers, as a natural person could lawfully make, perform, do or exercise.

(o) To remunerate, in cash, shares of stock, bonds, or other securities or evidences of indebtedness or [fol. 57] otherwise, any person, firm, syndicate, association, or corporation, for services rendered, directly or indirectly, in selling, placing or guaranteeing the selling or placing of any shares of the capital stock, bonds, debentures, or other securities or evidences of indebted-

ness, issued, owned or controlled by this corporation or by any other corporation in which this corporation is interested, or in connection with the formation, promotion, or operation of this corporation, or of any other corporation in which this corporation is interested, or in connection with the conduct of the business or affairs or the protection of the property and interests of this corporation.

(p) To conduct its business in all its branches at one or more offices in the State of Delaware and in any or all other states, territories, districts, colonies, and dependencies of the United States of America and in any or all foreign countries.

It is the intention that the objects and purposes specified in the foregoing clauses of this Article THIRD, shall, except where otherwise expressed in this Article, be in no wise limited or restricted by reference to, or inference from, the terms of any other clause of this or any other article in this certificate, but that the objects and purposes specified in each of the clauses of this Article shall be regarded as independent objects and purposes.

It is also the intention that said clauses be construed as powers as well as objects and purposes; and, generally, that the corporation shall be authorized to exercise and enjoy all other powers, rights, and privileges granted by the General Corporation Law, being Chapter 65 of the Revised Statutes, of the State of Delaware, to corporations of this character, as well as all the powers conferred or which may be conferred upon such corporations by the then [fol. 58] existing laws of the State of Delaware, so far as not in conflict therewith, or by all laws and acts heretofore or hereafter amendatory of, or supplementary to, said General Corporation Law, or of any or all of said laws or supplements thereto, but the enumeration of certain powers as herein specified is not intended as exclusive of, or as a waiver of, any of the powers, rights, or privileges granted or conferred by said General Corporation Law or the laws of said State now or hereafter in force; provided, however, that this corporation shall not have the power to carry on the business of constructing, maintaining or operating rail-

roads or railways within the State of Delaware; nor shall it possess the right of taking and condemning lands in the State of Delaware. This corporation shall not carry on any business, or exercise any powers, in any state, territory, or country which a similar corporation organized under the laws of such state, territory, or country could not carry on or exercise, except to the extent permitted or authorized by the laws of such state, territory, or country.

FOURTH: The total authorized capital stock of this corporation is One Million Dollars ($1,000,000), divided into Ten Thousand (10,000) shares of the par value of One Hundred Dollars ($100) each.

[fol. 59]

Amended September 8, 1939

FOURTH. The total number of shares of stock which the corporation shall have authority to issue is one hundred thousand (100,000); all of such shares shall be without par value.

Such stock may be issued by the corporation from time to time for such consideration as may be fixed from time to time by the board of directors thereof.

Amended December 27, 1935

FOURTH. The total number of shares of stock which the corporation shall have authority to issue is ten thousand (10,000); all of such shares shall be without par value.

Such stock may be issued by the corporation from time to time for such consideration as may be fixed from time to time by the board of directors thereof.

FIFTH: The amount of capital stock with which this corporation will commence business is ONE THOUSAND DOLLARS ($1,000).

SIXTH: The names and places of residence of the [fol. 60] original subscribers to the capital stock and the number of shares subscribed for by each, are as follows:

Name	Residence	No. of Shares
E. E. CRAIG	DOVER, DELAWARE	4
A. L. RAUGHLEY	DOVER, DELAWARE	3
M. S. COOK	DOVER, DELAWARE	3

SEVENTH: The existence of this corporation is to be perpetual.

EIGHTH: The private property of the stockholders of this corporation shall not be subject to payment of corporate debts to any extent whatever. No transaction entered into by the corporation shall be affected by the fact that the Directors of the corporation, or any of them, were personally interested in it; and every Director of the corporation is hereby relieved from any disability that might otherwise prevent his contracting with the corporation for the benefit of himself, or of any firm, association, or corporation in which he may be in any wise interested.

NINTH. At all elections of Directors of the corporation, each stockholder shall be entitled to as many votes as shall equal the number of his shares of stock multiplied by the number of Directors to be elected, and he may cast all of such votes for a single Director or may distribute them among the number to be voted for, or any two or more of them as he may see fit, which right, when exercised, shall be termed cumulative voting.

TENTH: In furtherance, and not in limitation of the powers conferred by statute, and without prejudice to the right hereby conferred on the corporation to vest additional [fol. 61] powers in the Board of Directors in its By-Laws, the Board of Directors of the corporation is expressly authorized, except as otherwise expressly provided by law:

1. To exercise all corporate powers, including the sale, mortgage, hypothecation and pledge of the whole or any part of the corporate property, except as otherwise expressly provided by law.

2. To make, alter, amend, and repeal By-Laws of the corporation, and to increase and reduce (but not to

less than three (3)) the number of the members of the Board of Directors, and from time to time to make and change rules and regulations, not inconsistent with the By-Laws for the management of the corporation's business and affairs.

3. To purchase or otherwise acquire for the corporation, any property, rights, or privileges which the corporation is authorized to acquire, at such price or consideration, and generally on such terms and conditions as they may see fit, and at their discretion, to pay for any property or rights acquired by the corporation, either wholly or partly in money, stock, bonds, debentures or other securities of the corporation.

4. To create, make and issue mortgages, bonds, notes, debentures, deeds of trust, trust agreements and negotiable or transferable instruments and securities of all kinds secured by mortgages or otherwise, and to do every other act and thing necessary to effectuate the same.

5. To sell or dispose of any real or personal estate, property, rights, franchises or privileges belonging to the corporation, whenever in their opinion its interests would be thereby promoted, on such terms as they may see fit, and to sell, assign, transfer or otherwise dispose of the whole property of the corporation; to appoint any person or corporation to accept and hold in trust for the corporation, any property belonging to the corporation, or in which it is interested, or for any other purposes, and to execute and do all such acts and things as may be requisite in relation to any such trust.

6. To delegate, during the intervals between meetings of the Board, all or any of the powers of the Board to an Executive Committee, of not less than two of its members, or to any officer or agent, and to delegate the duties of any officer or agent to any other officer or agent; to appoint subordinate officers, agents, employees and delegates to have such powers (including the power to choose, remove or suspend subordi-
[fol. 62] nate officers, agents, employees or servants,

and to sub-delegate) upon such terms as they may see fit; and at their discretion to remove the same with or without cause, and to so remove any executive officer.

7. To provide for and to pay to Directors rendering unusual or exceptional services to the corporation, such special compensation appropriate to the value of such services as they may in their discretion see fit.

8. To declare dividends out of the profits of the corporation at such times and in such amounts as they may from time to time determine and before payment of any dividend or dividends, to set aside out of the net profits of the corporation, such amount or amounts as they may in their absolute discretion think proper as reserve to meet contingencies, or for equalizing dividends, or for repairing or maintaining any property of the corporation, or for any such other purposes as the Directors may deem beneficial to the interests of the corporation, to apply the surplus earnings or accumulated profits of the corporation, otherwise by law to be reserved, to the purchase or acquisition of property to such an extent and in such manner and upon such terms as the Board may determine.

9. To determine, subject to the laws of the State of Delaware, and if allowed, when and under what conditions and regulations the records and books of the corporation, or any of them, shall be open to the inspection of the stockholders, and the stockholders' rights in this respect are and shall be restricted and limited accordingly.

ELEVENTH: Both stockholders and directors shall have power, if the By-Laws so provide, to hold their meetings either within or without the State of Delaware, and to have one or more offices within or without the State of Delaware, in addition to the principal office in Delaware, and to keep the books and records of the corporation (subject to the provisions of the statutes) outside the State of Delaware, at such places as may be from time to time designated by the directors or officers.

TWELFTH: The corporation reserves the right to amend, alter, change, or repeal any provisions contained in

[fol. 63]

(Tenth page of Amended Certificate of Incorporation as filed and recorded February 21, 1929)

this Certificate of Incorporation, in the manner now or hereafter prescribed by statute, and all rights conferred on officers, directors and stockholders herein are granted, subject to this reservation.

WE, THE UNDERSIGNED, being the incorporators named in the original Certificate of Incorporation of SOUTH AMERICAN AIRWAYS CORPORATION, and the original subscribers to its capital stock, do hereby make and file this Certificate pursuant to the provisions of Section 25 of the General Corporation Law of the State of Delaware, being Chapter 65 of the Revised Code of Delaware, and the acts amendatory thereof and supplementary thereto, for the purpose of changing the name of the corporation to PAN AMERICAN-GRACE AIRWAYS, INC., and we do hereby declare and certify that the facts herein stated are true, and do respectively agree to take the number of shares of stock hereinbefore set forth and do hereby certify that no payment of any of its capital has been made, and accordingly have hereunto set our hands and seals this 21st day of February A. D. 1929.

[fol. 67]

GOVERNMENT'S EXHIBIT 28

BY-LAWS

ARTICLE I.

Name and Seal

Section 1. *Name.* The name of this corporation is

PAN AMERICAN-GRACE AIRWAYS, INC.

Section 2. *Seal.* The corporate seal shall be in the form of a circle and shall contain the words "PAN AMERICAN-GRACE AIRWAYS, INC., CORPORATE SEAL, DELAWARE 1929."

ARTICLE II.

Location

Section 1. *Delaware.* The principal office of the corporation in the State of Delaware, shall be at No. 1921 Dover

Green, in the City of Dover, Kent County, and the name of the resident agent in charge thereof shall be United States Corporation Company.

Section 2. *Elsewhere.* The corporation may also have an office or offices at such other place or places as the Board of Directors may from time to time appoint or the business of the corporation may require.

ARTICLE III.

Stockholders' Meetings.

Section 1. *Place.* All Stockholders' Meetings shall be held within or without the State of Delaware as determined by the Board of Directors.

Section 2. *Annual.* The Annual Meeting of the stockholders for the election of Directors, and for the transaction of such other business as may properly come before the meeting, shall be held commencing with the year 1930 on the second Tuesday of April of each year, at 1:30 o'clock, P.M. If such Tuesday be a legal holiday, the meeting shall be held on the next succeeding business day.

Section 3. *Special.* Unless otherwise provided by statute, special meetings of the stockholders may be called by the president, or by resolution of the Board of Directors, at any time, and must be called by the President or Secretary at the written request of a majority of the Directors, 2114[

PAA 3915
1/4/55
W

[fol. 68] or by the owners of record of twenty per cent (20%) of the outstanding capital stock of the corporation. Such request must state the purpose of the meeting. The business of special meetings shall be confined to that stated in the notice and incidental matters germane thereto.

Section 4. *Notice.* Notice of all meetings of stockholders shall be mailed to each stockholder of record, at his address appearing on the books of the corporation, at least ten (10) days before the date of the meeting. Notice may

be given personally, by telephone or by telegraph, in which case, one (1) days' notice shall be sufficient. Meetings may be held without notice if every stockholder shall be present in person or by proxy or those absent shall waive notice in writing.

Section 5. *Quorum.* At all meetings of the stockholders, except where otherwise provided by law, or by these By Laws, the holders of a majority of the capital stock issued and outstanding, present in person or by proxy, shall be requisite to, and shall constitute a quorum. If a quorum shall not be present, a majority in interest of the stockholders present, may adjourn from time to time, and from place to place, without other notice than by announcement at the meeting. At any such adjourned meeting at which a quorum shall be present, any business may transacted which might have been transacted at the meeting as originally called.

Section 6. *Voting.* At all meetings of the stockholders, each stockholder shall be entitled to cast one vote in person or by proxy for each share of stock standing registered in his name on the books of the corporation at the time of the closing of the transfer books for the meeting. Except where otherwise provided by law, or by these By-Laws, a majority vote of all stockholders present in person, or by proxy, shall be determinative of all questions, except in election of Directors where plurality vote shall govern. Interest of a stockholder in any question shall not disqualify him from voting thereon, or in any way invalidate such vote. Proxies must have been granted not more than three years prior to the stockholders' meeting, at which they are used. No stock shall be voted on at any election which has been transferred on the books of the Corporation within twenty (20) days next preceding such election.

Section 7. *Stock List.* A full list of the stockholders entitled to vote at the ensuing election, arranged in alphabetical order, with the residence of each, and the number of shares held by each, shall be prepared by the Secretary and filed in the office where the election is to be held, at least ten (10) days before every election, and shall at all

times during the usual hours of business, be open to the examination of any stockholder. Such list shall be produced and kept at the time and place of election during the whole time thereof.

PAA 3916

2114I

[fol. 69]

ARTICLE IV.

Directors.

Section 1. *Number and Powers.* The Board of Directors shall consist of eight (8) members. The Board may increase and reduce the number of its members from time to time, provided that the number at no time shall be less than four (4). The Board shall elect officers of the corporation, and shall have general control and management of all the property, business and affairs of the corporation, with authority (without consent of the stockholders of the corporation, except where specifically required by law) to exercise and carry into effect all the purposes for which the corporation is organized and all the powers vested in this corporation by law.

Section 2. *Election, Tenure, Removal and Vacancies.* Directors shall be elected annually at the Annual stockholders' Meeting, and shall, unless sooner removed or disqualified, hold office until others are chosen and qualified in their stead. Directors may be removed at any time with or without cause, by a vote of the stockholders holding at at least two-thirds of the issued and outstanding stock, at any stockholders' meeting. Vacancies occurring the Board of Directors by reason of death, resignation, retirement, disqualification, removal from office or otherwise, and additional Directorships created by an increase in the Board, may be filled either by the stockholders or by the unanimous vote of the Directors remaining or then in office.

Section 3. *Meetings.* The Board of Directors may hold their meetings within or without the State of Delaware, as they see fit. The Annual Meeting for the election of officers and for the transaction of such business as may be deemed

desirable by the Directors present, shall be held immediately following the Annual Stockholders' Meeting. Special meetings may be called by the President at any time, and shall be called by the President or Secretary on the written request of two Directors. Such request shall state the purpose of the meeting. Stated meetings of the Board may be held at such time and place, without notice or, on such notice as the Board may from time to time prescribe.

Section 4. *Notice.* Notice of all meetings of the Directors, except stated meetings, shall be mailed to each Director at his address appearing on the books of the corporation, at least two (2) days before the date of the meeting. Such notice may be given personally, or by telephone, or telegraph, in which case, one (1) days' notice shall be sufficient. No notice shall be required of meetings at which every Director shall be personally present; or of which notice has been waived by those absent either before or after the meeting.

Section 5. *Quorum and Voting.* At all meetings of the Board of Directors, a majority of the Directors shall be

PAA 3917

21141

[fol. 70] necessary and sufficient to constitute a quorum. Each Director sholl be entitled to one vote. Majority vote of those present, shall govern, except where otherwise provided by laws, or by the Certificate of Incorporation, or by these By-Laws.

ARTICLE V.

Officers

Section 1. *Titles, Qualifications and Terms of Office.* The Executive Officers of the corporation shall be President, one or more Vice Presidents and one or more Assistant Vice Presidents as the Board of Directors may from to time to time determine; Secretary, Treasurer, Comptroller, and such number of Assistant Treasurers, Assistant Secretaries and Assistant Comptrollers as the Board may from time to time determine. The President must be a Director of the corporation. The same person may hold any two

offices, except the offices of the President and Vice President, Secretary and Assistant Secretary, or Treasurer and Assistant Treasurer. Each of the officers of the corporation shall hold office until the annual meeting of the Board of Directors next succeeding his election or until his sooner resignation or removal by the Board of Directors as provided in Section 10 of this Article.

Section 2. *Other Officers. Delegation.* The Board may appoint such other officers and agents as it may deem necessary, who shall have such title and authority, and perform such duties as from time to time may be prescribed by the Board. The Board may also, in the absence of any officer, or for any reason that it may deem sufficient, delegate the powers and duties of any officer to any other officer, or to any director.

Section 3. *President.* In addition to the duties herein elsewhere specified, the President shall be the chief executive officer and head of the corporation. He shall, subject to the control and supervision of the Board of Directors, have the general supervision, management and control of the business, property, and affairs of the corporation. He shall preside at all meetings of the Stockholders and Directors, at which he may be present.

Section 4. *Vice-Presidents.* In addition to the duties herein elsewhere specified, the Vice-President or Vice-presidents shall be vested with all the powers and shall perform the duties of the President in his absence or disability, and such other duties as may be assigned to him or them by the Board.

Section 4a. *Assistant Vice Presidents.* The Assistant Vice Presidents, if and when elected, shall have and perform the same duties as the Vice President, subject, however, to the discretion of the latter, and subject always to the orders of the Board.

PAA 3918

21141

[fol. 71] Section 5. *Secretary.* In addition to the duties herein elsewhere specified, the Secretary shall keep the minutes of all meetings of the Stockholders and of the

Board of Directors. He shall be the custodian of the Corporate Seal and of the Stock-Books and records of the corporation. He shall prepare and file the stock list required by Section 7 of Article III of these By-Laws. He shall, when authorized, affix the corporate seal to instruments requiring the same and attest the same by his signature. He shall be sworn to the faithful discharge of his duties.

Section 6. *Assistant-Secretary.* The Assistant Secretary, if, and when elected, shall have and perform the same duties as the Secretary, subject, however, to the discretion of the latter, and subject always to the orders of the Board.

Section 7. *Treasurer.* In addition to the duties herein elsewhere specified, the Treasurer shall have the custody of all the corporate funds and securities, and shall keep full and accurate account of receipts and disbursements in books belonging to the corporation. He shall deposit all money in the name and to the credit of the corporation in such depositories as may be designated by the Board of Directors. He shall pay out the funds of the corporation as may be ordered by the Board of Directors and by the proper officers of the corporation, taking proper vouchers for such disbursements. He shall render a report and account of all of his transactions, and of the financial condition of the corporation whenever so required by the President or Board of Directors. He shall, if required, give bond in such form and amount as the Board may require.

Section 8. *Assistant Treasurer.* The Assistant Treasurer, if and when elected, shall have and perform the duties as the Treasurer, subject, however, to the direction of the latter, and subject always to the orders of the Board.

Section 8a. *Comptroller.* The Comptroller shall have general control, charge and supervision of the accounts of the corporation and all branches thereof. He shall see that the corporation's subsidiaries keep proper accounts, and that all accounts (including those of subsidiaries) are properly audited from time to time.

Section 8b. *Assistant Comptroller.* The Assistant Comptroller, if and when elected, shall have and perform the same duties as the Comptroller, subject, however, to the direc-

tion of the latter, and subject always to the orders of the Board.

Section 9. *Vacancies.* If any office becomes vacant by reason of death, resignation, retirement, disqualification, removal from office, or otherwise, the Directors may choose a successor or successors, who shall hold office for the unexpired term in respect of which such vacancy occurs.

PAA 3919

2114I

[fol. 72] Section 10. *Removals.* Any officer or agent of the corporation may be removed at pleasure by a vote of not less than a majority of the entire Board of Directors at any meeting. The President, Vice President, or other officer may, at any time, remove from office, any subordinate officer or agent whom he has appointed.

Section 11. The President or any Vice President and the Secretary or any Assistant Secretary shall be authorized and empowered in the name and as the act and deed of the corporation to name and appoint general and special agents, representatives and attorneys to represent the corporation in the United States or in any foreign country or countries, and to prescribe, limit and define the powers and duties of such agents, representatives and attorneys, and to make substitution, revocation or cancellation in whole or in part of any power or authority conferred on any such agent, representative or attorney. All powers of Attorney or other instruments under which such agents, representatives or attorneys shall be so named and appointed, shall be signed and executed by the President or any Vice-President, and by the Secretary or any Assistant Secretary, and the corporate seal shall be affixed thereto. Any substitution, revocation or cancellation shall be signed in like manner, provided always that any agent, representative or attorney when so authorized by the instrument appointing him may substitute or delegate his powers in whole or in part and revoke and cancel such substitutions or delegations. No special authorization by the Board of Directors shall be necessary in connection with the foregoing, but this By-Law shall be deemed to constitute full

and complete authority to the officers above designated to do all the acts and things above referred to, and any and all such further acts and things as they may deem necessary or incidental thereto or in connection therewith.

ARTICLE VI.

Capital Stock

Section 1. *Amount.* The capital stock of the corporation shall be one hundred thousand (100,000) shares without par value.

Section 2. *Certificates.* Stock certificates shall be in such form as may be approved by the Board of Directors. They shall be signed by the President, or any Vice-President, and by either the Treasurer or any Assistant Treasurer, or by the Secretary or any Assistant Secretary, and shall bear the corporate seal.

Section 3. *Transfers.* Stock shall be transferable only on the books of the corporation by the person named in the Certificate, or by his legal representatives or attorney thereto, lawfully authorized in writing, and upon surrender of such certificate, accompanied by all transfer stamps required by law. Unless otherwise expressly provided by the laws of Delaware, the corporation shall be entitled to treat

PAA 3920

2114I

[fol. 73] the registered holder of any share as the absolute owner thereof, for all purposes whether or not it have express or other notice of any equitable or other interest or claim therein.

Section 4. *Closing of Books.* The Board of Directors may close the transfer books in their discretion for a period not exceeding twenty (20) days preceding any annual or special meeting of the stockholders, or the date appointed for the payment of any dividend.

Section 5. *Lost Certificates.* The Board of Directors may direct the issue of new certificates on such terms not in contravention of statute, as they may see fit, to replace any certificates lost or destroyed.

ARTICLE VII.

Signature.

Section 1. *Signatures.* Except as may be otherwise authorized by the Board of Directors from time to time, all deeds, mortgages, contracts and other agreements of the corporation, and all notes, checks, drafts, bills or orders for the payment of money and any and all other written obligations of the corporation, shall be signed by any two of the executive officers of the corporation, provided, however, that any one of such officers may endorse for deposit or collection, and provided also, that the signature of any executive officer attesting the corporate seal to any instrument shall be deemed one of the two required signatures within the meaning of this Section.

ARTICLE VIII.

Amendments.

Section 1. *By Stockholders.* The stockholders by the affirmative vote of a majority of the stock issued and outstanding, may, at any regular or at any special meeting, alter or amend these By-Laws, if notice thereof be contained in the notice of the meeting.

Section 2. *By Directors.* The Board of Directors, by the affirmative vote of a majority of its members, may alter or amend these By-Laws, provided that By-Laws so made or amended may be altered or repealed by the Directors or Stockholders.

[fol. 74]

GOVERNMENT'S EXHIBIT 29

Minutes of the first meeting of the Board of Directors of Pan American-Grace Airways, Inc., held at 25 Broad Street, New York City, on the 21st day of February, 1929 at 11 A.M.

PRESENT:

Messrs. J. T. Trippe
Richard F. Hoyt
R. H. Patchin
William F. Cogswell

being all of the Board.

Mr. Trippe called the meeting to order and on motion duly made and seconded, was appointed Chairman of the meeting. On motion duly made and seconded, Mr. Cogswell was appointed Secretary of the meeting.

The minutes of the first meeting of the Incorporators of this Corporation, held January 25, 1929, and the minutes of the second meeting of the Incorporators of this Corporation, held February 21st, 1929, were read and approved.

On motion duly made and seconded, the following resolutions were duly adopted:

RESOLVED that the By-Laws which were adopted at the first meeting of the Incorporators be, and the same hereby are, approved and adopted as the By-Laws of this Corporation.

RESOLVED that the seal, an impression of which is affixed in the margin hereof, be, and the same hereby is, adopted as the seal of this Corporation.

RESOLVED that the form of stock certificate presented at this meeting, be, and it hereby is, approved and adopted as the stock certificate for the capital stock of this Corporation, and that a specimen thereof be inserted in the Minute Book of this Corporation following the minutes of this meeting.

RESOLVED that the Treasurer or other officers of [fol. 75] this Corporation be, and they hereby are, authorized and directed to pay from the corporate funds the expenses incident to the organization of this Corporation.

Nominations for officers of the corporation for the term ending with the next annual stockholders' meeting were called for, and nominations having been made and ballot having been duly had, the following persons were unanimously elected to the offices set before their respective names:

Vice-President	J. T. Trippe
Vice-President	R. H. Patchin
Treasurer	P. H. Caine
Secretary	William F. Cogswell

The Chairman stated that W. R. GRACE & CO. and the AVIATION CORPORATION OF THE AMERICAS had each offered to purchase at par for cash one-half of the authorized capital stock of PAN AMERICAN-GRACE AIRWAYS, INC., if, as and when issued.

On motion duly made and seconded, it was unanimously

RESOLVED that the subscriptions of W. R. Grace & Co. and Aviation Corporation of the Americas to purchase one-half each of the capital stock of this Corporation at par of One Hundred Dollars ($100) per share be, and they hereby are, accepted, and that the Secretary be, and he hereby is, directed to call all of the said subscriptions for payment at once.

RESOLVED that the officers of this Corporation be, and they hereby are, authorized and directed to issue Five Thousand (5,000) shares of the capital stock of this Corporation to W. R. Grace & Co. and Five Thousand (5,000) shares of the capital stock of this Corporation to the Aviation Corporation of the Americas, and to deliver to the same duly executed certificates for the said shares in exchange [fol. 76] for the payment of subscriptions, as above.

On motion duly made and seconded, it was unanimously

RESOLVED that GRACE NATIONAL BANK OF NEW YORK be and hereby is designated as a depositary of the funds of this Corporation; and further

RESOLVED that any two of the following officers, viz: President, any Vice-President, Secretary, and or Treasurer, be and they hereby are authorized from time to time, for and on behalf of this Corporation, to sign checks, drafts or orders for the payment or withdrawal of funds of this Corporation; and further

RESOLVED that said Bank be and hereby is authorized to pay any and all said checks, drafts or orders drawn on the account of this Corporation with said Bank and signed as above provided, including such as may be drawn to the order or endorsed in favor of the officer signing and/or endorsing the same; and further

RESOLVED that the Secretary of this Corporation be and hereby is authorized and directed to certify to said Bank under the seal of this Corporation, a copy of these resolutions and to certify, from time to time, to said Bank the names, and to deliver to said Bank the specimen signatures of the persons at the time of such certification holding the respective offices hereinabove mentioned; and further

RESOLVED that until said Bank shall receive a certificate under the seal of this Corporation as to the expiration or termination of office of any person so certified to be an officer of this Corporation, said Bank may rely absolutely upon the authority of such person to sign as such officer as herein provided; and further

RESOLVED that these resolutions shall continue in force until formally rescinded and written notice of such rescission filed with said Bank.

[fol. 77] RESOLVED that Messrs. W. F. Cogswell, R. F. Hoyt, R. H. Patchin and J. T. Trippe, Directors of this Corporation, be and each of them is hereby severally authorized, empowered and directed, as agent for this Corporation, or any one of them acting alone, in the name and on behalf of this Corporation, and under its corporate seal or otherwise, to make, sign, execute, acknowledge, to affix the seal of this Corporation to, and to deliver to the official or officials of the Post Office Department of the United States Government authorized to receive the same, a bid or proposal for the transportation of United States mail by air, for a term of ten years, from April 1, 1929, or such subsequent date as may be ordered by the Postmaster General, on the route from Cristobal, Canal Zone, by Buenaventura and Tumaco, Colombia, Esmeraldas and Guayaquil, Ecuador, Talara, Trujillo, Lima, Lomas and Mollendo, Peru, Arica, Iquique, Antofagasta, Caldera and Coquimbo, to Santiago, Chile, and return in accordance with an existing advertisement for bids or proposals for the transportation of United State mail over such route, at such rate as such agents, or any one of them, may determine, and that each of said agents, or any one of them acting alone, be and he hereby is authorized, empowered and directed, to deposit with such bid or proposal such bonds or other security as may be required and to do all such acts and things, and to execute any and all such instruments and documents as he may deem necessary, or advisable in connection with said bid or proposal, and the submission of same, and to affix the seal of the corporation to any such instrument as may be required, and that each of said agents, or any one of them acting alone, or the Secretary of this Corporation, be and he hereby is authorized, empowered and directed, to attest the seal of the Corporation so affixed to any such instrument; and

RESOLVED FURTHER that the proper officer or officers of this Corporation be and they hereby are authorized, empowered and directed to procure for

submission with the aforesaid bid or proposal such surety bond or other security as may be required; and

[fol578] On motion duly made and seconded, it was unanimously:

RESOLVED that THE COMMERCIAL NATIONAL BANK AND TRUST COMPANY OF NEW YORK be and hereby is designated as a depositary of the funds of this Corporation; and further

RESOLVED that any two of the following officers, viz: President, any Vice-President, Secretary, and or Treasurer, be and they hereby are authorized from time to time, for and on behalf of this Corporation, to sign checks, drafts or orders for the payment or withdrawal of funds of this Corporation; and further

RESOLVED that said Bank be and hereby is authorized to pay any and all said checks, drafts or orders drawn on the account of this Corporation with said Bank and signed as above provided, including such as may be drawn to the order or endorsed in favor of the officer signing and or endorsing the same; and further

RESOLVED that the Secretary of this Corporation be and hereby is authorized and directed to certify to said Bank under the seal of this Corporation a copy of these resolutions and to certify, from time to time, to said Bank the names, and to deliver to said Bank the specimen signatures of the persons at the time of such certification holding the respective offices hereinabove mentioned; and further

RESOLVED that until said Bank shall receive a certificate under the seal of this Corporation as to the expiration or termination of office of any person so certified to be an officer of this Corporation, said Bank may rely absolutely upon the authority of such person to sign as such officer as herein provided; and further

RESOLVED that these resolutions shall continue in force until formally rescinded and written notice of such rescission filed with said Bank.

On motion duly made and seconded, the following resolution was adopted:

[fol: 79] RESOLVED FURTHER that in the event a contract for the transportation of mail by air is awarded to this Corporation upon the aforesaid bid or proposal, each of said agents, or any one of them acting alone, be and he hereby is authorized, empowered and directed to execute, sign and deliver, in the name and on behalf of this Corporation, and under its corporate seal, or otherwise, the formal contract prescribed by the Postmaster General or the Post Office Department of the United States Government, and to deposit with the United States Government such surety bond or other security as may be required to secure the performance of such contract.

On motion duly made and seconded, the following resolution was unanimously adopted:

WHEREAS, this Corporation heretofore authorized the submission to the Post Office Department of the United States Government of a bid or proposal for carrying mail on Air Mail Route from Cristobal, Canal Zone, by Buenaventura and Tumaco, Colombia, Esmeraldas and Guayaquil, Ecuador, Talara, Trujillo, Lima, Lomas and Mollendo, Peru, Arica, Iquique, Antofagasta, Caldera and Coquimbo, to Santiago, Chile, and return: and

WHEREAS, this Corporation has authorized the deposit with such bid or proposal of such bond or other security as may be required as security for the performance by this Corporation of all of the conditions and stipulations in said bid or proposal: and

WHEREAS, this Corporation intends to deposit with W. Irving Glover, the Second Assistant Postmaster

General, certain bonds notes in the principal sum of $25,000 as security for the performance by this Corporation of all of the conditions and stipulations in the aforementioned bid or proposal; and

WHEREAS, it is desired to appoint the proper bond approving officer representing the United States Government, and his successors in office, as attorney for this Corporation, for and in the name of this Corpo- [fol. 80] ration, to collect or to sell, assign and transfer such bonds notes in case of any default in the performance of any of the conditions and stipulations of the aforementioned bid.

RESOLVED that W. Irving Glover, Second Assistant Postmaster General, and his successors in office, be and each of them is hereby constituted and appointed attorney for this Corporation for and in the name of this Corporation to collect or to sell, assign, and transfer said bonds notes aggregating $25,000 to be deposited with the said United States Government as security for the faithful performance of any and all of the conditions or stipulations of the aforementioned obligation, and that this Corporation agree, and it does hereby agree, that in case of any default in the performance of any of the conditions and stipulations of said undertaking, its said attorney shall have full power to collect said bonds notes or any part thereof, or to sell, assign and transfer said bonds notes or any part thereof, without notice at public or private sale, free from any equity of redemption and without appraisement or valuation, notice and right of redemption being waived, and to apply the proceeds of such sale or collection, in whole or in part, to the satisfaction of any damages, demands or deficiency arising by reason of such default, as its said attorney may deem best. And this Corporation for itself, its successors and assigns, ratifies and confirms whatever its said attorney shall do by virtue of the aforementioned powers; and

RESOLVED FURTHER that Messrs. W. F. Cogswell, R. F. Hoyt, R. H. Patchin and J. T. Trippe, Directors

of this Corporation, be and each of them hereby is authorized, empowered and directed, as agent, any one of them acting alone, to execute and deliver, in the name and on behalf of this Corporation, and under its corporate seal, one or more powers of attorney and agreements embodying all the powers, terms and provisions set forth in the foregoing resolution, and that Mr. W. F. Cogswell, the Secretary of this Corporation, be and he hereby is authorized, empowered and directed to affix the seal of this Corporation to such one or more powers of attorney and agreements and to attest the same.

[fol. 81] On motion duly made and seconded, it was unanimously

RESOLVED that the officers of this Corporation be and they hereby are authorized to purchase and pay for $35,000 in par value Liberty Bonds.

On Motion duly made and seconded, it was unanimously

RESOLVED that the officers of this Corporation be and they hereby are authorized to purchase and pay over at par for cash all of the outstanding stock of Peruvian Airways Corporation and Chilean Airways Corporation.

There being no further business, the meeting adjourned.

/s/ J. T. Trippe
Chairman of the Meeting

/s/ W. F. Cogswell
Secretary of the Meeting

[fol. 82]

GOVERNMENT'S EXHIBIT 30

February 28, 1929.

Pan Am
Grace

The Honorable,
The Postmaster General,
Washington, D. C.

Sir:

Pan American-Grace Airways, Inc., a Delaware Corporation, was organized to operate an air transport service between Cristobal, C.Z., via the West Coast of South America, to Santiago, Chile, Buenos Aires, Argentina, and Montevideo, Uruguay.

The Company is jointly owned by Aviation Corporation of the Americas, a Delaware Corporation, which also holds all the capital stock of Pan-American Airways, Inc., and W.R. Grace & Co., a Connecticut Corporation, which also holds the capital stock of the Grace Steamship Company, the Panama Mail Steamship Company as well as other Grace transportation, commercial and industrial enterprises throughout the West Coast of South America.

Pan American-Grace Airways, Inc., owns the entire capital stock of the Peruvian Airways Corporation and of the Chilean Airways Corporation. Its authorized capital stock is $1,000,000 divided into 10,000 shares of $100 par value. Statement of our bankers is attached herewith (a). The capital structure of Pan American-Grace Airways, Inc., has been limited to 10,000 shares to reduce qualification

c
PAA—5512
3/2/55
JPC

2197 cc

[fol. 83] and similar foreign taxes—additional funds as required being advanced through loans as is the case with

Pan American Airways, Inc. The resources and reputation of Aviation Corporation of the Americas and W. R. Grace & Co., joint owners of Pan American-Grace Airways, Inc., vouch for the fact that a type of air transport service will be rendered between the Canal Zone and Argentina commensurate with the dignity of the United States in this territory.

The rapidly expanding net of foreign subsidized air transport enterprises in South America (b), nearly two years ago led Pan American Airways, Inc. to carefully survey the investment requirements and estimated operating results of a service between the Canal Zone, Chile, and Argentina.

The attitude of the Administration, as evinced by your desire as Postmaster General to see American Air Transport service established on the West Coast at the earliest opportunity strengthened the decision to proceed. Published statements of the Presidents and other members of his Cabinet and the appointment of the Inter-Departmental Committee to further this general program, confirmed the Government's position.

The results of its operation of the first American international air mail and passenger route between Florida and Cuba, as well as the results of its West Coast survey indicated to Pan American Airways that conditions did not

2197 cc

[fol. 84] justify its installing air transport service in this distant territory even with a possible additional revenue of a United States air mail contract netting $2 per flying mile. (This rate being considerably lower than that received by subsidized foreign companies operating in this territory. (c))

The air transport operations between the United States and Cuba had developed heavy direct expenses not encountered in domestic service. Among other items may be mentioned:

(a) Clearance expenses aggregating 36 cents per flying mile.

(b) Airway construction and maintenance, including airports, intermediate fields, radio aids, night lighting, etc.—facilities usually provided by the Federal or municipal governments in the domestic service—approximating on a three round trips per week schedule, over 50 cents per mile.

(c) Costs of maintaining adequate representatives in foreign countries, expenses of maintaining local national companies and increased costs of transporting and maintaining efficient American flying and ground personnel.

(d) High duties and delays in importing technical material, plus the always present increased cost of conducting a public utility in foreign countries.

P A A—5514

2197 cc

[fol. 85] W. R. Grace & Co. also began investigating the possibility of installing air service along the West Coast of South America, the territory covered by its existing steamship and rail service and other commercial enterprises.

By merging their interests in Pan American-Grace Airways, Inc., Pan American and Grace came to the conclusion that they could operate on the West Coast of South America more economically than could any other air transport company, including the French and German companies.

All the facilities of the Grace organizations' sixty or more branch houses—their personnel, their radio-equipped steamships plying along the coasts, the marine equipment at all ports, the traffic organization and the widespread commercial contacts—are available to the continued development of our enterprise.

Pan American and Grace interests, with the support of the Department of State, together proceeded to attack the many obstacles in the path of extending an American Air Transport Service along the West Coast to Valparaiso and over the Andes to Buenos Aires and Montevideo.

Qualified representatives were assigned to the countries concerned and in addition, to Venezuela and Brazil. French

air transport interests were active in Argentina, Chile, and Peru. German interests were already well entrenched in Colombia, Ecuador, Peru, Bolivia, and Argentina. Efforts

P A A—5515

2197 cc

[fol. 86] were therefore directed—

(a) To prevent the securing of additional monopolistic concessions pending at many points on the part of these foreign interests.

(b) In securing adequate operating rights and legal standing and where possible international mail contract in all these countries.

In carrying out this plan, initiated eighteen months ago, and developed at very considerable expense, we believe we have been entirely successful.

We have arranged for service between Cristobal, C.Z., and Guayaquil, Ecuador, through sub-contract to Pan American Airways, Inc., our affiliated company, which already holds foreign mail contracts with your Department in the Caribbean, in Mexico, and along the North Coast of South America.

Pan American Airways, as the result of many months efforts, is qualified and bonded to operate in the Canal Zone under the executive orders dated September 28, 1928, and February 18, 1929. (e),

In Panama, Pan American Airways holds adequate operating rights. The company already operates into David and Panama City, important points in the Republic. A long term exclusive mail contract is now pending and about to be executed.

For over two years, Pan American Airways has been attempting to secure operating permits from the Colombian Government. In this connection conferences have been had with executives of the SCADTA, the German controlled

P A A—5516

2197 cc

[fol. 87] Colombian Air Transport Company, over a period of years, in New York, in Berlin and Colombia. Through these conferences, an agreement was finally reached with SCADTA whereby Pan American Airways enjoys the exclusive use of SCADTA's technical facilities on the coast of Colombia. These facilities built over a period of years at a cost of over a quarter of a million of dollars are essential to the early operation of the dangerous section of this route owing to the prevalent fog and extreme tide conditions. (f) and (g) It is expected that Pan American-Grace Airways will have acquired proper facilities equal to those now owned by SCADTA at the points of call between the Canal Zone and Ecuador, a distance of 900 miles, would require at least eight months.

Through our 100% owned subsidiary, Peruvian Airways Corporation, we have secured in the face of strenuous German competition in Peru and Ecuador over a period of many months, broad operating permits and an exclusive international air mail contract. (h) Operations were inaugurated in September, 1928. Regular transport and air mail service is now maintained between Guayaquil, Ecuador, and Mollendo, Peru, near the Chilean frontier, a distance of 1,490 miles, and over 62% of the entire distance between Cristobal and Mollendo.

In Chile, through a 100% owned subsidiary Chilean Airways Corporation, we have for many months been negotiating for adequate operating rights and legal standing. The French Air Transport Company, the Aeropostale, already holds broad concessions and mail contracts to the east and to Europe, which they were attempting to extend northward

P A A—5517

2197 cc

[fol. 88] through Peru and Ecuador to the Panama Canal. (i) The American Ambassador has been advised by the Chilean Government that permission, including the temporary use of Chilean military airports, would be formally granted this week to Chilean Airways Corporation, permitting the prompt extension of our through service to Santiago. (j)

With reference to the Postmaster General's option to require extension of this service to Argentina, we are

negotiating with the Argentine Government for an adequate concession. An Assistant Vice-President of Pan American Airways, Inc., J.D. Sommers, is in Buenos Aires where he is assisted by distinguished Argentine counsel. They report negotiations progressing favorably.

SUMMARY

Summarizing, our present position and existing service we would point out that:

1. We are now operating 62% of the entire route between the Canal Zone and Molleno, Peru, carrying passengers and international mail under exclusive contract.

2. We are in a position, now that obstacles at Colombia have been removed and airway facilities assured, to promptly operate the intermediate section between the Canal Zone and Guayaquil as well as to extend to Santiago.

3. Foreign countries operating in this territory are receiving a direct subsidy in excess of $2.10 per mile, exclusive of air mail revenues. (k) Pan American-Grace Airways, Inc., and subsidiary operating com-

2197 cc

[fol. 89] panies, is now operating at a heavy loss. To develop and furnish the type of transport service in the international field maintained by its affiliated company, Pan American Airways, Inc., the additional revenue from the transportation of American mail is essential, without the cooperation of the Grace organization, along the route, and the benefit of the experience and engineering assistance of Pan American Airways, Inc., including the services of Colonel Charles A. Lindbergh, Technical Adviser—all available to Pan American-Grace Airways, Inc.—we maintain that no American Air Transport Company could economically survive in this territory. Furthermore, Pan American-Grace Airways, Inc., is in actual operation and we maintain that no other company, with the exception of the

Aeropostale, the French National Air Transport monopoly, that might consider bidding under your advertisement for air mail service on the West Coast, is in a position to attempt to render air mail service on this route during the year 1929.

The Governor of the Canal Zone, and American Embassies and Consulates in the countries concerned are thoroughly familiar with the position of our company and its operations. We believe they will be glad to

P A A—5519

2197 cc

[fol. 90] substantiate, through the Department of State, the statement set forth herein.

Respectfully submitted,

PAN AMERICAN-GRACE AIRWAYS, INC.

By .....
Agent and Director.

GOVERNMENT'S EXHIBIT 31

A special meeting of the Board of Directors of PAN AMERICAN-GRACE AIRWAYS, INC. was held at the office of the Pan American Airways, Inc., No. 122 East 42nd Street, New York City, N.Y. on the 29th day of March, 1929 at 12:00 o'clock noon.

PRESENT: Messrs. R. F. Hoyt
J. T. Trippe
R. H. Patchin
William F. Cogswell

being all of the Board.

Mr. Trippe called the meeting to order and on motion duly made and seconded was appointed Chairman of the meeting. Mr. Cogswell, Secretary of the Corporation, acted as Secretary of the meeting.

The minutes of the first meeting of the Board of Directors, held on the 21st day of February, 1929, and of a special meeting of the Board of Directors, held on the 2nd day of March, 1929, were read and approved.

On motion duly made and seconded, the following resolution was unanimously adopted:

> RESOLVED that the proper officers of this Corporation are hereby authorized to enter into an agreement in the name and on behalf of this Corporation with Pan American Airways, Inc. for the subletting to Pan American Airways, Inc. of service on so much of Foreign Airmail Route No. 9 as extends from Cristóbal, Canal Zone, to Guayaquil, Ecuador, or at the option of this Corporation to Talara, Peru.
>
> FURTHER RESOLVED that compensation for such service shall be at the rate of One Dollar Eighty Cents ($1.80) per mile each way, plus the rate of Ninety Cents ($.90) per pound per one thousand miles, or pro rata thereof, for greater or less mileage for any excess [fol. 92] mails required to be carried in the same aircraft, payment to be made as and when received by this Corporation from the Post Office Department.
>
> FURTHER RESOLVED that said agreement shall extend for a period of one year with an option by this Corporation to cancel it at any time on sixty days' notice.

On motion duly made and seconded, the following resolution was unanimously adopted:

> RESOLVED that this Corporation purchase at face value, plus interest, from W. R. Grace & Co. and Aviation Corporation of the Americas the promissory notes of Peruvian Airways Corporation, and that this Corporation thereupon cancel said notes and carry the amount thereof as an indebtedness on open account with that corporation.

The Chairman stated to the meeting that Pan American Airways, Inc. had committed itself for the purchase of

three Sikorsky Amphibians with the idea of using them on the northern part of Foreign Airmail Route No. 9 under a subletting agreement with this Corporation. He also stated that this Corporation should be responsible for the purchase of the three Sikorsky Amphibians just mentioned. Thereupon, on motion duly made and seconded, the following resolution was unanimously adopted:

> RESOLVED that this Corporation will be responsible for three Sikorsky Amphibians ordered by Pan American Airways, Inc. in anticipation of performing service over the northern part of said route.
>
> FURTHER RESOLVED that if Pan American Airways, Inc. should use three Sikorsky Amphibians on the northern part of F.A.M. Route No. 9, the respon-[fol. 93] sibility of this Corporation will be fulfilled by purchasing said three Sikorsky Amphibians at their depreciated value.

There being no further business, the meeting adjourned.

GOVERNMENT'S EXHIBIT 32

EXHIBIT "C-1"

PAN AMERICAN-GRACE AIRWAYS, INC.

I lunched today with Richard Hoyt. We agreed that we would authorize the employment of MacGregor as Executive Vice-President of this Company at a salary of $18,000. per year and that we would ask him as promptly as possible to lay out an organization and plan of action.—this to be submitted to the Executive Committee for their modification or approval. I stated that I would like to have an opportunity of discussing it with him in case there was a failure on the part of our men to agree on a line of action.

I indicated that I hoped MacGregor would favor the naming of Jacob as one Vice-President and of Harris as another. We decided that MacGregor should be instructed to use the Grace organization in South America as far as he found it practicable to use it in the same way as he was to use the Pan American Airways in New York as far as he found it practicable to do so.

It was understood that he would say to Mr. Trippe and I would say to Mr. Patchin that it was to be understood that MacGregor was to run this business in the same way as Trippe was running the Pan American Airways, that he was to report to his Executive Committee but that all actual administrative business responsibility should be placed directly on MacGregor's shoulders and that he should be given all the prerogatives necessary to the successful carrying of this responsibility.

D.S.I.

GR-11221

[fol. 95] A special meeting of the Board of Directors of PAN AMERICAN-GRACE AIRWAYS, INC. was held at the office of the Pan American Airways, Inc., No. 122 East 42nd Street, New York City, N.Y., on the 8th day of April, 1929 at 5:00 o'clock P.M.

PRESENT: Messrs. R. F. Hoyt
J. T. Trippe
R. H. Patchin
William F. Cogswell

being all of the Board.

Mr. Trippe called the meeting to order and on motion duly made and seconded was appointed Chairman of the meeting. Mr. Cogswell, Secretary of the corporation, acted as Secretary of the meeting.

The minutes of a special meeting of the Board of Directors, held on the 29th day of March, 1929, were read and approved.

On motion duly made and seconded, the following resolution was unanimously adopted:

> RESOLVED that the By Laws of this Corporation be and they hereby are amended in the following respects: The first sentence of Section 1 of Article V shall hereafter read—"The Executive Officers of the Corporation shall be President, one or more Vice Presidents and one or more Assistant Vice Presidents, as the Board of Directors may from time to time determine, Secretary, Treasurer, and such number of Assistant Treasurers and Assistant Secretaries as the Board may from time to time determine".
>
> There shall be inserted a new section to be numbered "4a" of Article V which shall read—"Assistant Vice Presidents—The Assistant Vice Presidents, if and when elected, shall have and perform the same duties as the [fol. 96] Vice President, subject, however, to the discretion of the latter, and subject always to the orders of the Board."

Mr. J. D. MacGregor was nominated as Vice President and General Manager and was unanimously elected. On motion duly made and seconded, it was

> RESOLVED that Mr. J. D. MacGregor's salary shall be at the rate of Eighteen Thousand Dollars ($18,000) per year, commencing April 9th, 1929.

Mr. Harold R. Harris was nominated as Vice President and was unanimously elected. The Secretary stated to the meeting that Mr. Harris's salary as Vice President of Peruvian Airways Corporation was at the rate of Nine Thousand Six Hundred Dollars ($9600) per year. On motion duly made and seconded, it was unanimously

> RESOLVED that Mr. Harris's salary from this Corporation and its subsidiaries shall be at the rate of $12,000 per year, commencing April 9th, 1929;
>
> FURTHER RESOLVED that so long as Mr. Harris is being paid his salary at the rate of $9600 per year by Peruvian Airways Corporation, his salary from

this Corporation shall be at the rate of $2400 per year, commencing April 9th, 1929.

Mr. Walter P. Jacob was nominated as Assistant Vice President and was unanimously elected. On motion duly made and seconded, the following resolution was adopted:

RESOLVED that Mr. Jacob's salary from this Corporation shall be at the rate of $8500 per year, commencing April 9th, 1929.

[fol. 97] On motion duly made and seconded, it was unanimously

RESOLVED that GRACE NATIONAL BANK OF NEW YORK be and hereby is designated as a depositary of the funds of this Corporation; and further

RESOLVED that any two of the following officers, viz: President, any Vice-President, any Assistant Vice President, Secretary, Treasurer, and/or Comptroller, be and they hereby are authorized from time to time, for and on behalf of this Corporation, to sign checks, drafts or orders for the payment or withdrawal of funds of this Corporation; and further

RESOLVED that said Bank be and hereby is authorized to pay any and all said checks, drafts or orders drawn on the account of this Corporation with said Bank and signed as above provided, including such as may be drawn to the order or endorsed in favor of the officer signing and/or endorsing the same; and further

RESOLVED that the Secretary of this Corporation be and hereby is authorized and directed to certify to said Bank under the seal of this Corporation, a copy of these resolutions and to certify, from time to time, to said Bank the names, and to deliver to said Bank the specimen signatures of the persons at the time of such certification holding the respective offices hereinabove mentioned; and further

RESOLVED that until said bank shall receive a certificate under the seal of this Corporation as to the

expiration or termination of office of any person so certified to be an officer of this Corporation, said Bank may rely absolutely upon the authority of such person to sign as such officer as herein provided; and further

RESOLVED that these resolutions shall continue in force until formally rescinded and written notice of such rescission filed with said Bank.

[fol. 98] On motion duly made and seconded, it was unanimously

RESOLVED that THE COMMERCIAL NATIONAL BANK AND TRUST COMPANY OF NEW YORK be and hereby is designated as a depositary of the funds of this Corporation; and further

RESOLVED that any two of the following officers, viz: President, any Vice President, and Assistant Vice President, Secretary, Treasurer, and/or Comptroller, be and they hereby are authorized from time to time, for and on behalf of this Corporation, to sign checks, drafts or orders for the payment or withdrawal of funds of this Corporation; and further

RESOLVED that said Bank be and hereby is authorized to pay any and all said checks, drafts or orders drawn on the account of this Corporation with said Bank and signed as above provided, including such as may be drawn to the order or endorsed in favor of the officer signing and/or endorsing the same; and further

RESOLVED that the Secretary of this Corporation be and hereby is authorized and directed to certify to said Bank under the seal of this Corporation, a copy of these resolutions and to certify, from time to time, to said Bank the names, and to deliver to said Bank the specimen signatures of the persons at the time of such certification holding the respective offices hereinabove mentioned; and further

RESOLVED that until said Bank shall receive a certificate under the seal of this Corporation as to the

expiration or termination of office of any person so certified to be an officer of this Corporation, said Bank may rely absolutely upon the authority of such person to sign as such officer as herein provided; and further RESOLVED that these resolutions shall continue in force until formally rescinded and written notice of such rescission filed with said Bank.

[fol. 99] There being no further business, the meeting adjourned.

GOVERNMENT'S EXHIBIT 33

W. R. Grace & Co.
New York

April 19, 1929.

MEMO. TO:
Mr. J. D. MacGregor.

Referring to your recommendations for Pan American-Grace Airways Inc. forwarded with your letter of April 16th to me, I think we ought to have before our Board meeting as much of an estimate as you can give of the cost of flying and ground equipment and the cost of operations.

This company has a capital of $1,000,000. which was estimated to be sufficient to equip it in every respect to carry out the contract. No provision has been made for increased capital, therefore, the operations and plant must be laid out within the limits of the present capital. We do not wish to increase the capital or to carry on an expansion as rapid as that of Pan American Airways.

Mr. Jacob prepared an estimate of investment in working capital which was the basis of the capitalization of the company at $1,000,000. and I think this should be adhered to in all plans and, of course, no commitment taken in excess thereof without approval by the Board.

With reference to your detailed recommendation, as previously stated I think that the New York office should be the head office and that it should be adequately staffed.

As you and Mr. Jacob are shortly to be absent at the same time I understand it is your idea that the controller should be in charge of the office.

I note that you recommend that the accounting to be

GR-81
10-26-54 G006652
RLA

[fol. 101] handled in the several sections by W. R. Grace & Co. be under the general supervision of a chief accountant and traffic manager located at the Canal Zone. If this means that the different sections are to forward their accounts to be consolidated at the Panama Canal I think a good deal of motion will be wasted and that it would be far better, in fact, indispensable, to have the chief accountant in New York. Complete accounts cannot be made up at the Canal because there will be large expenditures for equipment and supplies at New York and all of the mail revenue will be paid to the New York office. This being the case, I think the New York office is the only place for chief accountancy because it is the only point where all of the accounting reports can be concentrated for prompt monthly consolidation so that the directors can have a continuous picture of the operating results.

The only way in which the New York office as head office can keep in control of the business is to have all the separate sections report to New York and have the accounts and expenditures controlled from New York.

Sufficient copies of accounting reports should be sent to the Vice President in charge of operations at Cristobal to enable him to do his work intelligently throughout the area which it is ultimately determined as in his jurisdiction.

W. R. Grace & Co. will be glad to assign a first class man in each section to supervise all of the accounting

and to render the reports in the form adopted and approved by the Vice President and General Manager and the Board.

GR-82
10-26-54
RLA

G006653

[fol. 102] With reference to the Canal Zone I feel that the arrangements for use of airports, repair shops and traffic facilities are desirable but as to sharing the cost or expense of a staff house I am a little doubtful. I do not think married employees care much about living in a staff house and there are sometimes difficulties.

The Board has decided that the service from Cristobal to Guayaquil should be sub-contracted to Pan American Airways only until Pan American-Grace can get rights of its own.

How long will it be before Pan American Airways contract is approved by the Congress at Panama?

My understanding is that there is now no obstacle to any American company obtaining operating rights in Colombia. I am not informed of the nature of the negotiations being carried on by Pan American Airways in Colombia or as to their duration, but I think that operating rights should be obtained by Pan American-Grace from the Colombian Government without delay. This can raise no question in the mind of the Colombian Government as between Pan American and Pan American-Grace, for the reason that Pan American does not propose to operate on the West Coast of Colombia but only on the Northern coast.

Any contract to carry Colombian mail South to Peru and other South American countries is negligible in importance for the volume is insignificant.

I assume the transfer of the West Coast landing rights from SCADTA can be readily arranged as these were obtained for the benefit of the jointly-owned Pan American-Grace company.

GOVERNMENT'S EXHIBIT 37.

PAN AMERICAN-GRACE AIRWAYS, INC.

2.2.A3

No. 2.

Cristobal, Canal Zone,
June 21st, 1929.

Mr. J. D. MacGregor,
Vice President & General Manager,
Pan American-Grace Airways, Inc.,
c/o W. R. Grace & Company,
Lima, Peru.

Lulsluti this is carbon of original letter previously sent.

W.R.

Dear Mr. MacGregor:

This will serve as a memorandum of matters discussed with you and Mr. Harris in connection with the preparation of an operating budget for our Company.

PERSONNEL:

Mr. Harris will be in charge of operations of the entire Line with headquarters at Cristobal. The Line will be divided into three divisions:

No. 1—from the Canal Zone to Guayaquil in charge of Mr. Gillespie as Flight Superintendent.

No. 2—covering the Line in Peru in charge of Mr. Travis as Flight Superintendent.

No. 3—covering the Line in Chile and an extension to Argentine in charge of Mr. Williams as Flight Superintendent.

It is estimated that we will require three Pilots in Chile including the Flight Superintendent, three in Peru including the Flight Superintendent, and two in the Canal Zone including the Flight Superintendent. We will require six mechanics to travel with the planes, that is, one with each

Ford and one with the Sikorsky. It is, of course, understood that not all of these will be required until all of the Fords are in operation. There will also be required two or three wasp mechanics for shop overhaul work and about fifteen
10/21/54 G 926
GR-148
[fol. 111] assistant mechanics and miscellaneous laborers.

OVERHAUL SHOPS:

These are suggested at Lima, Santiago and at the Canal Zone, although at the latter point we may be able to make some arrangements to share at least some of the facilities of the Pan American Airways. It was suggested that shop buildings would cost about $5,000. and the equipment about $15,000. at each point. The shop building item, however, is to be omitted at least for the present and we will use space in the rear of the hangars. The item of $15,000. for equipment is believed to be unnecessarily high and the actual cost of this item should work out substantially less. You indicated that the shop equipment required would consist of Universal metal work machinery, lathe, shaper, drill press and wasp repair equipment.

W. R. Grace & Company, as you know, controls the International Machinery Company, which has offices in Lima and Santiago, and which will be in a position to quote prices on shop equipment, and I think prices should be obtained from them as well as the Pan American Airways, and purchase made where they can be made the cheapest.

HANGARS:

These were suggested for Lima and Santiago and perhaps at one other point to be decided upon.

At the Canal Zone it is hoped that we will be able to arrange for space in the Pan American hangar.

Size of the hangar proposed is 100' by 100' by 18'. On the basis of a price which you secured from Rieter and Pineus of £575 CIF Callao, for a hangar 55' by 75' by 18'
GC-149 G927

[fol. 112] and price of $24,000. at which the Peruvian Government was negotiating for two hangars 100' by 200', it would seem as if we should be able to arrange for these at a cost of not over $12,000. erected. It was suggested that some saving in the original cost and maintenance might be effected by using adobe side walls. Before contracting hangars I think we should obtain competitive prices in the United States, England and Germany. W. R. Grace & Company, as you know, has the agency for Milliken Brothers, and I believe we could secure foreign prices thru our subsidiaries. The British Foreign Machinery Company, London, and Kiefer Helmke & Company, Hamburg. In case the U. S. price is practically the same as foreign prices, it should, of course, have the preference; if, however, there is a substantial difference, we should endeavor to use the less expensive equipment provided we can do so without violation of our Mail Contract.

FLYING FIELDS:

Guayaquil—It is understood that we can use the Government field by incurring a few minor expenses.

Peru—It is understood that we can use the Government fields and arrange to have them under our control by small expenditures on the fields not exceeding an average of $500. per field. A field of 140 acres at Lima can be purchased for about $20,000., but we are to endeavor to avoid this capital investment as long as possible.

Chile—We are to use the Government fields as long as possible, in the meantime, Mr. Hoyt, Mr. Trippe and I decided before I left New York that we would ask Mr. Metzner to quietly investigate available locations in such a way that it would not appear that either Pan American Air-

[fol. 113] ways or Grace were interested parties in order to get in hand, when needed, some suitable field near Santiago at a reasonable price. I would suggest that you discuss this with Mr. Metzner, and the same procedure incidentally might be followed with Mr. Redshaw in Lima.

PASSENGER AND SHORT STOP ACCOMMODATIONS:

At fields where short stops are made it was suggested that a Milliken portable sheet metal house, obtainable from local offices of W. R. Grace & Co., or a small thatch building each costing about $500. be arranged. It was indicated that 10 or 15 of these would be required. They would be as small as practicable to provide minimum passenger accommodations and storage for gasoline, oil and supplies. A watchman at a salary of $20. per month may be required at each of these places and it was suggested that he might live in the building. In that case, it may be necessary to provide outside under-ground gasoline storage and I think it will also be necessary that we find watchmen with little or no family.

At Lima and Santiago better passenger accommodations will probably be required, but here again we are to adhere to strictest economy. While it will, of course, be a short-sighted policy to have our accommodations too small, I believe it will be equally bad policy to be too far-sighted in this matter. Our passenger movement is not going to assume enormous proportions over night and we cannot afford to provide accommodations too far ahead of the trade. If we proceed on a moderate basis, I believe by the time larger passenger accommodations are required, our original facilities will be written off and we will, in the meantime, have saved interest and maintenance charges on idle

GR-151 G929

[fol. 114] capital for a period of years, and when larger passenger movement comes, we will have the income to provide better accommodations. You considered that at Guayaquil in addition to some passenger accommodations you would probably require a ramp to bring planes ashore which might cost as much as $5,000.

MOTOR CARS:

It was stated that you would require a Ford station wagon costing about $1200. at Guayaquil and Talara and

perhaps a car at Lima. My feeling is that we should only purchase cars where absolutely essential and then only when we have actual figures showing the comparative cost of owning cars and paying hire. As long as we have only a weekly service we are not going to have much active service for a car in most places. We will never-the-less have the constant expense of paying some one to run the car while interest and depreciation at a heavy rate will be adding materially to our operating cost.

It is my experience that when actual comparisons are made between the cost of owning a car and hiring one, it is surprising to find how often the figures strongly favor the latter course.

GENERAL:

It is understood that upon completion of this survey you and Mr. Harris will submit to the Directors a complete detailed budget showing total capital investment required for the service and an operating budget. It is likely that Mr. Vidal will be in Lima upon your return from Chile, and, if so, you will, I take it, find it convenient to avail of his assistance in preparing your actual budgets. These figures should be prepared on the ground so as to avoid

[fol. 115] any misunderstanding between you and Harris, and in order that points of doubt, which always arise at the last moment, may be immediately straightened out. No commitments are to be made until we have this complete picture, because if we go about it piece-meal, we are not only likely to get a non-standardized miscellaneous layout, but we are very likely to spend in the aggregate much more than originally contemplated. Moreover, it will be necessary to go over the whole lay-out with Mr. Trippe before going ahead, as it was impossible to do so before you left.

We should not, therefore, start in on any program covering the matters mentioned in this letter until the Directors have the whole program before them in its entirety so that they can decide how much is to be appropriated for the entire operation.

Preliminary estimates indicate a total cost with Fords considerably in excess of our mail revenue of $1.80 per mile, even working along the conservative sane and sound lines which have been followed by Peruvian Airways and which we desire to adhere to on the extended routes. Unless these estimates can be very materially reduced, therefore, the Company will show a heavy loss, which I am sure will not be satisfactory for any length of time and will not make for the best results in the long run. We cannot, in my opinion, rely upon reducing this cost by considering our depreciation and crash reserve excessive. While it certainly is to be hoped that experience will show them to be excessive, there is not enough actual experience to date to enable us to rely on this with any certainty, and until we have actual experience to go by, I think we must accept the Pan American Airways' basis of depreciation and crash reserve, which we are following, as a reasonable and nec-

G 931

GR-153

[fol. 146] essary expense. This means that we can only break even by keeping down our plant investment with its inevitable fixed charges by exercising eternal vigilance in respect of unnecessary expenses, and by making the greatest possible effort to secure passengers and other local business.

This is of the greatest importance because even ten years runs off pretty quickly and we must be constantly striving to get in a position where we are not dependent on our subsidy. In other words, we should not rely on the subsidy as a permanent source of income, but rather should regard it as a temporary assistance while we are getting our business on a thoroughly sound commercial basis.

I entirely agree with the proposition that safety of our passengers and crew must always be our first consideration. This we must provide for by furnishing the best type of equipment, maintaining it at all times in the highest state of efficiency and operating it with the best personnel obtainable. Nothing I have said herein is to be interpreted as in contravention of the principle of "Safety First". Here conveniences and luxuries, however, not contributing to this

principle, we can get on without until we can pay for them out of earnings.

I have dwelt upon all of the foregoing so often that I have hesitated to repeat it here, but the subject is of such vital importance that I have ventured to do so once more, even at the risk of boring you. The thing which gives me confidence is that both you and Harris see eye to eye with me on all these fundamental considerations.

Yours very truly,

HJR/CAM

Rec'd
9/19/29

Mr. H. Roig.
C/o. W. R. Grace & Co.,
NEW YORK

Dear Mr. Roig,

I am delighted to receive the information that you have been placed on the Board of Directors of the Pan American-Grace Airways, Inc., and know that the work of the Board will be very much assisted by your presence.

With regard to your letter of August 6th the following points are noted.

PERSONNEL: Gillespie has written me that he is perfectly willing to take a position with us at any time that he loses any other job which he may have. In other words he seems to think that we will hold a position open for him, but he is very much mistaken as our work must go forward. Richardson of the Mexican section of the Pan American Airways has written to me with regard to a man named Bradley who is working for him and who he recommends highly as a possible flight superintendent. I have written to Richardson suggesting that Bradley come on down at our regular pilot's salary rate so that I may look him over. As you already know, Travis has gone to Chile to take William's place.

HANGARS: With regard to Hangars I feel that it is extremely important that we have a hangar at Lima as soon as possible. As you already know we have been having considerable discussion between Richter & Pickis and Milli-

GR-64
11-5-54
D.L.A.

G018780

[fol. 118] kin Bros. bids and the question now seems to hinge on the relative life of the sheeting furnished by the two manufacturers. Richer & Pickis hangar seems to have a thickness of material more than twice that of the Millikin Bros. hangar.

I have received a quotation of approximately ten thousand dollars for the erection and instaliation of either hangar complete with lights, cement floor, toilet, etc. This would make the total cost in the vicinity of $20,000.00 not including duties which we believe we will be able to avoid.

With regard to our not making any capital commitments until we have our full capital budget arranged, I agree with you in principle but feel that particularly in the case of Lima the deterioration of the airplanes which are at present standing out in the open, far outweighs the question of studying the investment analysis before purchasing a hangar.

I am very anxious to get together with Mr. MacGregor with regard to capital and operating budgets but it seems that various organization and operating questions have been so acute that it has been impossible for us to see each other.

I believe that we will be able to make a satisfactory arrangement with the Peruvian Government authorities to use the various Government fields throughout Peru for the erection of hangars or any other facilities which we may desire to instal.

With regard to Guayaquil and other Ecuadorian airports I have covered this separately in my letter to the Pan American Grace Airways Inc. #49. With regard to Buenaventura, we are at present using a float at this point and I
GR-65 G018781
[fol. 119] do not believe it is necessary to build a ramp there. However, I think it is very wise to consider the question of securing the use of the large island at Tumaco where we can build a ramp and landing field so that in case it becomes desirable we can ferry land machines through to Panama and can beach for repairs and take off or land our amphibians on the landing field at Tumaco. The securing of this island is I understand a matter which will require negotiation with the Colombian Government in Bogotá and should be undertaken at the earliest opportunity.

I am completely in accord with your statement that capital investments in aviation industry today are likely to be obsolete tomorrow on account of equipment improvements. However, there are certain fundamental considerations such as the arrangement of ramps and landing fields which it would seem cannot be dispensed with until entirely new types of aircraft are in existence and it is believed that with our present investment in our present types of flying equipment we are justified in spending a considerable amount of money in order to preserve that equipment particularly in view of the fact that no startling invention in aircraft types are at all obviously looming on the horizon, the chief points of development at present being in the shape of improved efficiency in engines and propellers.

With regard to motor cars, the Pan American Grace Airways now own one Ford touring car in Talara which has not yet been assembled from the crate. At all other points motor transportation is handled by rental arrangements.

With regard to fare tariffs, we have just been informed by Faucett that he is going to reduce his tariff rates on the

GR-116

G018782

[fol. 120] opening of his operations on September 15th. I have discussed this matter with the officers of the Grace organization here and they are unanimously of the opinion that we must meet Faucett's rates. Incidentally, Faucett has prevailed upon the Government to notify us that we should reduce our tariff. The Government has considerable power under our contract to control our tariffs and it is therefore necessary for us to take some action in this regard. Therefore we have arranged a conference with Faucett at which the entire question will be studied. He has suggested a cut of 20% on our present tariffs but I believe that I can arrange for this cut to be considerably less in most instances although we may have to reduce by this amount to a few places.

In this connection you will be pleased to know that the Ford northbound tomorrow is carrying ten paying passengers out of the thirteen seats available. We have instituted a rather intensive passenger solicitation in conjunction with the Steamer Department of the Grace office here and believe that we are securing results in this regard already. We find that the luxury, comfort and safety of the Ford planes is a very great advantage in soliciting passenger traffic. The second ford will be flown tomorrow in Guayaquil and I understand that Mr. MacGregor is anxious to have it come immediately to Chile for the survey flight to Buenos Aires.

With best personal regards, I am;

Yours very truly,

/s/ Harold R. Harris

AGENTS

In accordance with my instructions I very carefully investigated the possibility of the use that could be made of the various organizations of W. R. Grace & Company along our route. I am glad to be able to have the opportunity of placing on record my appreciation of the way in which I was received by all the Grace & Company officials, and the enthusiastic co-operation shown by them at all times in matters concerning our aviation activities.

In the chief centers, at Lima and Santiago, sufficient space was placed at our disposal to enable us to carry on such work as it was found necessary to do with our own employees. We were able to secure from the Grace organization men well suited for handling the business needs of our Company. Rentals were agreed to for the space occupied and we, of course, took entire charge of reimbursing the employees we secured from Grace.

The fact that we must institute a system of very complete accounting, and that other business activities require so much time to commence and finish, makes it impossible for the employees of Grace & Co. to handle this work in addition to the work they are now doing. The Grace managers themselves were the first to point this out to us after they had had a chance to familiarize themselves with our needs. We have found it necessary, therefore, to take into our organization, on a 100% basis, various employees whom we had though previously could have done our work in conjunction with the work they are doing for Grace & Co.

I consider, however, that remuneration should be made for the work done for us by the higher officials in the various Grace Companies in South America in return for the great assistance they have rendered and the time they have given, and will give, in aiding us to solve our many complicated problems. These officials are extremely busy, and the

time and thought they give to us, and without which our task would be infinitely harder, is difficult to describe but is always evident. In view of the fact that we are paying for office space separately, that we have found it necessary to secure our own personnel for accounting, that all incidental expenses are paid directly by us, I consider that the reimbursement for the higher officials for goodwill and for legal counsel by Grace Lawyers should be placed upon a flat basis as follows:

$18,000 per annum while we are operating on a once-a-week schedule;

$22,000 per annum on a twice-a-week schedule;

$25,000 per annum on a three times a week schedule.

GR-11237

G066065

[fol. 122] My reason for not placing this remuneration upon a mileage basis is that the greater amount of work done for us by the Grace & Co. higher officials is during the period when we are operating only once a week. After we have secured our operating rights and have shown the countries through which we fly that we are worthy of trust and confidence, our political and international problems will not be so complex, and we hope that we shall have to impose less upon the expensive time of the Grace managers and their assistants.

I repeat again that it is hard to estimate in dollars and cents the benefit we receive from the Grace organization, but I recognize these benefits and the work already done, and to be done, for us by the powerful Grace interests, and I have recommended what I think is a fair compensation for benefits received.

PAN AMERICAN AIRWAYS INC.

There is no question that in order to operate successfully a 4,800 mile air line at all, a great deal of technical skill and brains must be required. Panagra is fortunate in having the offer of the services of Pan American Airways, Inc. with an already established and competent supervisory operating personnel.

It is my understanding that the Pan American Airways, Inc. offer includes engineering supervision and advice, purchasing of airplanes, equipment and supplies, radio supervision, and whatever advice or assistance we may need in establishing, soliciting and regulating our passenger traffic. We are also to have the privilege of using, wherever practicable, the accounting system originated by Pan American Airways, Inc., and to be permitted to purchase at cost the Code Book prepared by them for the cheap and intelligent despatch of cabled messages. We are also to have the privilege of consulting, and the assistance where necessary, of the Pan American Airways, Inc. Washington office.

My recommendation is that remuneration for these services should be placed upon a mileage basis rather than a flat basis, because the work to be performed by Panair will always bear a distinct relation to the amount of miles flown by Panagra airplanes. My recommendation as to reimbursement for these services is not to exceed 9¢ per mile. This is in line with what I am informed the Pan American Airway, Inc. technical and supervisory overhead figures out on the basis of the present mileage flown by Panair and affiliated Companies. It is my understanding that as the mileage increased the above figure will be reduced, and therefore, the above maximum price per mile be correspondingly modified.

I should wish to point out that we not only receive the assistance of Panair Purchasing Department, but are also permitted to avail ourselves of the discounts for which

[fol. 123] Panair has been able to arrange on account of large scale purchases. We will also be able to avail ourselves of the work already done by Panair in building and testing special airplane radio sets for use in our operations. Not only would this radio equipment cost us, if we purchased it from manufacturers, a great deal more than Panair proposes to charge us, but I am afraid we would find, after the purchase had been made, that it was not suitable for

our requirements. I am also informed that it would be several months, possibly a year, before we could secure suitable radio sets from any other source.

The above would constitute a modification of the amount shown in the estimated budget for the year 1930, under the heading of ESTIMATED PAYMENT TO PAN AMERICAN AIRWAYS, INC.

It is, I understand, the intention of neither W. R. Grace & Company nor Pan American Airways, Inc. that any large profit be made for the services rendered by their respective organizations to Pan American-Grace Airways, Inc. On the other hand, neither organization wishes to lose money, and to the best of my belief the figures recommended will attain that desirable end.

MEMORANDUM FOR MR. GARNI:

PAN AMERICAN-GRACE AIRWAYS, INC.

PROPOSED AGENCY AGREEMENT WITH
W. R. GRACE & CO.

1. Subject to working out the terms to mutual satisfaction it has been agreed that W. R. Grace & Co. will be appointed general agents of Pan American-Grace Airways over their entire line from Cristobal to Montevideo. I would, therefore, appreciate it greatly if you could discuss the matter with Mr. Redshaw and Mr. Rebstock and let me have their views in detail. I am sending copy of this memorandum to Mr. Valverde with covering letter requesting that he take the matter up with Mr. Metzner. Please bear

in mind that as this matter has not yet been put in definite shape, it has not been discussed at all with Mr. Harris or the other Pan American-Grace or Pan American people on the Coast and it is, therefore, desired that the matter be kept strictly confidential unitl it is closed and we can advise the Pan American-Grace people from here. This is of great importance.

2. The general idea is that Pan American-Grace will conduct its own flying operations including flying personnel, equipment, landing fields, maintenance and everything directly connected with the business of flying. All other operations of the company in South America will be handled by the general agents. This will include all the local business of the company and all matters in connection with traffic including receipt and dispatch of planes under which head-

[fol. 125] ing it should be possible for the agents to exercise considerable control over at least the business side of operations. This division between the flying and business sides of the venture may not be entirely sound but so far we have been unable to reach any agreement carrying the agent's functions into the flying side as our partners feel that this part of the business calls for specialists and that a separate organization of this character should be built up. I believe, however, that by close cooperation between our Houses and the Panagra flying organization, there should be no serious difficulties arising from this division of functions. It is, of course, apparent that the functions of the general agent go far beyond that of an ordinary steamship agent and our Houses should approach the matter with this viewpoint. Their function is really to act as principals on the business side and through their control of finances and accounting they should be able, by harmonious cooperation with the Panagra organization, to exercise a very important influence in controlling expenditures, etc. of Panagra's operating organization.

3. The theory of the agency arrangement is that one house in each of the four divisions into which our operations

are divided, will be responsible for the discharge of the agents duties in that division. Thus Panama Agencies Company, Cristobal will be responsible for Division No. 1 (Cristobal to Talara); W. R. Grace & Co., Lima, for Division No. 2 (Talara to Arica); Grace y Cia (Chile), Santiago, for Division No. 3 (Arica to Santiago) and Division No. 4 (Santiago to Montevideo). This means that Pan American-

GR-251

G019485

[fol. 126] Grace, New York, will deal directly only with these three offices. These three offices will appoint and respond for the agents at the various points where the planes call including outside agents at points where we have no organization of our own. The idea is that these three offices would take into their respective organizations such general personnel as Panagra now has at these three points, or such part of it as we wish to take over. Thereafter Panagra's business under this general agency agreement will become a department of each of these three main offices and the business will be handled precisely the same as that of any other department of the respective houses. It will not be necessary that the Houses maintain in any sense a separate Panagra organization but it will be necessary that they delegate to this work one good man as head of this department who can be responsible to see that the work is properly organized and effectively carried on. It may be that in some cases there will have to be an assistant. It is not our intention, however, to prescribe in detail how the separate offices shall carry out their responsibilities under this contract. They will know better than we how best to secure the desired results. It will, however, be strictly incumbent upon them to adopt such method as will guarantee these results.

4. The question of compensation is one on which we have not as yet reached any agreement with our partners and the plan of compensation submitted herewith is accordingly strictly tentative. Our theory, however, is to pay to each of these three division headquarters offices an

GR-252

G019486

[fol. 127] amount sufficient to cover their out-of-pocket for services which we estimate will be required under this agency agreement, plus a reasonable amount in respect of overhead. Additionally we will pay a fixed agency fee for each port of call and a slightly larger fee where there is an overnight stop or other special consideration. The agents will also receive a commission on passenger and freight bookings and will be entitled to bill as disbursements various items not included in the fixed fee. All of these payments will be made to these three main offices. They will make their own arrangements with outlying agencies and outside agents and will pay these outside agents such amounts as they may arrange. In case they have to pay more than the amount allowed, however, they will have to absorb this difference. Similarly, the booking commission may be apportioned in such manner as the main offices see fit and the monthly fee may be applied by them as they deem best.

5. Herewith is a draft form of agency agreement and a draft of proposed fee basis which will indicate how the foregoing works out in detail. If any part of this is not clear or if our managers are not in agreement on any point, I would be glad if they would cable me promptly in order that the matter may be taken care of while the contract is under negotiation.

6. We have secured this agency agreement because of our unqualified assurances to our partner that in this way Panagra can have the work covered by the agency contract better done and for less money than by setting up their own organization. We can only retain the agency if these assur-

GR-253

G019487

[fol. 128] ances are substantiated by actual performance. In our estimates we have calculated fees on what we believe to be a liberal basis and we will not accept the agency except on such a basis. But it goes without saying that we expect corresponding service. This business is a new one and it is expected that the agents will approach it enthusiastically with a view to building up a commercial business and not merely with the idea of administering a going one.

Personnel should be selected of a type to do this kind of a job. Our mail revenue is not sufficient to pay expenses today and we must develop a large passenger and express business in order to make this venture pay. Moreover, neither we nor the United States Post Office regard the mail revenue as anything except a subsidy during the pioneer period to enable us during that period to build up a real commercial business. Our mail contract calls for three trips per week but so far the Post Office has given us only one trip. We are hopeful of getting a second trip beginning July 1st but whether we get and retain this second trip, to say nothing of the third, is very largely dependent on increase of use of air mail. We are, therefore, interested in stimulating the air mail movement even though that does not directly swell our income account. We must also develop passenger and express business not only to make the business pay on its own feet but also because the policy of the United States Post Office Department is not to foster lines which merely carry the mail but the Postmaster has stated very emphatically they are only interested in lines which under the protection of the mail subsidy are building up a real air transportation business on a commercial basis. It

GR-254

G019488

[fol. 129] is, therefore, the function of the general agents not merely to administer the business and sell tickets to people who ask for them but to actively and vigorously go after and build up traffic in every possible direction. In this connection it should be borne in mind that Pan American Airways have a very effective traffic organization of their own which is building up a very considerable business on their lines. As our partners in this venture they will always be comparing the results of their traffic organization with ours. With our many years of experience in this field we ought to be able to show a much better performance than they and I do not think we will have made good on this contract unless we do.

7. It is believed that the compensation provided should be adequate to take care of all expenses of the agency and that the booking commission, with the development of busi-

ness, ought to make the agency distinctly profitable to the Houses. I see no reason why the Houses, therefore, should not undertake the business with enthusiasm and if they do I feel certain that it will be made a great success.

/s/ Harold R. Harris

January 29, 1930

P.S. The agreement between Pan American-Grace Airways and Pan American Airways referred to in the "Second" paragraph of the agreement relates merely to Panama and the Canal Zone and provides that at that point the Government negotiations shall be carried on by Pan American Airways. This is thought desirable because of their extended operations at this point, and because of the fact that the France Field arrangements are in their name.

G019489

[fol. 130]

GOVERNMENT'S EXHIBIT 41

February 19, 1930

MEMORANDUM FOR MR. TRIPPE:

PAN AMERICAN-GRACE AIRWAYS

After most careful consideration of the points discussed in our various conversations, I have reached the conclusion that it would not be practical to turn over the entire operation of Pan American-Grace to Pan American Airways and that the soundest policy would be to continue the plan of having the flying operations (including maintenance, landing fields, etc) in the hands of a separate organization under the control of a general manager responding to the Pan American-Grace Board of Directors.

My reasons are, briefly, as follows:

1. Whether it be a happy incident or not, the fact is that Pan American-Grace has a separate capital owned by two disassociated interests which, it seems to me, re-

quires that the company be, to some extent at least, maintained as an independent entity with an independent management.

2. The foregoing consideration is of the greater importance because the entire life of the company depends on a separate and independent mail contract on which it has bound itself to the United States Government for a period of ten years. Performance of this contract is, therefore, the company's paramount problem. As a matter of sound policy it does not seem to me that the company is warranted in turning over responsibility for performance of this paramount obligation to any third party, even though that party be a 50% owner of the company. Under your plan I feel that in practice our whole operating organization and personnel would, in fact, become a part of the Pan American organization and that Pan American-Grace would have divested itself of any machinery whatever for performing its obligations under its mail contract. While such a contingency is hardly to be contemplated, I think that in view of your recent

GR-214
10-28-54 P.J.S.

G010712

[fol. 131] proposal of one stockholder of Pan American-Grace buying from or selling to the other, we must take into consideration the possibility of a situation arising where such a condition might again arise and perhaps under strained circumstances. In such a situation, Pan American-Grace, having no operating organization of its own and being obligated to maintain operations under its mail contract.

GR-215

G010713

[fol. 132]

GOVERNMENT'S EXHIBIT 42

Buenos Aires, Argentine
Feb 27, 1930

Mr. Harold R. Harris,
Vice President
Pan American Grace Airways, Inc.
Lima, Peru

Dear Mr. Harris:

Was not particularly surprised to see your letter of Feb 20th but hardly expected exactly your attitude in advising that Pan American Grace agents should not accept instructions from Pan American Airways officials. I think this was quite unnecessary and probably due to your misunderstanding of what occurred. I issued no instructions to your people. I requested Summers to have the motor changed, after finding out that it had 362 hours and was expected to fly to Santiago and return without being changed. Mr. Summers, as your representative, had a perfect right to refuse my request but he did not do so, as he agreed with me that the Pan American Grace should not take the chance of a forced landing in the face of the competition that Nyrba was going to give them on the East coast. Had I known in time that you had a motor in the Ford that had 362 hours and you expected it to make the trip to Santiago and return, I would have taken the matter up with you direct.

I happened to be in Montevideo on Thursday and as a matter of curiosity asked Williams what time his motors had. My only reason for doing this was to get an idea of what would be needed in the near future. I was dumbfounded to learn that he had two new motors but one of 362 hours. I made no request to Williams but spoke directly to Summers.

The motor had to be changed on Friday or the plane had to go out as it was. I had no time to wire you and I am glad I did not as from the tone of your letter and the

reasons you give for not having the motor changed here convince me that you would have refused my request and I would have had to have appealed to New York.

You undoubtedly realize that Pan American Airways owns 50% of the Pan American Grace Airways. You probably do not realize that the Washington post office does not look to Pan American Grace for results on the operation of the line from Cristobal to Montevideo, but to Pan American Airways. Pan American Airways has entirely too much at stake for one of its officers to take into consideration the feelings of a Pan American Grace official when the action under consideration may cause an irreparable loss.

We know of your ability as an operator and had always thought that you were handicapped in your operation of the Pan American Grace by lack of equipment. I personally had never thought that you would operate the line as it is being run if you had full control over the purchasing of equipment. It was because I knew that Pan American

GR-6655

6031987

[fol. 133]. Airways interests were demanding that Pan American Grace put in necessary spares that I considered I was perfectly justified in suggesting that your only spare motor be used. If you consider it good operating to use a Ford over the Andes that has one motor with 362 hours, then you and the Pan American Airways are miles apart.

I only trust that such is not the case and that your letter was inspired from your fear of not being able to get more spares as quickly as you may need them.

In closing I may say that I had no idea of indicating that the Pan American Airways is going to hold a spare Wasp motor in reserve for you at Montevideo. Your idea of flying the Ford to Lima for replacement seems hardly economic as in view of the cost of gasoline and equipment I rather think that it would cost much less to ship your three motors for overhaul to Miami or Cristobal, than it would be to fly the Ford from Santiago to Lima to say nothing of the risk being run. Pan American Airways is

always willing to cooperate with you and if it is necessary for you to use any motors that we may have here, they will be at your disposition providing it is possible. I am not sending a copy of this letter to New York but you of course are free to do so, should you wish.

With kindest personal regards,

Yours faithfully

George L. Rihl
Vice-President

GR-6656

G031988

[fol. 134]

GOVERNMENT'S EXHIBIT 43

New York, March 4, 1930.

D. S. Iglehart, Esq.,
Delray, Florida

Dear Mr. Iglehart:

We were all delighted to get your telegram of a few days ago and I hope I am not imposing too much on the privilege by this letter. I have, however, delayed taking this matter up with you for several weeks but I cannot keep it in abeyance much longer and it is so serious that we do not want to make a decision without the benefit of your views.

About a month ago after one of our usual unsatisfactory Directors' meetings, Trippe told me that Hoyt and Whitney had seen him after the meeting and had told him that this dual management could not go on any longer and that we should either liquidate the company or one party sell out to the other, Hoyt's idea on the latter point being that each should submit a sealed bid for the other's interest and the high man become the buyer. I told Trippe that we were quite as much concerned about the management problem as he was but that we were not prepared to settle it on a gambling basis and saw no reason for liquidating,

that in my opinion the idea of a separate management for this company was entirely sound and the only reason it had not worked was because of our unfortunate selection of a general manager and that the thing to do was to correct this mistake but not change our general policy. He replied

G 131

GR-218
10-18-54 PJS

[fol. 135] that while he agreed that the manager was inadequate he did not consider that anyone, however competent, could do the job with dual control and that the only reason he had hesitated to carry out the decision about MacGregor promptly was that Harris had told Whitney at the Canal recently in effect that he had some sort of a commitment with MacGregor to step out if MacGregor did.

Trippe's idea was that the solution of the management problem was to turn over the entire management to Pan American for a fee and let them run the line as a part of their organization, going back to the original idea when the company was formed under which Grace would attend to the business on the Coast and Pan American would attend to the operations. You will recall that this was the original idea as embodied in letters exchanged at the time. Trippe also made the point that experience had demonstrated that it was utterly impractical for his technical organization to work effectively with Pan American-Grace when they occupied the position of an outside independent company and that it did not suit them as stockholders to have the Pan American-Grace setup a wholly complete separate organization as that would mean from their standpoint duplication of expense and unnecessary loss to them. I objected to turning the matter over to them entirely on the ground that whether happily or not, the fact was that Pan American-Grace had a separate capital with separate

G132

GR-219

[fol. 136] stockholders and with a separate obligation to the United States under its mail contract and that they must maintain a separate identity for these reasons and that some way ought to be found of doing this while at the

same time getting full advantage of Pan American's operating experience. It was at this point that I suggested to Mr. Grace as a compromise the plan of keeping a separate company, making Trippe President of it in direct charge of operations and with myself as Chairman so that Trippe and I would constitute something of an executive committee. We can then pay Pan American a fixed sum for their operating services, including Trippe's services as President while maintaining the separate identity of Pan American-Grace, and Trippe, being in charge of operations in general, will be able to use his own organization to the best possible advantage.

While matters were in this state, a wholly new situation developed which made matters still more acute. The Nyrba people you may recall had succeeded some time ago in persuading the Post Office Department to ask for an appropriation for the establishment of an East Coast line. This did not at the time suit Trippe because he felt that in competition with the Nyrba he would have to take the line at a very low figure whereas by delaying matters the Nyrba might fade out of the picture. He succeeded sufficiently in persuading the Post Office Department as to the inad- [fol. 137] visability of advertising an East Coast line so.

G 133

GR-220

that it looked very much as if this project might be dropped. At the same time we had been urging additional service on the West Coast. As a result of a good many factors which I need not detail here, the Post Office Department suddenly decided definitely not to advertise a complete East Coast line but merely a line from Rio to Buenos Aires, the mail being carried from there on over our line and in this way make the money originally intended for the East Coast line available for giving us a second trip a week beginning July 1st.

While Trippe was perfectly satisfied and even anxious to see us get a second trip a week and to see the East Coast line held in abeyance for a time, this new plan of the Post Office did not suit him at all because he felt that the short line from Buenos Aires to Rio might very well have to be taken at a ruinous price or fall into the hands of Nyrba

which would make impossible his later getting a through East Coast line. He had also in the meantime made certain arrangements on the East Coast which he felt would put him in a very favorable position to get the East Coast line if it were advertised as a whole. It thereupon immediately became to his interest to have a complete East Coast line advertised even if we had to be denied one second trip in order to make funds available.

He thereupon came to me with a proposition which he stated represented Hoyt's views as well as his own that, in

G 134

GR-221

[fol. 138] view of this conflict of interest as well as impending future conflict growing out of negotiations he has under way with Scadta and greater efficiency in management if the whole system were run as one, some form of merger or consolidation ought to be effected between Pan American and Pan American-Grace. While he suggested that failing this, they would be willing to sell to us, I think he was really more anxious to buy than sell and personally I do not see how it would suit us to buy especially if we are to have competition from a cheaper East Coast line.

Mr. Grace and Mr. Holloway sat in with us one whole afternoon going over this business and I have had several long talks with Trippe since. I need not trouble you with all this beyond saying that without committing ourselves to sell at any price, I did, by a roundabout calculation, indicate that we consider our half interest worth $2,500,000 of which we would want $500,000 cash and $2,000,000 in Aviation Company stock at a fair figure. Trippe, by an equally roundabout process, indicated his idea as $750,000, of which $500,000 might possibly be cash with perhaps a little time on some of it. I think he could probably be got up to about $1,000,000 but from there on it would be slow going so we were too far apart to get anywhere. Hoyt, having left on a six weeks' trip to the West Indies could not be reached.

Finally I insisted definitely that we waste no more time discussing mergers but get down to the problem of manage-

G 135

GR-222

[fol. 139] ment of the line we already had. In a talk this afternoon I told Trippe that I would submit to him in writing a possible form of management so that I might get his ideas in concrete shape which we might have to submit to you. I am enclosing herewith copy of the memorandum I have sent Trippe.

While we are in no way committed to this plan, I feel that something along this line is the best we can do at this time and that it is more important to get matters lined up on some fairly satisfactory basis at once than to permit them to drift any longer in the hope of something better. Mr. Grace, Mr. Holloway and Mr. Patchin approve this plan under the circumstances. Mr. Cogswell is more doubtful about it than the rest of us. Vidal, who is just back from Panama where he saw a good deal of Pan American's operations, feels that it is highly desirable to give Pan American a larger hand in operations and that this will in the end prove much cheaper than going on as we are where saving in maintenance is seriously increasing our depreciation charge. Before Garni and Valverde left I discussed with them the possibility of dividing the business along the lines now proposed and although originally opposed, after a full discussion they concurred in this plan. I enclose copy of memorandum Mr. Garni took with him and which I have sent Mr. Valverde by mail. Two letters from Garni enclosed show his reactions since he has been on the ground. While I do not consider the plan ideal, I

G136

GR-223

[fol. 140] feel pretty clearly that it is the best we can hope for with 50/50 ownership where both interests are determined to have a part in the management and neither is satisfied with the position of a mere investor. Pan American are just as determined on this point as we are and they will under no circumstances turn over the whole control to us any more than we would to them. Unless some such plan as this, therefore, can be worked out, my feeling is that we might better sell out to them even at a modest price than to let matters go on as they are.

As to the need of some radical reorganization of operations, I would prefer not to go into details here but from reports received not only from Pan American people but from several wholly disinterested sources, I feel satisfied that there is great urgency for prompt action.

I hope I have succeeded in making at least the high points of the problem clear. The whole story would fill a book.

Sincerely,

Encs.

P.S. For your information especially in connection with the merger question, the entire Pan American system showed a profit of $30,000 for the month of January.

In explanation of the reference to Pan American servicing our planes at the Canal Zone, this contract provides

GR-224

G 137

[fol. 141] for our paying a fixed pro-rata of the rent and other fixed charges and their actual direct labor cost for maintenance plus 150% and cost of spares plus 33⅓%. I discussed these percentages with Mr. Doubleday who considers the former very modest and the latter perhaps a little high. As spares are not a very large item, however, I may be forced to accept this figure as it is a distinct advantage to us not to have to carry a stock of spares for machinery which is changing as rapidly as aviation equipment. Vidal saw this plan in actual operation in the month of January at the Canal and reports that the service our planes are receiving is most satisfactory and the total cost of this first class maintenance is less than it would cost us to keep one mechanic at the Zone.

All of these contracts which we propose making can be cancelled on reasonable notice if they do not work out.

J. T. Trippe, Esq.,
Pan American Airways,
122 East 42nd Street,
New York City

Dear Trippe:

I enclose memorandum promised yesterday.

As this plan represents such a departure from the present setup, I do not wish to be committed to it until I have had opportunity to get Mr. Iglehart's views. I believe, however, that the thing for you and me to do is to get this in concrete shape so far as we are concerned as soon as possible.

To that end I would be glad to have your comments on this memorandum.

Very sincerely yours,

PAN AMERICAN-GRACE AIRWAYS

PLAN OF ORGANIZATION

While availing of the facilities of its two stockholders to the fullest extent possible, it is necessary that Pan American-Grace Airways maintain its separate identity because of its separate capital, separately owned, and because of its separate liability under its mail contract.

The following plan of organization is intended to preserve the necessary balance between these factors while at the same time giving the company an effective management.

1. The company retains its present Board of Directors, Mr. Trippe, however, becoming President of the company and Mr. Roig Chairman of the Board and these two constituting an executive committee.

2. The New York office of the company to be closed and its personnel dismissed with the exception of Mr. Vidal who will be continued as Comptroller with such accounting assistance as he requires.

3. Mr. Trippe as President will be in responsible charge of operations, including flying, equipment, maintenance, ground stations, and everything directly connected with flying. In the discharge of this responsibility he will bring to his assistance such departments of the Pan American organization as necessary and employ them in such manner as he deems best. Pan American Airways will be paid an agreed fee for their services hereunder, including Mr. Trippe's services as President.

4. Mr. Roig as Chairman, in addition to presiding at Directors' meetings, will be in general charge of the work of W. R. Grace & Co. as agents, whose functions shall be as outlined in the form of agency contract submitted to Mr. Trippe on January 31, 1930. The fee paid W. R. Grace & Co. shall include Mr. Roig's services as Chairman.

GR-227 G010697

[fol. 144] 5. Matters not falling under the heading "operations" or under the agency contract, shall be handled by the Executive Committee or in such manner as they or the Directors may from time to time decide.

6. In order to bring about proper coordination between the operations and the functions covered by the agency contract, there must be close contact and cooperation between both personnels on the Coast and between Messrs. Trippe and Roig in New York. Without undue interference in the other's field, it would be expected that both members of the Executive Committee would be in more or less constant

touch with each other and would keep each other more or less posted (through copies of cables and otherwise) of what was going on in their respective fields and would exchange views freely with the idea of bringing about the closest possible synchronization between the two ends of the business.

7. Mr. Harris will continue as Vice-President in charge of operations under Mr. Trippe but his activities will, of course, be restricted to operating matters, the other business which he now handles being taken over by the agents. In order that there may be a complete understanding with Mr. Harris regarding the plan of organization and the policy of the company and complete mutual confidence established between him and Mr. Trippe, he is to be asked to make a short trip to New York or Miami to go over the whole matter with Messrs. Trippe and Roig. It goes without saying that it is essential to the success of the plan that Mr. Harris be in accord with it and that Mr. Trippe be assured of his full cooperation in carrying out the operating program.

8. As soon as possible after this plan becomes effective, and every six months thereafter, the President will submit to the Board of Directors a budget giving his recommendations of capital expenditures to be made during the ensuing six months. These recommendations will, of course, be made in consultation with the Vice-President in charge of operations and will, so far as possible, represent the joint views of the President and this Vice-President. The Board of Directors will authorize such of these expenditures as they deem best and no capital expenditures will be made except those so recommended and approved by the Board.

9. On or before the first of each month, the President will submit to the Board of Directors a budget giving

[fol. 145] an estimate of operating expenses for the ensuing month. The Board may approve or amend this budget and the President will be expected to see to it that the expenses are kept within the approved amount.

10. The company will keep its own accounts and maintain its own separate financial structure both under the jurisdiction of the Comptroller whose signature or that of his assistant shall be required to all checks and obligations. Pan American Airways will not be expected to make any advances in connection with operations, all such expenses being paid by Pan American-Grace Airways itself. The Comptroller will be expected to see that expenditures are kept within approved budget amounts and in order that he may do this shall have access to all necessary sources of information.

11. Pan American Airways will service our planes at the Canal Zone under contract substantially in the form now under discussion. Some joint working arrangement may be desirable in the Argentine. But except where special arrangements of this kind are made, neither W. R. Grace & Co. nor Pan American Airways will be expected to perform any services outside of those covered by the general contracts referred to in paragraphs "3" and "4" above nor to look to the company for any compensation or expenses other than those therein provided.

12. The fee of Pan American Airways should, in my opinion, be a fixed amount per month the same as the Grace fee. I am perfectly willing, however, to discuss this with Mr. Trippe further and if he desires, to go over his figures with him with a view to deciding on the fairest basis for both sides.

H.J.R.

[fol. 146]

GOVERNMENT'S EXHIBIT 45

Lima Peru
5 March 1930

Mr. George Rihl,
Vice-President, Pan American Airways, Inc.
Buenos Aires, Argentine

Dear George:

I was very glad to get your letter of Feb. 27, 1930 on the subject of the motor change in the San Cristobal, since it puts on paper for the first time in my experience with the Pan American Grace Airways, the feeling that I have suspected exists in the minds of many Pan American Airways people with regard to the position and functions of the Pan American Grace Airways. As you well realize, my own position has been quite difficult at times, and this is one of them. You must remember that I am employed by 100% of our stockholders, and am held answerable to them, through our General Manager, Mr. MacGregor. A number of times in the past I have found exactly your attitude with regard to the Pan American interests, expressed in practically the same way by officials of the Grace Co. with regard to the Grace interests. My only hope of getting along is to make my plans and carry on as best I can, keeping both sides of the picture in mind. It is quite possible that eventually the operations of the Pan American Grace Airways will be under the Pan American Airways, but until that time comes, I am charged with the responsibilities of our operations, and will continue to carry on as best I can under all the conditions existing.

With regard to your statement that "You probably do not realize that the Washington post office does not look to

[fol. 147] Pan American Grace for results on the operation of the line from Cristobal to Montevideo, but to Pan American Airways." is odd since as far as I know, the only operation than Pan American Airways has ever done on this FAM #9 has been the operation for several months of the Cristobal-Guayaquil run. Since the first of Jan. 1930 this section has also been operated by the Pan American Grace Airways.

I am in complete accord with your remark "I personally had never thought, that you would operate the line as it is being run if you had full control over the purchasing of equipment". However, since I have been repeatedly warned that all expenditures must be curtailed, it is necessary for me to get along with the minimum of shop facilities, personnel, and spares.

As far as the use of the motor in question for one round trip between Santiago and Montevideo, you may be sure that I personally would have been glad to have made this trip with this motor, since I had information from my crew that this motor was in excellent condition. For your information, we are operating on the principle that our motors are changed when they require overhaul, and not on the basis of a blanket overhaul after so many hours. This is a safe method when the operation is only once a week, and there is time for personal attention and work on each piece of equipment. As a proof of this statement, I need only point out that to date from the commencement of our operations in South America on Sept. 13, 1928, we have only had one forced landing on account of motor failure, which occurred Nov. 11, 1928, on account of a burned out piston in a J5 Whirlwind motor.

Best personal regards. I hope to see you soon

(sgd) Harold R. Harris

GOVERNMENT'S EXHIBIT 47

Letter No. 2

New York, March 10, 1930

D. S. Iglehart, Esq.,
Delray, Florida

Dear Mr. Iglehart:

Your wire was very helpful in enabling me to shape my conversation with Mr. Trippe this morning.

The difficulty you mention as to Trippe's having a 100% interest on one side and a 50% on the other, is absolutely fundamental and he has repeatedly said himself in connection with this East Coast negotiation that he did not see how he could fail to be governed by his greater interest much as he regretted to be forced into this position. Whether I could ever assume the position in the picture which you very correctly state is essential to its satisfactory working, is also a matter of considerable doubt in my mind because of the fact that Trippe seems unable to stay put. This morning's conversation, for instance, was largely given over to his raising points about the working agreement which had never been raised before and some of which were inconsistent with the tentative understanding previously reached. Ironing these out is going to be a l g and unsatisfactory job, especially since they will no sooner be disposed of than others will be brought forward.

He again renewed this morning the question of our selling out as the only method of solving our various conflicting

G130

GR-237
10-18-54 PJS.

[fol. 150] interests. There is unfortunately a good deal of basis for this view. If Trippe were a more normal person to get along with it would be different but it is almost impossible to get anything finished with him and Hoyt, ex-

cept on the high spots, is not available and will not trouble to go into the details. Unhappily it is the details that make the trouble because without Trippe carrying along on these any general decisions Hoyt makes are meaningless and their execution can be evaded eternally. I have personally spent an enormous amount of time with Trippe in the past month trying to get some workable organization plan set up. We have repeatedly spent solid half days on it for days running but just as we are apparently ready to close, he is off on some tangent and in ten minutes we are back to scratch. I do not see how a partnership where such basic differences of opinion exist as here can get very far for I am afraid that the time diverted from the business of the company to ironing out these differences and reaching in the best of cases a more or less unsatisfactory compromise, is not conducive to building up a new business.

Quite apart from this mental incompatibility which makes a satisfactory management for Pan American-Grace well nigh impossible, there are unhappily several very serious points of directly conflicting interest where Trippe refuses to recognize that his 50% interest in our company precludes him from following what he conceives to be a more important 100% interest. The East Coast situation is the most glaring example of this. We have all taken a hand at trying

G130A

GR-237A

[fol. 151] to persuade him that his interest in Pan American-Grace precludes him taking any position regarding the East Coast which is prejudicial to the West Coast. He simply refuses to recognize this beyond arguing that he clears himself by his offer to merge and by undertaking to keep us posted in what action he takes regarding the East Coast. Moreover, it seems very likely that sooner or later he will reach some agreement with Von Bauer for taking over Scadta. Scadta is operating in direct competition with Pan American-Grace yet Trippe feels that if Pan American absorbs Scadta he would be under no obligation to discontinue this competition. Moreover, he feels that in this event Scadta should operate the entire north coast of South America and that Pan American

should sublet to them their line from the Canal to Paramaribo and Pan American-Grace should sublet to them our line from the Canal to Guayaquil, —or at any rate that this is the efficient way to operate, — his idea of efficiency being always determined by his 100% interest. Finally, there is the old question of an interior line from Bolivia to Buenos Aires which he constantly comes back to as a scheme which Pan American may have to undertake in order to keep someone else out.

I agree with you that $750,000 is not an adequate price. In my talk with Trippe this morning, however, it became very apparent that this is by no means his ultimate price. I have always told him that we did not care to either buy or

G130B

GR-737B

[fol. 152] sell but when I suggested to him this morning that if the property were to be given away at any such price as $750,000. we would rather buy than sell, he immediately explained that that figure did not by any means represent his limit of what he ought to pay. My own figure of a valuation of $5,000,000 for the line was based on the fact that presumably if they had had the money this is what Montgomery's group would have paid for it on the day we got the mail contract since on that day we had $1,000,000 of cash in the company and a mail contract at forty cents a mail more than they were willing to take it for. This, on a basis of two trips a week, or say 20,000 miles per week, or 1,000,000 miles per year, made our contract worth $400,000 per year, or $4,000,000 for ten years, making the line worth $5,000,000 and our half $2,500,000. I have also said that I believe we could sell our half for at least this to Nyrba or some other outside interest and that if it came to a question of sale there was no reason that we should sell to him for less than we could get for the line in any other direction.

If we could get anything like this for our interest, payable $500,000 in cash and the balance in Aviation Company stock at a fair valuation, I would much rather sell than buy and provided we get some sort of an agency contract,

believe that sale would be preferable to going on with a 50/50 company with so unsatisfactory a partner. I believe the Aviation Company stock would be worth a good deal

G130C

GR-237C

[fol. 153] of money in the course of time as Pan American made $30,000 in January. Trippe says they made more than that in February which if true would seem to indicate they have turned the corner. Moreover, owing to their connection with experts in creating stock market values, it is entirely likely that some time or other they will run up the price on the stock very considerably. If we are to sell at all I believe, therefore, that the best time to do it is now when we can get Aviation Company stock at a lower valuation than it may be possible later and when they are particularly anxious to buy us out because of the imminence of the East Coast situation.

When it comes to buying them out, I think we have to consider in the first place that they would probably be willing to pay prima facie so much more than we that for us to top them at all would mean going up a pretty high figure. We would then have to, in addition to the purchase price, provide the additional capital which the company will need in the near future which Trippe estimates at about $1,500,000. I consider this very high but at any rate this is his figure. We would then have to go into the aviation business very seriously with a complete organization which would be a fairly considerable undertaking in itself. Finally, we would have to face active competition from Pan American on the East Coast and Scadta on the North Coast. While I see no reason to believe that in the end we could not make a success of it despite these difficulties, I fear that it would be a long while before

G130D

GR-237D

[fol. 154] we could take out as profit anything approximating what we would have on a sale now provided we can get a satisfactory price.

I would be glad if you would think over the general question of the advisability of selling provided we can get a satisfactory price and an agency agreement and let me have your ideas on the whole subject.

Sincerely yours,

P.S. Indications are that Pan American-Grace will show a loss of about $100,000 for last year assuming Pan American's bill for general services is within reason. This will be after payment of at least the following fees:

Lima	$10,000
Santiago	10,000
Guayaquil	7,500
Bolivia	2,000

GOVERNMENT'S EXHIBIT 48

EXHIBIT "Q"

New York, N. Y.,
March 28th, 1930.

AGENCY AGREEMENT
BETWEEN PAN AMERICAN-GRACE AIRWAYS, INC. AND W. R. GRACE & CO. PROPOSED IN CONNECTION WITH GENERAL PLAN OF REORGANIZATION OF PAN AMERICAN-GRACE AIRWAYS, INC.

Pan American-Grace Airways, Inc. (hereafter called "Panagra") proposes the following agreement with W. R. Grace & Co. (hereafter called "Grace") covering the services to be rendered in connection with the air transport services which Panagra is now operating from Cristobal, Canal Zone to Montevideo, Uruguay, by the West Coast of South America.

It is understood that where reference is made to either Panagra, Pan American Airways, Inc., or Grace in this memorandum, such reference to either includes its subsidiary companies or companies affiliated under the same ownership control.

The services of Grace, as agent, to be rendered shall consist of the following duties:

1. Grace shall conduct and handle all negotiations and arrangements on behalf of Panagra, as the necessity may arise or as may be requested by Panagra, with the Governments of Ecuador, Peru and Chile (or subdivisions thereof), and with any officials and agencies of said Governments. Such services shall be deemed to include all legal matters connected with the business of Panagra in such countries, and also the supervision of other agency services furnished by Grace at ports-of-call in these countries, where Panagra has no employee-representative. Similar services in the United States, Canal Zone, Republic of Panama, Colombia, Argentina and Uruguay are now being rendered to Panagra by its affiliated air transport company, Pan American Airways, Inc., which is conducting or about to conduct scheduled air transport operations in these countries and is maintaining local organizations for this purpose. In the event that Panagra should, during the continuance of this agreement, desire Grace to render such services in any of the latter named countries, including Bolivia, Grace will provide such services upon terms to be mutually agreed upon.

G066095

GR-11267

[fol. 156] As compensation for its services provided in this Paragraph 1, Panagra will pay Grace a fixed monthly fee of $..... per month. In addition to the above fee, Panagra will reimburse Grace for its actual proper disbursements, provided that, with the exception of cables and other routine disbursements, no expenses shall be incurred without the previous authorization of Panagra.

2. At all regular ports-of-call of Panagra's aircraft, where Panagra has no employee-representative, Grace shall handle the sale to the public, at such rates and tariffs and under such regulations as Panagra may establish, of tickets for passage and of transportation of baggage or merchandise upon the aircraft of Panagra from such ports-of-call to all points to which the services of Panagra or any of its affiliated or subsidiary companies now exist or may in the future be established. Such services shall include the keeping of all necessary records covering reservations for transportation and cancellations thereof, and correspondence necessary thereon, and the preparing of all such papers as may be necessary in connection with the transportation of passengers, baggage and air mail, including the weighing of same, and the issuance of receipts and or the securing of receipts therefor and, in general, all such traffic duties as usually appertain to the arrangements and relations with the public in connection with the operation of an air transport service, including (but this enumeration is not intended to be exclusive), the solicitation, receipt and despatch of passengers, merchandise, air mail and special flights, and when and where necessary, the entry and clearance of, the foregoing, together with the aircraft and flight crews of Panagra, the protection and safe-keeping of cargo and air mail at the airports of Panagra, and the handling of all advertising and publicity.

As compensation for Grace's services provided in this paragraph, Panagra shall pay Grace a fixed fee of $7.50 per plane on weekly service and $5.00 per plane on semi-weekly service. At all over-night stops, the above fees shall be increased by $5.00 per plane. At all scheduled ports-of-call involving entry into or clearance from a country by Grace for Panagra's aircraft, etc., the above fees shall be increased by $2.50 per plane. Panagra shall also pay Grace a commission of five per cent. (5%) upon the sale of all passenger tickets (including special flights) and merchandise booked for transportation, at each such office where the arrangement provided in this paragraph is applicable. In addition to the

foregoing fees, Panagra shall reimburse Grace for its

G066096

GR-11268

[fol. 157] actual proper disbursements for landing-fees, Customs charges, warehouse charges, not incidental to the carrying out by Grace of the routine duties herein specified, advertising, cables, and all out-of-pocket expenses, provided that, with the exception of cables, landing-fees, Customs charges and warehouse charges, no expenses shall be incurred without the previous authorization of Panagra.

Grace shall furnish, at its own expense, all personnel necessary for the performance of such services, it being understood that such personnel shall be employees of Grace, responsible to and paid by it, except at points where Grace has no office. At such points, Grace will arrange that the services herein required be furnished by outside agents satisfactory to Panagra, and Grace will pay the compensation of such sub-agents out of Grace's compensation herein provided.

3. Grace shall handle the receipt on behalf of, and accounting to, Panagra of all funds collected in connection with Panagra's business, and the handling of such funds and accounting therefor shall be performed in accordance with the attached separate memorandum.

4. At each regular port-of-call of Panagra where Panagra has an employee-representative performing certain traffic functions, and Panagra notifies Grace to this effect, the services of Grace as agent shall consist of only the following: Grace shall furnish such employee-representative of Panagra with desk-space in Grace's office and, in the event of the absence from the office of such representative of Panagra, shall answer any inquiries from the public regarding the schedules and rates of Panagra's transportation services and shall receive payment for tickets and other transportation services and also receive forms (the blank forms to be furnished by Panagra) containing the necessary information filled in by the customer, and turn over such payments and filled in forms to Panagra's employee-representative. Grace

shall not be required to keep any records or handle any correspondence pertaining to such transportation services, nor have any responsibility in connection with any papers or documents required in the entry and clearance or receiving and despatching of any passengers, baggage, merchandise or air mail. Grace agrees to place posters furnished by Panagra in conspicuous places in its office or premises and will prominently display and keep readily available to the public such folders, pamphlets, booklets and other literature as Panagra may furnish for distribution by it. Grace will, at its own expense, display prominently at the entrance or upon the

G066097

GR-11269

[fol. 158] door of its office and premises, a sign or signs announcing to the public that the Agency of Panagra is therein located and that Grace is the Agent of Panagra for the sale of its tickets and other transportation services.

As compensation for its services provided in this paragraph, Panagra will pay Grace a commission of five per cent (5%) on the sale of all passenger tickets (including special flights) and cargo booked at each such office where the arrangement provided in this paragraph is applicable.

All amounts payable to Grace by Panagra hereunder for its fees, commissions and disbursements shall be payable monthly. Grace shall present detailed statements covering such items for each month to Panagra's designated representative on or before the tenth day of the following month, and Panagra will pay Grace therefor not later than the twentieth day of such following month, but in the case of delay by Grace in the presentation of any such statements, payments thereof shall in no event become due and payable prior to ten days after the presentation of such statements. Interest at the rate of six per cent (6%) per annum will be charged by Grace on all such disbursements made by Grace from the date made, and on fees and commissions from the date when the same are due and payable.

as hereinabove provided. Any credit balance of Panagra with Grace will be credited with interest at the same rate.

It is understood that Grace will incur no liability or responsibility to third parties merely by reason of its acting as Panagra's agent hereunder, on account of the operations of Panagra, and Panagra agrees to fully indemnify and hold Grace harmless from all such demands and expenses, including counsel fees for defending any such claims and demands.

The agreement covered by this memorandum shall become effective on the first day of January, 1930, and shall remain in force for a period of twelve (12) months thereafter.

Mr. H. J. Roig, Vice President,
W. R. Grace & Co.,
7 Hanover Square,
New York, N. Y.

Dear Mr. Roig:—

I am enclosing an informal memorandum in connection with the draft plan of reorganization for Pan American-Grace Airways, Inc., received from you last week, also draft of a proposed agreement between Pan American Airways System and Pan American-Grace, covering supervisory services. I sent you a preliminary draft of our ideas of an Agency Agreement covering services by W. R. Grace & Company on the West Coast.

I am also attaching supplementary memorandum covering our ideas of the method of financial control and account-

ing procedure we should adopt in Pan American-Grace to afford the proper control of the operations of this Company.

During the past several days I have asked the Pan American Accounting Department to summarize, by departments, the approximate monthly cost of conducting services under your Agency Agreement proposal, received February 2nd. Also for comparative purposes, an approximate summary of the actual present cost to Pan American Airways, broken down by departments, of conducting service on the Porto Rico, Trinidad and Paramaribo route, where service is rendered on a once a week basis, under service and schedule conditions very similar to those now obtainable on the West Coast.

I think the figures will be interesting to check over before our meeting at 2:30 tomorrow.

Sincerely,

(sd) J T Trippe

Government's Exhibit 50

PAN AMERICAN AIRWAYS, INC.

General Offices—122 East Forty-Second Street—
New York City

Office of The
President

April 9th, 1930.

Mr. H. J. Roig, Vice President,
W. R. Grace & Company,
7 Hanover Square,
New York, N. Y.

Dear Mr. Roig:

Referring to your memorandum of last week outlining a plan of organization for the Pan American-Grace Air-

ways, Inc., I would summarize, for your consideration, certain thoughts in reference to several of the numbered paragraphs as discussed over the telephone, and in several later conferences between us.

Paragraph one provides for the Company retaining its present Board of Directors, together with an Executive Committee of two. This small Executive Committee would appear desirable in view of the fifty-fifty division of stock ownership, making possible Executive Committee meetings at frequent intervals and assuring the availability to both stockholders of full information covering the Company's operations at all times.

In paragraph two, the plan contemplates closing the New York Office of the Pan American-Grace Airways, Inc., and dismissing its personnel. Separate books and records of the Company would be maintained, I assume, in one small room at the office of the Pan American Air-Out ways System. With reference to retaining Mr. Vidal as Comptroller, I would suggest, for your consideration, the attached plan of financial control and accounting procedure, which would contemplate our removing to the proper point on the Airways, the books containing accounts having to do with field operations, under the personal control of Mr. Vidal as Assistant Comptroller.

The monthly statements to Directors and Operating Executives now in force in Panagra are most unsatisfactory, to my mind. I would suggest the desirability of installing the system outlined in the attached memorandum headed "Plan of Financial Control and Accounting Procedure" modelled after Panair's. Should you wish to personally inspect the monthly financial reports and statistical information now available to the Directors and officials of Pan American Airways System covering the previous month's

[fol. 161] operations on or before the sixteenth of the following month, I am sure you will agree with the above observation. Furthermore, the cost of securing this information to Panair has been less that $2.50 per month at ports of call, and less than $15.00 per month at overnight stops on routes where one trip a week schedule is in effect.

Paragraph three refers to the supervisory services of Pan American. I would suggest these be determined by the following yard stick, and made available to Pan Grace at actual cost, without profit to Panair. The length of airways flown by Pan Grace in relation to the rest of the System would be determined each month: the number of ship miles flown by Pan Grace in relation to the rest of the System would be determined each month. The mean of the above two fractions would determine the overhead monthly charges to be allocated to Panagra. No Foreign Department representatives or attorneys in the foreign field would be included and should the Directors of Panagra accept the proposal of Pan American to Mr. MacGregor to operate their entire Communications System, including, in general, the supplying of both ship and ground operators and the leasing and maintenance of apparatus at *10¢ per airplane mile*, the services of Pan American's Communications Engineer and his assistants would also be struck out of the Pan American supervisory charge. I am attaching a draft of proposed resolution relating to Pan American supervisory charges.

Referring to paragraph four, I do not believe that the work of the Grace Agents on the West Coast, or, for that matter, any other agents of the Company in Argentine or elsewhere, should be directed in any way by W. R. Grace & Company here. Their agency activities before the Government should be directed, I believe, by the Executive Department of the Company. Their activities in clearing and fueling ships should be directed by the Operating Department of the Company. Their activities in the solicitation of traffic should be directed by the men in responsible charge of coordinating in the traffic solicitation activities of the Company. I believe, therefore, that Mr. Roig's services as Chairman, and as a member of the Executive Committee,

should be handled on a separate fee basis in proportion to the amount of time made available to the Company.

Referring to paragraph five, I believe that the Executive Committee and/or the full Board, should be in touch with all corporate activities.

With reference to paragraph six, it would be expected that Messrs. Trippe and Roig would be in more or less constant touch with each other and that both would receive copies of cables and important letters of every description.

G038680

GR-6688

[fol. 162] With reference to paragraph seven, most certainly Mr. Harris should be asked to make a short trip to both New York and Miami, immediately after placing into effect the plan of organization. It should be understood, however, that the President of the Company would be held entirely responsible to the Executive Committee and Directors for the proper management of the Company and that Mr. Harris and all other employees should understand that there is one single directing head and not two or more directing heads.

With reference to paragraph eight, a budget should of course, be submitted by the President as soon as practicable and thereafter every six months. The budget would be developed after consultation with executives in charge of operations and other officials concerned. The Board will authorize such of these expenditures as they deem best, or such additional expenditures as they consider proper. No capital expenditures will be made except those so recommended and approved by the Board.

Referring to paragraph nine. The President will also submit, as soon as practicable after the installation of the plan of organization, a budget covering operating expenses and expended income for the ensuing three months period. I am of the opinion that the paper work involved in budgeting operating costs and incomes for periods shorter than three months, would cost more than the information would be worth either to the Directors, Executive Committee, or officials concerned. It might be well that an income and

expense budget for a six months period would be in order after the first few months, after a proper system of Company organization has been established.

Paragraph ten has to do with the financial control. My views have been covered under the separate memorandum on this subject, previously referred to.

In paragraph eleven, you refer to possible working arrangements in the Argentine. I am of the opinion that some arrangement should be worked out here and that both Pan American affiliated company Alas and Panagra would mutually benefit thereby. I believe that neither W. R. Grace & Company or Pan American should be expected to perform services outside of those covered by specific contracts.

In paragraph twelve, you suggest a fixed fee per month for both W. R. Grace and Pan American Airways, Inc. I suggest, for your consideration, a fee with set limits, as outlined in the Pan American supervisory service draft,

G038681

GR-6689

[fol. 163] based on a definite yard stick—miles of route operated and ship miles flown in the case of Pan American, and on an agency basis with set fee plus commission, in the case of W. R. Grace & Company, as submitted in our draft last week.

Very truly yours,

/s/ J. T. T.

April 10, 1930

MEMORANDUM FOR MR. ROIG:

In more than one instance, on matters of importance affecting both Pan American Airways and Pan American Grace Airways, the former, without consulting Pan American-Grace Airways, have carried negotiations with the Post Office Department so far that it would have been difficult to have altered them.

As specific examples, I might cite the general reduction in airmail rates and the revised schedule. In respect to the former, an entire new rate schedule affecting not only mail to the United States and the Canal Zone, but also between foreign countries, was approved by the Post Office before Pan American-Grace was consulted. My own opinion is that the rates from South America are too high, but it is naturally more to the interest of Pan American Airways to keep these rates high as they have to carry everything which we do plus whatever they accumulate en route. In respect to the schedule, it was of course necessary to make it connect with the various services of Pan American arriving at the Canal Zone from Brownsville and other points and, on the whole, I consider the schedule as established the satisfactory one. I doubt, however, if any real effort was made to prepare a schedule which would be helpful to Pan American-Grace.

RELATIONS
PAN AMERICAN AIRWAYS AND PAN AMERICAN GRACE AIRWAYS

At the meeting at Mr. Hoyt's home in January and subsequent meetings of the Directors, it was definitely agreed that the original policy of having Pan American Airways and W. R. Grace & Co. rendering each the maximum service of which they were capable at New York and in the countries traversed by the Pan American-Grace Airways should be pursued and developed.

After the meeting of January 10th at a conference between Messrs. Hoyt, Trippe, Whitney, Roig and Patchin, it was agreed that a change should be made in the executive management, that an agency contract with W. R. Grace & Co. and a definite arrangement made with Pan American Airways for technical and other services at New York should be immediately drawn.

Subsequently an alternative proposal was brought under discussion but about February 1st, Mr. Trippe was advised that this was unacceptable to Grace. Mr. Roig sought to advise Mr. Hoyt to the same effect only to find that he had left for the West Indies. Shortly thereafter Mr. Roig submitted to Mr. Trippe an agency contract for W. R. Grace & Co. to act as agents along lines discussed from the time when the Pan American-Grace Airways was organized. Mr. Trippe has submitted no comment or modification of this agency agreement, but last week submitted a counter proposal contemplating but little more than an option on the part of P. A. A. to avail of the services of the Grace organization when convenient and placing upon W. R. Grace & Co. the responsibility of governmental negotiations and regulations without giving Grace Houses any authority in

[fol. 166] the management of the company for whose interest it is expected to be responsible before the various governments.

During the last two months Pan American Airways has practically withheld service and cooperation in the following particulars:

RADIO—Mr. Trippe has declined to provide the Trans-Andine or other planes with Pan American Airways radios unless Pan American-Grace should agree to allow Pan American Airways to install and operate all radio communication throughout Route #9. He has failed to submit, upon request of other Directors of Pan American Airways, estimate of what such service would cost. He has stated that he was unwilling to put Pan American Airways radio sets in the planes because such sets could not possibly be operated satisfactorily without the entire system being installed by Pan American Airways. Several of the Governments have made it clear that they will not permit the installation of ground-sets by Pan American-Grace or anyone else in view of radio being a Government monopoly. Pan American Airways provided Lieutenants White and McMullen with a Pan American Airways set for use on their five day Newark-Buenos Aires flight. Lt. White has stated it gave good service and communication with various government radio stations down the West Coast. We are informed that Mr. Summers caused a Pan American Airways radio set to be installed in a Trans-Andine plane and that it maintained good communication with Buenos Aires throughout its flight. It has since been taken out by Mr. Summers.

GO66070

PAN AMERICAN AIRWAYS TECHNICAL AND ENGINEERING SERVICE—At the Directors meeting on January the desirability of having Mr. Priester make GR-11242

[fol. 167] a trip to the West Coast was discussed and there was general agreement that it would be a good plan. Mr. Trippe has since stated he would not let Mr. Priester pro-

ceed on such a journey unless there was some arrangement under which Pan American Airways would have definite authority over Pan American-Grace operations. Mr. Trippe has stated repeatedly that Messrs. Priester and Gledhill are in a practical state of revolt against rendering any service of more than routine character to Pan American-Grace and that it is difficult for him to get them to do anything.

INCREASED SERVICE ON THE WEST COAST—Mr. Trippe told Mr. Patchin that he had told Mr. MacCracken of Nyrba that he, Trippe, would take no side in the controversy as to whether additional appropriations should be devoted to increasing the service on the West Coast to two trips a week or providing new service on the East Coast. He told Mr. Patchin he felt at entire liberty to work against the allocation of these appropriations to the West Coast because Pan American Airways has a 100% interest on the East Coast as against 50% on the West Coast. He has repeatedly stated that he could not support the effort to hold these appropriations to the West Coast because he would thereby seem hostile to the East Coast service. He has said that the alternative proposition he had made to Pan American-Grace to merge with Pan American Airways completely cleared his skirts of any blame in case he opposed the Post Office Department's declared intention to increase the service via the West Coast route. He has had frequent conversations with Mr. MacCracken who pointedly avoids discussion with anyone exclusively interested in Pan American-Grace. The whole burden of

GR-11243 G066071

[fol. 168] supporting the increase of service on the West Coast has fallen on Grace Directors.

ACCOUNTS—Mr. Trippe has failed to comply with repeated requests to submit a bill for Pan American Airways services during the year 1929, although Mr. Patchin in accordance with the instructions of the Directors, has passed on all pending bills rendered by W. R. Grace & Co. and Pan American-Grace Airways. Although Pan American-

Grace has agreed to pay one-half of Mr. Summers salary and experses chargeable to negotiations and representation in Argentina, Mr. Summers has apparently been subject to no restriction and his salary and expense account in the last part of 1929 was running at the rate of $5,000 per month without adequate or convincing supporting details.

INEQUITABLE PROPOSALS—Mr. Trippe proposed to Mr. Patchin that Pan American-Grace should contribute an amount, not specified, to offset a supposed or anticipated loss to Pan American Airways in making direct flight across the Caribbean in order to shorten the through schedule. He also proposed to Mr. Patchin that Pan American-Grace should share a portion of the expenses of the East Coast trip of Mr. Rihl if the frequency of service on the West Coast should be increased but no charge should be made in case Pan American Airways should decide to work for the diversion of appropriations from the West Coast to the East Coast.

GOVERNMENT'S EXHIBIT 53

April 22, 1930

MEMORANDUM FOR MR. IGLEHART:

PAN AMERICAN-GRACE AIRWAYS
PLAN OF ORGANIZATION

Paragraphs "3" and "4" of my memorandum provide in part as follows:

Paragraph "3"

> "Mr. Trippe as President will be in responsible charge of operations including flying, equipment, maintenance, ground stations, and everything directly connected with flying".

Paragraph "4":

> "Mr. Roig as Chairman, in addition to presiding at Directors' meetings, will be in general charge of the work of W. R. Grace & Co. as agents whose functions shall be as outlined in the form of agency contract submitted to Mr. Trippe on January 31, 1930".

In case the compromise plan is adopted, it would be very helpful if you in your talk with Mr. Hoyt can help to get him more fully aboard on the theory back of the two sentences above which constitute the heart of the whole plan. The essence of the plan is that Pan American's activity, through Trippe, is to be limited to the points mentioned in Paragraph "3" and that our activities are not to be limited to that of mere traffic agents but that we are to have general charge of the commercial end of the business in South America.

In other words, as I see it, if Trippe and I were partners in this business we would presumably divide the work be-

[fol. 170] tween us by his taking charge of the flying end and I of the commercial end. This is what I think we should do under the proposed plan of organization, the only difference being that Trippe has back of him on the flying side the Pan American organization and I have back of me on the commercial side, the Grace Coast organization.

But this means that the Grace agency contract be in the nature of a partnership agency and not merely an employee agency. The same, of course, applies to the Pan American contract. The difficulty I have with Trippe is that he sees Pan American in the light of the *sole* owner of the business with W. R. Grace & Co. as an outside agent just as we might employ Boyd Brothers at the Canal Zone, for example, or Delfino in Buenos Aires. There is nothing in my plan at all unless there is a large element of mutuality

in it and unless it is carried out in a true partnership spirit, Trippe and myself being the personifications of the two owners of the business.

April 22, 1930.

MEMORANDUM

PAN AMERICAN-GRACE AIRWAYS

Mr. Hoyt came down to see me today at my request.

I explained to him that after an absence of some months I found the discussions going on with his group regarding the Airways business were taking a course that might lead to confusion and were apparently not leading to any beneficial or practical results. I recalled the fact that he, in his first meeting with me, suggested that we should become partners in this business because, on the one hand, his group could contribute to it a knowledge of the air business, whereas our group could contribute a knowledge of South American business, and that working together we should be able to develop a successful enterprise.

I recalled the fact that in our second conversation he had stated to me that their theory of running a business was to select a competent man and put him in charge of the business and let him run it, giving him full support and full confidence. He said at that time that their theory was to give such a man not only a salary but also an interest in the profits. At the time I agreed to this policy and Mr. MacGregor was selected for the post of General Manager. I stated that Mr. MacGregor for one reason or another had made a failure, and Mr. Hoyt attributed this to a swelled head.

I told him that I thought we ought to endeavour to find a man to take Mr. MacGregor's place and he suggested that we should bring up Harris and look him over as to fitness for the post. I told him I agreed to this provided it was understood that if we found him competent, we would put him in charge and let him determine to what extent he could use the services of Pan American Airways and what was a reasonable compensation for those services, in the same way that he was to decide to what extent he could use W. R. Grace & Co.'s services in South America and to determine what a reasonable compensation for these services was.

Mr. Hoyt then referred to the memorandum which Mr. Roig had drawn up as to a modus operandi. I replied that Mr. Roig's plan in principle was perfectly sound, but it involved the two partners working in complete harmony and that up to the present time they had not been able to do this. He replied that Mr. Trippe is a very difficult man to deal with, but that he is competent and that he felt that, if we could arrive at a basis, that Mr. Trippe, once having accepted that basis, would not be difficult to deal with.

GR-11277. G066105

[fol. 172] I explained I felt that we ran against a fundamental difficulty due to the fact that Mr. Trippe conceived of the Pan American-Grace Airways as a mere department or subsidiary of Pan American Airways and that he looked upon it in the same way as he looked upon his Mexican service or his Caribbean service, and would not be satisfied unless he dominated the business in the same way that he dominated them. Mr. Hoyt replied that Mr. Trippe was under this misconception, and that this point would have to be cleared, but he thought to might be cleared by bringing Harris up here and having him, in case we decided him to be competent, undertake the more or less independent administration of the business, using Mr. Roig's suggested basis of direction. I told him that I rather feared it would be difficult to work out Mr. Roig's basis in practice, as it seemed that to get Mr. Trippe to agree to the exact spirit

of an agreement was seeking a millennium. I told Mr. Hoyt, however, that if he felt this could be worked out by having Mr. Harris come up here, I was entirely agreeable to doing so, but that I wanted to have it clearly established that whatever arrangement was worked out for the administration of the business, it was to be an independent administration and in no sense to be a department of their business any more than it was a department of ours. Mr. Hoyt agreed definitely to this understanding.

In leaving, Mr. Hoyt stated that he had been discussing with Curtiss the idea of taking over their interest in the Faucett business.

MEMORANDUM

PAN AMERICAN-GRACE AIRWAYS

Mr. Hoyt telephoned to me today stating that he wanted to see me, and came down at 2.30 p.m.

He said that, after our conversation of April 22nd, he saw Mr. Trippe at once and told him of our tentative understanding. Mr. Trippe was very much upset and claimed that Hoyt was interfering and that if he had left him (Trippe) alone he would have been able to work out with Roig in two hours that afternoon a definite understanding based on Roig's memorandum that would have been quite practicable of carrying out. Hoyt replied to him that even if he (Trippe) had reached such an understanding, I would not have agreed to it for two fundamental reasons.

1) I was definitely opposed to dual management, particularly in view of the fact that the two elements that composed it had not up to the present time been able to work in the close harmony in which two successful partners must necessarily work.

2) I was definitely opposed to Pan American-Grace Airways being run as a department of Pan American Airways.

Trippe replied that he felt that he at least should have been given an opportunity to place his case before me and he was satisfied that he would have convinced me of the merit of it. Hoyt suggested then that he (Trippe) should come down and see me at once, but Trippe advised that, as he was sailing for Europe, this was impossible and that he would like to have the matter left until his return.

I made it clear to Mr. Hoyt that Trippe's contention that he would have reached a basis of understanding with Roig in two hours and that this understanding would have been a practical basis of operation, was entirely erroneous, and, although Hoyt did not definitely state so, he gave me the impression that he entirely agreed with me.

I explained to Hoyt that all of my dealings had been with him, that I wanted to continue my dealings with him; furthermore, that my one conversation with Trippe had given me the impression that it was quite an impractical thing for me to start any negotiations with him. Hoyt sympathized with this view, but said that he thought it would help in reaching an understanding if I would at least give

GR-11279 G066107

[fol. 174] an hour or half an hour of my time to listen to Trippe's story, and then stating in a pleasant but very determined way the attitude that we propose to take. He said that he thought if I did this, they would be able to bring Trippe into line. I told him that I was willing to do this on one definite understanding and that is that my future dealings are to be with him, i.e. Hoyt, and that he would assume the task of getting his associates into line with whatever policy we agreed upon.

I explained to him that while interminable and futile discussions were going on, the business was not being managed, and I told him that our Houses on the Coast have not as yet really begun to contribute to the success of the enterprise the effort that we had agreed to exert when we originally undertook the business with him. I told him I had great confidence in the future of this business, but that it must be managed and that we could not afford to delay even another week in beginning an effort to gradually throw about the business the men and the influences necessary to push it ahead. I explained to him that I had suggested to Mr. Roig this morning that he should go down to the Coast at once and begin to study the business at close range to form a definite opinion of Harris and his work, to study the opportunities for building up the business and controlling it, and prepare a plan for getting all of our Houses to working in close synchronism with the management of the business; and, I suggested that he (Hoyt) should name someone from his organization to accompany Mr. Roig on the understanding that they were to work out a plan which, though not definite, would in practice be confirmed on their return to New York. He said that he did not know who he could send and feared that if he suggested to Trippe that they should send someone, he would object or he would give instructions to that man as to what plan he was to lay out and would tie his hands to such an extent as to make the success of the trip impractical. He said that the only man who might go down with a free hand was Whitney, but that he was inexperienced and would probably have to take a competent man with him. I suggested that he should consider this idea as I was afraid that even after Trippe's return, discussion would go on for a long time before a definite understanding was reached and that it meant a great prejudice to the business to lose this time, and that it was very dangerous to the business to allow it to continue in its present loose administration. He said that he would talk the matter over with Whitney at once and see whether anything practical could be worked out regarding my suggestion.

GR-11280

[fol. 175]

GOVERNMENT'S EXHIBIT 56

SANTIAGO, 18th. August 1930

MEMORANDUM TO ALL CONCERNED

All general policies with regard to PAN AMERICAN GRACE AIRWAYS INC. are determined in our New York office and are enunciated either direct by Mr. MacGregor or through the undersigned in Lima. As far as possible the local divisions will have a free hand in working out their local problems, based on the general policies laid down by New York.

In order to definitely provide for the proper allocation of local responsibilities and duties as well as to reduce to a minimum any questions which may arise, the following duties and responsibilities are allocated to the companies and persons connected with PAN AMERICAN GRACE AIRWAYS, INC. organization operating in Chile:

W. R. Grace & Co. will be responsible for the following *local* functions:

1) Agencies and representations
2) Negotiations
3) Traffic, including mail, cargo and passengers (When carried)
4) Advertising
5) Purchases, including checking of presupuestos
6) Accounts, including checking and payment of all income and expenditures
7) Legal representation, including—
   a) Registration of PAN AMERICAN GRACE AIRWAYS INC. to do business in Chile, if necessary
   b) Determination of Governmental fees and taxes
8) Employment of personnel except operations personnel.
9) Securing of requisite office space, furniture and office personnel where necessary.

10) Cables, telegrams and telephones.
11) Distributing all PAN AMERICAN GRACE AIRWAYS INC correspondence and checking to make sure that *all* correspondence is promptly answered with copies to all concerned.
12) All local insurance
13) Movements of aircraft, except test flights

The necessary personnel will, for the carrying out of these functions, be employed by W. R. Grace & Co. for the account of PAN AMERICAN GRACE AIRWAYS, INC. Such employees will be under the direct supervision and control of a Grace representative having Power of Attorney for PAN AMERICAN GRACE AIRWAYS INC. Up to 50% of this representative's salary will be payable by PAN AMERICAN GRACE AIRWAYS INC. to W. R. Grace & Co. for his work in charge of the various functions allocated to W. R. Grace & Co.

PAG-W-452

W455

[fol. 176] PAN AMERICAN GRACE AIRWAYS INC. will be responsible for:

1) Operation and maintenance of aircraft and motors.
2) Spare parts and supplies
3) Operation and maintenance of PAN AMERICAN GRACE AIRWAYS INC automobiles
4) Care of hangars, both of PAN AMERICAN GRACE AIRWAYS INC and/or rented ones.
5) Efficiency of aircraft movement
6) Employment of operating personnel
7) Efficiency of operating personnel
8) Appearance and conduct of pilots and flight mechanics while on duty
9) Proper maintenance of all operations reports and record and prompt forwarding of necessary operations reports to all concerned
10)

PAN AMERICAN GRACE AIRWAYS INC personnel will at all times maintain complete co-operation with W. R.

Grace & Co. employees or representatives engaged in PAN AMERICAN GRACE AIRWAYS INC. work.

It will be the duty of both PAN AMERICAN GRACE AIRWAYS INC employees and W. R. Grace & Co. employees to report in writing to PAN AMERICAN GRACE AIRWAYS, INC., New York, with copies to PANAIR, New York, W. R. Grace & Co., New York and the undersigned in Lima, a weekly summary of the general situation as regards PAN AMERICAN GRACE AIRWAYS INC interests, activities and plans. There will also be reported any points of discussion or differences of opinion on questions of policy on any other questions that may arise in the minds of any one group with regard to the functioning of the other group. Since neither organization has control of the other, the best way to further the interests of PAN AMERICAN GRACE AIRWAYS INC, with the minimum friction is to attempt to visualize the problem presented by the general situation (including international as well as local problems) and to co-operate in every way possible in order that the PAN AMERICAN GRACE AIRWAYS INC may become a self-supporting organization based upon a solid economic foundation.

PAN AMERICAN-GRACE AIRWAYS, INC.

H. R. Harris
Vice President

GOVERNMENT'S EXHIBIT 57

LETTER NO. —2—
W. R. Grace & Co. New York

ORIGINAL AIR MAIL LETTER

Regular Mail Copy Follows

New York, September 25th, 1930

H. J. Roig Esq.
Pan American-Grace Airways Inc.
Lima, Peru.

Dear Roig:

Met with Trippe September 22nd to discuss the bills, but made little progress, and this will be continued Friday when we will also have a meeting on the Chilean situation.

Trippe led the conversation to management arguing that PanAir should take over the administration of Panagra in the interest of economy, avoidance of duplicate effort etc., etc. I replied we considered the question settled when the separate company was organized and that the results which were now leaving a profit proved that method the most satisfactory and economical. I pointed out that on this basis the enterprise promised to be permanently successful which was its object, but that with the present costs of PanAir, being substantially higher than Panagra, the results would be disastrous. You can imagine his line of argument against this, namely, that the Panagra results were due to inadequate organization and operating standards, including lack of radio. When I replied that the satisfactory performance of all divisions except the trans-Andean in bad months proved that operating standards could not be so faulty as he alleged, he said that "Washington" was concerned over the general conditions of the service on Route #9.

I replied this was surprising because none of the many officials with whom I had frequently discussed the service had made any complaints whatever, on the contrary, the

Post Office Department seemed quite well satisfied. I pressed him to be specific. After a number of general statements he stated that Clarence Young, whom he saw last week, had expressed himself very strongly, alleging inadequate operating standards and stating that some of the inspectors had asked to be relieved of the responsibility of passing on the equipment. (I suppose this refers to Wooten). I told Trippe much of this was doubtless the result of unfavorable atmosphere created by Nyrba and others, including some in PanAir, that such conditions as might be justly complained of were rapidly being remedied and that this was one reason why you had wished him or Whitney to go to the West Coast with you and why, long ago, we had wanted Priester or himself to go for the purpose of inspection.

This conversation went on for some time, pleasantly enough, but without producing anything else new. To me it indicated the usual effort to push things along toward Trippe's never forgotten goal but I made clear that our attitude was entirely unchanged.

As MacGregor saw Young at Washington last week I asked *him* what Young said about our service. MacG. replied that Young said he had some reports which were unfavorable, whereupon MacG. explained the situation as fully as he could, emphasizing the performance record and stating that Panagra "Had never had an engine failure." He said he thought he left Young satisfied, particularly as he designated Cole to be Department's inspector of our equipment.

GR-353
10/18/54 Omit

G 1007

[fol. 178] While this solves the difficulty of getting inspection it seems to me it might possibly be awkward in case of controversy arising from any serious accident.

MacGregor says that Cole has been sending in substantial requests for supplies. Cogswell says Panagra has $50,000. worth of spare parts, tools, etc. in Lima alone ex-

clusive of motors. Certainly the plane and motor equipment is ample as I calculate the planes are averaging less than two flying hours per day.

I think Panagra management ought finally to refutes the haywire reproach by assembling at the New York Office evidence in contradiction of disparaging statements and generalities that are false and by correcting any conditions that may be at fault. I suggested to MacGregor that he submit a performance report to the next Board Meeting showing how well the schedule has been maintained.

While the New York Office has photographs of the planes, it would be well to have some more showing planes arriving and departing from landing fields, the embarkation of passengers, new hangars in course of construction and anything else that shows progress in the provision of facilities. Photographs of the pilots and mechanics *in uniform* would make a good impression. Mr. MacG. says that an artist who recently went over the line spoke very highly of the attention given the passengers by the stewards on the Fords. Photographs of our store house showing the spare motors and parts would be useful. Duplicates of the literature and posters already sent here I can use to advantage in Washington.

Trippe said he had heard reports that we were considering selling our interest in Panagra and referred to a remark you made about our having an inquiry from a possible buyer. Also, "Didn't I think" that each side ought to give the other the first call in case of an opportunity to sell. I replied that, in general, I thought one's partner ought to have prior consideration. He said he thought there ought to be an agreement to this effect and I said that a hard and fast option was something else again on which I could express no opinion.

We are having a Directors' Meeting tomorrow to consider the Chilean situation. Trippe said he thought that Bihl, if given the opportunity, could work out a very much better settlement in Chile.

I hope we will make some progress with the bills before you get to Chile, if not, I will bring them up in the next following Directors' Meeting and request that the Directors as a committee of the whole dispose of them.

We are obtaining letters from various prominent patrons of Panagra testifying to the usefulness of the service to their business. Similar letters from Americans and others interested in South America would be helpful. Mr. Van Deusen of the Banco Central of Chile told me this week that the Vice President in charge of the National City Branches in South America is moving his headquarters to New York as he finds he can better supervise them from here with the air mail and the telephone. West India Oil Co. says air mail is a wonderful help to their business. We are endeavoring to make up an impressive record with such letters.

Very truly yours,

/s/ R. H. Patchin

GR-354

G 1008

[fol. 179]

Government's Exhibit 58

1930

Under date of August 13, 1928 Mr. Trippe submitted the attached Draft Memorandum on West Coast Operations (Exhibit A).

Under date of August 31, 1928 we wrote Pan American Airways, Inc. as per letter, copy attached (Exhibit B). Subsequent correspondence modified this to the extent that if we did not take at least 10% of the stock of the new company our interest in the venture would be in the form of stock of Aviation Corporation of the Americas.

On September 4, 1928 Peruvian Airways Corporation was formed. About the middle of September, 1928 Mr. Harris, Vice President and General Manager of Peruvian

Airways Corporation, left for Peru to commence service there.

About this time Mr. Trippe submitted a "Preliminary Estimate of Proposed Airline Services between Cristobal, P.C.Z., and Valparaiso, Chile" as a West Coast division of Pan American Airways, Inc. System. This showed, on a three times weekly service, a capital investment of $1,689,990 and annual operating costs of $1,971,900, or $1.69 a mile. Copy of the portion of such estimate for "Executive and General Expense" is hereto annexed (Exhibit C).

Pan American-Grace Airways, Inc. was incorporated on January 25, 1929 under the name of South American Airways Corporation, the name being changed on February 21, 1929 before the company commenced business. Messrs. Patchin and Trippe were elected Vice Presidents, Mr. Cogswell Secretary and Mr. Caine Treasurer.
GR-11210 2/10/55 JPC

G066038

[fol. 180] On April 3rd, 1929 Mr. Iglehart had a conference with Mr. Hoyt relative to the employment of Mr. MacGregor and his management of the line. Memorandum of conference is attached and marked Exhibit C-1. On April 8, 1929 Mr. MacGregor was elected Vice President and General Manager, Mr. Harris Vice President and Mr. Jacob Assistant Vice President. On April 23rd Mr. Vidal was elected Comptroller. Immediately following the election of Mr. MacGregor the following cable was sent to Mr. Harris:

"Following for Harris from directors Pan American Grace Airways Inc. we have appointed J D MacGregor executive head of Pan American Grace Airways Inc. with title Vice President and General Manager and headquarters New York J D MacGregor retires from Pan American Airways to accept this position sentence as mark appreciation your highly satisfactory service directors appoint you Vice President Pan American Grace Airways Inc. and increase your salary to $12,000 per year sentence J D MacGregor will reach

Cristobal about end of April and will wish to confer with you there sentence our intention you take charge of flight operations sentence it might become advisable you be stationed canal zone in that case have you in Peru anyone capable act as flight superintendent Peruvian Airways Corporation under your supervision from Cristobal"

After his election it was determined that Mr. MacGregor should make a trip to South America and before going he submitted to the Directors the annexed memorandums (Exhibits D and E).

In May, 1929 we prepared drafts of agreements with Panair and W. R. Grace & Co., as per Exhibits F and G, but there is no record of their having been submitted to Panair. As the agreement with W. R. Grace & Co. was to be used for discussion with the West Coast Houses, it presumably was not submitted to Panair.

Mr. MacGregor left for South America in May, 1929 GR-11211

G066039

[fol. 181] and returned at the end of the year. On January 6, 1930 he submitted an estimated budget for the year 1930 with written report based thereon. Extracts of such report in reference to services of W. R. Grace & Co. and Pan American Airways, Inc. are annexed (Exhibit H). At a conference at Mr. Hoyt's house in the evening the principal discussion was as to the authority of the Grace Houses, Mr. Trippe taking the position that they should have nothing to do with operations and further that a separate organization on the coast was necessary. At this meeting it was definitely agreed that the original policy of having Pan American Airways and W. R. Grace & Co. rendering each the maximum service of which they were capable at New York and in the countries traversed by Pan American-Grace Airways, should be pursued and developed. Under date of January 18, 1930 Mr. Roig sent Mr. Hoyt a tentative chart of organization which gave the agents no control over flying operations (Exhibit I).

Subsequently, at a meeting between Messrs. Roig, Patchin, Hoyt, Trippe and Whitney, it was agreed that a change should be made in the executive management; that an agency contract with W. R. Grace & Co. and a definite arrangement with Pan American Airways for technical and other services at New York should be immediately drawn. See Mr. Patchin's memorandum "Relations Pan American Airways, Inc. and Pan American-Grace Airways, Inc. (Exhibit J) which was made about April 15th, 1930.

Under date of January 31, 1930 Mr. Roig wrote Mr. Trippe enclosing proposed W. R. Grace & Co. agency agreement as per Exhibit K.

GR-11212

G066040

[fol. 182] Shortly thereafter Mr. Trippe suggested that the capital of the corporation be increased to $2,500,000 and that Panagra be run as a division of Panair. Mr. Trippe was advised that this was unsatisfactory.

Letter from Mr. Roig to Mr. Iglehart of March 4th, 1930 (Exhibit L) outlines the situation at this time.

Under date of March 5th, 1930, Mr. Roig wrote Mr. Trippe enclosing memorandum of plan of organization (Exhibit M). Under date of April 9th, 1930 Mr. Trippe wrote Mr. Roig as per Exhibit N. The various papers referred to in this letter are annexed and marked as follows:

Exhibit O—Informal memorandum in connection with draft of reorganization.

Exhibit P—Draft of proposed agreement between Pan American Airways and Panagra for supervisory services.

Exhibit Q—Draft of ideas of agency agreement covering the West Coast.

Exhibit R—Supplemental memorandum covering ideas of method of financial control and accounting procedure.

Exhibit S—Comparison of cost of Grace agency fees and cost of similar services as rendered under Panair operations.

On April 22nd, 1930 Mr. Iglehart had a conference with Mr. Hoyt in which it was agreed that the administration of the business should be independent and in no sense a department of either W. R. Grace & Co. or Pan American Airways, Inc. Memorandum of conference is attached and marked Exhibit T.

GR-11213

G066041

[fol. 183] On April 28, 1930 Mr. Iglehart had a further conference with Mr. Hoyt as per memorandum attached (Exhibit U).

In the summer of 1930 Mr. Harris spent several weeks in this country but no important changes in the organization were agreed upon as a result thereof.

On September 15, 1930 Panair purchased certain assets of the Nyrba. It was distinctly understood while the negotiations leading up to this purchase were in process that Pan American-Grace Airways were not to be committed in any way without specific authorization by its Board of Directors.

In September, 1930 Mr. Roig left for the West Coast, returning in January. The principal question under consideration by the Board during this period and until January 30, 1931 was the Chilean concession.

On February 2nd, 1931 Mr. Roig sent Mr. MacGregor draft of agency agreement covering services of Grace y. Cia. in Chile (Exhibit V).

GR-11214

G066042

[fol. 184]

GOVERNMENT'S EXHIBIT 59

January 27, 1931

MEMORANDUM FOR MR. MACGREGOR:

GRACE AGENCY CONTRACT

Although we have now been operating for two years, there has never been any agency agreement between Panagra and our West Coast Houses. In the light of our actual experience it ought now to be possible to agree upon mutually satisfactory terms.

The attached draft covers proposed agreement for Chile only but can, of course, serve as a model for the other countries. The draft follows in general the same form as the agency agreement made with Pan American Airways in Buenos Aires except that it covers the following additional services:

1. Pan American's agency contract applies to the single city of Buenos Aires. The Chile contract includes not only Santiago but the stops at Ovalle, Antofagasta and Arica as well. Additionally, it includes supervision of the accounts of the Buenos Aires and Montevideo agencies which respond in the first instance to the Santiago office and in the nature of the case a somewhat more extended administrative job.
2. The Chile contract includes legal services and Government negotiations neither of which is included in the Pan American agreement.
3. The Chile agreement covers an airline 1,800 miles long (including the Santiago/Montevideo division) whereas the Pan American contract is applicable over a distance of only 800 miles even including the run to Montevideo. In the section east of the Andes we have three stops only one of which (Montevideo) is an overnight stop, in Chile we have four stops of which two are overnight. In the section east of the

Andes we have separate agents who have to be paid separately at two (Mendoza and Montevideo) of the three stops. Moreover, both Santiago and Arica are points where planes from two divisions meet so that

1-10-55 F
GR-8781

[fol. 185] the handling involves not merely that of a through plane but that of termini for two planes.

4. In both contracts sub-agents are placed at the service of Panagra in the sale of passages but Pan American has no sub-agents whereas we have them throughout the whole of Chile.

The fee has been arrived at as follows:

Present Panagra personnel to be taken over by W. R. Grace & Co.	$ 7,400.—
Rent Santiago office (front space on first floor in place of present space)	2,500.—
Manager	5,000.—
Three agencies. (Ovalle, Antofagasta and Arica) at the rate of $12.50 per plane for overnight stops and $10. per plane other stops	6,760.—
Legal and general supervision	5,000.—
	$26,660.—
Or say, per month	$ 2,250.—

GOVERNMENT'S EXHIBIT 60

PERSONAL

NEW YORK,
March 21, 1931.

Mr. H. R. Harris,
Lima, Peru.

My dear H. R.:

In anticipation of a strenuous kick from you because you received no official letters from me this airmail, I am writing this little note to tell you that I have been in a tail spin, and simply couldn't get to it.

I have been busy every day trying to reconcile conflicting views of the Directors with regard to present and future policy. Pan American Airways wishes to spend money ahead of results. Grace wishes to get the income before spending it. Pan American feel we should place multi-motored equipment, radio equipped, along the whole line at once. Grace wishes to do it by sections. Pan American wish to start passenger service over the entire line and put in passenger stations and hangars. They say that, granted we do not own the fields, we can make a deal with the Governments and put in facilities on Government owned fields on some kind of a basis.

The fundamental difference in the view-point of the two stockholders, apart from the above, is whether the Post Office, if we do not put in these facilities, will curtail the service and the frequency. Pan American insist that they will. Grace is not willing to allow that contention.

I think you will agree with me that there is something to be said on both sides. Pan American have thoroughly sold

PAG-W 75
9/30/54
JPC 3

[fol. 187] their service to the Post Office and to President Hoover, on the basis of a large investment. Panair does

W 678

not propose to insist that we make a similar investment, but they do insist that we put in something, which, all along the entire route, would be an evidence of our willingness to co-operate with the American Government in establishing a service which would be a monument to American initiative, skill and forethought.

This letter is very sketchy, but you can readily see how divergent the views are, and the greater the delay, the wider the divergence.

At the last meeting of the Board of Directors, I was requested to prepare a program and estimate of facilities which I would consider necessary to carry out the Panair program. I made it very plain that my program would be without relation to the present cash position or to our capital structure, and that whatever amount I arrived at might be very greatly increased through the fact that where it is necessary to build facilities on Government property, the plans have to be approved by the Government, and the Government's ideas would naturally tend to the installation of facilities very much more elaborate than we, as a Corporation, would consider necessary. However, I shall make a stab at preparing something for them on the basis that we put hangars at overnight stops and passenger stations at regular stops (excluding flag stops) and see what the figures look like.

If you have any suggestions, wire me privately to White Plains, on receipt of this letter, as I would not wish the letter drawn to our Directors' attention by mention in a Company cable.

Very truly yours,

J. D. MacGregor.

Mr. MacGregor, New York

USE OF PANAIR EMPLOYEES

As I told you over the phone Captain Roy Odell, Chief Airport Engineer of Panair, was in Buenos Aires during my stay there. I was able to get quite a good deal of information from Odell including the complete supervision of the final plans submitted for the Buenos Aires hangar. The hangar contract was almost entirely dictated by Odell and he made a number of interesting and important observations with regard to this and similar buildings.

Odell would have come north with me over the Panagra route if Rihl had not been afraid that Trippe would be angry at our use of a Panair expert's services without first securing his personal authorization. I do not know what the answer to a thing of that sort is. I am sure it has given you many headaches. It strikes me that if possible we should arrange with Panair to take advantage of their experts on some sort of a cost plus basis. I do not believe you have ever told me what your deal with Zalduondo is but it seems to me that we might make similar deals for other Panair employees in the same way that we used Laidlaw.

J.D.M. Series #63

New York
November 14, 1929
Excerpt (P2).

Mr. J. D. MacGregor,
Pan American-Grace Airways, Inc.,
c/o W. R. Grace & Co.,
Lima, Peru

Dear Mr. MacGregor:

In reply to the enquiry in your letter #16 in reference to the joint activities of ourselves and the Pan American Airways, in the Argentine, you have received our cable in which we outlined the general agreement between the two Companies on this matter. The understanding is that we will have the through route and any local business in connection with the operation thereof. Pan American Airways, on the other hand, through their subsidiary, Wings, will carry on all local business not in connection with the operation of the through route. This, of course, is a broad statement of the general understanding, and specific instances will have to be settled as they come up.

Very truly yours,

PAN AMERICAN-GRACE AIRWAYS, INC.

Secretary.

WFC/Q

[fol. 192]

GOVERNMENT'S EXHIBIT 65

PAN AMERICAN-GRACE AIRWAYS, INC.

ACQUISITION INTEREST IN BOLIVIAN COMPANY

1. The capital of Pan American-Grace is not sufficient to permit of its investment of approximately one-third thereof in the acquisition of a 51% interest in a small company operating in the interior of Bolivia.

2. In my opinion, this company is not of sufficient value to make it worthwhile considering increasing our capital in order to acquire it because:

(a) Its concession and subsidy, whatever they may be worth, have only about a year and a half to run and even with these advantages, they are only showing results by providing inadequate depreciation and otherwise forcing their figures.

(b) When this concession and subsidy run out they will probably have nothing of interest to our operations which we cannot acquire directly for less cost at such time, if ever, as it suited us to do so.

(c) The question of connecting this interior service with the West Coast by air appears to present serious difficulties.

(d) The purchase is of little value to us or anyone else as a means of reaching the Argentine.

3. The policy of attempting to maintain a monopoly by purchasing inconsequential services at extravagant prices, merely to prevent their falling into the hands of competitors, is not, in my opinion, sound. I do not see how we can ever hope to continue buying off such competitors. It is too easy to set up in this business to make this course practical and the capital diverted in the purchase of competition at fancy prices will be far better employed in beating competition in actual operations. I

GR-213
11-4-54
RLA

G013359

[fol. 193] think that we are always going to have a certain amount of competition but in combatting it we have the important advantage of our mail subsidy and will have, in my opinion, an added advantage if our competitors acquire their facilities on any such basis as that proposed in connection with this Bolivian company. The risk of disaster from over extension of our capital and operating ability is far greater than that from unsubsidized and overcapitalized competition.

4. Bolivia is a West Coast country and accordingly comes within the sphere of operations of Pan American-Grace. That company's through service is, accordingly, entitled to secure as much of the Bolivian business as possible and to make traffic arrangements to that end compatible with its financial and other limitations. For Pan American, therefore, to buy this Bolivian company with a view to diverting traffic to the East Coast is not, in my opinion, correct and is in effect setting up direct competition with Pan American-Grace. For Pan American to acquire the company in this connection giving Pan American-Grace an option to repurchase at cost does not cure the situation. It merely tends to force the hand of Pan American-Grace.

5. Pan American-Grace should endeavor to make some working arrangement with this Bolivian company for exchange of traffic and if necessary or desirable to that end, purchase a small block of stock in order to secure a seat in the company's Board.

NEW YORK
September 12, 1930.

Memorandum to:

Mr. J. T. Trippe, President,
Pan-American Airways, Inc.,
New York City.

I am in receipt of the following cable from Mr. Metzner at Valparaiso:

"'Alas' plane apparently making trip Mendoza Chile daily. We understand Bradley, Secretary Civil Aviation, Argentine, Manager of Alas, coming Chile next Saturday.

that is September 13th, to get a concession from Chilean Government. We understand they (Alas) have been subjected to continuous fines beginning with first trip."

In conversation with you some weeks ago, I understood you to say that NYRBA would ask for a cancellation of its contract with the Chilean Government, and that the route between Santiago and Buenos Aires and Montevideo would be left free for Panagra.

It would seem from the above cable that Alas planes are making frequent trips to Santiago. It may, of course, very readily be that until September 15th Alas is complying with obligations incurred by NYRBA. I thought it well, however, to draw this matter to your personal attention in the hope that you would confirm the intention of Pan American Airways, Inc. not to compete with Panagra between Santiago and the Uruguayan and Argentine Republics.

Mr. H. R. Harris, Vice President,
Pan American Grace Airways, Inc.,
Lima, Peru

Dear Mr. Harris:

Referring to your letter #223 of September 11th on the subject of our representative in the Argentine, you may be sure that we have this question very much in mind.

The allocation of passenger traffic, to which you refer, as between Panagra, Panair and Alas, was settled by our Directors whilst I was in South America. We have exclusive right as between the two Companies to passengers between Buenos Aires and Mendoza, along our present route. Panair can compete with us between Buenos Aires and Montevideo only. Panair or Alas have the exclusive right to passenger service, as far as we are concerned, anywhere else in the Republic.

Very truly yours,

PAN AMERICAN-GRACE AIRWAYS, INC.

RECEIVED BY ORDINARY MAIL

Dear Sirs:

I am very much surprised to learn from Mr. Van Law that Summers sent a passenger, presumably paying, by our regular Fairchild from Buenos Aires to Mendoza. This was a Mr. Adams, South American representative of the Anglo-French bank. He was presumably a paying passenger for Panair between Mendoza and Santiago. I was also surprised to learn that Mr. Summers had apparently on his own responsibility started a passenger service between Mendoza and Santiago with a Nyrba Ford previous to the day on which the Nyrba assets were taken over by Panair. This Nyrba Ford was piloted by Pilot Lansing of Panair.

I again call to your attention the danger of allowing such conditions to exist in Argentine where there will inevitably arise a conflict between Panair and PANAGRA unless these conditions are corrected by a final assignment of the sections over which each organization will hold jurisdiction. I am sure that these matters have already been

brot to your attention and that you have taken the requisite action but I wish again to emphasize the situation.

Very truly yours,

PAN AMERICAN-GRACE AIRWAYS INC.

R. H. Patchin Esq.,
W. R. Grace & Co.,
NEW YORK.

Dear Patchin,

P., A. A. Argentine Situation

Panamerican have no basis in the Argentine today, and even if they get the U. S. mail contract extension they will have no basis for their present layout there.

As partners in Panagra they should consider that they are already serving Argentine over the West Coast, and should retire from that field entirely, at least beyond Punta Alegre. This would not only be playing the game with their partners, but would be making money for themselves, instead of losing it at a frightful rate. Rihl sees this, but Trippe will never see it until the loss has become so colossal that someone stops it. Happily this will not take long at the rate they are going, and if we can only keep the Post Office from extending the East Coast mail contract for say one more year it will be of very great value to our line. If they do not get the appropriation for the Fiscal

year beginning July 1st, next. I do not see how they can stand the pace of waiting another whole year, and they may become sane and quit.

. . . . . .

Very truly yours,

GOVERNMENT'S EXHIBIT 73

EXECUTIVE COMMITTEE

APRIL 8, 1931.

"A general discussion ensued relative to a possible conflict of interests with Pan American-Grace Airways, Inc. arising out of the fact that the United States Post Office Department, in the interests of the postal service, might decide to temporarily reduce service between Santiago and Montevideo under F. A. M. contract No. 9 held by Pan American-Grace Airways, Inc. from two trips per week each to one trip per week—providing for one trip per week between the United States, Argentine and Uruguay, via the west coast and a second trip per week between these points via the east coast. Mr. Trippe pointed out that the past understanding between this Company and W. R. Grace & Company at the time of the organization of Pan American-Grace Airways, Inc. contemplated that Pan American Airways, Inc. would operate along the east coast to Buenos Aires and that domestic service within Argentina with the exception of the route between Buenos Aires and Mendoza to Santiago, would be served by Pan American Airways, Inc.

Following a detailed discussion, at which the past agreements and understandings between this Company and W. R. Grace & Company were reviewed, a letter from this Company to Pan American-Grace Airways, Inc. was drafted. The letter, in addition to summarizing the past under-

standings and agreements, pointed out the possible conflict of interests between the two companies that might arise out of this Company's efforts to obtain support of a United States Post Office contract for the route between Santos and Buenos Aires, and also stated that Messrs. Hoyt, Trippe and Whitney, since they are directors of Pan American Airways, Inc., would refrain from influencing in any way the conduct of Pan American-Grace Airways, Inc., in respect to any matters in which there is a conflict of interest, but would, of course, attend any meeting of the Board of Directors of Pan American-Grace Airways, Inc., for the purpose of establishing a quorum, if requested to do so, but would refrain from voting.

[fol. 202] Upon motion, duly made, seconded and carried, such letter was approved and the President was authorized to forward same, and to send a copy to each representative of W. R. Grace & Co. on the Board of Directors of Pan American-Grace Airways, Inc., and a copy was ordered filed with the minutes of this meeting."

Vice President and General Manager.

Dear Sirs:

Referring to our previous discussions, we wish to inform you that service on the route on the east coast of South

America between Santos and Buenos Aires, which was temporarily suspended to permit the rehabilitation of equipment after the acquisition by us of the assets of New York, Rio & Buenos Aires Line, Inc., will soon be resumed. In order to cover even the direct out-of-pocket expenses of operation between Santos and Buenos Aires, a United States postal contract is, of course, essential, and accordingly we are taking up with the United States Post Office Department the extension of our Contract No. 10 to Buenos Aires.

The contemplated extension of our service to Buenos Aires is in fulfillment of plans developed by us prior to the formation of your Company, and which have been assented to by W. R. Grace & Company and by your Company. The arrangement between Aviation Corporation of the Americas and W. R. Grace & Company, as a result of which your Company was formed, contemplated that the sphere of operation of your Company should be confined to the west coast of South America. When it was later decided that your operations should be extended over the Andes to Buenos Aires and Montevideo, it was understood by all parties that our Company was to retain full rights to operate air transport lines in the eastern or central part of South America; that Pan American, during the term of your United States mail contract, would use your services on the west coast of South America and your present Trans-Andean route to Buenos Aires, and, except between Buenos Aires and Montevideo, you would use Pan American's services elsewhere in the Argentine and South America, the two companies cooperating in their respective spheres.

We realize that there is in the proposed extension a possibility of a conflict of interest between Pan American Airways and Pan American-Grace Airways, Inc., just as there is a possibility of conflict of interest on other matters between the interests of W. R. Grace & Company and Pan American-Grace Airways, Inc.

We do not intend and have never intended to suggest to the Post Office Department that, in connection with an ex-

tension of Contract No. 10 to Buenos Aires, it should reduce

PAG—W 77
9/30/54 JPC 4

W 1456

[fol. 204] the number of trips to be flown by, or the rate of compensation to be paid to, your Company. The whole matter appears to us to be a question of postal policy, as to which the officers of the Department must necessarily be the judges.

Mr. Hoyt, Mr. Trippe and Mr. Whitney have authorized us to inform you that since they sit on the Board of Directors of Pan American Airways, they will, of course, refrain from influencing in any way the conduct of Pan American-Grace Airways, Inc., in respect to any matters in which there is a conflict of interest. If the presence of any of them is required for the purpose of affording a quorum for Board action of Pan American-Grace Airways, Inc. relating to any such matter, they will attend for the purpose of establishing a quorum, if requested to do so, but will refrain from voting.

We are sending copies of this letter to Mr. Patchin, Mr. Roig and Mr. Cogswell.

Very truly yours,

PAN AMERICAN AIRWAYS, INC.,

By J. T. TRIPPE
President

GOVERNMENT'S EXHIBIT 75

Panagra

New York, April 10th, 1931.

MEMORANDUM FOR MR. ROIG

In our conversation this morning, Mr. Trippe showed me a draft of a letter from Panair to Panagra stating they were about to resume service between Santos and Buenos

Aires and that postal aid would be necessary to its Maintenance.

The letter developed the idea that it had always been understood that Panair should operate down the East Coast of South America, that Panagra was interested in the West Coast only; that the question of obtaining mail pay for this extension of the East Coast made a conflict of interest between Panair and Panagra, in view of which Messrs. Hoyt, Trippe and Whitney as Directors of Panagra would refrain from voting but would be willing to make a quorum at any meeting where this question might come up. The letter also stated that the extension was a question of postal policy.

Mr. Trippe wished to discuss the letter but I told him that as it had been prepared very carefully for the purpose of making record, I did not wish to make an offhand comment upon it. I repeated that we (Grace Directors) were interested only in preserving the two trips a week on the West Coast and that I proposed to do everything possible to protect the company's interest in this regard, that the interest of the Post Office service plainly called for continuation of not less than two trips a week via the West Coast, since it carries the mail by the shortest route at the lowest rate to Buenos Aires and Montevideo. Also that the

60180[illegible]

GR-496
1f 4 54
JDC

[fol. 206] extension while entirely justified if the Post Office Department had sufficient appropriations, was not necessary in order to give air mail service to Buenos Aires.

Mr. Trippe intimated that Panair ought to have the support of Panagra in getting a contract for the extension and I replied that this was not the case if in any way the payment was to be taken from the West Coast service either by reduction of frequency of the service, curtailment of route or rate of pay.

Att. Mr. J. T. Trippe, President

Gentlemen:

I beg to acknowledge receipt of your favor of April 8th, 1931 with regard to the contemplated extension of the service of Pan American Airways, Inc. to Buenos Aires.

We have carefully noted your advice as to the course that will be pursued by Pan American Airways Directors who are also members of Pan American-Grace Airways Board in the event of a meeting of a Board of Pan American-Grace Airways called to take action on a possible conflict of interest of the two Companies resulting from that extension.

Very truly yours,

PAN AMERICAN-GRACE AIRWAYS, INC.

April 23, 1931

J. T. Trippe, Esq.,
Pan American Airways, Inc.,
122 East 42nd Street,
New York City

Dear Trippe:

I beg to acknowledge your recent letter enclosing copy of Pan American Airways, Inc.'s letter of April 8th addressed to Pan American-Grace Airways, Inc.

While I do not know when your plans for extension to Buenos Aires were developed, I do know that the decision that Panagra's operations should be extended over the Andes to Buenos Aires and Montevideo was not a "later" decision in any relevant sense, as evidenced by the fact that this extension is included in our original Post Office mail contract of March 2, 1929. I also knew, of course, that Pan American have for some time contemplated extending their East Coast line to Buenos Aires and operating in the Argentine (except between Santiago and Montevideo via Buenos Aires) and that Panagra have not contemplated operations east of the Andes except between Santiago, Buenos Aires and Montevideo.

Your letter states that Pan American "are taking up with the United States Post Office Department the extension of contract No. 10 to Buenos Aires" and that "we do not intend and never have intended to suggest to the Post Office Department that, in connection with an extension of contract No. 10 to Buenos Aires it should reduce the number of trips to be flown by or the rate of compensation to be paid to" Panagra. W. R. Grace & Co. as a stockholder of Panagra accepts and relies upon these assurances as given in good faith; as including any action (whether of the kind specifically mentioned or otherwise) calculated to divert any United States mail pay from con

tract No. 9 to contract No. 10; and as including not only Pan American as a company but also anyone on its behalf. Almost simultaneously with receipt of your letter under reply Mr. MacGregor brought me a proposal from you that Panagra join Pan American in suggesting to the Post Office that in order to provide funds for your East Coast extension Panagra give up one trip a week between Santiago and Montevideo. This is, of course, entirely unacceptable. I understand your assurances to mean that this suggestion has not been made and will not be made to the Post Office Department without authorization of Panagra's Board of Directors.

Referring to paragraph "3" of letter exchanged by Mr. Rihl and myself at Buenos Aires dated November 16, 1930, it is, of course, understood Pan American is not at liberty to operate the proposed East Coast extension under this contract of Panagra's without express authorization of Panagra's directors and in case they grant such authorization it must, naturally, be conditioned on Pan American's furnishing adequate guaranties holding Panagra harmless from any claims against its bond deposit or otherwise arising out of Pan American's operation of this East Coast service.

GR 6750
12/14/54
ab

G031765
145

[fol. 209] There is no conflict "between the interests of W. R. Grace & Co. and Panagra" which bears the remotest resemblance to the situation presented by your letter and proposal.

While we appreciate the spirit of the next to the last paragraph of your letter, it is only fair to say that W. R. Grace & Co. do not consider that the proposed procedure covers the full measure of a director's responsibility in the premises and our acquiescence in this procedure is not to be construed as carrying any other implication.

I am sending copies of this letter to Messrs. Hoyt and Whitney.

Very truly yours,

(sgd) HAROLD J. ROW
Vice-President

Berengaria 3 4

LONDON, April 30, 1931.

Dear Whitney,

Just before sailing from New York I received advices from Washington which were surprising and indeed, very disappointing to me. They were to the effect that one of your associates, a director of our Pan American Grace Airways, had suggested to the Post Office Department that the service on our line from Santiago to Buenos Aires be cut down from two trips to one trip a week.

While the Washington officials declined to interfere with our service, the incident may result in a very heavy financial loss to our company, as my advices indicate that it may lead to an effort to force us to accept for our second weekly trip $1.60 a mile instead of the $1.80 to which under our contract we are entitled after July 1st, 1931. This would mean a loss to our company of $100,000. a year, which is a most serious matter. I think we should carefully consider how the company is to obtain redress and I should like to talk this over with you on my return.

I am giving you these facts confidentially as I feel that you should have them in order that you may be in a position to take any steps that you may consider necessary

or advisable to right the wrong that has been done and to provide against the repetition of such an incident.

GR-501
10/24/54 PJS· G 1941

[fol. 211] I feel confident in placing this whole matter before you for your consideration and solution.

I have not intervened in the management of Panagra and am not too anxious to take on anything new. But I have enough confidence in *you* to believe that you and I can sit down and work out a plan of action. We would, however, have to sit down with full authority and independent of the opinion of anyone. I am sure that you would look at the whole matter with a spirit of fair dealing and understanding; and I would endeavor to do the same.

I expect to be back in New York early in June.

I am, with kind regards,

Sincerely yours,

(Sgd) D S Iglehart

Office of the
President

May 4 1931. Rico 5/6/31

Harold J. Roig, Esq., Vice President,
W. R. Grace & Company,
Hanover Square,
New York City.

Dear Roig:

I have your letter of April 23 commenting on Pan American Airways, Inc.'s letter of April 9, addressed to Pan American-Grace Airways, Inc.

As I understand it, while there may be a minor difference of opinion between us in regard to the date of the decision that Panagra's operations be extended over the Andes to Buenos Aires and Montevideo, you confirm that, as stated in our letter of April 9, it had been understood from an early date that Pan American Airways, Inc., might extend its East Coast line to Buenos Aires and operate in the Argentine (except between Santiago and Montevideo via Buenos Aires). Since, obviously, such operations could not be conducted without a United States mail contract, this understanding necessarily implied that Pan American Airways, Inc., should be free to make proper representations to the Post Office Department to this end, in the same way that W. R. Grace & Company might make representations to secure ocean mail contracts on the West Coast. In our letter of April 9, we assured Pan American-Grace Airways, Inc., that, in making such representations, we did not intend

to suggest to the Post Office Department that, in order to provide funds for this purpose, it should reduce the number of trips to be flown by, of the rate of compensation to be paid to, that company, and we do not now intend to make any such request.

New York, May 5th, 1931.

H. J. Roig Esq.,
c/o Grace Brothers & Co., Ltd.,
London, England.

PAN AMERICAN-GRACE AIRWAYS INC.

Dear Roig:—

In Washington April 28th the Postmaster General confirmed that Trippe and MacCracken had sought to bring about cancellation of one of our trips from Santiago to Buenos Aires. He said he asked them what Mr. Patchin thought about it and they had given him to understand that I was indifferent. Of course he knew from me previously that this was not true. The Postmaster General said he told Trippe and MacCracken that if this were true the best way to handle the matter was for them and us to come down

together to discuss it. Needless to say we have since had no request from Trippe to do anything of this kind.

The Postmaster General told me, as had Glover previously, that he was not disposed to penalize the pioneers on the West Coast route to Buenos Aires, that nobody had contended more strongly than Mr. Trippe had originally that the West Coast route to Buenos Aires was the logical route. While the Department would rather like to see the extension made to Buenos Aires on the East Coast he was not disposed to do it at the expense of the Pan American-Grace Airways Inc.

The Postmaster General added that Trippe had stated that Pan American-Grace Airways expects to have its pay "raised" to $1.80 in the next fiscal year and that he had told Trippe that this was not his understanding. You see Trippe,

G 1936

GR-507
10-21-54
PJS

[fol. 216] characteristically, did not ask that our pay be kept at $1.60 in order to provide funds to help out East Coast extension but he precipitated the issue and the Postmaster General immediately took the attitude that he was going to require continuance of the $1.60 rate.

After making the obvious reply regarding the $1.60 rate, I asked the Postmaster General if any decision in this matter couldn't be deferred until your return and he said that he was not inclined to hasten the matter so long as the Post Office did not, by its silence, commit itself to a resumption of the $1.80 rate, but that it might be necessary to write us a letter asking us to continue at $1.60 for another year. Meantime, I found that White had the impression from Glover that the Postmaster General has practically made up his mind on this question and intends to hold to the $1.60. We are evidently going to have a struggle to get the full rate restored with the chances, I think, rather against us. Postmaster General said he was going to read over our contract again.

While this might have happened in any event, Trippe's action made it inevitable.

The Postmaster General did not repeat to me what I understand Trippe told him about Grace hanging back, being opposed to passenger business, etc. He, however, asked particularly about the percentage of performance on the Trans-Andean run, volume of mail, rate of increase of use of mail, the extent of our present passenger traffic and when we were going to carry passengers in Chile. Glover later told me Trippe is making a great play on the fact Pan-Air is giving highclass passenger service and we are not. I think it very important we start complete passenger service very soon.

G 1937

GR-508

[fol. 217] The present status, therefore, is that one trip a week is not to be cut off at the expense of Pan American-Grace Airways but I feel that Trippe is working in every possible way to bring that result about. I am going down to the International Chamber of Commerce Meeting at Washington on Thursday, May 7th, for a day, and will doubtless hear more.

I read the Postmaster General Trippe's pledge that he did not intend and had never intended to suggest curtailment of service or compensation on Route #9 as a means of helping the East Coast extension. I think he had already heard of this from Glover and it evidently had its effect. He said he expected people to deal honestly and frankly with him and nobody got very far who did not.

He assured me that there would be no change in policy without sending for me and discussing the matter with me. "There will be no dark lantern business" he said.

I discussed the advisability of writing a letter to Trippe regarding the violation of his pledge with J.P.G. who was firmly of the opinion that it would do no good as he would go on working against us anyway. He felt we had better let the record stand as it now is. We have, therefore, not discussed the Washington situation with Trippe or his associates any further.

We have heard nothing further from them regarding arbitration. There has been further discussion of radio but it is not definite enough to warrant writing.

We had no Directors' Meeting on Monday, the fourth, but one has been set at Trippe's request for Monday the eleventh. I may telephone you before than.

G 1938

GR-509

[fol. 218] I have been following your progress in the cables. Hope you have been having a little fun along with the hard work. Business sentiment here seems to be a little more cheerful the last few days. President Crowley of the New York Central says he notices a "spotty improvement and hopes it will continue.

Regards to all hands.

Faithfully yours,

NEW YORK,
May 6, 1931.

Memo. to Mr. J. T. Trippe, President,
Pan American Airways, Inc.,
New York City.

As you are aware, Panagra has refrained from carrying local passengers along the west coast of Colombia because we did not wish to do anything that would disturb the relations with Mr. von Bauer. You are also aware that SCADTA has discontinued service between Guayaquil and Buenaventura. I am not sure whether the SCADTA plane runs as far as Tumaco, but I am inclined to think that it now goes no further than Buenaventura.

Under these circumstances, is there any objection to Panagra requesting the right to carry passengers between Colombian ports on the west coast?

Your advice will be appreciated.

New York, U.S.A.

Dear Juan:

The question of charter flights will frequently arise between Panagra and ourselves; it seems to me that it might be well to settle between the two companies who is to have the first call on them.

I understand it has always been arranged that we would operate local services, Panagra being confined to the operation of the direct line.

At the present time we are the only ones who have multi-motored equipment in reserve, and so we are the only ones at present in a position to take care of charter flights calling for this type. Panagra has a Fairchild in reserve and we will have one as soon as the overhaul job is completed. Our Fairchild is at the ramp and cannot be used unless we take it to Moron. There is no reason why we should not store this machine there in a small garage which we could put up with little expense. This would put us in the same position as Panagra for handling charter flights that require single motored equipment.

Will appreciate your letting me know your attitude in the matter.

With kindest regards.

Dear Mac,

I had explicit instructions from Mr. Trippe to settle with you the question of charter business arising at Buenos

Aires. Unfortunately I forgot all about bringing this point up.

* * * * *

My understanding is that Pan American has the right to any aviation business in the Argentine not directly connected with the operation of the international service via the West Coast. If my assumption is correct there will be no argument as to who will take the charter flights.

* * * * *

In order to avoid complications it would seem to me that both companies should abide by the original understanding. I will appreciate your advising me as to what you recommend to your Directors.

With kindest regards.

Yours faithfully,

Dear George,

With reference to your letter to me of October 8, my answer to you under date October 12 and your letter of October 20 to your employees and agents, all referring to the question of charter flights in the Argentine:

Your letter of October 20 does not set forth the complete understanding as arrived at by our previous exchange of letters. Your local company will have the right to all charter flights originating in the Argentine, EXCEPT ALONG THE ESTABLISHED PANAGRA ROUTE FROM BUENOS AIRES TO MENDOZA. It will also have prior right to charter flights from the Argentine to Uruguay, but Panagra will have equal rights to flights originating in Uruguay for the Argentine or to the interior of Uruguay; this latter until such time as Panair forms a local company in Uruguay to engage in cabotage business.

Dear Roig,

AIRMAIL TUMACO — Your No 7

• • • • •

If I were you I would get directly in correspondence with Harper regarding this and get his views as to what he considers he will be able to accomplish and how he proposes to go about doing it. You then can decide whether anything would be gained by taking the matter up with Trippe. In accordance with our general understanding with Trippe, Panagra was to operate on the whole West Coast of South America and across to Buenos Aires and, I think, Montevideo. The operating by them of a service from Buenaventura to Tumaco is not compatible with this arrangement and, as I do not think that Scadta can possibly be making anything out of this service, it would seem a very natural thing for them to retire from it; in fact, I think we really have a right to ask them to retire, particularly if they suffer no prejudice by doing so.

Memorandum to Mr. J. T. Trippe, President,
Pan American Airways, Inc.,
New York City

It develops that there is a possibility of quite some little passenger traffic between San Juan and Mendoza. For your information, San Juan is located some 150 kilometers north of Mendoza and, although it is a town of importance in the wine and mineral business, it is very much isolated due to poor and infrequent railroad service.

During my stay in Buenos Aires, Mr. Bradley informed me that there was every possibility of securing a subsidy from the Province of San Juan of approximately two Argentine pesos per kilometer if the Company was willing to insure twice a week service by airplane to Mendoza. As you are aware, Pan American-Grace Airways maintains a spare Fairchild at the Mendoza airport for use on its Transandean service, and it would be possible to locate also at Mendoza one of two or three mechanics now on our payroll who possess a commercial pilot's license.

Under ordinary circumstances, I would recommend that our Directors authorize me to instruct Bradley to secure this subsidy if possible and start a twice weekly mail and passenger service to San Juan as a feeder to our international line. I do not wish to make this recommendation without your consent because of the intercompany agreement that Pan American-Grace Airways will confine its operations strictly to its mail route between Mendoza and Buenos Aires. As the town of San Juan is located near to the extreme western terminal of our line in the Argentine, it occurs to me with San Juan to the north and possibly

San Rafael to the south, an exception might be made. Will you kindly advise.

Dear Roig,

PANAGRA

Your letter No. 20.

I have answered most of the points in this letter.

Regarding the Lima field, the fog conditions vary in different seasons of the year but I think near Callao they rule better. I would ask for full data, a survey and a studied opinion.

TUMACO

Pan American have no right under their agreement with us to be interested in a service along the West Coast of South America. I believe we can get the Colombian Government to grant us coastwise rights. Panagra have no right to give their agents orders to keep their hands off of Seadta.

Our answer to this would be to threaten to form the cabotaje companies in Peru and Chile ourselves rather than have Panagra form them. Scadta must get out of the West Coast Colombian trade. I think now is the time to make an issue of this and tell Scadta that either they must get out of the North and South trade on the Pacific or we will go after them in Colombia. They are not strong and there is a good deal of feeling against them in Colombia. Please let me have your view about this.

Very truly yours,

Cable Address
"PANAGRA"

November 16, 1932

Memorandum to Mr. R. H. Patchin, Vice President,
W. R. Grace & Co.,
New York City.

* * * * *

The route Santiago/San Rafael/Mendoza entails a flight of some 450 kilometers, or 270 miles, as against approximately 150 miles Santiago via Uspallata to Mendoza. I believe that a better idea would be a single motored shuttle between San Rafael and Mendoza to make connection with our through planes. That I have had this in mind for some time you can see by the attached copy of my memorandum to Mr. Trippe in which I requested that the policy, by which

Panagra operations in the Argentine are restricted to the carrying of passengers only along its present Mendoza/Buenos Aires route, be modified so that we might, if necessary, establish a shuttle between San Juan and Mendoza on the north, and San Rafael and Mendoza on the south. Although there is railroad connection between both of these towns and Mendoza, the trains run slowly and it has very often been suggested to us that there was a possibility of building up air traffic in connection with our trunk line.

That I have not pushed this matter to a decision recently has been due to the fact that until the recent purchase of two additional Fords the loss of the SAN JOSE in the middle of the winter season tied up the flying equipment I had in mind for this shuttle service. I also thought it better to wait until the effect in Mendoza of the loss of the SAN JOSE had been minimized by lapse of time. However, as this subject has come to your personal attention, I shall place it on the agenda for the Directors' Meeting next Monday in order, if possible, to secure a modification of what I understand is the gentlemen's agreement between Pan American-Grace and Pan American Airways with regard to additional services in the Argentine.

CHARTER HIRE—MORON AIRPORT

NEW YORK
February 11, 1933.

Mr. H. R. Harris,
LIMA.

My dear H.R.:

I note in a letter written by Dr. Lopez to Mr. Young of Panair that Lopez suggests the advisability of always having at Moron a small plane which could be used for visiting neighboring "haciendas", on charter, because, as Dr. Lopez points out, with the crisis there is a great deal of mortgaging of land going on and representatives of Banks and other interests can examine a property much more quickly by air than otherwise.

I do not know whether you have a Fairchild located at Moron at present. If not, it might be well to study this feature a little and slip a plane in there and tell Lopez quietly that Panagra has a plane there which can be used for charter hire.

Of course, charter business out of Buenos Aires belongs to Panair, but if Panair has not the equipment available, we have the refusal.

Please think this over and let me know your reaction.

MEMORANDUM TO MR. GARNI
MR. PATCHIN
MR. COGSWELL

PANAGRA

As Mr. Roig will be seeing Mr. Trippe I think it might be advisable to give him by cable our views with reference to the two handwritten letters to me and also with reference to his letter No. 13 addressed to me.

With reference to the handwritten letters, I think we might say that we are particularly in favor of a plan to extend to Bolivia and also to serve the interior points in Peru; furthermore, if we do develop Bolivia I think we ought to study very carefully the plan to extend to Salinas. We should be able to get very interesting figures with reference to travel movement, possibility of getting income from local mails and express and some estimates as to cost.

* * * * *

Buenaventura—Cali:

It is a practical matter to decide whether our planes ought to call at Buenaventura or Cali or both. The figures and information that Roig gives us regarding the competition of Scadta on through traffic from Miami are surprising to me as I think they also are to him. My strong impression is that this movement is a violation of the general agreement that we had with Pan American to the GR-

11/26/54
F
5109

G030744

[fol. 234] effect that we would stay on the West Coast and they would stay on the East Coast of South America with the one exception that we could fly across to Buenos Aires

and Montevideo. Pan American's failure to give a direct service to Panama for the through movement and their availing of the indirect routes and of Scadta to compete with us on the West Coast is a violation of our agreement which should be remedied promptly and provided you agree I think Roig should take a very strong attitude with Trippe on this point.

J. D. MacGregor, Esq.,
Santiago, Chile

Dear MacGregor:

Harris has written you fully regarding Bolivian developments.

Pan American have not yet indicated their willingness to have Panagra undertake this extension. Guzman Tellez cables that the time element is of great importance. If Panagra is ultimately to undertake the service it is obvious that the sooner the matter is decided the better. If W. R. Grace & Co. undertakes it there will naturally be expenses incurred which would be unnecessary if Panagra does it. Our idea in volunteering to undertake it was to protect Panagra's position by enabling Guzman Tellez to act promptly (pending decision of Mr. Trippe who was then very much occupied in Washington) thereby securing to Panagra the important benefits which I believe will accrue from having this Bolivian concession. While Guzman Tellez has applied for the concession in the name of W. R. Grace & Co and we are going right ahead on that basis, the business seems to me to be one which Panagra should undertake.

It occurs to me that if you think well of Panagra's undertaking this extension it might be advisable for you to cable Panagra New York your recommendation in the premises.

Very truly yours,

(sgd) HAROLD J. ROIG

Rec'd JAN 16

LA PAZ SERVICE

Dear Mr. Garni:

During this week we have discussed fully with J. Guzman Tellez the various details in connection with the proposed service to La Paz.

Shea and Thommen have enlightened him regarding the general mechanism of postal arrangements, etc.

He is sending you by this mail a draft of the proposal which he intends to submit to the Bolivian Government if you approve of it.

The purpose of this letter is to specifically refer to your cable No. 98, where you suggested to Guzman Tellez that he discuss with me the possibility of securing operating rights for a Grace company for the Peruvian portion of the La Paz extension. G061267

Although it is premature to be going into these details, I should just like to leave on record that we feel strongly that if it is not possible to arrange with Panagra to carry on this service, and it is necessary to form a separate company, this company should by all means be an American company. We feel that we shall always have a certain amount of difficulty in arranging an operating permit for another company in addition to Panagra's and Aerovias' operating permits, but we feel that there will be more chance of success in this direction if the company is American and not, for example, Bolivian.

Correspondingly, it would seem to us that it would be easier in Bolivia if this were an American company than if, say, it were attempted to have Aerovias Peruanas go into Bolivia.

1-28-55 mfr
GR 11468

[fol. 237] MacGregor has evinced considerable interest in the newspaper reports of the La Paz service, but unless authorized to do so by you neither Guzman Tellez nor ourselves will discuss the matter with anyone in Panagra.

Yours truly,

I thought you cabled J. G. T. to discuss with MacGregor

EXCERPT P 1-2-3-4 Rec'd. MAY 1

Dear Garni,

BUENOS AIRES—SALTA—BOLIVIA LINE

You may or may not recall that in the early days when we were running out our line there was considerable doubt

whether we should go beyond Santiago. Our Post Office contract gave us an option to proceed to the Argentine and Uruguay, and, for reasons of expediency at that time rather than because of any carefully considered plan to go beyond Santiago, we exercised this option. Pan American had a local company ("Alas") here at that time through which they were intending to develop cabotaje business and, as I recall it, it was part of the understanding under which they agreed to our exercise of the Argentine option that Panagra was not to compete with them for local Argentine business except along our main line. That is how the understanding came about that we would not be interested in cabotaje in the Argentine except to the extent indicated.

The above represents my recollection of the matter at this time but my memory of the details is not too clear and the above statement may not be 100% correct. Patchin may have a clearer recollection of the circumstances. I mention this, however, because if this question is coming up for discussion it is just as well that you have some general idea of where this understanding came from. It was never reduced to writing any more than was our general understanding, of which it was a part, that our interests were in general to be confined to the West Coast

-5-55
GR-8863

G046743

[fol. 241] countries while Pan American's were confined to the East Coast.

A good deal of water has gone under the bridge since that time and, while the understanding still remains and I would not for a moment think of questioning it, it may be that as matters stand today it would be in the interests of all concerned to consider modification of this understanding by mutual consent and perhaps Trippe's request for a letter on the matter may afford an opportunity for discussing the question with him. Hence the suggestion in my cable No 25 that, if feasible, the delivery of such a letter be deferred until you received this line.

Incidentally, if a letter has been or is to be delivered in compliance with Trippe's request I see no objection to the form enclosed with your letter No 25 which, as I recall it, is in conformity with the draft which I prepared some time

ago when there was some possibility of our having to give such a letter as a condition to Panagra's taking over the Bolivian concession. Even if this letter is delivered it would not, of course, preclude in any way the possibility of a discussion of a modification of the understanding.

G046744

Trippe has mentioned to me on a number of occasions what he has evidently repeated to you—that the Argentine Government was very much interested in the development of interior lines and was contemplating subsidies for such lines and that Pan American was expecting to bid on such lines. In fact, if I am not mistaken, on one occasion not very long ago when we were discussing this understanding and I suggested that if I wished to be technical I might suggest that the understanding had lapsed by reason of their long delay in developing interior lines, he suggested GR-8864
[fol. 242] that the reason for this delay had been the various "Tramites" in connection with the development of the plan now referred to.

There has been an Argentine Aeronautical Conference going on here ever since I arrived which Bradley has been attending and I have therefore not seen much of him. In the short talk I had with him the other day, however, I asked him if the development of this plan was being discussed at the Conference and whether there was any prospect of progress being made on it. He said that there had been no serious discussion of the matter at the Conference; that the project was not new but had been under discussion for a long time but had not yet taken any definite shape. I will follow this matter up with him as well as in other directions and will try to get something really definite on the subject in the next day or two.

In a broad way, however, the idea contemplates several lines,—one of which would be between Buenos Aires and Salta by way of Rosario, Cordova and Tucuman. This is of course the one in which we are interested. Trippe will also be interested in it and perhaps in some of the others.

G046745

This line would tap a large population (the four principal cities alone having about a million) where railroad service is not as good or as inexpensive as between here and Mendoza, and for that reason ought to offer excellent cabotaje possibilities. Harris has had his eye on it for a long time and we discussed it quite a bit last Summer; in fact, at that time, at my suggestion, he mentioned it to Trippe in B.A., suggesting that since Panair were evidently GR-8865
[fol. 243] not making any plans in that direction, Panagra would take it under consideration. Trippe categorically rejected this suggestion reminding Harris of the understanding between the two companies above referred to.

PANAGRA

Re: Bolivian Concession

When Pan American Airways purchased the Nyrba Line which was the line running down the East Coast, and started to operate it about 1930, for a short time they ran services to Buenos Aires and Mendoca which was in competition with our main line to Buenos Aires. Panagra protested this and a verbal gentlemen's agreement was then made that Panagra only would do business between Mendoca and Buenos Aires and Pan American Airways, through a subsidiary which they were forming for that purpose, would operate all other routes in the Argentine. They did form the company, but they never operated any routes in Argentina. This year when the question came up

as to whether Panagra would take over a concession to operate in Bolivia, which was being sought in its preliminary stages by W. R. Grace & Co., Mr. Trippe stated that as a condition to his approval of Panagra's taking on this Bolivian concession, he would require a letter from Pan American-Grace Airways stating that his acquiescence in this matter should not be considered as prejudicial to what is called the existing agreement with regard to business in the Argentine. Mr. Roig replied that he did not see any need for this as the operation at present contemplated in Bolivia did not effect in any way the business in the Argentine and while Mr. Trippe did not specifically acquiesce in this, he gave his consent to Panagra, making commitment with the Bolivian Government which bound Panagra to inaugurate a service between Tacna and La Paz within six months.

After this concession was obtained and the obligation assumed by Panagra, Mr. Trippe very properly insisted that the operating management of Panagra make a detailed study of the route and submit a report describing the manner in which they proposed to operate this service. This

GR-6623 G031694
12/14/54 aa 119

[fol. 245] was done and their proposed plan of operation approved with suggestions for minor changes, but at the insistence of Pan American Airways, Panagra's operating management in South America was advised by cable that they would be instructed later as to the date of inauguration of this service. On this point, Mr. Trippe stated that before he would consent to authorize an inauguration of the service, he must have a letter from Panagra along the lines of the one which he had previously asked for before approving Panagra's acceptance of the Bolivian concession.

The objection to giving him the letter would be that the verbal agreement above referred to was made four or five years ago under conditions which may or may not prevail in the future, particularly with regard to the right of Panagra to operate its international line through Chile. In other words, although the Chilean concession has recently

been renewed for four years, if at some future time passage through Chile should be refused and Panagra should find it expedient for this reason or for other reasons to operate its international line through Bolivia to Buenos Aires, a formal agreement of this nature would cut Panagra off at the border between Bolivia and Argentina.

GOVERNMENT'S EXHIBIT 100

Letter No. 59
(HJR trip series)

Airmail 5.2.35
NY 5.8.35

(Dictated in) Buenos Aires, April 24, 193

A. Garni, Esquire,
New York.

Dear Garni,

BUENOS AIRES — SALTA — BOLIVIA LINE

Referring to my letter No. 48 just by coincidence I am in receipt of a letter from Harris from which I quote the following:

"In connection with the claim that Panair make as regards their prior rights to institute local services in the Argentine except on the Buenos Aires/Mendoza section, it seems that inasmuch as we have made no move to expand our local operations in the Argentine for a period of years in view of their statement that they are about to commence local services, we would be perfectly justified in limiting our recognition of their claims to a definite period of time. In other words, if service from Buenos Aires to Bolivia, B.A. to Rosario, B.A. to Asuncion, etc., etc. were not instituted by a Panair company say by January 1, 1937, Panagra would

have a right to institute such services as they saw fit without further prior claims by Panair on this territory."

If we really feel that we would be interested in developing the Salta line and other methods failed, this might be a way to bring the matter to an issue. Naturally, however, we could not expect to get Trippe's acquiescence in Panagra's giving such a notice or instituting such a service if he had declined to agree to it in some other form. It would, therefore, like Bolivia have to be a case of W. R. Grace & Co. stepping into the breach.

Very truly yours,

NEW YORK, May 6th, 1935.

	Arica	3	
	Buenos Aires	4	
Harold J. Roig, Esq.,	Santiago	1	
Santiago, Chile.	Bolivia	1	Arrived 5/13/35

Dear Harold:—

BOLIVIA. My recollection is that when Trippe acquired Nyrba, there was some question of competition between

Santiago and Buenos Aires, and at that time it was agreed that our operations east of the Andes would be limited to that line and Panair would not compete with us there. In other words, the arrangement was from the point of view of competition. A great deal of water has gone over the dam since that time and it might well be argued that Trippe is not in a position now to stop our operating to Buenos Aires through Bolivia. At any rate, the latter might well be the case if and when we should decide that such operation became necessary. Accordingly, a letter to the effect that any agreement which may exist would not be affected would seem to be in order.

While discussing the letter, Trippe suggested that this might be a good time to clear the whole matter up and he has suggested that if we do extend to Buenos Aires through Bolivia, we should pay a part of Nyrba's development expense which was taken over by Panair. As I understand it, the letter would be along the lines that Panagra would have the option to extend to the Argentine and if such option should be exercised would pay a specified amount to Panair. We are now waiting to hear from Trippe what that amount should be. If it is at all reasonable, it might be well to clean [fol. 248] the matter up along these lines as it would be settled definitely and it is our idea that the option of extending service should then be left with the Grace directors.

Very truly yours,

W. F. Cogswell

Harold J. Roig, Esq.

Dear Roig:

PANAGRA

Bolivian Service: This air business is certainly a fast-moving enterprise and between calling up Washington and looking for Trippe there is very little time left for anything else.

Just after I finished my letter to you of today trying to keep you up to date on what developed regarding the Bolivian situation, somebody at Panair called me up to say that Trippe had telephoned up instructions to inform me that he agrees to have us start the Bolivian service just as soon as Panagra is in a position to do so, on the understanding, however, that after six months' operations the position should be reviewed to determine whether or not it suits to go on.

I told my informant that we would want to review the position from month to month, not so much with the idea of seeing whether we should go on but to determine whether the service should be extended, and that while I had no illusions as to the first six months' results, I felt very con-

fident that in the long run a well studied and well organized service in Bolivia will give satisfactory results.

Since Cogswell telephoned to me at noon about the file memorandum I have heard nothing further from him, but in view of this very latest development I take it that he and Trippe agree on the wording of that memorandum. I think

JMcG 11-3-54 GR-1022 G014300

[fol. 250] I made it clear that no letter will be written to him, nor do I imagine that he will get a copy of this file memorandum, although he probably has made a copy himself while discussing it with Cogswell. At any rate I think a well worded file memorandum is not as bad as a similarly worded letter and I think we also agree that the present solution is far better than some far-fetched option agreement to buy out his so-called rights.

MEMORANDUM

In discussing the question of Panagra's starting service to La Paz, Mr. Trippe made the point that it should not be construed to affect arrangement between Panair and Panagra entered into in connection with extension of Panagra service from Santiago to Buenos Aires, whereby Pan American (or its affiliated national company) was free to operate in Argentine, with the exception of the Mendoza-Buenos Aires route, to which Panagra's operations would be limited. I stated I was not familiar with the arrangement, but agreed that, upon Mr. Roig's return, Panagra would write a letter to Panair to the effect that their consent to the extension to La Paz should not be construed as affecting any arrangement which *might* exist between the two companies in reference to the sphere of operating in the Argentine. He suggested that I make this memo as a

record of the position, in order not to hold up Pan American-Grace pending Mr. Roig's return.

Dear Roig,

INTERNATIONAL TRAFFIC

I asked for figures regarding the number of passengers that come from Panair and went to Panair from Panagra and I got the attached. From this it seems clear that our traffic connection with Panair is bringing us almost nothing and that our international movement moves mostly by steamer to and from the U.S. This is merely an impression and I want to suggest that you should set someone on the task of analyzing all of our movement so that we would know how many people are coming into Cristobal and out, where they are coming from and where they go to and what medium of transportation they use for the whole journey. The same information might be obtained from Lima, Santiago and Buenos Aires and with this we might begin to see the conditions and handle our problem more intelligently.

I talked to Smith and Brown together of the importance of working in very close harmony and of the steamers and Panagra using one another to the fullest. I explained what great mutual advantage they could get by having each of

these services work for the other and they were both, I think, quite impressed with the benefit that might come from such an effort. Smith said as I left that he thought it was a despairing task to build up traffic relying on Pan air but that if the Grace Line got back of the effort he would not worry about the results. I told him that I did not know to what extent this could be brought about but that he and Brown might develop this idea and they both said they were going to work hard to do it.

COLOMBIA—EQUADOR

I am sending you a cable with reference to my old idea of
GR-1199 G019323
[fol. 254] flying over Colombia and Ecuador instead of flying over the sea.

* * * * *

I feel, however, that Colombia is so much of a key country for us that we must get our foot in the door and endeavor to get hold of the Western side of the country which belongs to us. I know how difficult it is to bring this about; in fact, it may be impossible. I however thought it worth while putting the matter before you again with a few additional facts to see whether you could not devise some means of taking a step forward now that we are going to have an adequate unit that could fly over the mountains, has the speed to make the run with the stops that would be necessary.

* * * * *

Very truly yours,

Dear Roig,

PANAMA

Harris met me in Buenaventura and went up to Panama with me. Helbling arrived from the interior just as the steamer was about to leave so I had him come along to Panama also. I was glad that I had done so as I let Harris hear my talk with Helbling in which I emphasized as I have with all managers all along the Coast the fact that our primary interest is transport and that the first attention of all our managements must be given this - both steamer and air.

COLOMBIA

I attach a note of the further conversation and have nothing to add to this except to say that two things become clearer and clearer to me. The first is that the Western part of Colombia belongs to us and that there is a potential movement south from Medellin at least as far as Tumaco which would be very important. Scadta is running a service from Medellin to Cali five days a week both ways and Helbling tells me that they are running full all the time. The Commodore which arrived from the north while

I was in Buenaventura had eleven passengers of which ten got off at Buenaventura. I am convinced that we can get as intensive a movement in Western Colombia as we have in Peru and that we will eventually operate an international service twice a week and a local service of about the frequency of Aerovias and connecting up with it.

GOVERNMENT'S EXHIBIT 106

New York, July 22, 1936

E. T. Allen, Esq.,
care Grace y Cia (Chile) S.A.
Santiago, Chile

* * * * *

Dear Ed:

As you are probably aware, the Argentine Government recently authorized an appropriation in favor of the Direccion de Aeronautica Civil to be used in subsidizing airlines to the interior of the country and we have reason to believe that in the near future the Director de Aeronautica Civil, Senor Mendez Goncalves, will advertise for bids covering two routes, i.e., from Buenos Aires to Asuncion, Paraguay, and Buenos Aires to Salta via Rosario, Cordoba, Santiago del Estero and Tucuman. It is not known whether the entire appropriation for subsidy which we understand to be 750,000 Argentine pesos, will be used on these two routes only or whether other routes are also contemplated.

* * * * *

The route from B.A. to Salta is in Panagra territory and is one in which Panagra is greatly interested in view of the possibility at some future time of operating from Peru to

-2-55
F

B.A. by way of Bolivia. Consequently it is entirely possible that Panagra in its own name or through the information of an Argentine subsidiary might make a bid for the

subsidy on the Salta line. It is also not unlikely that Panair might be interested in the Asuncion route.

Since you will undoubtedly be in very close personal contact with a great many military and civil aviation officials during your stay in the Argentine, I have no doubt that you will be able in a casual and personal way and without reference to Panagra's interest in the matter, to obtain GR-11526 G039802
[fol. 257] a good deal of information regarding the general policy which the Government will follow in connection with these lines as well as the operating requirements which will be demanded of bidders in order to qualify. I would greatly appreciate any advice you can give me on these matters as well as on the activities of prospective Argentine bidders as at the moment we are somewhat in the dark with regard to this proposed development.

GOVERNMENT'S EXHIBIT 108

W. R. Grace & Co.
NEW YORK

New York, September 23, 1936.

Dear Mr. MacGregor:

George Rihl came down and had lunch with me last Friday.

We talked about the Argentine situation in a general way but it was impossible to arrive at any definite conclusion as the whole matter is so very much up in the air. I explained that while we do not want to lay down in any definite way until the situation was clearer what we would and would not do, we were in general of the opinion that

nothing would be gained by our taking a small stock interest in a large company which operated all the routes in the Argentine and that the only plan I could see for a combination with anyone would be a combination with Dodero on the Salta route. While even this would not be too satisfactory it would probably be better, provided a reasonable basis could be worked out, than being excluded entirely from this operation. The main thing is that we know what is going on and have an opportunity to come in if we want to on the best plan that can be worked out but we really cannot know much about this and have much of an opinion about this until you and George get on the ground.

I also discussed with George the Panagra situation with reference to the West Coast of Colombia. I pointed out that under our original arrangement with Pan American the West Coast of South America was Panagra territory and that this agreement had really been breached when Panair bought control of Seadta. In view of the foregoing their interest in Seadta should certainly not be used to prevent Panagra's having a normal and proper development on the western side of Colombia and that such development would certainly mean at present going into Cali and perhaps at a later date entirely overland via Medellin. Under the circumstances I told him that it seemed to me that the least Panair should do would be to tell Panagra that it was in order for them to get Colombian permit to go to Cali at this time and make this change in the route if corresponding permission was obtained. This would mean facing opposition from Seadta but Panair should at least be neutral in the matter. George seemed to feel that this was a reasonable attitude but stated very clearly that the matter was entirely out of his province and that even Young could not pass on it and that no one could except Mr. Trippe. I nevertheless have in mind going over the same ground with Mr. Young at the first opportunity.

GR-1503

[fol. 267]

GOVERNMENT'S EXHIBIT 114

11/19/36

Mr. Roig's cable states that Mr. Trippe took the position it was impossible for Pan American-Grace Airways to operate through Cali because his original agreement with Von Bauer and the Colombian Government and the purchase of the Scadta stock making possible treaties under which we were enabled to bid on our route and operate in Colombia, imposed the obligation not to operate in the interior of Colombia.

The facts as I can gather them are as follows:

Scadta was for a number of years refused permission to land in the Canal Zone. Accordingly, when the airmail service was started, there was an obstacle to obtaining landing rights on either the east coast or the west coast of Colombia. The State Department was then willing to let Colombia into the zone in exchange for reciprocal rights, but the situation then was that Scadta was more anxious to keep American companies out of Colombia than get into the Canal Zone.

In December 1928, preliminary discussions were begun between the Department of State and the Colombian minister to Washington. As a result of these negotiations, there was a formal exchange of notes dated February 23, 1929 whereby reciprocal rights were granted.

G061930

During January 1929, negotiations had been conducted by Pan American Airways with Scadta for the reciprocal use of the two companies of the facilities of each in the Canal Zone and in Colombia. This resulted in arrrangement of January 28, 1929, copy of which is hereto annexed.
GR-11568

In February 1929, Pan American Airways posted a bond of $25,000 with the Colombian Government in exchange for procuring flying rights. Under date of February 28, 1929,

1-31-55
F

[fol. 268] Mr. Trippe, in behalf of Pan American-Grace Airways, Inc., submitted letter to the Post Office in reference to its bid, in which was stated:

> "We have arranged for service between Cristobal, C.Z. and Guayaquil, Ecuador, through sub-contract to Pan American Airways, our affiliated company which already holds foreign mail contracts with your Department in the Caribbean, in Mexico and along the North Coast of South America.
>
> Pan American Airways, as a result of many months efforts, is qualified and bonded to operate in the Canal

Zone under the executive orde , dated September 28, 1928 and February 18, 1929.

• •

For over two years, Pan American Airways has been attempting to secure operating permits from the Colombian Government. In this connection conferences have been had with executives of the Scadta, the German controlled Colombian air transport company, over a period of years in New York, in Berlin and in Colombia. Through these conferences an agreement was finally reached with Scadta whereby Pan American Airways enjoys the exclusive use of Scadta's technical facilities on the coast of Colombia. These facilities built over a period of years at a cost of over a quarter of a million dollars are essential to the early operation of the dangerous section of this route owing to the prevalent fog and extreme tide conditions. (f) and (g) It is expected that Pan American-Grace Airways will have acquired proper facilities equal to those now owned by Scadta at the points of call between the Canal Zone and Ecuador, a distance of 900 miles, would require least eight months."

When service was started on Route No. 9, it was carried on by Pan American Airways between Cristobal and Guayaquil due to the fact that Pan American-Grace Airways did not have operating rights in Colombia. These rights were obtained under date of November 4th, 1929, at which time bonds were deposited with the Colombian Government by Pan American-Grace Airways.

G061931

GR-11569

If Mr. Trippe means that there was an agreement with the Colombian Government that if they would enter into the reciprocal agreement with the United States we would not fly in the interior of Colombia, this, of course, could be changed by mutual agreement with the Colombian Government at any time. If he means that he made such an agree [fol. 269] ment with Scadta in order to induce them to withdraw their objections to the reciprocal agreement, I

can find no evidence that we had notice thereof. There is no reason why we should be bound by such an agreement any more than any other American company which undoubtedly could qualify under the reciprocal arrangement.

Certainly, to have had the effect stated by him, such an arrangement must have been made before February 23, 1929 and I am almost certain Panair had no interest in Scadta at that time and absolutely certain that if they did we had no notice thereof. I do not know when Panair did acquire their interest in Scadta or when we received notice thereof, but I do know that under date of January 1931, an arrangement was signed with Von Bauer in connection with Ecuador when Von Bauer was in New York and at that time we did not consider Panair had any agreement with Scadta.

If the arrangement claimed by Mr. Trippe was actually made, it is difficult to understand how UMCA is operating in the interior of Colombia.

GOVERNMENT'S EXHIBIT 115

Air Mail 11.20.36
Stgo 11.24

CCJTK NEW YORK, November 20, 1936.

John D. MacGregor, Esq.,

BUENOS AIRES (Copy to Santiago).

Dear Mac:

In my cable to you of today regarding the third trip, Argentine, etc., I added a few words to the effect that I was air mailing you today a letter with details regarding an interesting Colombian development.

Before leaving by air for the Buenos Aires Peace Conference, Miguel Lopez, who as you know is the Colombian Minister to Washington, left a message which has just been transmitted to us by the Colombian Consul. This message is to the effect that the President of Colombia would like to see Panagra include Cali in its regular schedule including Buenaventura and Tumaco.

G061927

Kirby returned on Monday of this week from Colombia and he advises that when he visited President Lopez last week the latter informed him that he had already written to Miguel. Kirby explained to President Lopez that if the line were deviated through Cali the entrance to Colombia would probably be Bahia Solano where the planes might possibly refuel, and President Lopez raised no objection to the elimination of the Buenaventura call nor to the route as outlined, which would continue from Cali to Papayan and down the coast either via Tumaco or eliminating Tumaco when the more direct route Popayan/Guayaquil had been thoroughly surveyed.

1-31-51
F

We transmitted all of the foregoing information to Roig in London, requesting that he discuss it with Trippe with whom he had an appointment yesterday.

GR-11571
[fol. 271]

In our cable to Roig we added that as the adoption of the foregoing plan is distinctly well within Panagra territory, we did not consider there could be any question on the part of Panair.

Roig discussed it with Trippe pointing out the feasibility and desirability of this operation and the great importance to Panagra of availing of this opportunity.

Roig suggested that if his Scadta interests were conflicting, that he remain neutral, leaving the matter in our hands.

G061928

In a cable from Roig today he advises that Trippe advanced no arguments in contra, but took the position that the proposal was impossible because his original agreement with Van Bauer and the Colombian Government and purchase of Scadta stock making possible treaty under which we were enabled to bid on our route and operate in Colombia, imposed an obligation not to operate in the interior of Colombia, saying that the situation had been fully explained at an early meeting in Hoyt's office at which Patchin and Cogswell were present.

Roig stated we were never party to such an agreement and the President's action made the present situation force majeure and we could rely on the President to deal with GR-11572
Scadta; but Trippe replied that this would create an impossible position and on Roig's continuing to press Juan suggested a settlement of the Colombian question by W. R. Grace & Co. purchasing part of Panair interest in Scadta. [fol. 272] While Trippe did not agree, Roig feels very strongly that we should reply to the President of Colombia that the suggestion is most interesting and that we are investigating and taking up this matter with our associates and that meanwhile we should study the operating plans.

We have discussed this matter today with Patchin and Cogswell, neither of whom have any recollection of the obligation not to operate in the interior of Colombia referred to, nor has Mr. Inglehart who, as you will recall, discussed a great many of these matters with Hoyt at the beginning.

Irrespective of any opposition on the part of Scadta, we feel that the proposed operation is so manifestly in the interest of Panagra and to the convenience of Colombia that we should never lose sight of this objective and see that it is achieved.

I shall take advantage of my presence at the Canal to discuss this matter with Harris, who I understand has a detailed knowledge of Colombia, as has also Campbell who accompanies me on my trip.

I do not expect to remain at the Canal for more than two days.

With best regards,

Sincerely yours,

G061929

GOVERNMENT'S EXHIBIT 116

Rec'd—9 DEC

PANAIR DO BRASIL, S. A.
EDIFICIO A NOITE—RIO DE JANEIRO

Rio de Janeiro,
November 30th, 1936.

Mr. A. Garni, Vice-President,
W. R. Grace & Co.,
7 Hanover Square,
NEW YORK CITY.

My dear Adolf:

I have your letter of November 20th which reached me from Buenos Aires yesterday.

What you have to tell me with regard to the Colombian situation is extremely interesting. Frankly I think we are headed for a complete show down with our associates. I had, of course, anticipated opposition on the question of running into Cali. It is rather surprising however to learn of the very arbitrary interpretation given to the Tri-Partite agreement you mention in the fourth paragraph of the second page of your letter. We had, as you say, no intervention of any kind in the Scadta deal and I can readily see your point of view that where we had no knowledge we could not be bound by the terms of any agreement which might at any time affect the efficient operation of our services. The suggestion made in the last paragraph of the

second page is quite naive. I think the deal you mention must stand on the books of our associates at somewhere in the neighborhood of $1,000,000 and I have no doubt that the investment you mention would be offered at about a fourth of that sum for a 25% interest of our associates' participation which I think is 85%. That would be a hefty price to pay for an interest in a company in which, according to our associates, there is no voice in the management. I am basing my assumption on the attitude assumed by our associates in connection with the extension to Salta. I believe they have in mind whatever they can get over $50,000 for releasing us from what has never been anything more than a gentlemen's aggreement and an agreement which could never, for obvious reasons, be reduced to writing.

I am hoping that in addition to your conversation with Harris at the Canal you are taking steps to have at least a survey, made from the ground, of the Cali and Popayah regions. Possibly you will use Douglas Campbell for this assignment although I would prefer to see a survey made by a purely Grace or outside individual, as Douglas has been closely affiliated with Panagra of late months and has an official title in our company.

Yours truly,

/s/ J. D. MacGregor

G061922

PAN AMERICAN AIRWAYS SYSTEM, A MAIOR REDE DE TRANSPORTES AEREOS DO MUNDO

[fol. 275]

GOVERNMENT'S EXHIBIT 118

March 1, 1937.

Mr. Roig

Memorandum for Mr. Garni:

PANAGRA

You will take up the matter where Roig left off and concentrate on an endeavor to obtain three things:

(1) An adequate service to Panama.

(2) Entry into Cali.

(3) Service through Bolivia.

The task of accomplishing this is a very difficult one and I do not think you will get Trippe to come along unless you build a pretty big fire under him. It will perhaps be big but not so big that we can't put it out at any time.

PANAMA SERVICE

I attach herewith copy of Lima's Pansago cable No. 30 and also copy of a letter written by Boxhorn to Mr. Henry Morgan and you can get further details about this incident which brings out very clearly the fact that we are not going to be able to build up an international service unless we get a really adequate service between here and Panama, and unless it is closely correlated with Panagra. There are several things that you might do. One is to talk it over pretty frankly with Harllee Branch. The second is [fol. 276] that Douglas Campbell might begin a careful study looking toward our putting in our own service from Miami to Cristobal and possibly continuing on to Cali by way of Medellin. Douglas might speak to Rickenbacker to see whether we could use his terminal at Miami for amphibians and get him to do our terminal shop work. This would give our service a great advantage as it would connect up on the same field with Eastern Air Lines and we

could run a complete direct service from New York through Buenos Aires.

The third thing that might be done is that Douglas might go down to Colombia stopping off in Havana and having our lawyer there begin a thorough study of the question of our getting permission to land in Cuba. He might also stop off at Kingston and see whether we could get a permit to stop there, after which he could proceed to Columbia to study the question of getting permission to go to Medellin and/or Cali by acquiring one of the old connections or getting a new one.

I think you ought to see Trippe and give him a clean-cut notification that if he backs Scadta in going to Guayaquil or Quito or helps them to do so, we will be entirely free to [fol. 277] enter into competition with him as we would consider it a definite breach of his agreement with us.

I think that our activities as above indicated will reach Trippe and once he sees that we are serious about it, I think we will be able to make a trade with him on the three points to which I have referred above.

I would suggest that you should study this all out and let me have your views discussing them with Roig by telephone if necessary.

D. S. I.

(Dictated by telephone
from Florida)

GOVERNMENT'S EXHIBIT 119

GASPARILLA INN
Boca Grande, Florida

copy of handwritten letter

Dear Garni:

I have sent Miss Boucher a memo for you, with copy to Mr. Inglehart, regarding his memo of March 1st, points

"2" and "3", just in case I did not make the points I have in mind entirely clear to Cogswell and Campbell. I have not gone into point "1" as that is a larger subject which will probably be open when I get back. Whether it suits to meet one breach of agreement by threatening another is a point I find it hard to decide. It may depend somewhat on whether we would prefer to scrap Panagra at the expiration of the present mail contract and form a company of our own to compete with Panair on the new contract. There is a good deal to be said for this but I confess I haven't yet been quite able to bring my mind around to it. The risk, of course, is that the new mail contract might go at a ruinously low figure and if we got it we might still have Panair competition direct or through Scadta. I doubt, however, that this would suit Trippe any better than it would us. I do not see, therefore, but what we are in a position to take as strong a stand on any of these points as necessary for their accomplishment.

G029253

March 5, 1937

[fol. 282]

GOVERNMENT'S EXHIBIT 120

March 8, 1937

MEMORANDUM FOR MR. GARNI

PANAGRA

I explained fully to Cogswell and Campbell my ideas regarding Items "2" and "3" in Mr. Inglehart's memorandum of March 1st.

Briefly I think you should first be actually elected to the Board. This is definitely arranged and it has just been a case of getting Trippe to attend a meeting to do. It was to have been done at last week's meeting which was postponed on account of his absence in Washington. I hope it was held this week and this matter disposed of. The next thing is to get the two DC-3's definitely ordered and allocated against Panair's option with Douglas in order to get a prompt delivery. This was practically agreed to last week and has I hope been closed by now.

With these two matters out of the way my thought was to put it definitely up to Trippe that we must go into Cali and that he must control Scadta's competing with us on the West Coast; the former on the ground that Cali is definitely in Panagra's territory under our agreement and the latter on the ground that Scadta's expansion on the West Coast is in direct violation of that agreement.

G029251

If he objects to Cali on the same ground he did in London we should at least be freed to handle the matter with the Colombian Government and Panair should take a neutral position. If he refuses or claims to be unable to control Scadfa's expansion in our territory I think we should tell him that then Scadta simply becomes a part of the foreign competition which, with the cooperation of the State and Post Office Departments, we are now battling on the West Coast and that we will take it up with those departments in

GR-5305
11/29/54 PJS

[fol. 283] the same way that we have Condor and other foreign competition, and this, if he fails to come along, I should do. After all the recent talks with the Government about foreign competition and the interest they have shown in helping us to meet it, it is simply unthinkable that we should be cherishing and protecting a foreign competitor right in the Panair family.

Regarding Bolivia/B.A. extension, you will have seen on your return that he had arranged so far as Bolivia was concerned, to go right through to the Argentine border. We

also proposed starting in April provisional service between Cordoba and Tucaman. Trippe refused to agree to this until the "Nybra settlement" was agreed to. We asked Panair for details of the $90,000 but while these have been prepared Trippe had not yet released them. If, as I assume they are on a mileage basis, it is obvious that these particular miles are not worth anything like the East Coast Nyrba mileage which Trippe had to buy in order to get a satisfactory East Coast mail contract. If we valued them at 1/10th it would be liberal. The many reasons for this are well known to you. Any idea that Panair is entitled to any consideration for having "kept the flag flying" in the Argentime is, of course, unfounded. We are the ones who have done that for Panagra has paid ⅔rds of the B.A. office expense and I had thought to throw into this discussion the idea that the time had now come for us to definitely take charge of that office.

Campbell is familiar with the discussion I had with MacGregor and Harris about moving Kirkland to B.A. Whatever we do in this connection, I think we should be careful not to weaken Santiago's control. I spoke to both Campbell and Simon about this.

Mr. Harold J. Roig, Esq.,
Vice-President
W. R. Grace & Co.
7 Hanover Square
New York, N.Y.

Dear Mr. Roig:

We received this morning a new page for Panair system Tariff giving time tables ten and eleven covering their joint service in Colombia with Scadta. This page is shown as being effective February 15th, 1937. You may have already seen this time table but if not, I suggest that you secure one as it shows the projected service of Scadta from Cali to Quito, with a weekly plane in either direction. Also shown on the Tariff is the rail connection which is made from Cali to Buenaventura.

If Panair Scadta inaugurate this extension of their service from Cali to Quito they will be paralleling our route

between here and Ecuador, and no doubt it would not be long before they further extend their line from Quito to Talara where they could easily hook up with Fawcett and compete with us through Peru and even through to Chile by using the Chilean Government service.

This appears to be a serious threat to Panagra service and especially since the projected service of Scadta from Cali to Quito will be serving the interior capitals of Colombia and Ecuador, whereas Panagra skirts the coast.

Very truly yours

Dear Garni,

. . . . . .

Panagra.

This is a very perplexing problem. I appreciate the danger of starting competition with him. But *he* has already started competition with us of the most Machiavellian and effective type. Talking with him will get nowhere. It never has, only pressure counts.

W. R. Grace & Co. might advise Pan Am officially of what is happening regarding Bolivia-Argentine extension and

Panama Scadta situation and state that in order to prevent serious prejudice to Panagra W. *R. G. & Co. proposes to start the service in the Argentine and start a direct service Miami to Cristobal* but offering these services to Panagra at cost, etc. etc. Making clear that our interest is merely to obtain fair treatment for Panagra and to give that company the great development to which its accomplishments and its preferential geographical position entitles it. Think this over and talk it over with Rôig.

Yours sincerely,

s/ D. S. L.

Panagra

In the early days of Panagra and before Pan American had purchased Nyrba, it was felt that in view of the general relationship between Panagra and Panair and the interest of Panair in Panagra, there should be some general understanding as to the respective sphere of activity of the two companies. A gentlemen's agreement was accordingly reached that Panagra's activities would cover the West Coast of South America and Pan American the East Coast and that in respect of the Argentine, Panagra's only interest would be in the line between Mendoza and B. A. and thence to Montevideo. This was definitely a gentlemen's agreement covering the respective ideas of policy as they existed at that time. It was not contemplated that this understanding was not subject to change when it suited the mutual interest or that in the event of such change money payment should be required by one company to the other as a condition to such change.

G037160

Pan American departed from this agreement when they purchased Scadta to the extent that Scadta operates on the West Coast of South America, violated again in the organization of Umca to the extent that this company diverts West Coast traffic and will violate again if Scadta extends to Quito. Panagra and W. R. Grace & Co. did not object or ask for any money payment from Pan American in connection with any of these operations because at the time they were not prejudicial to Panagra or in any event Panagra was not in a position to give the corresponding service. Similarly, when in the interest of Panagra it was necessary to take prompt action in order to secure the La Paz service, W. R. Grace & Co. secured operating rights in their own name and took the full responsibility for having to operate this service until Panagra was prepared to take it over. They transferred these operating rights to Panagra without receiving or even asking any payment and they

12/21/54 F
GR-7264

[fol. 287] have ever since provided Panagra with full service in Bolivia including not only routine handling of the service but constant concession and other governmental negotiations without receiving or asking any increase in their annual agency fee.

G037161

Pan American at that time did not own the Argentine and do not own it now. They did not at that time have and have not now any tangible or intangible rights or operating permits or other facilities to be turned over to Panagra in connection with the Scadta service.

When about a year ago in the interests of Panagra it became desirable to divert the Mendoza Buenos Aires service through Cordoba Mr. Trippe made it a condition to his giving consent to this as a director of Panagra that they recognize some payment to Panair if later on Panagra should wish to extend to Salta, and this was agreed to in order to make possible this necessary Panagra development. This was the first time that any suggestion was made of a money payment to Panair in the event of any departure from the gentlemen's agreement above referred to. This

money payment was related to Nyrba and it was known that the amount could not be large as no part of Panair's purchase price of Nyrba had been paid to secure the Salta service but rather to secure an East Coast mail contract. The first amount mentioned by Mr. Trippe was $25,000. This was subsequently increased to $90,000. During the last month this has been further increased to a minimum of $125,000, a maximum of $345,000 and an offer of settlement based on payment of $50,000 cash and the balance up to $245,000 out of earnings. In agreeing to Panagra's operation of the Salta service Panair are turning over nothing to Panagra and are depriving themselves of nothing except an academic right to run a service to Salta themselves which they have not exercised during the past eight years. GR-7265

fol. 288 which they could not exercise now in connection with their Asunción cut-off as their schedule does not permit of time for such diversion and which they could not operate as a separate service except at a loss. Their talk of operating the Salta service themselves now, therefore, is a mere specious make-weight to justify impossible and entirely unreasonable demands.

GOVERNMENT'S EXHIBIT 124

Panair files

Claimed payment based on Panair losses and expenses in the Argentine is without basis:

1—There was never any agreement to recognize these expenses, the only expense undertaken to be recognized being that in connection with the purchase of Nyrba.

2—Under the agreement Panagra agreed to a "hands off" policy in the Argentine to enable Panair to develop that field if they wished to and were able to. Their efforts

in this direction have been a complete failure and nothing whatever has been developed which they are turning over to Panagra. There is certainly no moral obligation to contribute to these fruitless attempts carried on for Panair's own benefit and resulting in nothing.

3—A not inconsiderable part of these "expenses" represent work done by Panair's B.A. office organization (Bradley, etc.) to the expense of which Panagra have already contributed two-thirds of the annual budget and at the beginning contributed also to a large amount of Argentine development expense. It is fair to bear in mind, however, that in these earlier expenses there was always a certain amount allocated to Panair's special activities.

4—The present Panagra Argentine program has not been facilitated in any way by the above activities and would have been just as feasible if these activities had never occurred.

5—The present Panagra Argentine plan offers the best possibility for Panair's making money in the Argentine and they have a better chance of recouping their losses in this way than any other but there is no basis for them in addition claiming special payment.

Memorandum of conversation at the University Club, on the morning of April 6, 1937

* * * * *

The Colombian situation was again discussed from various angles but without concrete results. Mr. Trippe repeated what he had said the night before, namely, that

should Scadta extend to Ecuador against the wishes of Pan American-Grace, Pan American would have no recourse but to dispose of its interests, but he felt that some agreement could be reached which would not necessitate this step. Mr. Trippe again insisted that there was an agreement between the W. R. Grace interests and Pan American covering the territory in which Pan American-Grace was to be dominant and without competition on the part of Pan American or its subsidiaries, and that while he felt it would be quite in order for Pan American-Grace to operate through Cali, he did not think it would be equitable for that company to expect to be allowed to serve Medellin. He also said he believed that now was the time to put in writing exactly what Pan American-Grace could and could not do, as well as Pan American, and he thought this agreement should be signed by Pan American Airways and W. R. Grace & Co., Pan American undertaking to see that Scadta lived up to the arrangement or sold out. Mr. Roig agreed that a written statement of the position of both companies would be desirable if an agreement could be reached, and Mr. Trippe suggested that he draft up something that would be acceptable to the Grace interests, which Mr. Roig promised to do.

AIR FRANCE—PARAGUAY
PANAIR PANAGRA—ARGENTINA COLOMBIA

NEW YORK
April 7, 1937.

Mr. G. Vidal,
SANTIAGO

We are at present in the thick of a battle royal with Panair on both the Argentine and Colombian questions.

We are demanding the right to go through Medellin, if necessary, as well as to divert our line via Cali. We have also taken the position that a survey flight by SCADTA to Quito would be an infringement of our agreement with Panair as to division of territory. Von Bauer is here at present and I believe is showing himself completely recalcitrant and unreasonable.

PRIVATE AND CONFIDENTIAL

April 12, 1937

MEMORANDUM TO MR. ZALLES:

COLOMBIA

1—The Kellogg-Olaya treaty made between the United States and Colombia about 1929, provides:

> "Commercial aircraft of U. S. registry will be permitted to fly along the Atlantic and Pacific Coast of Colombia and over the territory immediately adjacent to them; to land on land or water, take fuel, make repairs, discharge and receive passengers, mail and freight in the Colombian port where there are authorities capable of enforcing the regulamentory formalities, subject to the regulations and dispositions equivalent to those established for commercial aircraft of Colombian registry annexed to this note."

This is, I believe, the only treaty giving American planes any flying rights in Colombia. You may recall that in

return Colombia received the right to fly to and over the Canal Zone. It is under this treaty that Panair have operated their line along the north coast of Colombia and Panagra theirs along the west coast, actual operations being conducted under permit from the Colombian Government, subject to termination on sixty days' notice. You will note that under the treaty, Panagra operations are practically limited to over-water flying but it is to be borne in mind that at the time of the treaty this is the way the route was being operated and in fact the only way it could have been operated as land planes at that time had not been developed suitable for overland operation along the west coast of Colombia.

G031046

GR-7271
12/13/54
F

2—Early in the association between Panair and W. R. Grace & Co. and the formation of Panagra, there was a gentlemen's understanding between the two interests that Pan American's field of activity should be the East Coast of South America and Panagra's, the West Coast, plus the international line in the Argentine between Mendoza and B.A. Under this arrangement, it was always our under-

6

standing that although we were flying over the Pacific, [fol. 293] the West Coast of Colombia, with whatever that might include, was within our sphere of activity. We, of course, realized that Scadta was operating throughout the interior of Colombia but that, as we understood until some time later, was a wholly independent operation which had no bearing on the Panair/Panagra understanding. Along about 1932, we learned for the first time that Panair had acquired a large interest in Scadta, the extent of which we did not know until the Post Office mail contract investigation when it appeared to be about 84%. This we have since learned is now about 72%.

3—With the improvement in land planes inaugurated by the Douglas DC2 (which we are now using in our land operations south of Colombia), furthered by the DC3 (some

of which we now have on order), and probably brought to a high state of development by the proposed Douglas 4-engine plane, the time is not far distant when we will be able to operate our international line overland across Colombia, thereby, of course, greatly improving the service we are able to give to that section of the country. Panagra is contributing, along with other American airlines, to the experimental and development expense in connection with the 4-engine Douglas land plane above referred to. With a view to preparing ourselves for the above development we recently took up with Pan American the question of diverting our international line to go through Cali entering Colombia by way of Bahia Solano, omitting Buenaventura and coming out at Tumaco. We have made one flight over part of this route and while our investigations have not been completed, reports to date indicate that this is a feasible route. We have also taken up with Panair the possibility of later developing the main line south of Cali overland to Guayaquil, connecting by shuttle service to Quito and later on, if it proves feasible, running the direct line through Quito. Similarly, north of Cali we have suggested the later

[fol. 294] possibility of running overland to Cristobal, possibly by way of Medellin and Turbo. All of these extensions would, of course, involve permit from the Colombian government which would include not merely the right to run the international line over the routes indicated *but also to carry cabotaje passengers mail and express.* Panair have stated in these discussions that in order to make possible the Kellog-Olaya treaty they had purchased the major portion of the stock of Scadta and in connection with that purchase had made an agreement with Scadta that Panair and Panagra would combine their operations to the Atlantic and Pacific Coasts and would leave the interior business in Colombia to Scadta. Panagra was not a party to this agreement and knew nothing of it until it was mentioned in these discussions and are of course not bound by it. Nevertheless it seemed advisable to consult Von Bauer's views and on his recent visit to New York, George Rihl, of Pan American, talked to him and has reported to us that Von Bauer

stated that he had no objection to Panagra's going into Cali and diverting their international line north and south of Cali on the routes indicated even including Medellin, provided we did not carry cabotaje traffic between Cali and Medellin. Pan American, however, object to Panagra's going to Medellin partly because they consider that Medellin is not western Colombia and partly because Panagra would compete with Umca between Medellin and Cristobal. Umca is owned by Panair and prima facie their operation of this line would be in violation of their understanding with Scadta regarding interior services in Colombia but they state that Von Bauer was agreeable to this at the time as he preferred that Mejia who had the Cristobal Turbo Medellin concession work with Panair rather than outside interests who might be hostile to Scadta.

Memorandum of telephone conversation between Mr. Garni and Mr. Rial on the morning of Monday, April 19th '37

Mr. Garni called me shortly after I had finished talking with Mr. Roig. He said he wanted to call my attention to what might happen in case we went through with the sale of stock to von Bauer that is being contemplated. He stated that when W. R. Grace was making an agreement with the Chilean Navigation Company, regarding traffic agreements on the west coast, etc., it was found necessary to consult the various departments at Washington as even the War and Navy Departments were interested, and that they filed a copy of the agreement as finally signed. Mr. Garni pointed out that the amount offered by von Bauer for approximately 53 or 55% of the Scadta stock was, in his opinion, four times what it was worth from a commercial viewpoint, taking into consideration the balance sheet that Mr. Roig had shown him. Mr. Garni further stated that the only reason von Bauer could be interested in the stock at such a figure was because he had a government back of him, and it was to be supposed it was Hitler. I told Mr. Garni that I would mention the matter to Mr. Trippe but that the price being offered us was not as much as we had originally paid von Bauer. I stated that we gave von Bauer something over $400,000 in cash and 23,000 shares of Pan American Airways stock. Mr. Garni did not seem to understand at first what I had said about the number of shares of stock being in addition to the cash, as he said that paying von Bauer something over $400,000 was less than Mr. Trippe stated the company had cost, which Mr. Garni understood to be around $1,300,000. I repeated to Mr. Garni that in addition to the cash, we had paid von Bauer 23,000 shares of our stock, and then he said we had made a bad deal. I told him it was necessary to pay this in order to get hold of Scadta, which was important at that time in order that we could get rights through Colombia.

Mr. Garni stated that the W. R. Grace interests were very much concerned over the happenings of the weekend,

and I asked him what he would have us do. My memory is that Mr. Garni said he could not advise us in that as it was a matter for us to settle ourselves. He brought up the question of Pan American-Grace immediately proceeding to try to get permission to go into Cali, and I told him the same as I had told Mr. Roig previously, namely, that I thought it best to wait to see what kind of a deal we could make with Scadta for their cooperation. I further stated it was my understanding that Mr. Trippe hoped to work out some agreement with Scadta that would not mean cut-throat competition between the respective companies, and that it was also my understanding that von Bauer was agreeable to such arrangements.

I also told him that Mr. Trippe had agreed to send over to Dr. von Bauer a draft of an agreement. I might say here, that I also told Mr. Roig in my conversation with him, that the deal with Scadta was to be contingent upon some working agreement between Pan American and Scadta which would, of course, compromise Pan American-Grace to a certain extent. Mr. Roig insisted that any agreement that was made should be shown to Pan American-Grace, and I said undoubtedly that would happen as probably the agreement would provide for some kind of guarantee of performance, and Pan American-Grace would naturally be in a position to break any agreement made by Pan American.

Mr. Garni asked me to talk the matter over with Mr.

103

fol. 298 Trippe and arrange a meeting between Pan American and the Grace interests when the subject could be discussed again.

G.L.R.

104

[fol. 299]

GOVERNMENT'S EXHIBIT 130

COPY

Memorandum of conversation held between Messrs. Trippe, Garni, Roig and Rihl in Mr. Trippe's office on the morning of April 22, 1937

Mr. Garni opened the conversation by asking Mr. Trippe what was to be done in view of the recent developments in Colombia, i.e., survey flight by Scadta to Quito and the information received from von Bauer regarding the cancellation of Scadta's basic contract. Mr. Trippe replied that he did not quite know, but thought we should work out some arrangement whereby Pan American-Grace interests could be protected in line with the original understanding as to its sphere of activity in relation to Scadta's. Mr. Trippe further explained that the probabilities were that the cancellation of Scadta's concession was due directly to the delay in that company making a survey flight to Quito, which was made necessary at the direct request of the President of Colombia. Both Messrs. Garni and Roig stated that they did not believe the delay in making the flight had anything to do with the cancellation, but rather it came as a result of the enmity of some local official, as they had received advice that the Postmaster was not friendly towards Scadta, and the probabilities were there were other interests that were trying to encroach on the Scadta operation.

Mr. Trippe then explained that it was not his desire to hold the W. R. Grace interests responsible, and that Pan American was perfectly willing to take any loss that might be due to the cancellation of Scadta's concessions. However, he did feel that Pan American-Grace should buy half of the interest Pan American held in Scadta, the price to be determined by arbitration if it was not possible to arrive at a price by mutual agreement. Both Messrs. Garni and Roig objected to arriving at a price by arbitration and stated that they did not feel Pan American-Grace could afford to buy an interest in Scadta, even though the price was very considerably lower than the figure mentioned by

Mr. Trippe as what he considered our interests worth, and what von Bauer had offered for 15,000 shares of Scadta. Von Bauer offered, previous to the receipt of information about the cancellation of the contract, 10,000 of P.A.A. stock, or approximately $667,000 for 15,000 shares of stock. Mr. Trippe stated that he realized that the cancellation of the Scadta concession would probably mean that von Bauer could not uphold his offer, but insisted that Pan American-Grace should participate in the ownership of the stock in order to avoid conflicting interests. There was a great deal of discussion on this subject, with the final result that Messrs. Garni and Roig flatly refused to consider the purchase by Pan American-Grace of an interest in Scadta as they felt that Pan American-Grace could get into Colombia through a local subsidiary on much more favorable terms than would be possible by making a deal with Pan American. They stated that Pan American-Grace had been requested to make a survey flight via Cali with a view to eliminating Buenaventura as a stop on their regular service, the request coming from the Colombian Government. Mr. Trippe did not oppose the idea of making a survey flight but did state that he felt some formal arrangement ought to be made with Scadta. He stated that von Bauer had already advised Scadta to tell the Colombian Government that they could not establish a regular service from Cali to Quito, and had also given instructions that no opposition was to be made to Pan Grace deviating from their present route to allow the inclusion of Cali, and that this procedure was what he, Mr. Trippe, had promised would be done. Mr. Trippe further stated that he could see no reason why it would be inimical to Pan American-Grace interests to make a formal agreement [fol. 300] which would compromise Pan American-Grace not to go to other points in Colombia not on the route that would be necessary to be flown by including Cali, without the consent of Pan American and Scadta. Mr. Garni objected to making any formal agreement and brought up the question of Medellin. We discussed the possible inclusion of Medellin at some future date, and both Messrs. Trippe and Ribl opposed any such action as being in no way obligatory on the part of Pan American or Scadta

139-63

microcard

to agree to. Mr. Rihl stated that it did not seem equitable for Pan American-Grace to be allowed to compete with the Umca operation, inasmuch as that operation had been carried on at a loss by Pan American, and at the time it was initiated it was to the best interests of Pan American-Grace to have this line in the hands of Pan American. Mr. Rihl also stated that certainly at the present time Pan American could operate it much more cheaply than could Pan American-Grace on account of having surplus crews and equipment at the Zone. Mr. Trippe stated that the question of Pan American-Grace purchasing Umca could be discussed later on, but he did not feel that it was necessary to compromise Pan American at the moment.

Mr. Trippe again insisted that some sort of arrangement be made whereby Pan American-Grace interests could be protected without prejudicing the interests of Pan American-Grace, Pan American and Scadta. He repeated that he had talked the matter over not only with the Board but with certain officials in Washington, and it was felt absolutely essential that Scadta remain in the hands of American interests, and that if it was allowed to fall into foreign hands it would very greatly prejudice the interests of Pan American-Grace. Mr. Rihl pointed out that even though the present contracts of Scadta were to be cancelled undoubtedly others would be made, and that Scadta would continue to operate, and that while it was possible that the Pan American interests were not worth what von Bauer had offered before the talk of cancellation came up, it is more than probable that von Bauer would still be interested in buying. Mr. Rihl stated that both Messrs. Garni and Roig had expressed very great alarm over the possibility of von Bauer buying the Pan American interests, as they figured that would mean German competition. Mr. Rihl asked whether they thought it equitable for Pan American to be expected to carry the load of keeping Scadta from competing with Pan American-Grace. He also stated that Pan American would naturally have to do everything in its power to see that new concessions were obtained for Scadta, as it could not be expected to liquidate Scadta. No definite answer was given to this question.

The final result of the meeting was that Messrs. Garni and Roig promised to study the question of making a definite agreement on the territory in which Pan American-Grace could operate and advise Mr. Trippe later. There was no undertaking, however, to make any agreement with Scadta, nor would Messrs. Garni and Roig agree that Pan American-Grace or W. R. Grace should assume any responsibility regarding the Scadta operation. The question did not come up as to whether W. R. Grace, as such, should purchase an interest in Scadta, but Mr. Garni did refuse to compromise W. R. Grace to increase the capital of Pan American-Grace in conjunction with Pan American, which would permit Pan American-Grace to take over, wholly or in part, Pan American's interests.

GOVERNMENT'S EXHIBIT 131

Mr. Iglehart

New York, April 30, 1937

G. Vidal, Esq.,
Santiago, Chile

Dear Vidal:

ARGENTINE

I have read your cables and letters on this subject with the greatest interest.

In the first place, I think you are to be congratulated on on the very able manner in which you handled the whole matter of procuring Panagra's operating rights for the Salta line. Your analysis of the situation has been accurate from the outset and your procedure in every step admirable. It also seems increasingly clear that your action was taken none too soon and I am glad we were able to get the necessary clearance here in time to enable you to act when you did.

While we were naturally a good deal concerned with the indications we received from Rice of possible attack upon our operating permit, we decided to cable you last night,

leaving it to you to decide what had best be done to protect the situation. We are very hopeful that the U. S. subsidy for this extension will come through and naturally do not wish when that has been settled, to find ourselves in difficulty in operating the line. We realize, however, that you are fully aware of this situation and are so much more familiar with the actual situation in the Argentine that you will know what is best to be done to safeguard the position. It is, as you say, unfortunate that Panair did not secure their permit at the same time we did and that their application may now encounter difficulties. There is always the possibility, however, that this may react to the prejudice of our permit and this is naturally what we wish to avoid. You will know how best to accomplish this.

GOVERNMENT'S EXHIBIT 132

PERSONAL 1920

CRISTOBAL/CALI ROUTE

NEW YORK,
May 5, 1937.

Mr. H. R. Harris,
LIMA.

I note Mr. Beatty's letter to you, 4640-P of April 27th.

I am sorry that at present we are at somewhat of an impasse in connection with the Cali deviation. The matter, as you know, is intimately connected with a proposed division of territory between Panair and ourselves, in which SCADTA, as a subsidiary of Panair, is involved.

Incidentally, the sale to SCADTA of the Panair interest has not yet taken place. Von Bauer says he is afraid his contract will be cancelled and, for that reason, he is pushing his service to Quito.

Until I can get the situation cleared I cannot talk about Quibdo or any other place that has previously been considered SCADTA territory. It may be that Zalles can get a general radio permit, which would help matters considerably, but that would still not give us the right to land at Quibdo.

You can readily understand that our efforts of the past few weeks have thoroughly aroused SCADTA as they see where their invasion of our zone has brought a counter attack and they resent this. You can well imagine that when

a Company has had a monopoly, such as SCADTA has enjoyed, for almost 17 years, it views with extreme distaste any competition such as we contemplate.

You must give me time to clear the situation as the Panair financial interest in SCADTA impells them to try to block our game.

J. D. MacGregor.

JDM/Q

[fol. 304]

GOVERNMENT'S EXHIBIT 133

Dear Garni,

We had two conferences with Juan regarding the organization plan before I left. At neither of them was the question of any change of Grace functions even mentioned. Juan never left the chart out of his hands and I never saw the idea Grace Company Pan Am until George arrived in Lima. Our only discussion in New York was with reference to the single point of the change in operating organization as contract with Priester. If Juan had had any idea of including any change in Grace functions that was certainly the time to mention it.

While I suspect the question was answered before we got through I gave Juan the benefit of the doubt and your letter No. 1 while it crystalized my suspicion that he was beginning to chisel did not indicate that he has indicated any real change of functions or any specific change whatever. When George arrived in Lima he certainly had no idea that any change in Grace functions were contemplated for when I asked that the additional words be inserted so that we would be in no doubt on the point, I agreed. Even now I do not know which of our functions Juan objects to.

It seems perfectly clear to me that somewhere along the line after George and I left, Juan got the idea of using this opportunity to revive again the whole question of parent company functions and that he is now trying to get this afterthought into the picture just, as you will recall,

when we agreed sometime ago to stay out of a certain portion of Colombia, he forced in a proposed agreement under which we agreed to stay off the whole Caribbean and most of the rest of the world.

Grace functions and Panair's are always open to discus- [fol. 305] sion. There is no agreement covering either. But forcing changes of a dog in the manger attitude on an operating matter of this seriousness is no way to go about it. We are consistently making changes in our functions. Even now pursuers are being transferred to operations (from traffic) to conform to change in Panair practice. If we are doing anything that can be better done otherwise I will be glad to discuss it and the carrying out of the plan will not prejudice the question in any way. But lets discuss this question on its merits and stop playing poker. I can't see what objection there is to Vidal's language but if there is any, why not strike out all description of Grace and Panair functions from the chart (and omit paragraphs VII and VIII of this memo) except traffic and operations and simply put in the names of the companies with a statement on the chart or in this memo that the chart reflects only the traffic functions performed by Grace and the operating and traffic functions performed by Panair and does not purport to reflect or show the other functions performed by the two parent companies.

You will recall Juan wanted Mr. Burns to adopt the plan before I left. I wanted to discuss it first with Mac and Harris but agreed to submit it as a plan on which the Board were definitely agreed in principal. George and I handled the matter in this form and for us to stall now after the management has agreed, if it were not so serious would be childish and ridiculous. Surely George can find something to avoid putting the Board in such an utterly absurd position and to spare this line from the prejudice which delay in this matter involves.

Very sincerely,

/s/ Harold Roig

GOVERNMENT'S EXHIBIT 135

letter J.D.

April 29, 1938

Memorandum for Mr. A. Garni,
Vice President
W. R. Grace & Co.,
New York.

Please be advised that today, at five minutes to one, I received a telephone call from Mr. Evan Young requesting me to have lunch with him. Upon my arrival at his office I found Doctor Von Bauer and Mr. Rihl, and we all went to lunch together. I had no previous intimation that I was to lunch with Doctor Von Bauer.

During lunch I took the opportunity of thanking Mr. Von Bauer for the actions of the Scadta Company in not opposing: first, our request to the Colombian Government to operate through Cali, and second, that they did not oppose our request to change our route from the sea route to the over land route.

I went on to say that I had recommended to my Directors that Panagra enter into a traffic and airmail agreement with Scadta and Adelca along the lines and for the period of the contracts those companies had with Pan American Airways. I mentioned that the only reservation I had was that I should like to have some assurance that Scadta would not operate into Quito and in that way enter into competition with our West Coast international service. Doctor Von Bauer vigorously confirmed what we had been told by Mr. Trippe. He said that Scadta had no desire to operate to Quito.

He stated that President Lopez had told him that he wished to leave some personal monument to his administration, that he had not the money to build roads as his predecessor had attempted to do, and that in his opinion the easiest way to do something of a striking nature was to develop air services in Colombia and connect that with the neighboring roads of Venezuela and Ecuador.

Doctor Von Bauer stated that he had suggested to the President that he could best develop Colombian aviation by putting in decent airports, but that that did not appeal to the President because it represented a large investment of funds which were not available; and the President, there-

GR-2009
11/4/54
JPH

G016113

[fol. 309] fore, requested that Scadta make surveys to both Quito and Caracas, the President undertaking to get the necessary permits. In that way the President figured on leaving some important executive act without cost to him by which his administration would be patriotically remembered.

Doctor Von Bauer said that, speaking for Scadta, he still did not wish to operate internationally but that, although at the present moment, with the imminent change of administration in Colombia, the matter of the Quito connection had been dropped, he could not guarantee that a succeeding administration would not revive the question. What he would state was that the question would not be revived by him or by Scadta and that, if the question arose through the instigation of a succeeding Government, the problem would have to be restudied and some method devised to solve it.

Doctor Von Bauer said that he wished that Pan American-Grace would give some consideration to Scadta problems. He said that, upon my assurance that we had no present intention of engaging in cabotaje in Colombia, he asked why then did we ask for landing rights at Turbo and Medellin. He intimated that asking for these landing rights was not necessary if we did not intend to engage in cabotaje, that the mere fact that a route via Turbo/Medellin/Cartago to Cali was granted would give by Colombian law automatically the right to land there for emergency purposes, whether for refueling or for refuge from weather.

Doctor Von Bauer stated that, just as the Colombian Government might, on account of public or political pres-

sure, try to force him to go to Quito, we might be faced with an attempt to make us serve the cities of Antioquia and Medellin, near which we pass on the new route. Doctor Von Bauer stated that Scadta naturally would deprecate the running of a lot of international airlines across Colombia, because sooner or later it would bring a demand that the international planes deliver mail and engage in international traffic in the interior, which would greatly prejudice the Scadta position. He said very frankly that Buenaventura was the hub of his activities and that his entire organization was built to function from that outlet, and the loss of revenue to international operators would mean the death of Scadta.

I said I could see his position very well but that the prime object of Panagra's existence was to carry airmail to Buenos Aires via the West Coast of South America

G016114

[fol. 310] in as speedy a fashion as possible, and in order to accomplish this, we could not make a number of stops at Colombian cities, and that we would in every way fight for only a limited number of stops throughout the line, in order that a fast schedule might be maintained.

Doctor Von Bauer said that he had spoken to Mr. Kuhl about the agreement with Panagra and that Kuhl had told him that two years ago a draft was prepared but that nothing had come of it, but that he would again write to Mr. Kuhl, and he suggested that we send Mr. Kuhl our ideas of the contract in writing in order that it might be studied.

Doctor Von Bauer intimated that in all probability Scadta would have to establish, at quite some expense, a redespatch point at Cali and the Scadta schedules would have to be studied, so that if possible a rearrangement could be made which would provide for the rapid transfer and transmission of airmail and express in Colombia in connection with Panagra's departures and arrivals.

In conclusion, Mr. Von Bauer was extremely regretful that he was unable to arrange for luncheon with Messrs.

Iglehart and Garni. In his own words, he said: "You know I am just like any other employee, at the end of a string waiting for the latch-door to open". He said that it was imperative that he leave for Europe tomorrow and he wished me to personally convey his remarks to you. If he finds that, in spite of his urgency to leave (because of serious business complications in Austria), he is not able to settle certain business matters pending in New York, he will at once advise us and accept with great pleasure an invitation to any function you might care to extend.

He stated that on one of his first visits to the States, I believe in 1925, he endeavored to interest Mr. Joseph P. Grace in the Scadta Line but that there was some hitch and that Pan American jumped right into the picture. He wished me to convey to you that he still remembers with a great deal of pleasure the kind and courteous way he was received by Mr. Grace at the time he visited him in Hanover Square.

Apart from the above, Mr. Von Bauer said that he thought some study should be given by Pan American Grace to the portion of the route lying between Turbo and Antioquia. He said that, as I was aware, Buenaventura was the wettest place in Colombia and that the weather extended

GR-2011

G016115.

[fol. 311] inland very often as far as Antioquia. The Doctor thinks that we should arrange for meteorological information from that section by the establishment of proper facilities. He also said that, while he could give radio service from Turbo and from Medellin, neither of these stations could give meteorological information from a part of the sector we would fly, and which he considers the most difficult part of the new route. I shall discuss this further with Pan American Airways on account of their flying experience on the FMCA route.

GOVERNMENT'S EXHIBIT 136

not Pan-Air

NEW YORK, September 7, 1938.

MEMORANDUM:

Bolivian Extension: When we first sensed the advisability of giving La Paz an air connection, Panair objected to our going into Bolivia and after numerous efforts to get them to see the advisability of this step failed, we decided to ask for operating rights in our own name.

These were granted to W. R. Grace & Co. for a service connecting the international service at Tacna, thus laying the foundation to give the capital of Bolivia airmail service to and from the United States. After this was accomplished Panair changed their mind and W. R. Grace & Co. turned over the corresponding concession to Panagra at no cost to the latter.

Diagonal Extension: When it further became apparent that this first step was insufficient to meet threatened European invasion we pointed out the advisability of extending the above service right through to Buenos Aires. At that particular time we did not receive much support nor enthusiastic response from Panair, and I recall that the situation appeared so urgent that we opened pourparlers with the Post Office Department and I personally proceeded to Panama to discuss this new development with the Second Assistant Postmaster General.

Our direct and more or less unsupported efforts resulted
GR-2158
11-1-54
RLA.

[fol. 313] in United States aid to establish what is now called the Diagonal Service. About the time this was accomplished Panair was negotiating with the Asunción cut-off and at that time they wanted us to form some joint local company for the purpose of handling questions such as the

securing of Argentine operating rights over this new route into that country. We considered it unnecessary to take this step and likewise did not approve of handling the East and West Coast problem through one Argentine company, and sent Vidal to Buenos Aires to handle this matter independently, with the result that our Diagonal Service between Bolivia and Buenos Aires was operated many months before Panair's Asunción cut-off began to function.

I merely cite these instances to point out the difficulties we were up against at a time when it was advisable to act very quickly and with united support, which latter was not forthcoming.

Caribbean: The question of getting more adequate service between Miami and Panama was discussed during many months and on two or three occasions when it was apparent that no headway could be made, I indicated that Panair's refusal might force us to ask for an extension of Panagra's line to a United States terminal.

Speaking from recollection, these indications were made as far back as three years ago. Some time later, say early 1937, when the question of Colombia was under active dis-

GR-2159

G013159

[fol. 314] cussion, Panair, as a quid pro quo to agree to let us go into Colombia, amongst other conditions wanted us to sign an agreement not to attempt to operate in the Caribbean. We took exception to this at the time, stating that there never has been any such understanding and we felt that the discussion about our not entering the Caribbean was entirely irrelevant.

I believe that one of the reasons why no particular agreement was drawn up at the time covering our operations through Colombia, was the unusual condition which Panair put forward with reference to our signing off whatever rights we had, to extend Panagra's operations through the Caribbean to a United States terminal.

being a quorum of the Board.

Mr. J D MacGregor, Vice President and General Manager of the corporation, was also present.

Mr. G L Rihl called the meeting to order and on motion duly adopted acted as Chairman of the meeting. Mr. W F Cogswell, Secretary of the corporation, recorded the minutes.

On motion duly made and adopted, it was unanimously

RESOLVED, that J. D. MacGregor, Vice President and General Manager, H. R. Harris, Vice President and Operations Manager, and J. S. Woodbridge, Treasurer, of this Corporation, be, and they hereby are, jointly authorized, in the name and on behalf of this Corporation, to execute and file with the Civil Aeronautics Authority an application, in the form submitted to this meeting, for a permanent certificate to be issued under Section 401 (e) (1) of the Civil Aeronautics Act of 1938 to engage in scheduled air transportation in the carriage of passengers, property and

mail on the general route between Cristobal (Canal [fol. 316] Zone) and Buenos Aires (Argentine), with intermediate stops in Colombia, Ecuador and Peru, and thence (a) with intermediate stops in Chile and Argentina with connecting service between Chile and Bolivia; and (b) with intermediate stops in Bolivia (or in Chile and Bolivia) and Argentina.

It was expressly understood between the Directors present and the stockholders they represent, that approval of the execution of the foregoing application is without prejudice to past questions or pending or future questions which have arisen or which may arise with respect to changes in the Company's route or to any understandings there may be between the stockholders of the Company with respect to its routes or changes therein.

There being no further business, the meeting adjourned.

GOVERNMENT'S EXHIBIT 138

Mr. Roig.

November 15, 1938

G013152

C. V. Whitney, Esq.,
230 Park Avenue,
New York City.

Dear Mr. Whitney:

Since meeting with your Executive Committee we have continued to seek a solution of our common problem.

We have considered various alternatives to the route previously discussed with you in an effort to work out a plan in harmony with your ideas. Mr. Roig and Mr. Douglas Campbell have made a trip to Mexico and Central America in connection with the suggestion of your Committee that a

solution of the matter might lie in our purchasing your properties there as well as your half of Panagra.

Regarding the right of Panagra to come through to an American terminal, I have given a great deal of thought to your indication that ethically we were not entitled to do so. I have weighed this question from every standpoint and have taken independent advice and counsel to be sure that we were taking no action which could give any just cause for criticism on this score. I have reached the conclusion, and those whom I have consulted are without exception of the same view, that Panagra is not only ethically entitled to come to an American terminal but that its duty in the public interest is to do so.

I am particularly anxious to guide our action in the friendliest possible course and in that spirit we have worked

GR-2227
11-1-54
RLA

[fol. 318] out a new plan for bringing Panagra to a United States terminal and greatly improving the present schedule. We are prepared, if need be, to protect Panagra's position by going ahead with this in our own name. Before doing so, however, I would like to have an opportunity of discussing the plan with you as I believe you will see the wisdom of Panagra's undertaking it.

If you do not object, I would like to treat this whole matter with you personally. If you will obtain authority from your Board, I will do so also, so that we may then act to end this endless discussion which has doubtless been quite as unattractive to you as it has been to me.

Yours sincerely,

(Sgd) D. S. IGLEHART

Rec'd 11/23/38

PAN AMERICAN AIRWAYS, INC
General Offices—Chrysler Building—New York City

November 19, 1938

Mr. D. S. Iglehart
President
W. R. Grace & Company
7 Hanover Square
New York, N. Y.

Dear Mr. Iglehart:

I wish to acknowledge your letter of November 15, 1938, which I have referred to our President, Mr. Trippe, and which we have discussed with our Executive Committee.

We are all appreciative of your earnest efforts to work out a solution of our common problem that would be satisfactory to all concerned, and we are ready, as in the past, to meet with you and to discuss any proposal to that end. With the approval of all concerned, however, the discussions to date have been with our Executive Committee and a committee of your Directors, and it would appear to me that the meeting which you suggest should therefore include the same group.

You refer to our suggestion that a solution of the problem, arising through your request that our joint company be turned over to Grace management and that its operations be extended to New Orleans, might lie in your purchasing our half interest in Panagra and our properties in Mexico and Central America.

This proposal, as well as that of Pan American's purchasing your half interest in Panagra, were both advanced. However, the question of Pan American selling to Grace was abandoned before the trip of Mr. Roig and Mr. Campbell to Central America, when it developed, as stated in our

letter of September 24th, that Pan American valued their respective half interest in Panagra at a much higher figure than did Grace & Company.

In substantiation of our evaluation of Panagra, as you know, we were actually willing to pay you a sum considerably higher than your maximum offer to us for our half interest in the joint company.

As to the right of Panagra to operate north of Cristobal, I must repeat that we are entirely unable to see how you have either a moral or a legal right to insist that this should be done. Under our original agreement, it is clear that Panagra was organized to operate from Cristobal south —along the west coast of South America, and to bid on a Foreign Air Mail Contract on that route, if advertised, and you were given an option to participate up to 50% therein. It was certainly not your intention or ours that this new company was organized to compete with Pan

[fol. 320] American then or any other time; for local or through traffic, between the United States and Cristobal, —a territory which we have always served.

We are, of course, interested in doing everything possible to improve Panagra's service and schedules, not only in the public interest, but to build up our through traffic as an end-on connecting air carrier. In fact, you will recall, that Pan American's proposal of last June to maintain a second direct service from Miami to the Canal Zone via Jamaica at a low rate of compensation, although acceptable to the Post Office Department insofar as Pan American was concerned, was held in abeyance by the Department until Panagra could arrange to provide an improved schedule along the west coast.

I still hope that we may be able to persuade you that it is unfair to ask us to agree that Panagra should be permitted to apply for an extension to Miami or New Orleans in competition with ourselves, and that we can cooperate

in the friendliest way in approving at an early date a program that will improve and expedite Panagra's service along the west coast of South America to Buenos Aires.

Will you not be good enough to let us know at what time and place you desire to have the meeting which you mentioned? If more convenient to you, our directors would be glad to come down town.

Yours sincerely,

(sgd) C. V. WHITNEY

SUBJECT: PAN AMERICAN-GRACE AIRWAYS EXTENSION TO IQUITOS

J. T. T.:

Mr. Campbell came to my office last evening and urgently requested an answer to the question of the joint airline extending to Iquitos and Tabatinga on a permanent certificate, stating that they must clear with the Peruvian Government and file with Washington before November 1. I advised him that in my opinion the extension to Tabatinga was neither necessary nor proper, and suggested the possibility, subject to profit and loss figures and your final approval, of our not opposing their extension to Iquitos, and that they in turn aid Panair do Brasil with the Peruvian Government to get permission to extend from Tabatinga to Iquitos. (I stated that as a result of the survey flights made by both Mr. MacGregor and Jay Rice some years ago, we did not consider Iquitos as west coast territory. Mr. Campbell said that he was aware of the survey flights but he thought he had correspondence which would conclusively

prove that we had agreed that all of the country of Peru was Pan American-Grace territory.)

Mr. Campbell returned this morning and said that he thought the following could be worked out:

(1) Pan American-Grace would apply for a permanent certificate to Iquitos, which could at a later date be extended to a border point in Peru upon the completion of the land field.

(2) They would assist Panair do Brasil in obtaining a temporary certificate to fly to Iquitos until such time as this new land airport was available.

(3) The actual operating loss in the first year is estimated at just under $15,000 without any Peruvian subsidy at all, and there is a possibility of obtaining some subsidy on this route.

Without in any way threatening any such action, Mr. Campbell indicated that if we were unwilling to give them an immediate answer, it might be necessary for them to take action to protect this route for themselves against the applications of both Braniff and Eastern, and in doing so it might be necessary to cite this as an incident of non-cooperation by Pan American Airways.

I don't like the position in which we are placed, or the pressure which is being applied at this time, but from a long-range point of view and the uncertainty of the future due to the present hearing, I recommend that we supply a quorum to enable Pan-American Grace to accomplish this extension as outlined.

GOVERNMENT'S EXHIBIT 145

Minutes of Adjourned Regular Meeting of the Board of Directors of Pan American-Grace Airways, Inc. held at the office of Pan American Airways Inc., 135 East 42nd Street, New York, N. Y. on the 8th day of November, 1943 at 4:00 o'clock in the afternoon.

PRESENT:

Messrs W F Cogswell
Howard B Dean
A Garni
H P Morris
H J Roig

being a quorum of the Board.

Mr H J Roig, President of the corporation, called the meeting to order and presided. Mr W F Cogswell, Secretary, acted as Secretary of the meeting.

Minutes of Adjourned Regular Meeting of August 12th were read and approved.

The President reported that Mr Vidal, who is leaving on a trip to South America would proceed directly to the Argentine to go into the situation in respect to the Cordoba airport and arrange for a license for night lighting.

The President stated that in connection with the CAB general South American route case, prehearing conferences in which were beginning on November 16th, he had engaged the services of Mr. Gerhard A. Gesell, of the firm of Covington, Burling, Rublee, Acheson & Shorb, to represent the Company's interests. On motion duly adopted, this action was approved.

The President then submitted to the meeting a form of application drafted by counsel applying for the certain routes therein described. The President stated that the [fol. 327] routes numbered 4(b) and 4(c) would probably

be suggested as alternate routes and that it might also be suggested that their operation was rather a matter for future development than for the immediate present. He also stated that the local Buenos Aires/Montevideo service proposed was a matter which would require considerable further study and would probably best be worked out through a local company in conjunction with local interests. It seemed desirable, however, to include this route in the present application in order to have the matter before the Board in connection with the general South American discussion.

Mr. Dean then made the following statement on behalf of himself and his associates representing Pan American Airways Corporation and on behalf of that Corporation with respect to the proposed application to the Civil Aeronautics Board for amendments of the certificate of convenience and necessity of Pan American-Grace Airways, Inc.:

1. The Pan American Directors, apart from the question of surface carrier control or affiliation referred to in paragraph 2 below, consider the routes applied for to be in the public interest and approve the form of the application as drafted by counsel for Pan American-Grace Airways, Inc. and attached to these minutes.

2. Pan American considers it to be established that the public interest, as defined in the Civil Aeronautics Act, does not permit an air carrier which is controlled by a surface carrier, or a company affiliated therewith, to be awarded any new route or any major extension of an existing route. Whether this principle applies likewise to minor extensions [fol. 328] or route modifications by such an air carrier within the same general territory which the carrier already serves, such as are involved in the proposed application, has not yet been determined, and Pan American has instructed its Directors on the Pan American-Grace board to take such action as will permit Pan American-Grace Airways to present this latter question to the Civil Aeronautics Board for determination. For the reasons stated in this paragraph, the Pan American Directors are not willing to vote in favor of the proposed application but they are will-

ing to furnish a quorum that will permit the Grace Directors to vote through a resolution to that effect so that the application may be filed with the Civil Aeronautics Board.

3. Pan American considers that the various points on the proposed route covered by the application are within the territory in which Pan American-Grace Airways was formed to operate under the original agreement of August 31, 1928, as later modified by consent of the two owners.

4. Pan American wishes to indicate that it considers Buenos Aires rather than Montevideo as the logical terminal for Pan American-Grace Airways, Inc. international service and questions whether, from a long-range point of view, it is desirable for the Company to engage in a local shuttle service between Buenos Aires and Montevideo.

5. With respect to the proposed Pan American-Grace Airways route between Chiclayo and Ramon Castilla, Peru, via Iquitos and other intermediate points, Pan American understands and its representatives are taking the action [fol. 329] above set forth upon the understanding,

(a) that Pan American-Grace Airways and W. R. Grace & Co. will consent to Panair do Brasil rendering connecting service from the east to Ramon Castilla or some other point in Peru in the vicinity of Ramon Castilla close to the Peruvian-Brazilian border and rendering temporary connecting service between Tabatinga and/or Ramon Castilla and Iquitos until such time as Pan American-Grace Airways, Inc. is able to operate between Iquitos and Ramon Castilla; and

(b) that Pan American Grace Airways will assist Panair do Brasil in obtaining the necessary permits for such service from the government of Peru, in the same way that Panair do Brasil assisted Pan American-Grace Airways in obtaining permission to land at Corumba, Brazil, in the establishment of the joint Pan American-Grace-Panair do Brasil transcontinental route through that part of South America.

6. With respect to the proposed Pan American-Grace Airways route between Cali, Colombia, and Buenos Aires,

Argentina, via Iquitos, Peru, and a point in Bolivia, Pan American is advised that operation of this route will require flight over a portion of Brazil. Pan American understands and its representatives are taking the action above set forth upon the understanding (a) that such action does not constitute a precedent with respect to operation by Pan American-Grace in Brazil, Pan American taking the position that Brazil is not within the agreed scope of the operations of Pan American-Grace and its consent to the flight over Brazil involved in the operation of the proposed route [fol. 330] being given only to permit a cut-off route between points within the territory served by Pan American-Grace; and (b) that in the event that Pan American should at some future time desire to apply for a route between Bogota and Buenos Aires via points in Brazil and/or Paraguay which would involve flight over a portion of Bolivia neither Pan American-Grace nor Grace will raise objection thereto.

Referring to the statement made by Mr. Dean, Mr. Garni made the following statement on behalf of himself and his associates representing W. R. Grace & Co.:

1. We do not agree in principle or detail with the interpretation of the Civil Aeronautics Act suggested by the Pan American directors as related to new routes, route modifications or extension of Pan American-Grace Airways, Inc., nor do we recognize that Pan American-Grace Airways, Inc. is in fact or ever has been controlled by a surface carrier.

2. In one form or another Mr. Dean's statement makes several references to an agreement between Pan American and Grace, or statements from which the existence of such an agreement might be inferred, relating to the scope of the operations of Pan American-Grace Airways, Inc. We do not concur that there is or ever was any agreement between Pan American and Grace limiting the scope of the operations of Pan American-Grace Airways, Inc., and no statement made by Mr. Dean or by us and no action taken by us at this meeting is to be construed as indicating the contrary or as involving the making of such an agreement at this time.

[fol. 331] 3. We are willing to commit Pan American Grace Airways to the proposition that the operation of a service between Cali and Buenos Aires via Iquitos and a point in Bolivia, which would involve flight over a portion of Brazil, shall not constitute a precedent with respect to operation by Pan American-Grace Airways in Brazil; and that Pan American-Grace Airways will not object in the event Pan American should at some future time desire to apply for a route between Bogota and Buenos Aires via points in Brazil and/or Paraguay on the ground such a service would involve flight over a portion of Bolivia, upon the understanding that this shall not constitute a precedent with respect to operations by Pan American in Bolivia.

As far as W. R. Grace & Co. is concerned, we are authorized by that company to state that it will not at any time object to Panair do Brasil rendering connecting service at Ramon Castilla or some other point in that vicinity close to the Peruvian-Brazilian border, or operating temporary connecting service between Ramon Castilla or some other point in that vicinity close to the Peruvian-Brazilian border as far as Iquitos until connection at such point becomes possible; and, further, that Grace will not object in the event that Pan American should at some future time desire to apply for a route between Bogota and Buenos Aires via points in Brazil and/or Paraguay on the ground such a service would involve flight over a portion of Bolivia. In making this statement, we wish it to be clearly understood, however, that W. R. Grace & Co. is not acknowledging that there is now or ever has been any agreement be- [fol. 332] tween it and Pan American involving the scope of the operations of Pan American-Grace Airways.

GOVERNMENT'S EXHIBIT 146

Minutes of Adjourned Regular Meeting of the Board of Directors of Pan American-Grace Airways, Inc. held at 135 East 42nd Street, New York, N. Y. on the 11th day of April, 1944 at 2:15 o'clock in the afternoon.

PRESENT:

Messrs W F COGSWELL
HOWARD B DEAN
A GARNI
H P MORRIS
R H PATCHIN
H J ROIG

being a quorum of the Board.

Mr. H J Roig, President of the corporation, called the meeting to order and presided. Mr W F Cogswell, Secretary, acted as Secretary of the meeting.

The President reported that pursuant to the authorization of the Board the firm of Milbank, Tweed & Hope had been retained as counsel in Docket No. 525.

This action was approved.

The President proposed that the Company file with the CAB an application for amendment to its certificate of public convenience and necessity so as to authorize temporary air transportation between Chiclayo, Peru and Iquitos, Peru until final decision and order of the CAB in respect to its application for a permanent amendment to its certificate authorizing operation between Chiclayo and Ramon Castillo. The Pan American directors stated that their position on such an application was the same as that stated at the meeting of November 8, 1943 with respect to the application for a permanent amendment of the Company's certificate, and that for that reason they were not vote against it, on the understanding that any applica- not willing to vote in favor of the proposal but would

[fol. 334] tion filed with the CAB would contain an appropriate reference to Pan American's position along the same lines as in the application filed pursuant to the action taken at the meeting of November 8, 1943. Messrs. Roig, Garni, Patchin and Cogswell stated that their position was the same as that stated by Mr. Garni at such meeting of November 8, 1943. Authorization to the President to file the application was given on this basis.

The President reported that no action is being taken towards filing application with the CAB for a new rate at least until the return of Mr Vidal.

The President submitted and commented on:

(1) A comparison of earnings for the years 1942 and 1943.

(2) A comparison of traffic figures between the year 1932 and 1942.

(3) Certain points raised by the CAA inspectors, whose report is expected to be received in the near future.

There being no further business, the meeting adjourned.

PANAIR DO BRASIL—SERVICE TO IQUITOS

Dr. Sampaio's memorandum January 2 to me

While you are in Rio I would very much appreciate your discussing with Mr. Rihl my memorandum to him of December 5, 1944 and Dr. Sampaio's memorandum to me of January 2. You will of course understand that in my memo of December 5 I was simply transmitting information given me by Panagra and, while I am very happy indeed to have the very complete information from Dr. Sampaio regarding Panair's side of the story covering the application for a permit from the Peruvian Government to operate to Iquitos, it is evident that he does not have the whole story regarding the Peruvian end of this deal. Certainly Mr. Vidal did not invent anything when he reported the reaction of the Peruvian authorities as conveyed to Panagra at that end.

Irrespective of what may have actually occured in the past, we are now most interested in a smooth operation for Panair do Brasil to Iquitos. Panagra is naturally much interested in assisting Panair in this matter because they themselves are anxious to connect with Panair at Iquitos.

In his memorandum to me Dr. Sampaio does not mention whether he desires to take advantage of the offer of Panagra to act as Panair do Brasil's agent in Peru for the purpose of maintaining the necessary contacts with the Peruvian authorities.

You of course understand the difference in the positions of the two companies. Panair do Brasil was interested in a service to Iquitos on the basis of its Brazilian contracts.

Panagra was vitally interested in the establishment of a transcontinental line in combination with Panair do Brasil, with a territorial division of activities at the Brazilian-Peruvian border. The international character of the joint operation was essential for the continuance of Panagra's cabotage privileges in Peru. The territorial division was in accordance with the long-established policy between PAA and Panagra. Perhaps an explanation of Panagra's motives might help to satisfy Dr. Sampaio that there never was any intention of complicating matters for Panair but, on the contrary, that we have only been motivated by the desire to assist in establishing the functioning of a transcontinental line through cooperation between Panagra and Panair do Brasil.

January 22, 1946.

H.J.F.:

Jan. 18

Attached hereto is a *Pan American-Grace* cable. As you know, all copies of their cables are sent to me. I have advised Vidal that Pan American Airways has no intention of permitting Pan American-Grace to extend to Bogota and that we consider Bogota in the Pan American sphere.

I did agree some months ago that there would be no objection in having Avianca extend from Cali to Quito via Ipiales and to have Pan American-Grace extend from Quito to Cali also via Ipiales. This extension was in line with a request made by Dr. del Corral when he was last in New York, and since Pan American-Grace also operated between Quito and Ipiales and between Guayaqnil and Cali, I saw no objection to permitting direct flights by both Avianca and Pan American-Grace between Cali and Quito. Avianca was most anxious to serve the capitol of Ecuador

because TACA de Colombia has announced that they propose to fly there.

This is another indication of inching by Pan American-Grace without any consultation by Pan American-Grace with us about their plans. I have quite clearly expressed myself to Vidal both as to how I feel about the extension and the method with which it was being approached.

COLOMBIA ECUADOR TRAFFIC

NEW YORK
February 1, 1946

Mr. Douglas Campbell
Pan American-Grace Airways, Inc.
Lima, Peru

Dear Doug:

With reference to our private cable No. 53 of January eighteenth and Quito's private letter to you #9347 of January twenty-second, I haven't had a chance to let you know that when Howard Dean saw the first of the above messages, he telephoned me to say that it would be useless for us to suggest to them or to Avianca that Panagra fly between Cali and Bogota in exchange for Avianca flying between Bogota and Quito. You will recall that Panair takes the position that our operations in Colombia are restricted to the area west of the Andes.

Even if we could go to Bogota, it may not suit to have Avianca fly between Colombia and Ecuador. It would,

therefore, be my suggestion that we simply make plans to operate Panagra services between Quito and Cali non-stop, in addition to the services now operated between Quito and Ipiales in conjunction with the Avianca service between Ipiales and Cali. The non-stop operation by Panagra between Quito and Cali does not seem to require any special permission from either Ecuador or Colombia, or if it does it should be relatively easy to obtain, and inasmuch as we did operate that route up to a few years ago, we are assuming that neither the CAA nor the CAB would object.

Sincerely yours,

(Sgd.) G VIDAL

GOVERNMENT'S EXHIBIT 152

J.P.G., JR. TRIP SERIES-LETTER NO. 1

AG
WGH

November 1, 1948
Recd. 11/5/48

Mr. H. J. Roig
7 Hanover Square
New York 5, New York

Dear Mr. Roig,

COLOMBIA

We were rather surprised when we read on Page 283 of the Aviation Daily of October 25th of Schneider's argument before the C.A.B. against Pan American's application to be authorized to operate a Bogota/Miami direct service.

It had been our understanding that it had been agreed at the time that the Panagra Through-Flight Agreement was signed that Western Colombia was Panagra's territory and furthermore that a Gentlemen's Agreement was made that Panagra could at any time petition the C.A.B. for inclusion of Bogota and Medellin on its route between Balboa and Lima and also that if it would facilitate this in any way, Panair would sell Panagra U.M.C.A.

We heartily agree with Schneider's argument that any Bogota/Miami direct service would prejudice the possibility of the Colombian Government's approving of any other U.S. flag service into that city, not only Braniff's, but also Panagra's if we were to decide to take up what might be considered to be an option on Bogota and Medellin. We did not have the opportunity of discussing this

GR-3739
10-19-54 PJS

G 251

[fol. 342] whole matter with you in New York and we were wondering just what your ideas are and whether or not you agree with us that this so-called route consolidation application of Panair prejudices our rights in Colombia.

It would also appear that this is an opportune time to take up actively again the extension of Panagra's route to include Bogota and Medellin since with the new mail pay, the P/L might look attractive.

We plan to discuss the whole matter of the Colombian Government's attitude on permitting U. S. flag carriers into Bogota with Latorre while we are there as well as the possibility of their allowing Panagra to go into Bogota and Medellin and we would like very much to hear from you on this subject before we get to Bogota.

With the DC 6 service coming through Balboa both northbound and southbound at around midnight, Panagra's service to and from Bogota and Medellin would be pretty good especially the northbound trip and particularly when we get through to New York. With night flying into Balboa it wouldn't be too inconvenient for passengers on the northbound DC 3 to deviate to Bogota and Medellin as they would have to wait in Balboa until around midnight anyway to pick up the northbound DC 6 or to pick up Panair's Central American Flight which leaves at around midnight and which will offer a direct connection with our northbound DC 6 when the Consolidated Vultee 240's start in the Central American service.

Very truly yours,

(signed) J P G, Jr.

Memorandum to Mr. J. P. Grace, Jr.

I called Henry Friendly today to ask him about Rio. He said he had spoken to Trippe with absolutely no success. He said he frankly does not know whether Trippe considers it a matter of principle or what but said he can do nothing further. I asked him what he would think of our approaching Juan and he said he thought that that was the only thing left to do.

We had also asked Balluder to talk with Trippe re the opening of a Panagra Sales Office in Buenos Aires and word came back from Mr. Balluder that Trippe would not hear of such a thing, that he thought that now is the time with Braniff coming into Buenos Aires for Panagra and Pan American to present a united front to the competition. When I was talking to Henry about the other matter I also mentioned this and told him I thought it was very short-sighted. We discussed the matter at some length and he said he was inclined to agree with Juan but I asked him to think it over and we decided to talk it over again in a few days.

It looks to me as though we are heading for another showdown and I think that when you get back we had better sit down with him (J. T.) and thrash a few of these things out. Henry thought this would be advisable.

GOVERNMENT'S EXHIBIT 157

November 6, 1950

MEMORANDUM TO MR. J. P. GRACE, JR.

You asked for a memorandum on the status of the Manaos/Goiania cut-off route through Brazil; what applications are pending, when we should apply, etc.

(1) As described in the U.S./Brazilian Bilateral, the route is as follows:

"*Description of Route*

From the United States of America via intermediate points in the Caribbean, South America, to Manaos, Goiania and Rio de Janeiro or Sao Paulo."

(2) *Pending Applications*

Based on a check and re-check with the dockets section of the CAB, Ed Howard confirms that the following applications are pending:

(A) Braniff has an application pending for a route from Bogota to Rio via Manaos and Goiania. This application was filed November 6, 1946 under Docket 2622. The Latin American decision was dated May 17, 1946, prior to this application. I understand a pre-hearing conference was held on this application but in May 1947, over the protests of Panagra, they obtained permission to postpone further proceedings on this application.

(B) Pan American has applications pending for:

(i) Caracas to co-terminal Rio and Sao Paulo via Manaos and Goiania.

(ii) Caracas to Asuncion via Manaos, Goiania and Guaira.

GR-12491
2/10/55
JPC

G0653965

[fol. 354] These applications were filed December 17, 1946 under Docket 2720.

(C) Chicago & Southern has an application pending for a route, U.S. to Buenos Aires via Kingston, Manaos, Goiania, Sao Paulo, Rio de Janeiro, Asuncion and Montevideo. This was filed August 29, 1949 under Docket 3724. C & S's application to serve Maracaibo has been severed from this application.

(3) *Time Action Likely on Above Applications.*

With respect to the various Manaos routes discussed in the Latin American decision, the Board stated:

> "In view of the substantial improvements made available by the routes established herein (that is, the Latin American decision), the limited volume of traffic to be expected from the proposed cutoff routes, and the substantial capital costs to establish airway aids and airport facilities, we conclude that these routes are not required by the public convenience and necessity."

Douglas Campbell investigated the status of development of the Manaos route while he was in Rio this June and Robert Harmon also discussed development of this route during his recent stay in Rio. Both of them were told by members of the Brazilian Ministry of Aviation that it would probably be a minimun of two years before the route was developed to the extent necessary to permit regular international air service. Based on this information, and the statement in the Latin American decision, it would appear that no action by either the carriers or the CAB would be taken on this route in less than 18 months to 2 years.

There is however one current matter which might bring this subject to a head sooner. The attached letter was re-
GR-12492

G065966

[fol. 355] ceived today by Panagra stating Braniff's objections to Pan American's proposed cutoff route, Caracas/Asuncion to Buenos Aires. You will notice that Braniff protests on the ground that Pan American's cutoff route may lead the Brazilians to claim that the Manaos route is operable and that, therefore, Braniff's temporary East/West

Coast route should be eliminated (as per the terms of the Bilateral Agreement) and, secondly, that the Manaos route has been earmarked for Braniff. By this last assertion, Braniff apparently assumes for itself the functions of the CAB to determine and grant routes in accordance with public convenience and necessity and we contemplate that we will be able to use this statement to the discomfort of Braniff. It is conceivable, and this is confirmed by Ed Howard, that this letter could lead to an early discussion of the Manaos route and it is conceivable that awarding of the route might be speeded up.

(4) *When Should Panagra Apply for the Route*

Panagra could not be excluded from applying for the Manaos route until a pre-hearing conference is held on the other applications; obviously all applications will be joined into one docket. I discussed with Gesell how long it would take us to go through the necessary routine resulting in a Panagra or Grace application, and he felt that it would only take about a week or two. Because of Docket 3500 we do not wish to make any application at this moment but will have to watch developments closely both in Docket 3500 and the Manaos dockets, so as to be prepared to jump in at the appropriate moment.

(5) *Routes for which Panagra Should Apply*

If Panagra gets through to New York under the National Interchange Agreement or under an extension of the Through Flight Agreement, it seems to me that Panagra should apply for both:

GR-12493

G065967

[fol. 356] (a) A route, New York/Caracas Manaos Rio and probably beyond to Montevideo and Buenos Aires, and

(b) A route, Balboa/Bogota Manaos Rio and probably beyond to Montevideo and Buenos Aires.

Inasmuch as this application would probably be the cause of a fight with Pan American, it would seem under present circumstances that we might as well apply for both (a) and (b) in the hope of obtaining what we really want. Obviously the (a) route above would be preferable to (b) and so long as we were already flying to New York, there would be no problem about getting our planes to Miami for maintenance even if we were not awarded an East Coast route between Rio and B. A.

H.L.C.
Clark

cc: ABShea

P.S.—As a footnote to the foregoing, we have just learned that Pan American may have lost its operating rights to Paraguay. This information was just received from Lima based on a decree issued by Paraguay. Doug Campbell does not feel that PAA will have a difficult time re-establishing its right to serve Asuncion but this development should at least slow down inauguration of their new proposed service. We will watch developments.

P.P.S. Since the Bilateral description says: "From the United States of America", we may have some trouble in establishing a route starting from Balboa under the Brazilian interpretation of the Bilateral.

GR-12494

G065968

[fol. 357]

GOVERNMENT'S EXHIBIT 158

NOTES ON TELEPHONE CONVERSATION WITH MR. ANDREW SHEA AND MR. BALLUDER ON 12/19/50

Mr. Shea called Mr. Balluder to discuss two topics: First, the Panair do Brasil intentions to serve Santiago and Lima from Rio, and second, the bonus situation in Panagra.

The bonus question was cleared affirmatively by Mr. Balluder after consultation with Mr. Friendly and a separate memorandum on this subject was prepared on the 20th.

With regard to the Panair do Brasil developments, Mr. Shea expressed great unhappiness over the plans of Panair do Brasil to establish routes from Rio to Santiago and Lima respectively. He felt that this would only be the beginning of further developments. He saw the possibility of ambitious plans developing under which Panair do Brasil would eventually want to operate along the west coast of South America to the west coast of the United States. He expressed considerable concern over the effects of such moves on the business of Panagra. He seemed to feel especially bitter because Panagra could not serve the Lima Rio route in competition with Braniff and was disappointed because Panair do Brasil, in which Pan American Airways held a substantial interest, was entering Panagra field on the west coast of South America.

Balluder tried to explain to Mr. Shea that the most recent developments in Brazil which led to Panair do Brasil's undertaking the operation of the Rio-Santiago route via Asuncion and the Rio-Lima direct route had no connection whatever with the Brazilian government's demand for a route to the west coast of the United States. Balluder told Shea that several years ago, Panair do Brasil had thought that it would be a good idea for them to ask for a route from Brazil via the east coast to Havana and then on to Los Angeles and or San Francisco but at that time, Balluder very strongly tried to discourage Panair do Brasil because he felt that this would not be a commercially productive operation unless very heavily subsidized by the Brazilian

733

PAA-427
11:30:54
RLA

[fol. 358] Government. At the time of the Brazilian bilateral discussions and consultations on capacity and routes which were held during 1949/1950 in Rio. At that time, Sampaio had definitely stated that Panair do Brasil was not interested in any route via the west coast of South America to points on the west coast of the United States. Without going into the details just given, Balluder explained to Shea that Panair do Brasil had completely shelved the idea of operating to the west coast of the United States.

Aerovias do Brasil, formerly TACA, is certificated to serve Miami and Chicago and more recently, under the presidency of Canby Araujo, they have activated this matter in Rio in an endeavor to get the government to obtain an extension of the route to Los Angeles and or San Francisco. The Brazilian Government became very insistent with the U. S. Government on this point during their recent discussions and have shown considerable resentment because the U. S. Government would not readily accede to their demands for an extension of the route to Los Angeles and or San Francisco. I repeated on various occasions to Mr. Shea that Panair do Brasil had not activated the matter and was not now interested in the route to the west coast of the U. S., but quite apparently, he did not believe me. I went further to say that I expected sooner or later to see Panair do Brasil under pressure from the Brazilian Government again consider the possibility of operating from Rio to Bogota. The Rio-Bogota route was under consideration especially at the time of the tragic Bogota meeting. Balluder mentioned that if Panagra were to apply to the U. S. Government for the right to fly from Lima to Rio, this could not be obtained in less than a year or 18 months and even then, the matter was very doubtful in view of the Brazilian position on that particular route but that the Panair do Brasil competition move against Braniff was immediate. Balluder reminded Shea of the fact that during the summer of this year, Mr. Campbell had spent three months in Rio in an effort to retain Panagra's rights to serve the Lima Campo Grande connection with Panair do Brasil. During the consultation between the United States and Brasil on the subject of capacities and routes, it was very evident that

733 PAA-428

[fol. 359] Brazil strenuously objected to the continuance of the Panagra services to Campo Grande and in effect, completely rejected any talks on this subject. Balluder reminded Shea that the Lima-Rio route of Braniff was a temporary route under the bilateral and that sooner or later Braniff would be forced from that route in order to operate the Bogota-Manaos-Rio report in accordance with the bilateral route descriptions. Balluder expressed the belief

that if Panagra were successful in obtaining from our Government an extension of their routes through Lima to Rio, it would mean that our government would be committed to maintain Braniff's rights on that routing. The result of this would be that three operators would serve that route. Balluder considered it entirely impossible to dissuade Panair do Brasil or for that matter, the Brazilian Governments from their idea of serving directly from Rio the other capitals of South America. Balluder reminded Mr. Shea that Panair do Brasil's operations from Rio to Buenos Aires certainly were not very agreeable to Pan American Airways because it meant that a large portion of our Buenos Aires-Rio business had been taken away from us by Panair do Brasil. But we considered it inevitable and knowing the pressure which had been exerted during the past few years on Panair do Brasil, we also felt the Rio Santiago, Rio Lima and eventually the Rio-Bogota routes would be performed by Brazilian carriers. If we accepted these developments as inevitable then, of course, it was natural for us to hope that Panair do Brasil would be given those routes with the corresponding subsidy. Balluder felt that Panair do Brasil could develop a very valuable volume of business between points like Santiago and Lima via Rio to Points in Europe, and vice-versa. Such business would undoubtedly result in Panair do Brasil's feeding passengers into Panagra at Lima. Mr. Shea, while admitting that this might be true, felt very strongly that Panair do Brasil's entry into Santiago meant very strong competition for Panagra because heretofore Panagra had carried passengers from Santiago via Buenos Aires or via the Canal Zone to connections for Europe.

PAA 423
733

[fol. 360] Balluder answered that it was not logical to think that we could stem the natural development of routes representing the shortest possible connection between two points. Balluder went on to say he felt that in effect, the Rio-Lima Panair do Brasil route would mean very effective competition for Braniff. Balluder explained to Shea that after discussion with Mr. Campbell, Mr. Sampaio had agreed to establish his schedules in such a manner that they would afford advantageous connections with Panagra's Inter-Americano in both directions north of Lima. Balluder

thought that these connections would feed to Panagra a considerable amount of the business from Rio to points on the West Coast of South America and the West Coast of North America, and would offer effective competition with Braniff from Rio via Lima to the Canal Zone and USA terminals for points in the Middle West and East of the United States.

Mr. Shea did not seem convinced by Balluder's arguments that the Panair do Brasil-Rio-Lima connection would be advantageous to Panagra. Shea showed considerable scepticism of the intentions of Panair do Brasil and repeatedly mentioned the possibility of Panair do Brasil's expansion on the west coast of South America to connecting points like Santiago and Lima with points north with a terminal in California. On several occasions, Balluder asked Shea what he thought Balluder could do to dispel Shea's suspicions. Mr. Balluder repeatedly explained that Panair do Brasil was acting under pressure from the Brazilian Government. Over a period of the last few years, Balluder had exercised all possible persuasion on Paulo Sampaio in order to prevent him from undertaking operations of new routes unless he could be certain of some very substantial subsidies from the Brazilian Government. Now that the Brazilian Government was willing to pay Panair do Brasil such a subsidy for the operation of the Rio-Santiago and Rio-Lima routes, Balluder saw no way in which Panair do Brasil could be stopped and Campbell had seemed to think favorably of Panair's operations since he was willing to have Panagra act for them as sales and handling agent.

733 PAA-430

[Vol. 361] During the course of the conversations, Mr. Shea repeated several times that he thought Balluder could not blame him for feeling very much frustrated by these Panair do Brasil developments.

N.Y. 17, N.Y.

Office of The President

December 29, 1950

PERSONAL

Mr. J. Peter Grace, Jr., President
W. R. Grace & Co.
7 Hanover Square
New York 5, New York

Dear Peter,

When you called me at home from Washington one evening last week in connection with the proposed Rio-Lima service by Panair do Brasil, we arranged to meet, you will recall, early in the week of January 2 to discuss the matter.

Unfortunately, I was unable to get away this week due to my daughter's illness and *I have therefore been able to check the* question you raised with Henry and Erwin.

The background facts as I understand them are as follows:

Although we have only one representative on the Board of Panair do Brasil, we have for a number of years urged its President, Mr. Sampaio, to concentrate on domestic services even at the expense of its European and other international services. Particularly, we opposed, for business reasons, the extension of their international services from Rio to other South American capitals.

During April 1948, however, Panair extended service paralleling us from Rio to Montevideo and Buenos Aires,

Later we were advised that the Brazilian Government were again insisting on Brazilian flag service from Rio via Asuncion to Santiago, Chile and to Lima. Again, we counseled against such an expansion by Panair because we felt such extensions would be commercially unwise, even though these new services might be justified by Panair as end-on extensions of its European services. Such services could perhaps also be justified as direct contiguous services to neighboring countries by a Brazilian carrier, particularly as most of the traffic would be third and fourth freedom traffic for Brazil.

2-9-55 F
GR-12538

G064560

[fol. 368] ? Recently, Mr. Sampaio advised us that he had been designated to operate the Rio-Santiago and Rio-Lima services by the Brazilian government, and that *Panagra had also confirmed the agreements* previously ? made to provide him handling services at the Santiago and Lima airports as well as traffic representation in Chile and Peru.

He informed us that he has been *requested by Panagra* to arrange his schedules so as to provide through connecting services with Panagra, which he has arranged to do. I believe Erwin Balluder sat in on certain of these discussions during his recent visit to New York.

In view of these developments, I am at a loss to understand why you feel we should now seek to have Panair withdraw from these proposed cross continent operations *in favor of some other Brazilian* carrier, and, *in fact,* ? *why it is not in your interests to have Panair provide these new services*—but this subject, of course, we can discuss when we meet.

Sincerely,

sgd. JUAN

W. R. GRACE & CO.
7 Hanover Square, New York, N. Y.

Office of the President — January 9, 1951

Juan T. Trippe, Esq.,
President
Pan American World Airways System,
135 East 42nd Street,
New York 17, New York.

Dear Juan,

Thank you for your letter of December 29th. I was very sorry to learn of your daughter's illness and hope she has fully recovered and that you have been able to get away for some rest.

With respect to our telephone conversation of December 21st, it appears to me from your letter that I may not have made myself entirely clear. My point was and is that despite our many requests to you, you have consistently declined to agree to an application by Panagra for an extension of its route from Campo Grande to Sao Paulo and Rio. As a result, Panagra's route into Brazil still terminates at Campo Grande and the service on even this short Brazilian segment is in imminent danger of cancellation by the Brazilian authorities.

You will recall that I have mentioned to you several times in the past the fact that Braniff is flying into Rio direct from Lima renders the joint service that Panagra

2078

PAA 3827
1/3/55

[fol. 370] and Panair do Brasil have been furnishing far less attractive to the transcontinental flying public. You have taken the position that there was no necessity for

Panagra to come into Sao Paulo and Rio, stating that this joint service was thoroughly adequate.

The very fact that your affiliate, Panair do Brasil has decided that it is now necessary to provide the service which in our judgment Panagra should have applied for long ago, and would have applied for had you agreed as we have often requested, appears to me to prove precisely what we have been saying all along.

The purpose of my telephone call was to again request you to agree to the filing of an application by Panagra for the short extension of the route from Campo Grande to Rio even though at this late date the likelihood of securing such a route extension might have diminished greatly.

I did not propose that you seek to have Panair withdraw from its projected cross-continent operations and as a matter of fact, proceeded on the assumption that those operations would become effective in the near future.

As indicated in your letter, we should sit down and discuss this and related matters, and Andy Shea and I look forward to the pleasure of doing so at your earliest convenience.

Sincerely yours,

/s/ PETER

Dear Mr. Iglehart:

PANAGRA

• • • • •

In connection with direct Kingston/Cristobal route, I enclose copy of report prepared by Dunn showing the comparison of this route with the present Kingston/Barranquilla route. There seems to be nothing inherently more dangerous in the Cristobal route except whatever hazard there may be in a somewhat longer flight. This is important among other things in its effect on arrival time at destination. This in turn is controlled to a considerable extent by departure time from Miami which ought to be earlier than it is. Trippe always claims it cannot be earlier because of late arrival of Eastern Air from New York but we have had this up with the Post Office and it may be that some time can be picked up here.

Sincerely yours,

Rou

Dear Bert:

* * * * *

Regarding my trip by air, you will probably have seen my letters covering my observations. The service rendered by Panagra is superior in many respects to that rendered by Panair. Regarding the speeding up of the Miami/Panama route, there is no doubt in my mind but that this can be done without any risk if Trippe wants to do it.

Since the inauguration of the new itinerary only about two voyages were made on time on the northern section and from what I know it seems that the Miami departures are invariably late. Just why this should be so, is a puzzle to me, as they have more margin at that point than anywhere else and there is no reason why they should not take off on time, which is 8 A.M., and if they want to they can take off at 7:30, making Panama that same afternoon if they choose to go from Kingston direct instead of going to Barranquilla. It will be a little difficult to persuade Trippe to do this but I have no doubt that in the course of time he will have to adopt the one-day schedule to Panama. As far as Panagra is concerned, they have frequently demonstrated, including the trip I took, that they can make Panama/Lima and Lima/Santiago in one day each. Personally I am not particularly proud of this performance during the winter months as to arrive at Lima at night i during the winter months as to arrive at Lima at night is a little disagreeable, particularly when there is a great deal of fog, as was the case during my trip.

Air Mail 9.10
Washington 9.14

SANTIAGO, September 9, 1936.

Harllee Branch, Esq.,
Second Assistant Postmaster General,
Washington, D. C.

Dear Mr. Branch:

* * * * * *

You have, I take it, heard before now that since the new schedule has been inaugurated there have been frequent delays between Miami and Barranquilla, originating at Miami. These innocent looking delays of one hour to one hour and a half become cumulative very rapidly, because they are just enough to provide an inducement to remain at Kingston overnight instead of making Barranquilla, thereby losing about three hours of daylight flying time, as these planes, even leaving late from Miami, as we did, arrive at Kingston a little before 3 P. M.

* * * * * *

This sort of a performance by Pan American, not to arrive in Barranquilla until the second morning, which has occurred quite frequently, completely demoralizes the whole West Coast schedule because, as indicated, by the time the plane is ready to take off from Barranquilla the passengers and mail corresponding to that particular trip should already be nearing Ecuador, so that before the mail gets to Panama the whole benefit of the one-day cut made by the new schedule is under these circumstances entirely wiped out.

* * * * * *

1-31-55
GR-11541
GR-11542

G061985
G061986

[fol. 374] The West Coast route being the shortest and most dependable route to B. A. ought not be delayed and hindered in capitalizing these natural advantages which will put this important commercial center within flying time of New York comparable or superior to that from European centers, by the purely artificial consideration which now makes Barranquilla the first overnight stop. The importance of the Canal Zone to the United States in itself and quite apart from any other consideration, also makes the best possible service to Cristobal imperative.

The port of entry to South America of the important United States West Coast trunk line ought to be in United States territory and not in a foreign country. Experience has shown that a steamship port of entry tends to become an important center. One need only look at the port and dock development, etc., at Cristobal to realize what this means. The same is true of an airline port of entry and as air transportation develops this will become more and more apparent. For obvious reasons this development financed by the United States Government ought to take place in United States territory. The time to insure this is now when the development is just starting. To delay it until facilities have been created, lines of travel established and custom and habit grown up at some other point will be fatal.

* * * * *

Yours sincerely,

October 3, 1936.

Mr. A. Garni,
Vice President,
W. R. Grace & Co.,
7 Hanover Square,
New York, N. Y.

My dear Mr. Garni:

I have carefully read your letter of September 22, in further reference to maintenance of satisfactory air mail schedules from Miami by the Canal Zone and other intermediate points to Buenos Aires.

The Department is disappointed in the failure of Pan American Airways to maintain regular through flights in a day from Miami to Barranquilla. Very much longer daily flights are made by some of the European companies on their international routes and it would appear that with efficient equipment the Miami-Barranquilla flight should be regularly made.

We have this matter up with Pan American Airways and that company is making increased effort to comply with the schedule. We are glad to have your suggestions for consideration in working out a service that will facilitate an

expeditious delivery of the mails with the lowest practicable cost to the Department.

Sincerely yours,

MIAMI-BARRANQUILLA OPERATIONS

Buenos Aires
October 15, 1936

Mr. G. Vidal
New York,—

I was glad to see by your JDM-22 of October 2nd that Panair is going to make an attempt to reach Barranquilla at 4.50 instead of 5.43 PM by leaving an hour earlier from Miami, and omitting Havana. I use the word "attempt" advisedly; if I am not mistaken, Panair planes have been late in reaching Cristobal subsequent to your letter on at least two additional occasions.

This situation is so highly undesirable, that it would not surprise me if very strong representations are made in Washington by the Post Offices on the West Coast with whom we have contractual obligations.

The situation may be a little better on the East Coast, but I surmise that Panair arrives late in Buenos Aires about 50% of the trips.

Very truly yours,

J. D. MacGregor

JDM:PG

GOVERNMENT'S EXHIBIT 168

March 15, 1937

MEMORANDUM FOR FILE:

MIAMI CRISTOBAL IN ONE DAY

History—In view of the importance to the U. S. Post Office and to Panagra, of reducing the elapsed time from the United States to Buenos Aires, via F.A.M. 9 as much as possible, the Panair Miami Cristobal schedule (*formerly 2 days*, now 1¼ days) has for some time been decidedly unsatisfactory. Owing to the spacing of the important local passenger traffic sections of Panagra's route and the location of the Andes crossing with respect to the rest of the route, an efficient schedule Cristobal Buenos Aires requires a dawn southbound departure from Cristobal. This requires arrival by Panair at Cristobal on the evening of the previous day.

For two or three years, the U. S. Post Office and W. R. Grace & Co. have been advocating a one day service Miami Cristobal.

Routes—There are several possible operations which would effect this improvement on the southbound trip. (The

northbound trip has been made in one day, on occasion, under the existing setup.)

1. Present route Miami/Kingston/Barranquilla/Cristobal, the Barranquilla/Cristobal leg (or part of it) to be made after dark.

   (a) Panair at first objected to this on the ground that weather conditions at Cristobal were unsafe for night arrival. In view of the weather information supplied by the Army and Navy establishments at Cristobal, and from other sources (see exhibits I-VI), this position has now apparently been abandoned, and Mr. Trippe now states that

   (b) In view of the "mountains" which must be crossed on his route approaching Cristobal, this leg is unsafe for night flying.

2. Miami/Kingston/Cristobal, with direct flight from Kingston to Cristobal.

   (a) Length of this route would be 1395 miles if a stop were made at Cienfuegos, and present offi-

GR-5308
11/22/54 G029248
JPC

[fol. 378] cial mileage route taken, or 1208.5 miles if direct great circle flight Miami/Kingston (580.5 miles) were made. A schedule with S-43 at 50% power Miami/Kingston/Cristobal is attached (Exhibit VII), showing 9 hours 53 minutes elapsed time. This route was actually flown, on ferry flight, October 15, 1936, in 8 hours 20 minutes elapsed time. Exhibit VIII gives data and schedule possibilities on Miami/Cienfuegos/Kingston/Cristobal operation.

Present Panair schedule calls for departure southbound from Kingston at 1:25 PM. If direct flight to Cristobal were made, arrival would be about 5:30 PM, one hour earlier than the hour of total darkness (6:30 PM) on shortest day of year.

(b) It has been stated that the Kingston/Cristobal flight is not feasible, owing to unfavorable winds. A report (Exhibit IX) based on an exhaustive study of wind data from Hydrographic charts, shows that these wind conditions are not only not prohibitive, but that they favor the southbound trip, on which heavier pay loads are to be expected than on the northbound trip, owing to volume of mail and express.

(c) The undersigned understands that the committee of Panair pilots appointed to study schedule improvement in 1936, recommended direct flight Kingston/Cristobal.

3. Miami/Havana/Grand Cayman Island/Old Providence Island/Cristobal. Total distance 1178 miles. Longest leg (Grand Cayman Island to Old Providence Island)-413 miles.

(a) Schedule with S-43 at 50% power, on the assumption of average headwind condition, is given in Exhibit X, and shows 10 hours 34 minutes elapsed time, allowing 20 minutes at all stops.

General Discussion. G029249

Barranquilla Route

The "mountains" to which Mr. Trippe refers appear to be those inland from Porto Bello promontory, about 35 miles east of Cristobal. The highest of these are not over 3100 feet high, and would scarcely interfere even with a normal descent into Cristobal from the east. Moreover, in case of questionable weather over these mountains, or in

5309

[fol. 379] night operation, there is no reason why the aircraft should not skirt the coast, avoiding the hills altogether, and approach Cristobal from the unobstructed harbor side. I believe this is done at present on most trips.

Kingston Route

Although from a purely operating point of view the route via Grand Cayman and Old Providence Islands possesses outstanding advantages, the route via Kingston with direct flight Kingston/Cristobal is very little longer, especially if Cienfuegos is omitted. It is definitely superior to the Barranquilla route as a means of reaching Cristobal in one day, as there is ample margin of time to allow on all-daylight operation.

Other advantages of this route are outlined in Exhibit XI.

The 628 mile overwater flight Kingston/Cristobal cannot be considered as a serious obstacle from an operating point of view, in view of the facts brought out in Exhibit IX, and as substantiated by flights already made and on record. Although less payload could be carried on this flight than on the present Kingston/Barranquilla flight, the present heavy traffic between Miami and Kingston would automatically result in some space being unoccupied south of Kingston in any case.

On the trans-Pacific service, Panair makes a 2400 mile flight, terminating at a point (Alameda, California) where weather conditions are frequently worse than at Cristobal, and where surrounding mountains make the approach a much more difficult problem than at Cristobal, which is unobstructed on the ocean side. It does not seem reasonable that trans-Caribbean operations, frequently spoken of as the "laboratory of ocean flying", can be "stumped" by a flight of 828 miles from Kingston to Cristobal.

GOVERNMENT'S EXHIBIT 170

W. R. Grace & Co.
New York

No. 7
(HJR Trip Series)

New York, October 18, 1937

Harold J. Roig, Esq.,
Santiago, Chile

Dear Roig:

Your No. 12. I was very happy to learn that Kirkland was put in charge of operations and Shannon in charge of maintenance, and particularly happy to know that Harris had accepted the new set-up. You have made great progress toward the solution of your administrative problem.

The discussion still continues as to the advisability of the purchase of the S-43 and furthermore as to the fixing of

schedules. Garni is handling the whole matter and will be writing to you fully about it. Meanwhile, my own view is that Trippe can go to Cristobal in a day and *should be made to do so at once*. We cannot do anything with regard to establishing an adequate schedule on our line until Trippe goes to Cristobal in a day. I believe it is a perfectly feasible thing to work toward a definite schedule of one day from Cristobal to Lima, and a second day from Lima to Santiago. This requires adequate lighting and emergency fields and adequate ground direction equipment; and furthermore, a thorough education of pilots in instrument flying. You are working on all of these points and will have them all in shape in a relatively short time.

This plan would be greatly facilitated by land flying from Guayaquil to Cristobal. My feeling is that if practicable you should go to Colombia on your return from the south and form your opinion on the spot, in view of the investigation that is being made, whether or not we are going to be able to use fast land planes for the northern section, and if so, how long it will take to equip ourselves for doing this.

GR-1697 G 1963

10-21-54 PJS

[fol. 384] Then can decide whether or not to buy an S-43.

Trippe's objection to calling in Cali was not the S-43 but a lack of adequate ground equipment. I fancy this can be provided promptly.

Yours very truly,

/s/ D. S. IGLEHART

P.S. Am just off for Washington and can therefore not write you by this mail.

Trippe is now definitely contemplating operating DC 3's between Brownsville and La Guayra via Central America and Panama.

This makes land operations Panama-Ecuador look fairly simple. Don't you think so?

/s/ DSI

GR-1698 G 1964

[fol. 385]

GOVERNMENT'S EXHIBIT 171

No. 9
(HJR Trip Series)

New York, October 21, 1937

Harold J. Roig, Esq.,
Lima, Peru.

Dear Roig:

Garni, Daulton, Patchin, Cogswell and Kirby have all been in Washington working over our steamer problem there, and although we are not making progress very rapidly, we have, I think, laid out a course of action that should ultimately result successfully.

Panagra—I am referring all of your letters to Garni and he will be taking up the different points constantly with you, and what I say is merely as a corollary.

Colombia—Trippe's tenacious insistence on making Barranquilla the central distributing point, and particularly now, his plan to run a service through Central America that actually flies through Cristobal to Barranquilla and on to Venezuela, and his having his Miami service hooked up with that line at Barranquilla instead of at Cristobal, all emphasizes the seriousness of our problem of getting satisfactory schedules and satisfactory service through from here to Buenos Aires. From the standpoint of our Government it would seem obvious that the thing to do is to demand a direct service from Miami via Kingston to Cristobal, and then to distribute to Colombia by land route directly from Cristobal to Medellin and to Cali for further distribution from these points. Here the Scadta interest intervenes and the mystery of Trippe's relation to Scadta makes it difficult to decide what our relation to Scadta should be.

In this connection I notice a report from the Colombian Consul, which says, "A bill which authorizes the Government to purchase shares of the SACO Air Transportation Company up to $200,000 has been approved in third de-

bate". When you go up to Colombia I think you should
GR-1700 10-21-54PJS G 1961

[fol. 386] on the ground decide whether we want to alter our policy. In my opinion we will never get a satisfactory schedule over our route which will make Buenos Aires in 3½ days until Trippe has been forced to fly from Kingston to Cristobal.

* * * * * *

Yours very truly,

(signed) D S IGLEHART

GR-1701 G1962

[fol. 387]

GOVERNMENT'S EXHIBIT 172

Personal

Washington, D. C., October 27, 1937.

Harold J. Roig, Esq.,

SANTIAGO, Chile (Copy to Lima)

Dear Roig:

I have before me Santiago Palmetto No. 24 as also Lima Palmetto No. 52, commenting on the advantages or disadvantages of Schedule C. In order that you may appreciate the position at this end I want to describe briefly the developments since you left.

Mr. Iglehart, as you know, is insistent on two points: First that we should force the issue now and prevail on the Post Office Department to eliminate Barranquilla entirely, making the southbound trip to Panama in one day via Kingston direct, and second, he is entirely opposed to the purchase of another S-43, on the grounds that this might well result in an unnecessary investment and in a plane that he considers unsuitable for reasons frequently discussed, as also for the reason that the acquisition of an additional S-43 might well retard the ultimate inauguration of an all-land plane service from Panama to B. A.

With reference to the first point (i.e., total elimination of Barranquilla) while I seriously doubt that it can be accomplished at this time I have nevertheless pressed this subject with Juan and on Columbus Day went to Washington to discuss it with Lamiell. The former has for some time agreed to make a direct trip via Kingston on the condition that this be the third trip which he wants to apply for. Outlining to Juan the great difficulty to get the money for a third trip as quickly as it was desirable to solve this problem, he has finally, under great pressure, agreed to a change in the program in the sense that he would run one

GR-1710
10-21-54 PJS

G 1956

[fol. 3 8] of the two existing trips in one day to Panama via Kingston direct, continuing the other trip as at present, overnighting at Barranquilla.

I thought this denoted quite a little progress and I hooked onto this suggestion, which is really the so-called C Plan. Knowing how anxious you and everybody else are to improve our whole itinerary situation, I thought the C Plan presented about as good a solution as could be hoped for under the circumstances and therefore approved the plan in principle when discussing it with Vidal, who accompanied me Monday night as far as Philadelphia, and I authorized him to send out the corresponding message, to which there seems to be so much opposition.

As far as my discussion with Lamiell is concerned I have made "theoretical" progress inasmuch as I got him to agree in principle that the proper thing to do would be for him to forget all about Barranquilla and to meet Trippe's argument with reference to the enormous amount of mail movement to Colombia and passenger movement to Venezuela (all via Barranquilla) by saying that as far as the Colombian mail is concerned this should be taken right into Cali by Panagra and redistributed from there to Bogota, Medellin, etc., by local services; with reference to the alleged large movement to Venezuela, I told him that with the improved East Coast schedule Venezuela should logically be served

via Trinidad rather than give that country four services a week—two via Barranquilla and two via Trinidad—which has so far placed that country in a preferential position for no particular reason whatever.

Lamiell meekly agreed to the soundness of this suggestion but brought out the fact that Panair has a large investment in Barranquilla; also that Colombia would object to the elimination of Barranquilla, etc., etc., so that his

GR-1711

G 1957

[fol. 389] acquiescence really does not amount to very much. My impression, therefore, was, and still is, that if we keep harping on the total elimination of Barranquilla we will stymie ourselves and get nowhere to improve the present unsatisfactory schedule position.

For these reasons I felt I had made quite a little progress in inducing Trippe to agree to deviate one of the existing trips, as this is at least half a loaf, which is always better than none, and if we should be successful in getting the Post Office Department's approval to this program (which incidentally would mean an additional appropriation to finance a weekly shuttle from Kingston to Barranquilla) we would thereby definitely establish the feasibility of the direct route and gradually bring out the great improvement thereby to the entire West Coast service.

* * * * *

Yours sincerely,

(signed) A. Garni

GOVERNMENT'S EXHIBIT 173

PERSONAL

Washington, D. C., October 28, 1937.

Harold J. Roig, Esq.,

SANTIAGO, Chile (Copy to Lima).

Dear Roig:

Since writing you my letter under yesterday's date I had an all-evening session with Juan on the subject of running both services direct to Panama, as also on the subject of the organization chart.

The position described in my yesterday's letter, regarding the deviation of one of the existing trips, is in accordance with the outline given me by Vidal last Monday but differs somewhat from Juan's basic idea, which is that he is ready to run one of the existing trips from Kingston direct to Panama, provided the Post Office Department subsidizes one additional trip (not a Kingston-Barranquilla shuttle as indicated by me but an additional trip from Miami to Barranquilla).

This differs somewhat from my outline inasmuch as Juan is unwilling to run one of the existing trips from Kingston direct to Panama unless he gets support for one extra trip from Miami to Barranquilla to take care of the movement in that section. On this latter point he says that due to various readjustments in Mexico, together with the fact that he is getting a substantial subsidy from Jamaica, he is in a position to run this extra Miami-Barranquilla trip for a relatively small sum, which the Post Office Department has available and which he is confident they will grant him.

Itinerary Situation: I have discussed this at great length and on further reading the many cables and letters on this subject, believe that the whole issue is becoming entirely too controversial.

I have also discussed with Juan the question of early

GR-1716
10-21-54 PJS

G 1952

[fol. 391] inauguration of land operations and found him to be more insistent than ever that this should be approached with a great deal of care, in which we, of course, all concur, as no one wants to do anything that would in any way lessen the safety factor. On reviewing the whole situation my present opinion is that if we can arrange to run one of the existing trips to Panama in one day (Kingston direct) and assuming that land operations all the way from Cristobal south cannot be resorted to as early as would be desirable for the purpose of an improved itinerary, we should adopt the following itinerary:

On trip going Panama direct:

First night	Panama
Second night	Trujillo
Third night	Antofagasta
Fourth night	Buenos Aires

On trip via Barranquilla:

First night	Barranquilla (sorting mail there)
Second night	Guayaquil
Third night	Arica
Fourth night	Santiago
Following noon	Buenos Aires

This would give one trip to B. A. in four days and another in 4½ days, but on returning north both trips would be made in four days from B. A. to Miami, the itinerary northbound being:

First day to	Antofagasta
Second day to	Trujillo
Third day to	Panama
Fourth day to	Miami

arriving New York early the following morning.

In expressing this view I am well aware of certain objections but I am brushing aside entirely the passengers' con-

venience or desire to overnight in a capital rather than in Trujillo, Arica or Antofagasta, as this is of secondary importance; I feel that very few, if any, will be deterred GR-1717

G 1953

[fol. 392] from taking this trip just because we overnight in Trujillo instead of in Lima, or in Antofagasta instead of in Santiago. The plan has certain objections inasmuch as the mail does not get to Lima until the morning of the third day (I am speaking of the faster of the two trips); on the other hand, it has the advantage of eliminating daybreak departure from Lima south with a rather long trip all the way to Santiago.

This sort of an itinerary distributes the 4,400-odd miles between Cristobal and Buenos Aires in a much more even way than the July 15 schedule, which contemplated Lima-Santiago in one day each, with fairly heavy mileage the first two days and insufficient mileage the last day. After seeing the Post Office Department, which I still hope to do today, I may again communicate with you by mail or by cable, preferably after you receive this letter, so that we can get our ideas together on a new schedule.

Organization Chart: I have also had a long powwow with Juan about this, the net of which is that I feel it better to discuss this further on your return. He thinks that the agent's functions on the Coast should be defined; also financial and accounting control should be centered in New York and not with the agent on the Coast. I told him that it is my impression that your reference in this respect applied specifically to financial and accounting functions *on the Coast* and did not refer to the Company's *general* financial or accounting position. It would be a long story to give you all the pro's and con's discussed and as you will prob ably be back here in the near future I see no point in pursuing this matter further, particularly as with you and George Rihl absent I doubt that Juan and I could reach an agreement.

Sincerely yours,

/s/ A. GARNI

GOVERNMENT'S EXHIBIT 174

copy of handwritten letter

PERSONAL

Dear Garni,

Your Personal Letters Oct 27, 28

I feel that the progress you have made, as indicated both by "Plan C" and by Palmetto #80, in the direction of getting one day direct service Miami/Cristobal is most satisfactory indeed. I fully realize also the importance to your efforts in this direction of our showing correspondingly improved Panagra schedules and have had this constantly in mind in formulating my views on the Panagra schedules we have had under consideration.

While we have pointed out certain traffic difficulties resulting from undesirable overnight stops etc which have been suggested in this connection, I am perfectly willing to forget these (even tho I still feel it means some considerable financial loss) if you feel that the general interest, and particularly the facilitation of the one day direct trip Miami/Cristobal, makes it expedient. This leaves in the picture just the factors required for a sound operation which is, of course, the thing to which we all give primary consideration.

While it is true that "Plan C" and later proposals make equal division of mileage *quantitatively*, I do not feel that they do so *qualitatively*. In other words, the miles between Antofagasta/B.A. for one reason, and the miles between Cristobal/Lima for another, are not the same kind of miles as those between, let us say, Lima/Santiago. In the two sections referred to, we have certain definite facts which simply cannot be ignored and which must be dealt with as they are in formulating any schedule.

(1) Under certain conditions, one day Antofagasta/B.A. is perfectly feasible. We have done it on a number of occa-

sions,—the last only a few days ago,—without the slightest
GR-1719
10/19/54

G 1256

[fol. 394] difficulty. I feel, however, that it is a very different thing to do this on occasion and to make a fixed schedule based on doing it regularly. With conditions as they are at Antofagasta and B.A. and with the Andes crossing in between, I feel that a regular one day schedule between these points at the present time is unsound.

* * * * *

Very sincerely,

(Sgd) HAROLD J. ROIG

Dear Roig:

PANAGRA SCHEDULES

Ever since you left I have been battling with all concerned over the question of schedules as I fully appreciate the importance of doing something promptly with reference thereto. I have had a number of rounds with Juan, the Post Office, Bob Tlach, etc., all in an effort to press for a direct service to Panama in one day.

The Post Office Dept. concurs entirely with our views in this respect and are ready to authorize this direct service, provided it does not cost them any more money. They

have even worked out a scheme of their own, connecting at Kingston with the through service, running two separate legs from that point, one to Barranquilla and the other to Panama direct and cutting out the shuttle between Barranquilla and Kingston. This scheme would not require any additional funds but Juan vigorously objected to it, advancing numerous reasons, some of which are sound and some unsound. I pressed very hard to get this adopted but Juan insists that the only satisfactory solution would be for the Post Office Department to authorize two brand new trips from Miami to Panama direct, leaving the two trips from Miami to Barranquilla undisturbed, or in other words, to give him four independent trips per week between Miami and the Canal and/or Barranquilla.

Theoretically such an improvement would cost the Post Office Dept. approximately $600,000, but knowing that this sum will not be available Juan has leaned over backwards to cut this down to a figure that might go by. In the first place, he offered to cut out the service between Havana and Belize, in which a substantial subsidy is involved; in

GR-1723
11-16-54 PJS

G016117

[fol. 396] the second place he offered to cut out the subsidy between Barranquilla and Cristobal, even if he were obliged, for reasons of his own, to continue running that section. With these two contributions the figure of $600,000, above referred to comes down to $285,000.

He then proceeded to further reduce this by offering to waive one northbound trip Barranquilla to Miami, which brought the final figure of additional money required down to $142,500. I told the Post Office Dept. that I felt that Panair had gone a long distance to make it possible to solve this whole problem and that they ought to find ways and means to find this sum, which, compared to the important improvement accruing to the whole West Coast route as also to the Caribbean service generally, is really a

trifling matter. However, in the existing atmosphere it is useless to talk about additional appropriations and I am afraid that it will be some time before we get a direct one-day service to Panama *twice* a week.

I have been groping around for some other solution and the net of protracted conversations in this respect is that I believe 50% of our problem can be solved, but even this may require our giving up the Montevideo-Buenos Aires service, which incidentally is not much of an asset. Juan is ready at the moment to run one of the two trips via Kingston direct to Panama in one day and the Post Office Dept. while formerly objecting to two distinct services, this afternoon felt that while this solves only half their problem, or to use their own words, "is only half of what we are aiming for" now seems to be willing to accept this change as a temporary solution.

As far as the other service via Barranquilla is concerned, Panair is ready to cut out Cienfuegos, thus saving approximately half-an-hour, and they are also ready to run the Cristobal-Barranquilla section with DC3s, thus
GR-1724

6016118

[fol. 397] saving a further half hour. It is expected that with these two savings the present 2½ or 3 hours' delay at the Isthmus in sorting the mail could be done away with to a large extent for the reason that the Cienfuegos saving would be used for a correspondingly later take-off at Miami to enable them to do more sorting there, whereas the Barranquilla-Cristobal saving would give them a half hour at the Isthmus over what they now have available, and it is calculated that in this way Panagra could take off at Cristobal at 9 A.M. This would be an improvement over the present performance, whereas the direct trip would be a definite step forward.

My feeling is that if we try to make a clean job of the whole business, continuing to harp on two direct trips to Panama via Kingston, we will be discussing this for another year or two, whereas if we accept the foregoing set-up we improve both of our existing services, get 50% of what we

are after as far as one day to Panama is concerned, and once we get this program going the rest will probably solve itself in the course of six to twelve months. In other words, I believe that if we get one trip on a direct basis now, the second one will come along before the end of next year.

I discussed this whole matter this afternoon with Grayson and will discuss it further tomorrow with Lamiell and Harllee Branch, but do not think the position will be any different to what I now describe it to be. In talking to Grayson this afternoon I told him that we are very anxious to get this question of schedules settled but that as long as the Miami-Panama route is in such an undefined, not to say sloppy, state, we are really stymied and I then launched a new attack on the subject of eliminating Barranquilla entirely, running both services direct to Panama and dropping all Colombian mail at Cali. As a result of this the

GR-1725

G016119

[fol. 398] foregoing developed and I am satisfied that while the Post Office Department sympathizes with our views we would be just wasting a lot of time by pressing for a *complete* solution of our problem at this time, and as far as I am concerned I would accept the idea of running one trip direct and speed up the mail sorting on the indirect trip and get going.

If in principle you concur with these views I will try to get everybody to agree before the idea gets cold again and I would appreciate it, therefore, if you would cable me as soon as practicable just what you think ought to be done.

* * * * *

Colombian Survey: New York just advised me of your cable saying that Campbell's survey is complete and I read between the lines that the conclusions are favorable to land operations. As Trippe has always volunteered to have this survey checked up by his experts and as I do not believe he has any intention of doing this, I suggested that Vidal submit the gist of your message to Rihl and Trippe, asking them whether they want to send Priester down to Colombia to check up this survey or if they prefer to have King and Campbell return to New York to discuss it.

I feel that Trippe should declare himself *now*; otherwise he will stall along indefinitely as he still seems to be opposed to *any* move that will improve the West Coast service.

. . . . . .

Yours sincerely,

/s/ A. Garni

WH 6-4890

W. R. Grace & Co.
New York

In resolution have record of conflicting interest and fact that Pan Air moving overland. Venezuela to Calif. B.A. to Rio.

December 24, 1937

Dear Mr. Iglehart:

Herewith I am sending you a clean copy of your handwritten draft letter to Mr. Whitney (marked "Draft No. 1"), and draft of another letter (marked "Draft No. 2") which attempts to adapt your draft to the later suggestion made in your confidential letter of December 20th. Referring to our telephone conversation, I intentionally omitted from my draft reference to the Grace Line Caribbean development as I feel that the introduction of this, coupled with indication of possibility of similar development in air will in view of Panair's large Caribbean aviation picture, inject a new and highly controversial issue

into the discussion which is apt to further complicate agreement on the main issue. I have amplified the draft as I read it to you over the telephone by adding some further particulars supporting the charge of subordination of Panagra's interests to those of Panair.

I also enclose copy of the resolution which we offered at yesterday's Board meeting. After considerable discussion, the matter was deferred to next week's meeting on the understanding that if agreement had not been reached by that time, our motion would go in yesterday's minutes if we desired.

Both Garni and I thoroughly agree that rather than write any letter to Mr. Whitney, it would be better if you were to telephone him as you suggest. Our ideal of the telephone conversation would be that it follow more or less the lines of draft No. 2 enclosed with various amplifications which you can add in a telephone conversation more satisfactorily than in a letter and winding up with the suggestion you indicated that as a favor to you, Mr. Whitney bring about GR-7350

G031015 58

[fol. 400] this meeting between us and two of the Panair directors not including Trippe. We are inclined to believe that it would be better not to make the definite suggestion of liquidation at this time but if you feel that it should not be entirely omitted, introduce it not as a threat but as a statement of the inevitable condition into which we are drifting unless the course you suggest is taken.

As I told you, Trippe is also thinking a good deal about this organization problem and in the last conversation Garni and I had with George Rihl last week, a good part of the time was devoted to this subject. They claim that their plan is actuated by the desire to give the company a wholly independent management. In fact, however, what their plan really comes down to is eliminating a good part of the present Grace intervention while retaining and increasing the Pan American intervention. This is, I think, quite plain from the memorandum on the subject which Rihl left

with its entitled "Suggested Plan for Re-organization for Pan American-Grace Airways", copy of which is enclosed.

Sincerely yours,

/s/ HAROLD J. ROSS

[fol. 401] Draft No. 1

C. V. Whitney, Esq.,
Chairman of the Board,
Pan American Airways,
New York City

Dear Mr. Whitney:

In representation of my firm as owner of half of the shares of the Pan American Grace Airways, Inc., I write to you as the representative of the owner of the other half.

I have once or twice appealed to you to intervene in settling problems connected with this enterprise and you have in each case responded in a very kindly way and with effectiveness.

Now a situation has arisen which has been accumulating for some time and which has now become so grave as to require some radical action for its remedy. I must ask again for your cooperation and assistance.

years ago in the last conversation which I have had with Mr. Trippe, your senior representative on the Board of Directors of Pan American Grace Airways, he stated that where there was a possible conflict between the interests of

the Pan American and Panagra, he felt that he had a right, in fact, it was his duty, to favor his 100% interest as against his 50% interest. I replied that in my opinion he should when sitting on the Board of Panagra, either act in its interest or retire from the Board.

Mr. Trippe has, however, since that time, constantly followed the policy of placing obstacles in the way of the development of Panagra whenever he considered that by so doing he might further the interest of Panair.

His attitude in this respect has, in my opinion, been unethical and in fact indefensible. I could place before you countless instances of action and inaction to support this opinion. As I say, I have not seen Mr. Trippe since he enunciated his above mentioned attitude. My associated GR-1747 10-20-54 PJS G1753 [fol. 402] have, however, been constantly in touch with him and have had most unusual patience and forbearance in their dealings with him.

The business has been kept going and was remarkably successful until about two years ago when it became large and its administrative problems became greater and required prompt decisions. As the business grew and as it became more and more apparent that Panagra was the direct and logical route to Buenos Aires, Mr. Trippe's opposition increased and he sought every means of retarding and obstructing our company's normal development. His 100% interest was in running a clipper service around the East Coast of South America and his 50% interest was in the direct route (Panagra). The more Panagra has grown and developed, the more he has opposed its development. We now have really serious problems such as the extension of land service from Guayaquil to Cristobal, the obtaining of a semi-weekly direct service from Cristobal to Miami, the working out of an adequate administrative program, the obtaining from Pan American Airways of adequate technical assistance. These in addition to the daily problems of management are meeting with tacit and active hindrance and opposition.

The time has come when this must be stopped. We could run this business successfully ourselves. We have been in the transportation business for generations and our numerous South American houses and we have been working actively over the aviation business for ... years. We have competent, in fact, highly expert aviation men in the employ of W. R. Grace & Co. We could manage the Panagra company far more safely and far more profitably than it is being managed at present.

We do not ask that you should permit us to run the business. We feel that Panair and W. R. Grace & Co. should cooperate in its management.

GR-1748 G1754

[fol. 403] We, after ... years of patient effort, my associates have now definitely decided that Mr. Trippe will not in good faith cooperate with us. I feel, therefore, that if Panagra is to return to successful operation, Mr. Trippe must be retired from the Panagra Board and someone named in his place who will have authority from your Board to act independently of Mr. Trippe and who will be instructed to act in the interest of Panagra. That man should begin by going over our line and should try to gain an intimate knowledge of it. Mr. Trippe has never even been over the line, nor has his senior technical man notwithstanding our constant effort to get them to look at the business. Instead of his being a partner and daily helper and cooperator in making the business a success, we have at no time received any bonafide cooperation from him. Furthermore he has while sitting on the Board of Panagra been guilty, in our opinion, of the most surprising acts of disloyalty to the company's interest.

Mr. Trippe has frequently contended that in the same way that he had a 100% interest in Panair and only a 50% interest in Panagra, we had a 100% interest in the Grace Line which was a competitor of Panagra. It will be obvious to you that we could not with delicacy allow any of our Panagra directors, in their decisions to take into consideration a conflicting interest that we may have in the Grace Line. I have myself from the time that Panagra was founded seen to it that this should be avoided and I

know of no instance where there has been the least breach of this attitude. On the contrary sacrifices have been constantly made to assure a mutually helpful attitude. The Grace Line is about to enter the Caribbean trade in an important way following our purchase of the Red D Line service to Puerto Rico and Venezuela and will on January 7th initiate a rapid and modern service to Colombian and

GR-1749 G1755

[fol. 404] Venezuelan and other Caribbean ports. Here again I am anxious that our steamship services should cooperate with the air services and avoid conflict with them, provided some plan for real cooperation can be reached.

Panagra's contracts with our Government will shortly expire and it is therefore urgent in my opinion that you should consider immediate and decisive action on my suggestion.

It might be advisable that you should name a committee of say 3 of your directors to meet with 3 of ours in order that detailed facts may be put before them and endeavor to reach a solution of this grave impasse. I feel that Mr. Trippe should not be a member of that Committee as discussions would be endless and nothing would be accomplished. I would prefer not to take part in the discussions either as I feel rather too strongly on the subject. It is distressing for me to have to write in this way but on the one hand Mr. Trippe has completely exhausted our patience and endurance and on the other hand W. R. Grace & Co. must during the first two weeks in January lay out its plans for the coming year. Mr. Roig and Mr. Garni will be at your disposal, along with any other of our directors, at any time that you may send for them.

GR-1750 G1756

[fol. 405]

Draft No. 2

C. V. Whitney, Esq.,
Chairman of the Board,
Pan American Airways, Inc.
New York City.

Dear Mr. Whitney:

In representation of my firm as owner of half of the shares of the Pan American Grace Airways, Inc. I write to you as the representative of the owner of the other half.

I have once or twice appealed to your to intervene in settling problems connected with this enterprise and you have in each case responded in a very kindly way and with effectiveness.

Now a situation has arisen which has been accumulating for some time and which has now become so grave as to require some radical action for its remedy. I must ask again for your cooperation and assistance.

I refer to the fact that the business has reached a size and is confronted with problems which call for a radical change in our management setup if it is to continue to be a success. I mean by this not only a management stronger than the present one in its authority but a management which is free to function in a manner dictated solely by what is in the best interests of Pan American Grace Airways. This latter point is of outstanding importance.

_____ years ago in the last conversation which I had with Mr. Trippe, he stated that where there was a possible conflict between the interests of Pan American and Panagra, he felt that he had a right and in fact it was his duty to favor his 100% interest as against his 50% interest. His adherence to this policy has been constantly apparent in many different situations which have arisen since that time.

1. He has consistently opposed giving a one day direct service between Miami and Cristobal which would

enable Panagra to improve its schedules between the United States and the countries which its line serves.

GR-1743 G1749

[fol. 406] He has preferred to give a better service to Barranquilla than to Cristobal which suits the interests of Scadta, as frankly stated in Scadta's last annual report, and holds back the naturally faster West Coast route to Buenos Aires and keeps it more nearly in pace with the slower East Coast route. Only after the greatest pressure from us and the Post Office has he finally been induced to run one trip per week direct to Cristobal.

2. He has long opposed normal Panagra development in the Argentine and only finally agreed to diversion of the line to Cordoba and later to the extension through the Argentine via Salta to La Paz on conditions coupled with outrageous demands for money payment to Pan American. Although Panagra's business and interests in the Argentine are much larger than Panair's and Panagra pays two-thirds of the expenses of the Buenos Aires office, he insists on Panair's retaining control of that office.

3. Panagra's publicity in the United States which is handled by Pan American and for which Panagra pays a substantial amount annually is almost invariably in a form which favors Pan American at the expense of Panagra whenever there is any conflict of interest involved.

4. He has made full cooperation of Pan American's engineering department, for which Panagra also pays a substantial amount annually, subject to conditions from time to time which it has not been reasonable that Panagra should comply with, with the result that the engineering assistance paid for has not been furnished.

5. In Colombia where Panagra's interests are in conflict with Umca and Scadta, he has long opposed and is

GR-1744. G1750

[fol. 407] now opposing the normal development of Panagra's route to an overland route which would be faster and more economical and would enable the company to improve its revenue by serving the large available Colombian traffic.

These and other instances which might be mentioned serve to indicate the manner in which his policy has for several years and is now definitely standing in the way of Panagra's reasonable and normal progress and development. In view of all this and with the company's earnings at low ebb in 1937 and a loss confronting us for 1938 unless prompt action is taken, I feel that the time has come where this intolerable situation must be remedied.

I feel that the most expeditious and practical solution is to put responsibility for the conduct of the business in our hands, placing one of the Grace directors in the Presidency of the company with ample authority, and having it definitely understood that when questions arise on which there is any conflict of interest between the two companies, the Pan American directors are to be disqualified from acting and the action of a majority of the other directors is to be decisive. I feel that only in this way can we secure the prompt decision of questions which cannot continue to be deferred for long periods by endless discussions and that only in this way can we be assured of questions involving conflict of interest between the two companies being decided solely from the standpoint of Panagra's best interests.

The Grace organization (with the cooperation of several of Pan American's departments which could be of great assistance if made free to cooperate fully) is abundantly able to assume this responsibility. We have been successfully engaged in the transportation business for generations. Not only in New York but all along the Panagra

GR-1745 G1751

[fol. 408] route in South America our organization has been working actively in the aviation business for the past eight years. We have competent, in fact, highly expert

aviation men in our employ. We could manage the business effectively and profitably.

In order to bring this vitally important matter to prompt decision, I suggest that you name a committee of yourself and another Pan American director to meet with Mr. Garni and Mr. Roig, directors of W. R. Grace & Co. and of Panagra, to go over the whole situation in detail and agree upon a plan of action along the above lines. I feel that Mr. Trippe should not be a member of this committee as that would lead to endless and fruitless discussion. I also would prefer not to take part in the discussions as I feel rather too strongly on the subject. Mr. Roig and Mr. Garni along with any other of our directors will be at your disposal at any time that you may send for them.

Sincerely yours,

GR-1746 G1752

[fol. 409]

SUGGESTED PLAN FOR REORGANIZATION OF PAN AMERICAN-GRACE AIRWAYS, INC.

Pan American-Grace Airways, Inc., while a corporate entity, does not operate as such for the following reasons:

1. The General Manager is now allowed to function as is customary in corporations that do not have active Presidents.

2. It is not possible, under the present procedure, for officers of the company to communicate directly with each other by code due to the fact that the company has no code of its own and all code messages are sent through W. R. Grace & Co., which does not permit the use of its code by Pan American-Grace employees.

3. Correspondence from the New York office of Pan American-Grace to the field operation of the company is nearly always directed to W. R. Grace Agents and, therefore, cannot reach the company personnel without first passing through the hands of a third party.

4. Accounting at Lima and the Canal Zone is directly under W. R. Grace as at neither of these points does

Pan American-Grace have its own employee in charge, although the clerks are on the payroll of the company.

5. The system is divided into three divisions which are in charge of pilots who are on regular runs though not with the same frequency as the ordinary pilots, but which necessitates their absence from division headquarters at very regular intervals. Because of this distribution of operating authority without sufficient company personnel to actually handle these operating units the custom has grown up in the company to rely on senior officials of W. R. Grace, who maintain extensive offices where all division headquarters are located.

In order to make Pan American-Grace an operating corporate entity as it is generally understood, it will be necessary to

(a) Give the General Manager, in the absence of a President, full authority to operate the company, making periodic reports to the Board of Directors, as is customary, in addition to which he could report at more frequent intervals to an Executive Committee, which Committee would have such powers as the Board saw fit to grant it.

(b) Provide a company code, or at least allow the
GR-1741 G1747
[fol. 410] company to use a code that would be available to such personnel as the General Manager saw fit to designate, with all messages being sent on company business directly to company personnel.

(c) Routine correspondence to be directed to and received by company personnel in the ordinary manner.

(d) Accounting to be reorganized in such a manner as to make available to field executives monthly full financial operating results at the earliest possible moment. In order to do this it is recommended that the operations accounts for the system be concentrated at Lima, with reports to be sent to the New York

office where they can be consolidated with expenses incurred in the United States, on which the field organization has no interest in or authority over. Inasmuch as W. R. Grace acts as Agents for the company, and as such at many places handle the finances of the company, they probably could undertake the field accounting quite readily, but wherever they do such work the Company should not have accounting employees.

(c) Consolidate the system into one operating division, establishing sections, if necessary, with local authority over the sections vested in ground personnel.

To accomplish the above recommended reforms the Board of Directors should approve an organization chart for the guidance of the General Manager, an example of which is attached, together with an outline of how the organization would function if the chart is followed.

GR-1742 G1748

GOVERNMENT'S EXHIBIT 177

January 7, 1938.

C. V. Whitney, Esquire,
230 Park Avenue,
New York City.

Dear Mr. Whitney,

I have been here for a few days and am sorry not to have had the pleasure of seeing you.

I find on careful study that the methods of active obstruction and of passive procrastination which have been employed over a period of years have now brought about a situation in Pan American-Grace Airways which is even more serious than I thought it, when I spoke to you by telephone.

I see no remedy for the situation except that you should agree to the naming of one of our men as President of the Company and our assuming the responsibility for the

management and for the success of this enterprise. I feel that we are now equipped with men and with experience to assume this responsibility, but I would not agree to doing so unless I could have your assurance that your representatives on the Board of Pan American-Grace Airways would work loyally and wholeheartedly in its individual interest. Furthermore, I would like to have your assurance that Pan American-Grace Airways would receive from the Technical, and Publicity Departments of the Pan American Airways an enthusiastic and effective support, which up to the present time we have not considered adequate.

G031810

GR-7358

178

[fol. 412] I would be very grateful to you if you would send for Messrs. Roig and Garni and receive from them the detailed facts that support the conclusions which I have reached.

I feel confident that after doing so you will agree to and will support these conclusions.

I have learned with regret from Messrs. Roig and Garni that Mr. Trippe has complained that my having approached you as I have was unethical on my part. I am sure you do not share this view. It seems to me most logical and legitimate that you and I, as heads of the two owning concerns, should confer and confer frankly as to the welfare of the jointly owned concern. It is superfluous to say that it is farthest from my mind or my desire to do an injury to any individual. My interest is solely the welfare of this Company and to establish and develop a spirit of friendly and helpful cooperation between our respective companies.

I am, with kind regards,

Sincerely yours,

(Sgd) D. S. Ingleheart

No. 9

(April 11, 1938)

(pl. return)
(*AG*)

Lima, Peru
April 6, 1938

Mr. A. Garni,
W. R. Grace & Co.,
New York

Dear Garni,

I have been looking into the schedule performance out of Cristobal since the December 15th schedule went into effect.

The figures, which I think you will find interesting, are as follows:—

"PANAGRA DELAYED DEPARTURES
FROM CRISTOBAL
"December 15, 1937—April 3, 1938

	Miami/Cristobal direct	Via Barranquilla
Total trips	16	16
Delayed trips	3	12
Delayed trips due PAA and/or P.O.	1	10
Delayed trips due Panagra	2	2
Delayed trips resulting overnight off schedule	2	8

(G049095)

As you will see from the above there have been 32 trips out of Cristobal since the new schedule went into effect, sixteen connecting with Panair's one day Miami/Cristobal run and a like number connecting with the run via Barranquilla. On Panagra's sixteen trips connecting with Pan

air's d[illegible] trip, its departure was delayed only once due to Pana[illegible]nd or the Post Office. On this one trip we were delayed 4.15 hours from our scheduled departure time of 9:30 and as a result we had to overnight at Buenaventura.

1-7-55 [illegible]
GR 89[illegible]

[fol. 111] On two of the other trips we were 1.30 hours late in getting off due to reasons of our own. I think the performance on the one day schedule with only one serious delay can be regarded as just about 100%.

On the other schedule via Barranquilla the picture is very different. Out of sixteen trips on that schedule, we were delayed in taking off from Cristobal on twelve trips or [illegible]n or over 60% of the total trips were due to Panair and or Post Office delays. On one of these ten trips it is true that after being delayed 4.25 hours due to Panair and or the Post Office we had to put back to Cristobal for reasons of our own, but, as we could not have gone on to Buenaventura in any case, I include this trip in the Panair and or Post Office delays. These delays ran [illegible] the way from five trips where we were 1.00 to 1.[illegible] late in starting, three where the delay was 3.00 hours, 4.25 hours and two trips a whole day late.

These delays resulted, in a considerable number of the cases, in our being forced to make off-schedule overnight stops which cost us a great deal of money to say nothing of the effect on our record for schedule maintenance.

(G5049096)

Unfortunately I cannot tell from the statistics available in Lima how many of these delays resulted from Panair's failure to reach Cristobal on time and how many resulted from delays by the Post Office in working the mail. I am getting this information and will advise you in due course, but I think the records will show that a good many of the delays were on account of late arrival by Panair. The result[illegible] as we are concerned is the same in either

1-7-55 [illegible] GR-8989

[fol. 415] ease. You appreciate, of course, that Panair's DC-3 which comes to Cristobal on the trip via Barranquilla is the La Guaira plane which overnights at Barranquilla. On time arrival at Cristobal by Panair on the indirect trip is therefore contingent on possible delays between any one or more of three sections, namely, Miami Cristobal, La Guaira Barranquilla and Barranquilla Cristobal. This puts a good many contingencies on this trip between Panagra and Miami.

The figures seem to show pretty clearly that the direct Miami/Cristobal schedule is far preferable from the standpoint of dependability and schedule maintenance.

Yours sincerely,

HAROLD J. ROE (signature)

Mr. A. Garni,
W. R. Grace & Co.,
NEW YORK

Dear Garni,

(probably means #9)

Referring to my letter #19, page 2, last paragraph

I now enclose letter from Rodenbaugh, Pan American's Section Superintendent at Cristobal, showing exact time lost by Panagra in Cristobal on the trips via Barranquilla since December 1st, last year.

Panair is scheduled to arrive at Cristobal on these trips at 8:00 AM. You will note that they have been on time just once out of nineteen trips. A number of the delays have, it is true, been inconsequential but you will note that the number of trips where they have arrived more than twenty minutes or a half hour late, which is not inconsequential, is very considerable. In a general way the figures appear to show that our delayed departures have been due to Panair's late arrivals rather than to time consumed in working the mail. There are, however, some exceptions where the time consumed in working the mail seems ex

cessive. Note, for example, the three hours and ten minutes on the one trip where Panair arrived on the dot.

I think it better in any discussions you may be having on this subject not to disclose the source of our information.

Yours sincerely,

604-9076

Harold Roe (signature)

No. 25
(HJR Trip Series)
W. R. GRACE & CO.
7 HANOVER SQUARE, NEW YORK

A. GARNI
FIRST VICE PRESIDENT

NEW YORK, April 29, 1938

Harold J. Roig, Esq.

LIMA, Peru.

Dear Roig:

Your No. 24:

I had a fairly long talk with George Ribl yesterday afternoon just about the time I received this letter.

I think we all agree with the views expressed by you and as far as I am concerned I think I would carry out your suggestion irrespective of whether or not we succeed in

the efforts we are again making to have a definite realignment of the management set-up of Panagra.

I have discussed your letter with George and he not only concurs with the views expressed by you but added that he formed this same opinion when he was last in Lima.

The object of my "tete-a-tete" with George was to reopen the discussion I had with Juan in Washington just before you left regarding the management of Panagra. I started off by acquainting George with what I had so far discussed with Juan, telling him that I intended to continue the conversation until we reach an agreement one way or another but that for various reasons it has been impossible to get hold of Juan.

It would be impossible to recite the many points I brought up in my talk with George, with most of which you are familiar anyhow. While I went somewhat into the back history I did concentrate on two major recent incidents

GR-2001 11-4-54 PJS

G016980

[fol. 420] with which neither you nor George were familiar. I told him that when, some two weeks ago, Juan pressed us about five o'clock one afternoon to agree to the general outline of an agreement with Lufthansa, we felt strongly that before opening serious pourparlers the matter should be discussed with the Washington officials, going on to say that Juan registered very definite objections to this but that we insisted in our views as we felt that the most important partner should at least be talked to before we enter into an agreement which might ultimately have far-reaching consequences.

Juan finally sent word that he thought it was a mistake but that if we insisted upon doing it he could not insist in his objections.

All this happened on a Friday and Patchin and I went down the following Tuesday evening, discussing the matter with Harllee Branch, Grayson, and at Branch's suggestion Patchin also discussed the matter with Judge Moore of the Interdepartmental Committee on Aviation, all of which you know from my letter No. 21.

Branch asked me whether Juan knew of my visit and the purpose thereof, and when I answered in the affirmative he said, "Well, Juan has beaten you to it as he came down yesterday and talked to me about this same matter."

Patchin's experience with Judge Moore was similar as Juan had also discussed the Lufthansa negotiations with him.

I told George that this is not the way we do business

GR-2002

G016981

[fol. 421] with any of our partners and that this was just one of many incidents tending to undermine our confidence.

I also spoke to George about another matter in which Juan does not appear to have acted strictly according to Hoyle. You will recall that when some four weeks ago the Post Office Department suddenly decided to advertise the foreign routes coincident with the intention we then had to send in that letter the draft of which you prepared, giving reasons for suspending the 20c cut, we temporarily abandoned the idea of making that presentation. However, as the idea of advertising those foreign routes has been temporarily dropped I revived the idea of presenting that letter, and after having made two or three changes to take care of some of Juan's objections I sent a clean draft to MacGregor, asking him to get Juan's approval. An answer came back that the Post Office Department has no available funds and that this is a very inopportune time to start a discussion along those lines.

The following day I learned that Juan is very active trying to get additional subsidy on one of his routes, which is in direct contradiction with the excuse he gave for not sending in that letter.

I outlined all this to George, asking him how, under the circumstances, we could have the confidence we ought to have in our partner. I talked about the handling of our affairs in the Argentine and a good many other things and wound up by saying that we now make a definite request

that the management of Panagra be turned over to us and GR-2003

G016982

[fol. 422] that I looked to him to take the matter up with Juan.

George made a suggestion of airing all this with the Executive Committee of Panair but I told him I did not think well of this.

At the end of the conversation George asked whether I felt that a realignment of the management duties such as we had in mind would affect Panair's fees. I told him that we had given this no thought and that I assumed Panair would continue rendering the same service they are now rendering to Panagra and that I did not therefore see why there should be any material change in the fee arrangement. I did say, however, that if we were to take over the management, liquidate the uptown office and generally rearrange the staff necessary to control and supervise Panagra's functions, our own direct expense account would probably be somewhat higher, but that this is a matter on which we could no doubt reach an agreement.

The upshot of the conversation with George was that he will have a serious talk with Juan and then get in touch with me again.

There are a number of other matters I would like to write to you about but doubt that I can do so by today's air mail.

Hoping that you are well, I am

Yours sincerely,

(signed) A GARNI

GR-2004

G016983

[fol. 423]

GOVERNMENT'S EXHIBIT 181

September 12, 1938

The discussion regarding New Orleans at Thursday's meeting brought out very graphically the real root of the difficulty between us.

Panagra maintained that the importance of its 6,000 mile international line warranted its seeking an American terminus and that this represented the next step in its natural development and was essential to its permanent security.

Pan American's answer in effect was that Panagra having begun ten years ago as a line terminating at Cristobal should never aspire to anything more and that Panagra should not even consider any development however otherwise normal or proper which might in any way or to any extent prejudice the interests of Panair. It was noteworthy throughout Thursday's discussion that on the New Orleans question none of the Pan American directors made any remarks or suggestions of any kind which would give the slightest indication that they had considered or were prepared to consider to any extent the position and welfare of Panagra as a separate entity in this matter, or to weigh the equities of its position against those of Panair. Their sole consideration was the possible adverse effect of the New Orleans development on Panair and they showed no concern or interest in the possible beneficial effects of this development for Panagra. Their only concession to Panagra's welfare was to promise *at this late date* that Panair would *in the future* give Panagra a satisfactory service to Cristobal, a thing which Panair should have been doing for years, and which up to now they have consistently failed to do in spite of repeated pressure from us for such service.

We cannot accept the theory that Panagra is not entitled to normal development and we are not impressed with Pan

G042028

GR-9009
1-3-55 nfr

[fol. 424] air's *promise* only at long last *after all these years*

and only under all this pressure to give us an adequate connecting service at Cristobal.

The theory that Panagra must never expand or develop beyond its original route is not a new one. We have been battling against this theory of our partners for many years.

1. Our route as originally laid out did not include Bolivia, that being the only South America West Coast country not provided with airmail service. From early in our history we began pressing the idea of a Bolivian extension. We received no encouragement from our partners. Finally, some two or three years ago, a point was reached where an opportunity presented to extend to Bolivia and receive a subsidy from the Bolivian Government for so doing. Prompt action was necessary to secure this subsidy and prevent its going to a German company. Our partners' consent could not be secured, with the result that it was necessary for W. R. Grace & Co. actually to enter into an agreement in its own name to operate the La Paz Arica service. Having secured this contract with its corresponding Bolivian subsidy equal to $1,200 per month, we offered it to Panagra without any compensation to ourselves for securing the concession or even for our expenses. In due course our partners acquiesced in Panagra's accepting the contract and the line has been successfully operated as a part of Panagra's route ever since.

2. When our line between Santiago and Buenos Aires was originally laid out it followed a practically straight line between these points. There was little way to way business between these points. A few years ago with the additional speed and payload provided by the DC2s it was felt that we could advantageously divert the line about 80 miles so as to pass through Cordoba, a city of about 250,000, and thereby improve our way to way traffic. This seemed like a perfectly natural and very simple development and we

[fol. 425] anticipated no difficulty in securing our partners' approval to so obvious a step. In this, however, we were disappointed. When we suggested this development we were told that the Argentine was Pan American territory

except on the straight line Mendoza Buenos Aires and that they could not agree to our going through Cordoba unless we compensated them for some part of the purchase price of Nyrba. At the time Panair purchased Nyrba, the latter operated a line from Buenos Aires through Cordoba to Salta; Panair after the purchase promptly discontinued this service and never operated it thereafter. We were told, however, as we are now with respect to New Orleans, that they were planning to operate through Cordoba Salta and that if we went to Cordoba we would take the most attractive part of this traffic. We did not deny that the Argentine was Pan American territory—of that there was no question under our East Coast West Coast understanding. We did contend, however, that since our partner was not operating to Cordoba or Salta and to the best of our belief had no real intention of doing so, and since as things had developed the logical and effective way to serve Cordoba and Salta was for Panagra to run this service, that our partners should not block it by a dog in the manger attitude. To make a long story short, our partners finally agreed to permitting Panagra to take in Cordoba upon the understanding, however, that if we should later extend to Salta we would compensate Panair in some reasonable amount based on the proportion of the purchase price of Nyrba which corresponded to the Buenos Aires Salta service, and thus, after a long struggle and on this basis, the second development of Panagra's route was made.

3. Sometime later it became apparent that in order to anticipate German competition, strengthen position in the Argentine and Bolivia and to provide an alternate Panagra

[fol. 426] route to Buenos Aires to that through Chile, we should run a line from Cordoba north through Tucuman and Salta to La Paz in Bolivia and thence connecting with the main line at Arequipa. After the usual struggle our partners' consent to this was obtained leaving the amount to be paid them for later determination and without their assistance we secured U.S. mail subsidy over this diagonal route between Cordoba and Arequipa. Our idea was always that the payment to Panair should be nominal. They originally

mentioned a figure which while not nominal might at least have been a basis for discussion but they soon ran this up to an exorbitant and wholly unreasonable amount. Our idea that the payment should be nominal was based on the fact that Panair had paid nothing to Nyrba for the Cordoba-Salta service and had never operated the service and had no real intention of doing so. There was no way that this line could be hooked up with Pan American's East Coast route. As a strictly local Pan American line in the Argentine it could never have been profitable because it could never have secured a U. S. subsidy. There was, therefore, no profitable way for Panair to operate this line. On the other hand, operated by Panagra it could be and was made a part of their international service and, therefore, could be and was subsidized by the United States and could be made a profitable service. Thus Panagra was in a logical position to develop this line and Panair, through their 50% interest in Panagra, were in position to benefit from such development of the line which otherwise could be of no possible interest to them. The statement that Panair in the purchase of Nyrba paid nothing for the Cordoba-Salta service is based on the well-known fact that the reason why Pan American purchased Nyrba was to secure a United States mail subsidy to Buenos Aires on a satisfactory basis, which would have been impossible had they had to enter competitive bidding with Nyrba for this route. They purchased Nyrba to eliminate this competition for the East Coast mail contract to B.A. The price they paid to Nyrba was based on GR-9012

G042031

[fol. 427] this consideration and on this consideration alone and would not have been a dollar less if the Cordoba-Salta service had not been included and was not a dollar more because it was included.

4. The next question which arose in connection with Panagra's normal development was the connection with Cali. When the northern section of Panagra's line began to be operated with S-43s in place of S-38s, it became feasible to divert the overwater line down the West Coast, inland to take in Cali on the Panagra route. Cali is the principal commercial city of western Colombia; there is no question

that it is on the western side of South America and therefore within Panagra's territory and it is obviously a point which should be served by Panagra. In opposition to the Cali development, Mr. Trippe brought up the whole question which was discussed at Thursday's meeting regarding original Colombian situation.

Our view regarding this is as follows:

When the East and West Coast lines to South America were originally established, it was necessary to have operating and landing rights on both coasts of Colombia. Pan American sent their Mr. Wilcox to Colombia as joint representative of the two companies to arrange this for both companies and Panagra contributed $20,000 toward the expense of this mission. When the job was finished, we had the right to fly over water down the West Coast of Colombia touching at Buenaventura and Tumaco, but no right to fly inland and Pan American, as we then understood it, had the right to fly over water down the East Coast calling at Barranquilla. We were not told directly or indirectly, nor was it in any way even remotely intimated to us, that Panair had in the course of the same negotiations purchased for their own account a large interest in Scadta, which at that time they considered a very fine investment, nor were we given any opportunity to participate in that purchase. Mr.

GR-9013

G042032

[fol. 428] Trippe's statement at Thursday's meeting that the matter was so confidential that it could not be intelligently recorded in Pan American's minutes and that the directors present at the meeting when it was discussed were warned not to mention the matter outside of the board room, makes it perfectly apparent that there was no intention that we should know anything about this transaction, much less be consulted regarding it or offered a participation in it. The first knowledge that we had that Panair had an interest in Scadta was long afterwards when the item appeared in their balance sheet and we did not know what this interest was until the facts appeared in the Black Committee report. The first time we were offered any participation in the venture was in a discussion between Mr. Trippe and

Mr. Roig in London some three years or so ago when the Cali diversion was under discussion. By that time, and increasingly since, it was apparent that the Scadta investment was attended with many headaches and was not the attractive investment it was originally thought to be.

5. After our partners had reluctantly consented to our diverting our line to Cali, Grace arranged the necessary permit with the Colombian Government and with the United States Post Office. The line was operated for some months when, for technical operating reasons, it was decided to discontinue it temporarily. With the advent of DC3s about two years ago, it became practical to operate overland across Colombia and resume the Cali service on this route. Overland operation obviously involved many advantages to Panagra, but our suggestion of this change in the route met again with vigorous opposition from our partners. This opposition again was for months based on no consideration except possible injury to Scadta (although at the last minute other objections were raised also) and was coupled with renewed pressure that we purchase an interest in Scadta, which we declined to do. Protracted discussions ensued on

GR-9014

G042033

[fol. 429] the question as to whether the line should be permitted to call at Medellin, based on whether this was to be considered on the East Coast or West Coast of South America. We were never able to reach an agreement on this point and were finally able to start the Colombian overland route only on the basis of omitting (without prejudice to the above question) the call at Medellin and making Cali our only stop in Colombia. Pan American's directors refrained from voting on the Panagra resolution authorizing this change of route. Grace had to do most of the work in making the surveys, negotiating the change of route with the Colombian Government and arranging the matter with the United States Post Office.

6. For years Panagra has been struggling for adequate connecting service between Miami and Cristobal. For several years it had been apparent that a direct one-day service between Miami and Cristobal was practicable. It had also

become obvious, and was not disputed at Thursday's meeting, that such a connecting service was necessary to Panagra's welfare. Panair resisted this on every conceivable ground and only beginning December 1, 1937, under the combined pressure of ourselves and the United States Post Office, did they finally agree to running one service a week direct one-day Miami Cristobal. Experience since then has shown that this service is entirely feasible and gives a far superior connection to the service by way of Barranquilla, which is the only connection with Panagra they still provide on one of our two weekly trips. In arriving at any complete understanding of Panair's reasons for so long resisting a reasonable Cristobal connection it is impossible to ignore the following translated extracts from Scadta's Annual Report for the year 1936:

"The transportation of air mail on the interaational lines which leave Barranquilla and Buenaventura for all countries of North and South America, has been

GR-9015

G042034

[fol. 430] speeded up by the new schedule of Pan American Airways, Inc., in accordance with which flights between Miami and Barranquilla are made in one day by daylight. In this way an airmail letter is carried in less than 24 hours from New York to Barranquilla, and vice versa, and in a day and a half between New York and Bogota. This new development in the transportation of international air mail has resulted in a considerable increase in the volume of air mail carried by both companies.

We are happy to acknowledge the full spirit of cooperation shown at all times by the high officials of Pan American Airways, inc., with reference to establishing and maintaining the most effective international connections between Colombia and other countries. To this acknowledgment must be added the fact that the services mentioned are being rendered with great efficiency and that Colombia can well be proud, not only of having the best local air service in South America but also the most efficient international connections."

It thus appears that every development of Panagra's route has been made at the instigation of the Grace directors and under great pressure from them and has had to encounter the vigorous opposition of our partners. Pan American, which has been conspicuously aggressive in developing their own lines, has been conspicuously reactionary in endeavoring to prevent Panagra from having any development at all. On every question which has arisen the predominant thought in their minds has been possible prejudice to Panair no matter how slight or how remote and at no time has there been any disposition to consider the rightful progress of Panagra or even fairly to weigh the relative equities of Panagra in any particular situation against those of Panair. Through the Scadta situation at the northern end of the line and the purely artificial and unnatural control of the Buenos Aires office at the southern end of the line, Panair has been in a position to follow a continuous obstructionist policy with regard to Panagra's development and has followed this policy on all occasions. Their position regarding New Orleans is no different than it always has been regarding every other development of Panagra's route.

OCTOBER 4, 1938.

"Mr. Trippe reported to the meeting on the following:

. . . . . .

(e) Further conferences with officials of W. R. Grace & Co."

BOARD OF DIRECTORS

DECEMBER 28, 1938.

"Mr. Trippe reported to the meeting on the status of negotiations with W. R. Grace & Co. It was the sense of the meeting that it would not be in the interest of our stockholders for our directors to authorize an application by Pan American-Grace Airways, Inc. to extend north of Cristobal in competition with Pan American Airways, Inc."

Mr. Adolf Garni
W. R. Grace & Company
7 Hanover Square
New York, N. Y.

Dear Adolf:

The storm raging Wednesday during our conference that morning and at luncheon struck my home at East Hampton that afternoon. Fortunately the children and the members of my household escaped, but the house was pretty badly wrecked. Thursday and most of yesterday I was tied up with personal problems at East Hampton, and so was unable to get on to the Pan American-Grace question with all our people until this morning.

Your office reports that you are out of town today. Inasmuch as I expect to be tied up with Mr. Noble and the members of the C. A. A. safety board on Monday and possibly Tuesday morning, I want to take this opportunity to let you know that our Executive Committee does not feel that the figure you mentioned of $1,250,000 for our interest in Pan American-Grace is at all satisfactory.

Inasmuch as you stated this would be Grace and Company's maximum offer there appears to be no solution of our difficulties in this direction, and no useful purpose would be served by further negotiations on the part of the sub-committee appointed by our respective Directors relat

ing to selling you our airline interests in the territory under discussion. In other words, we are both still confronted with the problem arising out of Mr. Iglehart's suggestion that Pan American-Grace be extended to New Orleans and the management of our joint company be taken over by Grace.

GR-7574 G032911
12/15/54 aa 216

[fol. 433] The other possible solution you mentioned Wednesday of our making an offer to buy Grace's interest in Pan American-Grace is one we are not enthusiastic about. For one thing, Pan American is confronted with a substantial new equipment program which complicates the question of taking on further capital commitments at this particular time.

Nevertheless, our Executive Committee, as you suggested, has considered the question of making you an offer for your interest in Pan American-Grace. Pan American would be willing to pay you a figure substantially in excess of the amount you have offered us for our half interest in the company. If your board would like to have us submit a definite figure with a view to purchasing your interest, we would be glad to do so.

I do hope that you find your house at Montauk escaped serious damage from the hurricane. Mine was pretty badly messed up.

Sincerely,

(signed) Juan

GOVERNMENT'S EXHIBIT 185

W. R. GRACE & CO.
7 HANOVER SQUARE, NEW YORK

OFFICE OF THE PRESIDENT

November 15, 1938

C. V. Whitney, Esq.,
230 Park Avenue
New York City

Dear Mr. Whitney:

Since meeting with your Executive Committee we have continued to seek a solution of our common problem.

We have considered various alternatives to the route previously discussed with you in an effort to work out a plan in harmony with your ideas. Mr. Roig and Mr. Douglas Campbell have made a trip to Mexico and Central America in connection with the suggestion of your Committee that a solution of the matter might lie in our purchasing your properties there as well as your half of Panagra.

Regarding the right of Panagra to come through to an American terminal, I have given a great deal of thought to your indication that ethically we were not entitled to do so. I have weighed this question from every standpoint and have taken independent advice and counsel to be sure that we were taking no action which could give any just cause for criticism on this score. I have reached the conclusion, and those whom I have consulted are without exception of the same view, that Panagra is not only ethically entitled to come to an American terminal but that its duty in the public interest is to do so.

I am particularly anxious to guide our action in the friendliest possible course and in that spirit we have worked

G013108

GR-2246
11-1-54

[fol. 438] out a new plan for bringing Panagra to a United States terminal and greatly improving the present schedule. We are prepared, if need be, to protect Panagra's position by going ahead with this in our own name. Before doing so, however, I would like to have an opportunity of discussing the plan with you as I believe you will see the wisdom of Panagra's undertaking it.

If you do not object, I would like to treat this whole matter with you personally. If you will obtain authority from your Board, I will do so also, so that we may then act to end this endless discussion which has doubtless been quite as unattractive to you as it has been to me.

Yours sincerely,

(signed) D. S. IGLEHART

November 29, 1938

Dear Sonny,

I turned over to Roig the letter that I received from you and he has handed me the attached memorandum. It might be well for you to read this carefully so that you may see clearly the other viewpoint. Your letter and this memorandum must make it evident to you, as it has to me, that there is a great divergence of view in the Board of Pan-Grace, and that there is little hope of bringing these elements together. I feel, however, encouraged to think that you and I may reach an agreement provided you can come to see that it suits your interest to give Pan-Grace its logical development under our management. I will tomor

row put before you some facts and figures bearing on this question.

Yours sincerely,

(sgd) D. S. IGLEHART

[fol. 440] November 29, 1938

MEMORANDUM TO MR. IGLEHART:

Mr. Whitney's letter of November 19th received Nov 23rd

The letter states

"With the approval of all concerned, however, the discussions to date have been with our Executive Committee and a committee of your Directors"

The facts are:

The discussions began between you and Mr Trippe, were continued with Pan American's Executive Committee and ended with four Panagra directors, Trippe, Rihl, Garmi and myself. The net result was a stalemate and when yours of November 15th was written it was quite in order to seek a fresh method of approach.

The letter states

"the question of Pan American selling to Grace was abandoned before the trip of Mr. Roig and Mr. Campbell to Central America ....."

"as you know, we were actually willing to pay you a sum considerably higher than your maximum offer to us for our half interest in the joint company."

The facts are:

Mr. Trippe's letter to Garmi of September 24th while stating that "no useful purpose would be served by further

negotiations" regarding Mexico and Central America did not definitely withdraw the suggestion. Mr. Trippe never put any price on these properties or gave us any information about them.

Despite Garni's unequivocal oral request prior to September 24th that Pan American make an offer for our half of Panagra they have never made us an offer or indicated any definite figure they would pay.

G013143

GR-2238
11-1-54
RLA
[fol. 441] *The letter states*

"As to the right of Panagra to operate north of Cristobal, I must repeat that we are entirely unable to see how you have either a moral or a legal right to insist that this should be done."

The facts are

The question of "legal right" has not heretofore been seriously raised. There is no legal conclusion to be drawn from the letter of August 1928 or from the territory covered by Panagra's original route that it was to be forever confined to that territory. The original route has already been modified on several occasions and normal and logical growth and development with a view to best serving the public interest is obviously Panagra's legal right and duty. Except for Panagra's undertaking not to operate on the East Coast of South America in exchange for Pan American Airways' similar undertaking with respect to the West Coast, there is no agreement or undertaking of any kind, express or implied, restricting the operations of either company or of W. R. Grace & Co.

The letter states

"It was certainly not your intention or ours that this new company was organized to compete with Pan American Airways then or at any other time for local or through traffic between the United States and Cristobal—a territory which we have always served."

The facts are:

Panagra was organized for the purpose of providing and maintaining an air service to the West Coast of South America and B.A. in the form that would at all times best serve the public interest.

But at that early date, ten years ago, there was no intention one way or the other as to Panagra's coming through to a terminus in the United States. The point was simply not present in anybody's mind any more than at that time Pan American had any intention of flying the Pacific or the Atlantic. But from this complete absence of any affirmative intention one way or another at that time, there cannot

G013144

GR-2239
11-1-54 RLA

[fol. 442] ten years later be imputed a negative intention prohibiting a course which experience and new conditions now indicate to be in Panagra's interest and in the public interest.

So far as competition with Pan American is concerned, the extent and the whole extent to which that was limited is defined by the East and West Coast agreement above referred to. The objection to Panagra's coming to a U. S. terminal in the Gulf on the ground of competition with Pan American is based on the assumption that Pan American control all routes from the United States to Cristobal. This was not a fact at the time Panagra was organized and it is not a fact today. The fact that Pan American then had and now have two relatively indirect routes to Cristobal and Brownsville and Miami gives them no exclusive title or claim to a direct route to Cristobal from a Gulf port such as we have in mind.

After all the traffic to Cristobal and the West Coast of South American and B.A. which Pan American have been serving badly for years in favor of other more lucrative business is business which is entitled to be well served and which cannot be kept in a step-child position forever. Not only is it unreasonable that matters of large importance to Panagra should always be sacrificed to Pan American's

interests, no matter how slight, but it is even more unreasonable that the public interest in the best possible air service to the West Coast and B.A. should be sacrificed because of some possible small loss of business to Pan American.

As Mr. Branch stated at a hearing before the Civil Aeronauties Authority in Washington some months ago, this whole question cannot be approached from the standpoint of relative advantages to the two companies but must be approached from the standpoint of the public interest. And this, as he stated, includes not only the question of which

6013145

GR-2240

[fol. 443] course will result in the best service but also the question of avoiding monopolistic control by one company of all U. S. foreign air routes. So long as both of these companies derive their main support from the U. S. Treasury the question of public interest is paramount and other questions must yield to that consideration.

The letter states

"We are, of course, interested in doing everything possible to improve Panagra's service and schedules not only in the public interest but to build up our through traffic as an end-on connecting air carrier."

The facts are:

The record unfortunately shows a primary concern in the development of routes in which Pan American has a 100% interest or an 84% interest (Scadta) and only a very secondary concern in Panagra in which they have a 50% interest.

As long ago as an article appearing in the New York World Telegram of September 5, 1934, based on an interview with Mr. Trippe, this point of view appears. After describing the performance record of Pan American, the article continues:

"This—safety and efficiency—has been their experience on the east coast of South America. The west coast routes present a different situation. There the lines

> are owned 50-50 by the Grace Lines and Pan American. Because of this set-up neither side has control. Whether this has brought about a condition of less efficiency it is a fact that the major crack-ups in South America have occurred in the Andean sector."

Neither prior to that time nor at any time since had Mr. Tripp travelled over any part of Panagra's line.

Panagra has from the outset paid Pan American each year for services rendered to Panagra. These services include publicity in the United States. In spite of this, Panagra, has, except on a few isolated instances, never received adequate or appropriate publicity through this channel. On the contrary by distortion of maps and by resort to arbi-

[fol. 444] trary charts such as those now appearing in the Pan American System timetable, persistent effort has been made to conceal the longer East Coast route and to ignore the fact that Panagra's present schedule between Miami and B.A. is 4½ days southbound as against Pan American's 6 days. The most recent illustration of the treatment accorded Panagra in this connection is in the exhibition of Pan American's latest film just now being shown to travel agencies and others to stimulate air travel to South America. No one looking at this presentation could escape the conclusion that the east coast route was the way to go to B.A. and only by close attention would one learn from this presentation that Panagra even ran to B.A. If we had not so repeatedly called these shortcomings to their attention and been assured, without result, of their correction it might be possible to regard them as unintentional.

The inadequacy of the Miami Cristobal service in the past and today is admitted. The reason for this is to be found in the following statement in Scadta's Annual Report for the year 1936:

> "We are happy to acknowledge the full spirit of cooperation shown at all times by the high officials of Pan American Airways, Inc. with reference to establishing and maintaining the most effective international con-

nections between Colombia and other countries. To this acknowledgement must be added the fact that the services mentioned are being rendered with great efficiency and that Colombia can well be proud, not only of having the best local air service in South America, but also the most efficient international connections."

While Pan American have been conspicuously aggressive in developing their own lines they have been conspicuously reluctant to permit Panagra any development at all. Every extension of Panagra's route has been undertaken at the instigation of the Grace directors and in the face of Pan American's opposition. Their present attitude is no different from the one we have had to face in every development of Panagra's route. Only with the very greatest difficulty

G013147

GR-2242

[fol. 445] was Panair's acquiescence secured to Panagra's extension to Bolivia, to their making the Cali call, to the Cordoba diversion, to the Diagonal service and to the overland route through Colombia. Wherever Panagra has wished to develop, opposition has been raised on the ground that Panair had some superior rights. Bolivia is the only instance where their opposition was not based on this ground. In Colombia some interest of Scadta or Tanca had always to be given preferential consideration. In the Argentine it has been a dog in the manger attitude for years. Unmitigated self-interest, and pretty unenlightened self-interest at that has guided their policy on every major question which has arisen regarding Panagra.

The letter states:

"In fact you will recall, that Pan American's proposal of last June to maintain a second direct service from Miami to the Canal Zone via Jamaica at a low rate of compensation, although acceptable to the Post Office Department insofar as Pan American was concerned, was held in abeyance by the Department until Panagra could arrange to provide an improved schedule along the west coast."

The facts are:

The proposal for a second direct service from Miami to the Canal Zone did not originate with Pan American but with the Grace directors. Pan American agreed to it only after many months of pressure from us. When last June they finally agreed to running this second direct service their agreement was not simply to make their indirect service a direct one but was conditional on various rearrangement of their services, the net result of which was an additional expense to the Post Office Department of $90,000. But for this additional expense there would have been no question of the Post Office Department holding the service in abeyance. Not only this but Pan American did not agree to our pressing for the second direct service even on this condition until after they had rearranged certain of their other Caribbean services (unrelated to the Miami Cristobal service) on a basis involving considerable additional pay-

G013148

GR-2243

[fol. 446] ments to them by the Post Office Department making acquiescence of the Department in the further expenditure involved in this second direct service more difficult.

GR-2244

[fol. 447]

GOVERNMENT'S EXHIBIT 187

W. R. GRACE & CO.
NEW YORK

December 31, 1938

D. S. Iglehart, Esq.,
P. O. Box 1268,
Delray Beach, Florida

Dear Mr. Iglehart:

PANAGRA

I have been thinking over some of the details which lie behind the general basis of proposed settlement and have

been wondering how far it suits to try to get some of these in the form of more specific agreement before we actually close the proposed compromise. I would be glad to have your views as to how best to approach this, having in mind that perhaps the best time to get all these details agreed upon may be while the general settlement is being concluded rather than afterwards when resistance on relatively minor points may develop.

Back of the memorandum and not referred to therein are, of course the matters of Medellin and the Argentine. Trippe indicated to me that he was prepared to discuss with us the sale of UMCA to Panagra, thus giving us an entry to Medellin. Agreement on the price, however, is not likely to be easy. In connection with the Argentine, the settlement we should have should include Pan American's release of any claim to money payment in connection with the Diagonal and satisfactory arrangement regarding the B.A. office which should include Panagra's at least taking over the management of that office if not the actual ownership of it and failing this, reorganization of the personnel of that office. Trippe has assured me of his disposition to settle these matters to my satisfaction but nothing specific has been agreed upon.

GOODALE

GR-7630
12/9/54 F

[fol. 448] Turning now to the particular numbered paragraphs of the settlement memorandum, the following points arise:

1. Our taking over the management should involve transfer of the Panagra personnel to 7 Hanover Square and the various changes in that personnel which we have discussed. Additionally, I would like to see Campbell given some definite status, his position and perhaps title, corresponding to that of Assistant to the President.

2. Adequate direct connecting service between Miami and Oriental should include at least the following:

all of which except item "(a)" have been discussed with Trippe and agreed to by him:

(a) Immediate inauguration of a second direct service with present equipment and irrespective of whether or not Pan American can secure subsidy for this extra service. Trippe promised this at a lunch last September but I have not discussed it with him recently.

(b) Inauguration of a direct non-stop service with Boeing 307s as soon as they are available.

(c) Working out in connection with the direct non-stop Boeing service a schedule which will make New York to Cali in one day and the schedule in connection with the direct service to be worked out to our satisfaction with the primary objective of accomplishing this purpose; The President of Panagra being authorized to handle this schedule discussion with the CAA.

(d) The direct non-stop Boeing Miami/Cristobal service to be increased from twice a week to three times a week if Panagra is granted a third service.

(e) The connecting service with Panagra Cristobal to be called the "Panagra Special", "South American Special", "South American Express" or some other appropriate name earmarking it as a Panagra service, and to be publicized as such. The idea here is that this connecting plane should be handled as far as publicity is concerned, in much the same way as the Seaboard, for example, publicize The Orange Blossom Special as their fast train from New York even though they run over the Pennsylvania right of way for part of the trip. In other words, to all intents and purposes so far as the public is concerned, this connecting plane is to be part of the Panagra service.

[fol. 449] (f) I have also discussed with Trippe the possibility of working out some arrangement if desirable at some future date under which Panagra might use their Boeing 307s between Cristobal and Cali. He has expressed general acquiescence in this idea but no specific plan has been discussed.

3. I consider it of the very greatest importance that the arrangement be discussed with the CAA not only because of the previous discussions we have had with them but because of the provision by which Pan American guarantees satisfactory service and undertakes to turn over the route to Panagra if they do not furnish it. This should go a long way towards satisfying the CAA that the previous unsatisfactory service will not be continued. I see no possibility at all of the CAA objecting to the management arrangement but if for any reason they do object to this or any other part of the plan, I think that now rather than later is the time to work it out to their satisfaction.

4. The way this sentence is worded is evidently designed to maintain Pan American's proportion of the total service fees, including the $5,000 differential. While I realize that it may be necessary, for obvious reasons, to agree to this, it does seem a little strong in view of the fact that the new arrangement in its very essence contemplates increased services on our part and the wording as it stands would require the same proportion of service fees even though the proportion of services rendered, while satisfactory in quality, were greatly reduced in quantity. It would, therefore, be a little more accurate if we could add at the end of this sentence, the words "and renders a corresponding proportion of services". I have explained to Trippe that my idea of satisfactory service on their part would be that their departments be fully and in every respect available to Panagra in the same way that they are now available to Panair and that they render in every respect the same kind of service

to Panagra that they render to Panagra, their department heads carrying out whatever instructions they receive from Panagra and responding to Panagra therefor.

Sincerely yours,

(signed) H. J. Hoo

GOVERNMENT'S EXHIBIT 188

C. V. WHITNEY
230 Park Avenue
New York

January 17, 1939

My dear Mr. Iglehart:

We had a very long meeting of Panam Executive Committee this afternoon at which, to my great distress, I found the situation still at odds, mostly in an effort to define the meaning of "adequate service".

I feel now that the best solution would be one you originally made to me. In other words, let us take the memorandum you and I wrote (with such minor changes as seem to be advisable and necessary), and then leave every phase of it to be arbitrated by yourself and me.

In other words, broadly speaking, we will turn over the Presidency of the Company to you and agree to give you an *adequate connecting service*. The *interpretation of "adequate"* is to be left to you and me. If we fail to be able to agree, Panagra will be allowed to apply for a certificate on the route we, of course, reserving a right to defend our position.

This is my interpretation of what we have to agree to accomplish, and if it is yours, I will give my best effort to seeing that it is put in effect immediately. This would eliminate the necessity of trying at this time to define what was meant by an adequate service which I thought you agreed was a very difficult thing to do at this time, in this type of business and which is certain to be controversial with a group of men sitting around a table. On the other hand, I am sure that you and I could always reach a fair solution.

I believe Mr. Trippe and Mr. Roig have gone over the minor changes in wording which were necessary in paragraphs 1, 2, 3, and 4 of our memorandum. If paragraph 5 were changed to cover any suggestion above, I would be enthusiastic to see the plan put into effect at once. If this is satisfactory to you, I suggest that you redraft the memo, and have Mr. Roig present it to Mr. Trippe as your final word on the matters.

I can be reached at Hobe Sound, Florida, 2901 Thursday evening. I am now convinced that our future relations depend on this solution to the matter.

I remain,

Sincerely yours,

(signed) Sidney Weinberg

(handwritten)

P.S. I do not believe it is your intention to impose a service upon us which might be impractical or unsound economically, and to commit the Companies to such a course would be disastrous. Let me repeat, however, that it is our intention to give you the best service we can reasonably be expected to give, and if you and I cannot agree that this is being done, I am willing that you should have the right to apply to paddle your own canoe.

Mr. D. Stewart Iglehart

C. V. Whitney, Esq.
Hobe Sound,
Florida

Dear Sonny,

I have just received your letter of yesterday.

I have been over the minor changes which Mr. Roig and Mr. Trippe suggested to the memorandum that you and I agreed upon. They seem to be in order and Mr. Roig is taking to Mr. Trippe a clause "5" which I have endeavored to revise, as per attached, in the sense of our telephone discussion. As you indicate, Mr. Roig will take this to Mr. Trippe as my final word in the matter, and I hope that now we may proceed to carry out the arrangement.

As I indicated to you on the telephone, we will consider the memorandum regarding adequate service, which Mr. Roig and Mr. Rihl had tentatively agreed upon, as merely an indication of a general viewpoint and neither will consider that it is to be followed to the letter.

The thing that pleases me in this whole matter is that your mind and my mind have met; that we understand exactly what we are driving at; and, I feel entirely confident that we will see that all friction is eliminated and that everyone bends his efforts to constructive accomplishment.

GOVERNMENT'S EXHIBIT 190.

Copy of signed original

Discussion with Panair 6-1-39

1. One of the Grace directors of Panagra (who shall also be a director of Grace) will be elected President of Panagra and placed in responsible charge of the management of the Company. If at any time the Company's affairs are not being conducted to Pan American's reasonable satisfaction, then the President will resign.

2. Pan American will inaugurate on or before April 1, 1939, a second direct trip between Miami and Cristobal and will maintain an adequate direct connecting service between Miami, or some other U. S. port agreed upon, and Cristobal connecting with Panagra's through mail schedules. If at any time Pan American shall not comply with the foregoing, then Pan American will cause its directors on the Board of Panagra to take such action as will permit Panagra's applying to the C.A.A. for a certificate to operate this connecting service, provided that, irrespective of any determination made as provided in paragraph 4, Pan American shall not be in any way precluded from maintaining before the C.A.A. that its service is satisfactory and should be continued and that no other service is required in the public interest. With the exception of the second direct trip between Miami and Cristobal above referred to, Pan American shall not be obligated to operate any schedules and services not designated by the Post Office Department as mail schedules but will use their best efforts to have designated as mail schedules any additional trips required to make connection with any increase in Panagra's through mail schedules.

3. It is agreeable to the parties that Pan American-Grace shall continue to utilize the respective services of Grace and Pan American and pay service fees in the same proportion as presently allowed, provided that the services

to be rendered by the respective parties are satisfactory to Pan American-Grace.

4. Any disputes arising under this general plan and every phase thereof, including, without limiting the generality of the foregoing, determination of "Pan American's reasonable satisfaction" referred to in paragraph 1 above and of "adequate direct connecting service" referred to in paragraph 2 above, which cannot be settled by the Board of Panagra, shall be determined by Messrs. D. S. Iglehart and C. V. Whitney. If Mr. Iglehart or Mr. Whitney shall be unable to act, or unable to agree in connection with any matter arising under the foregoing paragraphs, then, unless otherwise agreed between Grace and Pan American, such matters shall be determined by arbitration by an arbitrator or arbitrators appointed by Messrs. Iglehart and Whitney, or failing such appointment, by three arbitrators, one appointed by Grace, one by Pan American and a third by these two, and the party adjudged in default shall, at the discretion of the Arbitrator, be given such reasonable time to correct the default as the Arbitrator may fix.

5. This agreement shall continue to February 1, 1944, and thereafter until cancelled by Pan American or Grace on six months' written notice.

AGREED—February 14, 1939.

GOVERNMENT'S EXHIBIT 191

NEW YORK, December 28, 1940.

MEMORANDUM

When I first learned of the American Export Lines' interest in a Caribbean service, at that time reported to begin at New Orleans and stop at Panama, my immediate reaction was that such a move by a third party constitutes a definite danger, as if such third party were to operate this service they could not in practice stop at New Orleans, nor at Panama, and in the course of a relatively short time Panagra would be definitely parallelled.

Since I formulated this view I have learned that the American Export Lines have acquired the Taca Line in Central America and appear to have a very definite program to extend their operation down the West Coast of South America and up the East Coast. In my opinion the establishment of such a third line would be highly destructive as in the long run the United States Government could not afford to pay sufficient subsidy to two lines to enable each line to operate with the present high degree of efficiency.

Neither line could show a reasonable return on its investment and could therefore not afford to supply all the modern safety improvements, etc., nor could it afford to replace its equipment by more modern, faster and larger craft.

I feel strongly, therefore, that the Export Lines' efforts

G 1000

GR-2379
10-18-54
JBH

[fol. 455] to maneuver themselves into aviation in South America constitutes a real danger from the standpoint of the progress of American aviation, and the future development of Panagra will, in my opinion, depend on the Export Lines' success or failure in their present attempt.

It is of paramount importance, therefore, to show that it is not in the public interest to encourage a newcomer in that trade.

However, I believe that even by marshalling the most convincing arguments for this purpose it will be very difficult to convince some of those in power that to give this new service to Pan American Airways would not tend to further strengthen what some people believe to be a monopoly.

Assuming that I am right in my reasoning up to this point, it seems to me that Pan American Airways and W. R. Grace & Co., as joint owners of Pan American-Grace Airways, have a better chance to defend the future of Panagra by combining their efforts and show cause why Panagra, which now has its terminal at the Isthmus, should extend its service to New Orleans, there to connect with Eastern Air Lines. I further believe that such an application may even be stronger if it were supported by Eastern Air.

Whereas Eastern Air has hitherto definitely frowned upon any idea of going beyond the United States borders and still does not want to have any direct responsibility in what they call foreign operations, I believe that they realize that their own business would be definitely preju-

G 1001

GR-2380

[fol. 456] diced if the American Export Lines or some other third party were to establish a service between New Orleans and Panama, and for this reason I feel that Eastern Air would be willing to support an application in the above sense, making itself a minority partner in an application between Pan American Airways and Pan American-Grace Airways.

The many advantages accruing to Panagra and Eastern Air Lines by combining their facilities in such a service are obvious and it is my opinion that no time should be lost in moving this whole question with Washington.

EXECUTIVE COMMITTEE,

DECEMBER 30, 1940.

"Mr. C. V. Whitney referred to a proposal which had been offered by Mr. Harold J. Roig, of W. R. Grace & Co., relating to the filing of an application for a certificate of convenience and necessity between New Orleans and the Canal Zone. Upon the invitation of the Committee, Mr. Roig entered the meeting, and outlined a proposal that this Company acquiesce in the filing by Pan American-Grace Airways with the Civil Aeronautics Board of an application for a certificate of convenience and necessity on the aforementioned route, or the filing of such an application by a new company to be organized, two-thirds of the capital stock of which would be owned by Pan American-Grace Airways, Inc. and one-third by Eastern Airlines, Inc. Mr. Roig was informed that his proposal would be given consideration, and that he would be advised of the Company's action with respect thereto at a later date. Thereupon, Mr. Roig withdrew from the meeting."

EXECUTIVE COMMITTEE

JANUARY 6, 1941.

"A discussion thereupon ensued regarding the proposal made by Mr. Harold J. Roig, of W. R. Grace & Co., relating to the filing by Pan American-Grace Airways, Inc. of an application to the Civil Aeronautics Board for a certificate of convenience and necessity between New Orleans and the Canal Zone, or possibly the filing of such an application by a new company to be organized which would be jointly owned, one-third by Eastern Airlines and two-thirds by Pan American-Grace Airways, Inc. The Committee was of the opinion that this Corporation should not approve the organization of such new company, and that in no event should the pending application of Pan American Airways, Inc. for a certificate of convenience and necessity on this [fol. 458] route be withdrawn. No final action was taken on the question of whether this Corporation should acqui

esce in the filing of such an application by Pan American-Grace Airways, Inc., inasmuch as the Committee desired to consult counsel for the Company and to give the matter further consideration."

BOARD OF DIRECTORS

JANUARY 7, 1941.

"A discussion thereupon ensued regarding a proposal to have Pan American-Grace Airways, Inc., or another company in which it would be interested, apply for authority to operate between New Orleans and the Canal Zone. It was the sense of the meeting that such proposed action should be opposed."

EXECUTIVE COMMITTEE

JANUARY 14, 1941.

"The meeting proceeded to consideration of a proposal made by Mr. Harold J. Roig, of W. R. Grace & Company, that the Corporation should acquiesce in the filing by Pan American-Grace Airways, Inc. of an application for a certificate of convenience and necessity between the Canal Zone and New Orleans, Louisiana, and of a notice of a meeting of the Board of Directors of Pan American-Grace Airways, Inc. which had been called for the afternoon of January 14, 1941, to consider the same matter. Mr. Henry J. Friendly, of Root, Clark, Buckner & Ballantine, counsel for the Corporation, was invited to enter the meeting at this point. Mr. Friendly presented a legal opinion rendered by his firm and participated in the discussion. After full consideration, it was, upon motion duly made and seconded, unanimously

RESOLVED, that the Corporation, as owner of half of the stock of Pan American-Grace Airways, Inc., should decline to acquiesce in the filing by Pan Ameri- [fol. 4594] can-Grace Airways, Inc. of an application for a certificate of convenience and necessity between the Canal Zone and New Orleans, Louisiana, and that the representatives of the Corporation upon the Board of Directors of Pan American-Grace Airways, Inc

should not attend the meeting of such Board of Directors called for the afternoon of January 14, 1941, to act upon such proposal, or any adjournment thereof, and; except upon further instructions from the Executive Committee or the Board of Directors, should not attend any other meeting of the Board of Directors of Pan American-Grace Airways, Inc. at which action is to be taken upon the subject matter above described.

It was further determined that the proper officers of the Corporation should promptly communicate with Mr. Roig, and discuss the matter with him so that the position of the Corporation might be fully understood. A form of letter to be addressed to Mr. Roig, in the event that, after such conversations, he was nevertheless determined to proceed with the meeting of the Board of Directors of Pan American-Grace Airways, Inc., was approved."

EXECUTIVE COMMITTEE

JANUARY 28, 1941.

"Mr. Trippe reported to the meeting on a conference which had been held with Messrs. Garni and Roig relative to the filing of an application by Pan American-Grace Airways, Inc. for a certificate of convenience and necessity on a route between the Canal Zone and New Orleans, via Guatemala."

GOVERNMENT'S EXHIBIT 193

May 2, 1941

Civil Aeronautics Board
Washington, D.C.

Dear Sirs:

We are enclosing herewith copy of notice which we have mailed to the list of air carriers issued by the Civil Aeronautics Board under date of March 11, 1941.

Pursuant to said Notice of Intention, we hereby apply, in behalf of ourselves or of a subsidiary corporation, for

a Certificate of Convenience and Necessity authorizing ourselves or such subsidiary to engage in air transportation on the route therein described, namely: between New Orleans, Louisiana and Cristobal and or Balboa, Canal Zone, via Merida, or via other Mexican and or Central American ports.

We have not been able to prepare for filing a formal application in accordance with the forms prescribed by the Board. Such application, however, will be prepared as promptly as possible and it is expected that it can be completed in the course of a month.

In view of the fact that the route covered by the application is the same in substance as those covered in the applications now pending and on which hearings are to be held in Docket #373 and Docket #497, we respectfully request that hearings on these applications be postponed for a month so that our application can be considered at the same time. If the hearing is not postponed we request that we be permitted to intervene as a party therein.

Government Exhibit 211

"Minutes of Special Meeting of the Board of Directors of Pan American Grace Airways, Inc. held at the office of Pan American Airways, Inc., 135 East 42nd Street, New York, N.Y. on the 18th day of June, 1941 at 4:00 o'clock in the afternoon.

PRESENT: Messrs. W. F. Cogswell
A. Garbi
R. H. Patchin
H. J. Roig

being less than a quorum of the Board.

Mr. H. J. Roig, President of the corporation, presided. Mr. W. F. Cogswell, Secretary, acted as Secretary of the meeting.

The Secretary presented Call of the Meeting dated June 13th, 1941 and the notice of meeting, together with affidavit of mailing thereof on June 16th, 1941 to all of the Directors of the company.

Mr Roig thereupon made the following statement:

"At the close of our last regular meeting, Mr Garbi brought up the question of this Company's applying for the route between New Orleans and the Canal Zone. Mr Trippe stated that he did not know that this question was to be brought up, that the views of Pan American on the subject were well understood as a result of discussions which had been had and that if the matter was to be discussed by the Panagra Board, he felt that a special meeting for this purpose should be called. The subject was accordingly dropped with the understanding that such a special meeting would be called.

GR-13106 JPC

fol. 463 In accordance with the above understanding on June 13th I called a special meeting of the Board of D

rectors of this Company to be held June 18th, 1941 at 4:00 PM for the purpose of considering a proposal that this Company apply for the route between New Orleans and the Canal Zone.

At the time I called this meeting I was not aware that Mr. Trippe was leaving for London. When I learned of this I told Mr. Ribi that in Mr. Trippe's absence it would be entirely in order for any other Pan American officer or director to come to the meeting to present their views. As none of the Pan American directors is present at this meeting, we have no quorum. In the absence of a quorum, this meeting can only adjourn and I would suggest such adjournment in order to give the Pan American directors a further opportunity to be present. In connection with this adjournment, I would like, however, to submit the following facts:

Ever since the Export Line filed an application for the New Orleans route, the Grace directors have felt that a situation was presented of the very first importance to the welfare of Pan American Grace Airways. As President of the Company as well as one of the Grace directors, I have been particularly concerned by this development. Should the Export Line be granted this certificate, it would mean that they would have a direct connection between continental United States and the northern terminus of the Panagra Route with the constant possibility of their extending their route south of Cristobal paralleling the

GR 13107

[fol. 464] Panagra line and thus being in a position to compete with us with the great advantage on their side of being able to come through to the United States and with every likelihood that with this last important South American gateway preempted, it would be many years before our company could provide a similar connection to the United States if, indeed, they were ever able to do so.

The disadvantage of our not having a terminus of our line in the United States is continually becoming more apparent. While this disadvantage has been mitigated by our having a connection through an allied company, Pan American Airways, through Miami, if this new competing

service through New Orleans should not be awarded to Pan American Airways and if it should be awarded to Export, permanent and irrevocable damage would be done to our Company and our whole future development seriously prejudiced and even possibly destroyed.

Even if the route were awarded to Pan Americans this would be far short of our having our own direct connection. Having during the past twelve years pioneered and developed a 6,000 mile route serving seven South American countries, it is a natural and logical development for us to bring our line through to a terminus in the United States. This would improve our ability to serve the South American countries through which we operate. It would stimulate traffic by providing a direct service. With the coming use of four engine land planes, of which we have
GR:13108
[fol. 465] three DC-4s on order, it would make for economy and efficiency of operation as these planes are suitable for use over the New Orleans Canal Zone sector as well as from Cristobal south. This development is not only in the interest of Panagra but is manifestly in the national interest.

For more than six months [illegible] and others have endeavored to persuade the Chairman of the Board of Pan American Airways and other members of their Executive Committee of the seriousness and importance of this problem and to enlist their support for Panagra's applying for this route. As long ago as January 10th, I called a special meeting of this Board to be held on January 14th to consider the problem but that meeting was allowed to lapse in order to permit of further opportunity for this discussion with the Pan American officials. Up to this time Pan American have refused to agree to Panagra's applying for this New Orleans route.

I do not feel that I should take the responsibility of letting this matter of such serious and far-reaching importance be disposed of in this fashion without the directors of this Company taking official cognizance of it and sharing the responsibility for whatever action is taken or not taken by Panagra. This meeting was accordingly called in order

that the matter might be submitted to the responsible directors of this Company for their consideration solely as directors of this Company and from the standpoint of this company alone and for their determination of what

GR 13109

[fol. 466] under all the facts and circumstances of the situation had best be done to safeguard the interests of this Company which are so vitally concerned in this problem."

The directors present expressed their concurrence in the above views but in the absence of a quorum action in the matter was impossible.

The meeting thereupon adjourned to June 20th at 9:00 AM at the same place.

EXECUTIVE COMMITTEE

JUNE 24, 1941.

"Mr. Trippe read to the meeting a copy of a letter dated June 19, 1941, written by Mr. Geo. L. Rihl, a Vice President of the Corporation, to Mr. Harold J. Roig, relating to a special meeting of the Board of Directors of Pan American Grace Airways, Inc. which had been called for June 18, 1941, and which had been adjourned to June 20, 1941, for the purpose of considering a proposal that Pan American Grace Airways, Inc. extend its route from Cristobal and or Balboa to New Orleans and, an application to the Civil Aeronautics Board for the necessary certificate of convenience and necessity. Such letter was approved, as being in line with the previous position of the Company, and ordered filed with the Secretary's records."

BOARD OF DIRECTORS

JULY 1, 1941.

"Mr. Trippe reported to the meeting on developments to date in connection with a proposal submitted by W. R.

Grace & Co. relating to an extension of the operations of Pan American-Grace Airways, Inc. from the Canal Zone to New Orleans, and the filing of an application with the Civil Aeronautics Board for a certificate of convenience and necessity on such route. He referred to the special meeting of the Board of Directors of Pan American-Grace Airways, Inc., which had been called for June 18, 1941 to act upon such proposal, and the subsequent adjournments of such meeting. Mr. Trippe pointed out that in January, 1941, a meeting of the Board of Directors of Pan American-Grace Airways, Inc. had been called to act upon the same proposal, and recalled that the Board of Directors of Pan American Airways Corporation, as also its Executive Com- [fol. 469] mittee, had determined that the Company should decline to acquiesce in such proposal, and that the Executive Committee had issued instructions to the representatives of Pan American Airways Corporation on the Board of Directors of Pan American-Grace Airways, Inc. not to attend any meetings of the Board of Directors of Pan American-Grace Airways, Inc. at which such proposal was to be acted upon. He also stated that, at the request of Pan American Airways Corporation, a special meeting of the stockholders of Pan American-Grace Airways, Inc. had been called to be held on July 2, 1941, at which it was intended that a statement would be submitted on behalf of Pan American Airways Corporation setting forth its position with respect to such proposal, and that it was expected that the representatives of W. R. Grace & Co. at such stockholders' meeting would submit a statement on behalf of that Company respecting such proposal.

At the conclusion of the discussion which ensued, the Board reaffirmed the position which had been previously taken by the Board and the Executive Committee that it would not be in the interest of Pan American Airways Corporation or of Pan American-Grace Airways, Inc., or in the public interest for Pan American Airways Corporation to acquiesce in the proposal.

Upon motion, duly made and seconded, the following resolution was adopted:

RESOLVED, that the President, or any Vice-President, of this Corporation be, and each of them hereby is, authorized and empowered, in the name and on behalf of this Corporation and under its corporate seal or otherwise, to execute and deliver a proxy in favor of Geo. L. Rihl, John C. Cooper or J. Clawson Roop, Vice-Presidents of this Corporation, whereby the said Geo. L. Rihl, John C. Cooper or J. Clawson Roop will be authorized to attend a special meeting of the stockholders of Pan American-Grace Airways, Inc. to be held on July 2, 1941, or at any meeting of such stockholders adjourned therefrom, and to vote the shares of stock held by this Corporation in said Pan American-Grace Airways, Inc. at such special meeting to be held on July 2, 1941, and at any meeting adjourned therefrom, and that the Secretary, or any Assistant Secretary, of this Corporation be, and each of them hereby is authorized and empowered to affix the seal of this Corporation to such proxy so executed and to attest such seal so affixed."

June 30, 1941.

Mr. Harold J. Roig, President, and
Mr. W. F. Cogswell, Secretary,
Pan American-Grace Airways, Inc.,
c/o W. R. Grace & Co.,
7 Hanover Square,
New York, N. Y.

Dear Sirs:

Pursuant to the By-Laws of Pan American-Grace Airways, Inc., and particularly to Section 3 of Article III thereof, the undersigned corporation, being the owner of record of 50% of the outstanding capital stock of Pan American-Grace Airways, Inc., hereby requests that a special meeting of the stockholders of Pan American-Grace Airways, Inc. be called for the purpose of considering the proposal made by the President of Pan American-Grace Airways, Inc. at the Special Meeting of the Board of Directors held on the 18th day of June, 1941 with reference to the filing by Pan American-Grace Airways, Inc. of an application for a certificate of public convenience and necessity between New Orleans and the Canal Zone.

We further request that such meeting be called for Wednesday, July 2, 1941, and that notice thereof be given personally, by telephone or by telegraph.

Very truly yours,

GR-9112

PAN AMERICAN AIRWAYS CORPORATION
By (sgd) GEO. L. RIHL

GOVERNMENT'S EXHIBIT 201

Minutes of Adjourned Special Meeting of the Board of Directors of Pan American-Grace Airways, Inc. held at the office of W R Grace & Co, 7 Hanover Square, New York, N Y on the 1st day of July, 1941 at 2:30 o'clock in the afternoon.

PRESENT:

Messrs A Garni
H J Roig

being less than a quorum of the Board.

Mr H J Roig, President of the corporation, presided. In the absence of the Secretary, Mr A Garni acted as Secretary of the meeting.

Mr Roig presented to the meeting letter addressed to the Board of Directors from Mr D S Iglehart, President of W R Grace & Co, dated June 17, 1941, letter of June 19, 1941 from Mr George L. Rihl to Mr Harold J Roig, and Mr Roig's reply dated June 26, 1941, which letters were ordered spread upon the minutes:

"W. R. Grace & Co.
7 Hanover Square, New York

June 17, 1941

To the Board of Directors,
Pan American Grace Airways, Inc.,
New York, New York.

Dear Sirs:

We refer to the pending question as to the assignment by the Civil Aeronautics Board of the route from Panama to New Orleans. We understand that discussions have been going on for several months as to the advisability of your company applying for this route

and that your 50% stockholder, Pan American Airways Corporation, has refused to agree to your doing so.

GR-13096
2/16/55
JPC

[fol. 475] Some time since we took the matter up with Pan American Airways Corporation, explaining fully our reasons for feeling that it was a serious mistake for them to refuse to permit your company to apply for this route. The matter was taken up with their Executive Committee and Board of Directors and we were advised that they had decided that they could not agree to your company's applying for this route.

We believe it to be in the national interest that the great trunk lines that you have built up in South America should be extended to an American port. In fact, your service will be fragmentary and runs the constant risk of being interrupted and incomplete until the time comes when your own your own connections with this country.

In view of the existing situation and in order to protect our investment in Pan American-Grace Airways, Inc., pending consideration of this matter by your Board, we advised Pan American Airways Corporation that we felt compelled to notify the Civil Aeronautics Board of our intention to apply for the route in question. The latter recognized our interest by permitting us to intervene in a proceeding involving the application of Pan American Airways Corporation and American Export Lines for this route. Although we believe we can successfully compete for this New Orleans route and are preparing to form a company to undertake this service, and any other aviation services, we feel that it is more logical and more in the national interest that your company should file such an application in its own right.

You have on order three DC-4 planes that would be capable not only of serving the proposed Panama New Orleans route in an adequate way, but their acquisition

would also enable you to provide the increased capacity on your existing route that appears to be required urgently. We learn that you are now considering whether or not you will cancel your order for these planes. We urge upon you to study carefully the advisability of acquiring these planes and using them for the above purposes.

We furthermore feel that you should consider carefully the advisability of issuing further stock and of offering this stock to us in order that our Government may have two distinct entities to deal with and in order that the question which has constantly arisen as to the interest of your company being made subservient to that of the Pan American Airways Corporation interest may be definitely removed.

GR-43097

[fol. 476] We have been somewhat disturbed by certain recent developments with which you are undoubtedly familiar and which need not be elaborated upon in this letter, particularly the current charges of monopoly in the field of foreign air transportation. For this reason we believe it absolutely essential that the affairs of your company, in which we have a definite and substantial interest, be so conducted as to preserve its present independent status and to avoid any situation which would carry with it any possible implication that it does not occupy such an independent status.

We are taking the liberty of submitting a copy of this letter to the Chairman of the Pan American Airways Corporation.

Very truly yours,

W. R. Grace & Co.

(Dictated by) D. S. Ingalhart

"PAN AMERICAN AIRWAYS SYSTEM

Office of
G. L. Rihl, Vice-President

June 19 1941

Mr. Harold J. Roig
W. R. Grace & Co.
7 Hanover Square
New York City"

Dear Harold:

"I have been advised that the special meeting of the Board of Directors of Pan American-Grace Airways, Inc., called for June 18th, has been adjourned to June 20th at 9:00 A.M., and that the purpose of the meeting is to consider a proposal that Pan American-Grace Airways, Inc. extend its route from Cristobal and/or Balboa to New Orleans and apply to the Civil Aeronautics Board for the necessary Certificate of Convenience and Necessity.

When a similar proposal was advanced last January, our Executive Committee and Board of Directors felt unable to acquiesce in the proposal. I understand that this attitude of our Board and Executive Committee was explained to you.

GR-13098

[fol. 477] We considered that this proposal involved such a fundamental change in the venture into which our two companies had entered in 1928 as to be beyond the proper scope of action by the Board of Directors of Pan American-Grace Airways, Inc. in the absence of prior agreement by the two stockholders. For this reason we do not believe that any useful purpose would be served by attendance on the part of our representatives at the meeting tomorrow and rather that any discussion of the proposal should be between the two stockholders.

If you do not wish to await the return of Mr. Trippe, which I think will be shortly, I will be glad to discuss

the matter informally with you and report to members of our Executive Committee.

With kindest regards, I am

Yours faithfully,

(sgd) GEORGE L. RIHL"

"June 26, 1941

Mr. George E. Rihl,
Vice-President,
Pan American Airways System,
135 East 42nd Street,
New York City.

Dear George:

In view of pending discussions it does not seem necessary to reply in detail to yours of the 19th instant.

Referring to the next to the last paragraph of your letter, however, I would like to make it perfectly clear that I know of no such agreement or understanding which bars Pan American-Grace Airways from a normal and natural development of its route. The extension under discussion is not only that but a development which may prove vital to the integrity of even our present route.

New York City

Dear Mr. Roig:

As Mr. Rihl just explained to you on the telephone, the representatives of Pan American Airways Corporation who had expected to attend the Special Meeting of Pan American-Grace Airways, Inc., called for this morning at 10 o'clock, were unexpectedly required to go to Washington last night in connection with matters relating to national defense. For this reason Pan American Airways Corporation requests that the Special Meeting of stockholders be adjourned to next Tuesday, July 8th.

We would appreciate your cooperation in arranging such an adjournment.

Very truly yours,

PAN AMERICAN AIRWAYS CORPORATION

GOVERNMENT'S EXHIBIT 205

July 3, 1941

George L. Rihl, Esq.,
Pan American Airways System,
135 East 42nd Street,
New York City

Dear George:

Yours of July 2nd.

While under ordinary circumstances, I would have been delighted to suggest to the stockholders' meeting that they adjourn in compliance with your request, I frankly felt that to do so in this case would serve no useful purpose.

In our telephone conversation to which your letter refers, you stated that the representatives of Pan American Airways Corporation who had expected to attend the special stockholders' meeting were Messrs. Trippe and Cooper. The stockholders' meeting of July 2nd was called at the request of Pan American Airways Corporation and on a day fixed by them. If Messrs. Trippe and Cooper were unable to attend, certainly from among all the directors, officers and counsel of the Pan American Airways Corporation, some suitable proxies could have been found to do so.

We have been postponing consideration of this New Orleans/Panama route matter by the directors of Pan American-Grace Airways, Inc. for about six months. I have recently been adjourning special directors' meetings called to consider this subject ever since June 18th. Seven meetings (five since Mr. Trippe's return from London) have been held in the effort to get a discussion of this subject. The Pan American directors have declined to

GR-9115

GR-

GR-9115

[fol. 484] attend any of these meetings except on one occasion for the purpose of adjournment only. Last week I was advised that while Mr. Trippe, who returned from Europe about ten days ago, could not attend a meeting earlier than July 2nd, he could attend on that day. He was, of course, not present at the adjourned directors' meeting held at 9:45 AM on that day and I have had no word when he would attend. On the record, it would appear that the Pan American Airways directors have no present intention of attending a Pan American-Grace directors' meeting to discuss this subject.

As long ago as April 29th, I advised Mr. Trippe that Mr. Garni and I wished to discuss the New Orleans/Panama matter with him. The following day Mr. Garni and I called at his Washington office for this purpose. He was not in and although we left word of our call, he has made no attempt from that time to this to discuss this subject with us.

Hearings on this New Orleans route matter were begun before the C.A.B. two months ago and were concluded several weeks ago. Briefs are to be filed on the 15th of July. The matter is accordingly a very pressing one where if anything is to be done to protect Panagra's position, time is of the utmost importance. A point has been reached where further postponement and delay may render discussion academic. Under these circumstances and in view of all the foregoing, the last minute suggestion of this long adjournment with the absence of any indication of any

intention on the part of the Pan American Directors to

G041954
GR-

GR-9116

[fol. 485] attend a directors' meeting at any time to discuss the subject in question did not appear to me to be in order.

Very truly yours,

(Sgd) HAROLD J. ROIG

PAN AMERICAN AIRWAYS CORPORATION

15 Exchange Place, Jersey City, N. J.

July 22, 1941

W. R. Grace & Company,
7 Hanover Square,
New York, N. Y.

Dear Sirs:

A special meeting of the Board of Directors of Pan American-Grace Airways, Inc. was called for June 18th to consider a proposal that Pan American-Grace Airways, Inc. extend its route from the Canal Zone to a terminal in the United States at New Orleans and apply to the Civil Aeronautics Board for the necessary certificate of convenience and necessity.

The proposal that Pan American-Grace Airways, Inc. or, in the alternative, W. R. Grace & Company should apply for a certificate to New Orleans was made in the fall of 1938, prior to the agreement of February 14, 1939,

between W. R. Grace & Company and Pan American Airways Corporation. When the matter was again brought up by you in January, 1941, we stated that the position was fully covered by that agreement. When the matter was further raised by you in June, our representatives on the Pan American-Grace Airways, Inc. Board referred this matter to the Executive Committee of Pan American Airways Corporation.

The proposal was considered at ensuing meetings of the Executive Committee. The matter was also considered by our Board of Directors at a meeting on July 1st in line with the suggestion in Mr. Iglehart's letter of June 20th to Mr. Whitney.

As you have since been advised, our Board of Directors, after mature deliberation, has unanimously reached the conclusion that it would not be in our Company's interest, or in the interest of our jointly owned Company, or in the public interest, for our representatives on the Pan American-Grace Airways, Inc. Board of Directors to approve this proposal.

In line with the agreement of February 14, 1939, between W. R. Grace & Company and Pan American Airways Corporation, however, we are glad to submit the matters in-

G041918

1-3-55 mfr
GR-9122

[fol. 487] volved to arbitration as therein provided, and we confirm the request that Mr. Whitney made yesterday to Mr. Iglehart, that such arbitration be held at once.

Very truly yours,

PAN AMERICAN AIRWAYS CORPORATION

GOVERNMENT'S EXHIBIT 207

July 24, 1941

Pan American Airways Corporation,
135 E. 42nd Street,
New York City, N. Y.

Dear Sirs:

This will acknowledge your letter of July 22, 1941, in which the suggestion is made that your company and W. R. Grace & Co. submit to arbitration the question of whether Pan American-Grace Airways, Inc. or, in the alternative, W. R. Grace & Co. may, under the terms of the agreement of February 14, 1939, apply for a route from the Canal Zone to New Orleans.

We are somewhat confused and surprised to note that you believe this matter can be arbitrated under the agreement of February 14, 1939. This appears to be at variance with the position taken by Mr. Trippe in conversations with Mr. Roig in which Mr. Trippe maintained that any such arbitration was not covered by the terms of the agreement and would have to be considered outside of it. Be that as it may, however, we shall endeavor to express our views with respect to both positions, first, as to the possibility of arbitration under the agreement, and secondly, as to the possibility of arbitration outside of the agreement.

The agreement of February 14, 1939, although an agreement between W. R. Grace & Co. and Pan American Airways Corporation, in no way was intended to limit the freedom of action of W. R. Grace & Co. Paragraph 4 of the agreement specifically provides that only "disputes * * * which cannot be settled by the Board of Panagra" shall be determined by arbitration. The question of whether W. R. Grace & Co., directly or through a wholly owned subsidiary, may file an application with the Civil Aeronautics Board for a route is not a matter over which the Board of Panagra has any control or which can be settled by the Board of Panagra. Under these circumstances, I

must respectfully reject your suggestion of arbitration in so far as W. R. Grace & Co. is concerned.

In so far as Pan American-Grace Airways, Inc. is concerned, however, I am glad to submit to arbitration under paragraph 4 of the agreement of February 14, 1939, the question of whether Pan American-Grace Airways, Inc. may file an application in its own name for a route from the Canal Zone to New Orleans without violating any provision of that agreement. It has always been our position that the most logical applicant for the proposed route is Pan American-Grace Airways, Inc., and for the past several months we have endeavored repeatedly to persuade the

G041908

1-3-55 np
GR-9191

[fol. 489] Board of Directors of Panagra to this view. As you know, the Directors on the Board of Panagra representing your company have consistently refused to sanction any such action. I, therefore, welcome any procedure which may make it possible for Panagra to file for the proposed route in its own name, and I shall immediately undertake to discuss with Mr. Whitney the details of arbitrating this question under the agreement.

It is recognized, however, that arbitration proceedings of the nature contemplated by the agreement of February 14, 1939, will consume a considerable period of time. The hearings in connection with the application of Pan American Airways Company and American Export Airlines, Inc. have already been concluded and briefs filed with the Examiner, and these cases now stand submitted to the Examiner for his report. It is, therefore, urgent that some application be filed with the Civil Aeronautics Board by W. R. Grace & Co. or by one of its wholly-owned subsidiaries immediately in order to preserve our rights in the matter. Under these circumstances, it is our present intentoon to file immediately an application with the Civil Aeronautics Board by Gulf & Caribbean Airways, Inc., a wholly-owned subsidiary of W. R. Grace & Co., and to advise the Civil Aeronautics Board at that time that arbitration proceedings are presently pending between your company and this

company as to whether Pan American-Grace Airways, Inc. should be permitted to file for the route, and that in the event it is determined that Pan American-Grace Airways, Inc. may file for the route, the application of Gulf & Caribbean Airways, Inc. will be withdrawn and substituted by the application of Pan American-Grace Airways, Inc.

As to Mr. Trippe's suggestion that this matter be arbitrated outside of the agreement, we know of no person or body better qualified to arbitrate this entire question than the Civil Aeronautics Board. In your letter of July 22nd, you state that your Board of Directors has concluded that it would not be in the *public interest* for Panagra to file for the proposed route. As you know, we have heretofore taken the contrary view, and it would seem that the best judge on any question of *public interest* would be the Civil Aeronautics Board, and we shall be glad to submit it to them for their consideration and determination.

If it is now your desire to follow Mr. Trippe's suggestion and arbitrate this entire matter outside of the agreement rather than under it, please advise me to that effect immediately, so that appropriate steps may be taken quickly to place this matter in the hands of the Civil Aeronautics Board for arbitration. In the meantime, however, we shall proceed with the filing of the application of Gulf & Caribbean Airways, Inc. As you know, this matter has been under discussion for many months without any conclusion having been reached. We do not feel that we can let this

GB9192

G041909

[fol. 490] matter carry on this way any longer, and, although willing to submit to arbitration on the terms herein set forth, we are unwilling to jeopardize our interests in this matter by withholding the application of Gulf & Caribbean Airways, Inc.

Very truly yours,

W. R. Grace & Co.,

By .....

President

MEMORANDUM

Subject only to some further study of the questions of crews and reciprocal mileage, and of course agreement on details, Messrs. Trippe and Roig have agreed in principle on a plan under which Panagra can operate through to terminals in the United States and Mr. Friendly is preparing a draft agreement to carry out the understanding. The plan is to follow the general lines of the United Air/Western Air Express agreement and is to include Miami as well as New Orleans. Regarding Miami, while Mr. Trippe has stated that he was personally agreeable to its inclusion, this would require the approval of his Executive Committee.

Attention: Mr. J. T. Trippe, President

Dear Sirs:—

On August 26th, 1941, Pan American-Grace Airways, Inc. inaugurated a fourth through United States mail schedule over its route between Cristobal and Buenos Aires via Santiago.

To the best of our knowledge, you have not to date taken any steps to provide an adequate direct service between Miami, or any *other United States port agreed upon*, and Cristobal or Balboa connecting with this fourth mail schedule in accordance with agreement between us dated February 14, 1939.

We hereby require that you furnish such service promptly. In the event of your failure to do so, we shall expect you to comply with the requirement of such agreement that you cause your Directors on the Board of Pan American-Grace Airways, Inc. to take such action as will permit that company to apply to the Civil Aeronautics Board for a certificate to operate this connecting service.

Very truly yours,

PANAGRA

Miami New Orleans Connection

The following procedure is suggested:

1. As Trippe evidently does not intend to go ahead with the agreement in principle regarding New Orleans, Mr. Iglehart might write Mr. Whitney as per copy "A" attached.

2. As Miami connection is in any event much preferable to New Orleans, steps should be taken to put Panagra in position to apply for a Miami connection under agree-

ment between Grace and Pan American (copy "B" attached) as follows:

(a) Grace has already written Pan American demanding Miami connection for Panagra's fourth flight (copy "C" attached).

(b) Panagra should now write pointing out inadequacy of existing three connecting trips (copy "D" attached).

(c) Unless these letters result in Panair's providing additional services or raising questions making next step undesirable, next step would be for Panagra to proceed to apply for Miami route under agreement and if Panair failed to provide necessary directors' consent as they probably would, the officers of Panagra to make the application anyhow.

(d) In connection with the above the arbitration clause of the agreement must be considered and suitable reply made to Pan American's letter of July 22nd (copy "E" attached).

(e) Simultaneously with above proceeding, might be instituted before CAB under Sections 408, 409 and 411 looking to removal of Mr. Trippe as Panagra director on ground of prejudicial interlocking directorships the application explaining failure to ask for removal of other Panagra directors on ground that they are under Trippe's orders.

(f) Press for increase of capital in connection with needs of the business, rate case, etc. and endeavor to arrange that W. R. Grace & Co take this new capital or majority of it in line with Mr. Iglehart's letter to the Panagra Board of Directors dated June 17th in which it is stated:

"We furthermore feel that you should consider carefully the advisability of issuing further

[fol. 494] stock and of offering this stock to us in order that our Government may have two distinct entities to deal with and in order that the question which has constantly arisen as to the interest of your company being made subservient to that of the Pan American Airways Corporation interest may be definitely removed."

October 6, 1941

GR-9232 G041845

A

[fol. 495]

Dear Sonny,

Since I wrote you on August 11th, Mr. Roig has been constantly endeavoring in every possible way to bring to a conclusion the plan that was agreed upon in principle between him and Mr. Trippe on August 9th. As his repeated efforts to secure the draft contract which it was agreed should be prepared as a basis for discussion of details have failed completely, it seems clear that Mr. Trippe does not wish to carry out the understanding in principle which was reached practically a month ago.

Under these circumstances, unless you have some alternative course to suggest, it would appear to be necessary for us to abandon the possibility of a solution of Panagra's problem along the line you and I discussed and for Panagra and W. R. Grace & Co to seek a way in some other direction for safeguarding Panagra's interests and making possible its reasonable growth and development.

October 9, 1941

Pan American Airways,
Chrysler Building,
New York City

Attention: Mr. J. T. Trippe, President

Dear Sirs:

We beg to bring to your attention the inadequacy of the existing connecting services between Miami and the Canal Zone.

There is, as you know, no direct Miami connection for our fourth trip. Quite irrespective of this, however, the space available on the three existing trips is insufficient to accommodate our traffic. Passengers and express destined to and from our line are constantly being excluded from your planes for lack of space. Just as an example, a letter from Lima dated September 23rd states that "during the last four trips Panagra requested 15 seats of Panair but secured only 3, two of which were confirmed at the last minute." This appears to be the result of a division of the available payload between Panagra traffic and other traffic in this sector. We require sufficient space by direct connecting service to accommodate our traffic promptly irrespective of other movement in the area. This we are not now receiving. Rebooking of some of the excluded traffic days or weeks later does not change this fact.

We have had under discussion with the proper authorities in Washington for some time the question of providing additional trips over our route between Cristobal-Balboa and Buenos Aires. In connection with our pending rate proceeding we propose to request a rate based on daily services which will mean the addition of three trips per week to our present four trips. We will require direct

connecting service for these trips between Miami and or some other United States port agreed upon and the Canal Zone.

We would appreciate your advising us what steps you propose taking to meet the present situation and to provide the additional direct connecting services required in the event of increase in our schedules. In this connection we beg to state that the alternate indirect routes via Barranquilla and Brownsville do not provide satisfactory con

PAA-5541
3 3 55
np

2197-d

[fol. 497] necting service nor would a stop at Camaguay (at the expense of depriving us of direct service and slowing down our entire schedule) provide a satisfactory solution of the problem.

Very truly yours,

PAN AMERICAN-GRACE AIRWAYS, INC.,

GOVERNMENT'S EXHIBIT 212

PAN AMERICAN AIRWAYS CORPORATION
45 Exchange Place, Jersey City, N. J.

October 22, 1941
Received at (Oct. 23, 1941)

W. R. Grace & Company
7 Hanover Square
New York, N. Y.

Gentlemen:

We desire to acknowledge receipt of your letter of October 2, referring to the fourth weekly trip undertaken by our jointly owned company, Pan American Grace Airways, Inc., between Cristobal, Santiago, and Buenos Aires

The letter has been given careful consideration by Mr. Rihl and other of our System officials concerned. As you know, Mr. Rihl has recently been called out of the country and I am replying for him in his absence.

Prior to receipt of your letter our officials concerned had given the matter careful consideration. This fourth trip was scheduled to depart from Cristobal at 5:30 A.M. on Tuesday of each week, the same day on which one of the three regular trips is scheduled to depart. Obviously, this fourth trip is not properly spaced to provide adequate through mail or passenger service, and apparently it was set up in this manner due to the exigencies of Pan American-Grace's equipment situation, and without prior consultation with Pan American Airways. Obviously, it would not be in the public interest for Pan American Airways to operate an additional trip to Cristobal to provide a fourth through service of this sort.

Our System officials have, however, been considering four properly spaced schedules from Miami to Cristobal, there to connect with our jointly owned Company service to West Coast countries and Buenos Aires. They would be glad to confer with Mr. Roig or Mr. Harris with a view to arranging suitable schedules providing for four adequately spaced trips per week. As soon as a satisfactory fourth weekly schedule is worked out between us we will be glad to take the matter up immediately with the Post Office Department.

However, even when this step has been taken, we are of the opinion that the connecting services which would be provided by our jointly owned Company would still be far from satisfactory. We continue to hold that through services to points on the West Coast and Buenos Aires, connecting with our services at Cristobal, should be speeded up and greatly expanded. Four-engine equipment, capable of providing as efficient, comfortable and fast service to this important area as is planned by Pan American Airways for other parts of Latin America, should be provided.

[fol. 499] Four years ago, Pan American's Directors on the Board of our jointly owned Company favored providing service with four-engine equipment of large capacity to avoid the traffic bottleneck which still exists with respect to Pan American-Grace Airways' through traffic to all West Coast countries other than Colombia. Even today the passenger capacity of the DC-3's, on the sector between Cristobal and Ecuador, is limited to approximately twelve seats.

A year and a half ago, Pan American Airways placed orders for twenty-two forty passenger four-engine transports (type L-49), having a contract cruising speed well in excess of 250 miles per hour, for use on our principal Latin American trunk lines. This equipment would provide for four-engine service via Central American points to the Canal Zone in addition to daily express service between Miami and the Canal Zone. Other daily express services would run to Barranquilla with direct connections on to the Canal Zone. Daily service along the East Coast to Rio and Buenos Aires was also included.

Mr. Roig and Mr. Harris last year advised us that they were unwilling to support an order for suitable four-engine aircraft in addition to the three DC-4s which Pan American has on order for account of Pan American-Grace Airways. We would hope, however, that the Directors on the Board of our jointly owned Company representing Grace & Company will now join with us to permit the Company to place orders for sufficient four-engine equipment.

To improve the present unsatisfactory situation on the northern part of the Pan American-Grace Airways' route, Pan American Airways is prepared to conclude an agreement with Pan American Grace, subject to the approval of the Civil Aeronautics Board, along the lines of the Western Air-United Air Lines agreement. Such agreement would permit Pan American Airways to charter to Pan American-Grace, if the Grace interests were willing, four engine equipment for use on certain operations on this connecting West Coast service, thereby helping to provide a more efficient express service and to eliminate present

bottlenecks. A draft of such agreement will be forwarded within a few days to Pan American-Grace Airways.

Very truly yours,

PAN AMERICAN AIRWAYS CORPORATION

Evan E. Young
Vice President

GOVERNMENT'S EXHIBIT 213

W. R. GRACE & CO.
7 Hanover Square, New York

October 27, 1941

A. GARNI
First Vice President

Pan American Airways Corporation,
15 Exchange Place,
Jersey City, New Jersey.

Dear Sirs:

We beg to acknowledge receipt of yours of October 22nd.

It is true that Panagra's fourth trip leaves Cristobal southbound at 5:30 A.M. on Tuesdays and that one of their other trips leaves Cristobal at 1:50 P.M. on the same day. Your comments, however, overlook the fact that this trip is one day ahead of the 1:50 P.M. trip at all points south of Cali. A connection for this 5:30 A.M. Tuesday southbound trip would naturally leave Miami sometime on Monday either making the run at night or with overnight in Panama. You have no Panagra connecting trip out of Miami on Monday. Your comments also entirely overlook the fact that northbound Panagra's fourth trip, equally without direct connection to Miami, arrives at Balboa Friday night and, with present daylight flying, your connecting trip would in normal course leave Balboa on Saturdays, a day on which there is no other direct connecting schedule. With the increased frequencies which are inevitable with the increase of traffic, spacing of trips by a full intervening

day becomes more and more impractical and with the daily trips we anticipate shortly, will be impossible. We note that your letter makes no concrete suggestion of any schedule which would be an improvement over the present. We see no basis for your statement that Panagra's "fourth trip is not properly spaced to provide adequate through mail or passenger service".

PAA-55.46
2197d 3/3/55
mfr

[fol. 501] This fourth trip schedule was not, we are advised, "set up in this manner due to the exigencies of Pan American-Grace's equipment situation". It is obvious that Pan American was advised of the proposed schedule since Pan American's Traffic Department attended to the filing of schedule with the Civil Aeronautics Board and with the United States Post Office. As a matter of fact, one of the reasons leading to the present schedule was the necessity of an early Tuesday southbound departure from Cristobal in order to connect with Panair do Brasil at Corumbá. Panagra's fourth trip, as you will recall, being related to the provision of an American transcontinental service via Peru, Bolivia and Brazil to replace the German service.

While we mention the foregoing to avoid misunderstanding, the agreement of February 14, 1939 provides that your company will maintain adequate direct connecting services "connecting with Panagra's through mail schedules". It contains no provision that Panagra's schedules shall be arranged to suit your convenience. Your statement that "it would not be in the public interest for Pan American Airways to operate an additional trip to Cristóbal to provide a fourth through service of this sort" is unwarranted since the governmental authorities charged with responsibility for determining the "public interest" in these matters, viz., the United States Post Office Department and the Civil Aeronautics Board have approved the Panagra schedule in question in the manner provided by law.

2197d PAA-5547

[fol. 502] Your letter is, in effect, a categorical refusal to provide connecting service for Panagra's fourth trip as at present operated. The many wholly unrelated matters

which you bring into the discussion serve no constructive purpose whatever and if we may be permitted to say so, only becloud, delay and avoid the issue. In view of your refusal to provide connecting service as required by the agreement of February 14, 1939, we shall expect you to take the action necessary to permit Panagra to itself apply for this connecting service in accordance with the provisions of that agreement.

As all of the other matters discussed in your letter relate to business of Pan American-Grace Airways, unrelated to the agreement of February 14, 1939, we have referred them to the President of Pan American-Grace Airways for attention.

Very truly yours,

W. R. GRACE & Co.

/s/ A. GARNT

15 Exchange Place,
Jersey City, New Jersey

Dear Sirs:

I refer to yours of October 22nd addressed to W. R. Grace & Co.

The portion of your letter criticizing the Panagra service gives a rather incomplete and inaccurate impression regarding the matters to which you refer.

The idea which you state you "continue to hold" that Panagra service "should be speeded up and greatly expanded" neither originated with your company nor have you held it continuously. On the contrary, you have held on more than one occasion in the past and are, at the present time, in connection with Panagra's proposed extension to a terminal in the United States, holding quite contrary views. Since early 1939, in line with the view that Panagra's services "should be speeded up and greatly expanded", Panagra's management has with the support of its entire Board of Directors, among other constructive steps:

(1) Cut one full day from its schedule between the Canal Zone and Buenos Aires via the fourth trip and-half a day via the other trips.

(2) Doubled its frequencies (from two trips per week to four) over its entire route; increased frequencies between a number of local points on the route and in its pending rate application is seeking daily service over its entire route. You have failed to provide adequate connecting service for the fourth trip and have to date given no assurance of providing such connec-

2497 d

PAA-5549.
3 2 55
mfr.

[fol. 504] tion for the three additional trips in connection with our daily service.

(3) Expanded its route mileage about 30% by the addition of extensive new services in Ecuador and Bolivia.

(4) Undertaken a complete revision of its radio setup in anticipation of increased frequencies and faster schedules (including night flying) and greatly expanded and improved its facilities (including purchase of four engine equipment as hereafter referred to), organization and service in all departments.

(5) Expanded and developed its traffic on every section of its route with resulting large increases in revenue from passengers, express and foreign mail.

I have at no time been advised that the progress being made was not entirely satisfactory to you. Certainly none of your directors on the Board of Panagra has ever given any indication to that effect. On the contrary, they have from time to time indicated satisfaction with the progress being made.

As you know, I have for some time with the support of the Grace directors on the Board of Panagra, been urging upon your company that Panagra's services be "speeded up and greatly expanded" by their coming through to a terminal in the United States, a step which, for reasons with which you are familiar, we consider of the utmost importance to the company's welfare. By persistent refusal to permit this normal and logical expansion of Panagra's service, your company and your directors on the Board of Panagra have taken a course which to date has made impossible the most important single step by which "through service to points on the West Coast and Buenos Aires" could be "speeded up and greatly expanded".

The statement that "four years ago" your Panagra directors "favored providing service with four engine equipment" between Cristobal and Ecuador refers, I assume, to the effort of your directors on the Panagra board in 1938 to bar Panagra from an overland route across Colombia
2197 d. PAA-5550
[fol. 505] and to commit Panagra to an overwater route between Cristobal and Guayaquil operated with four engine seaplanes. There were no four engine land planes four years ago. If your views had been followed at that time Panagra would have been committed to a form of seaplane operation which has long since become obsolete on routes of this character and is rapidly becoming obsolete everywhere.

A year and a half ago, after exhaustive study of the then prospectively available four engine land planes, I recommended to the Board of Panagra the purchase of three Douglas DC4s. At a meeting of the Board held March 18,

1940, this purchase was authorized and correspond-
Wid ing contract entered into with the Douglas Air-
PAA craft Company. The contract called for deliveries
in July, August and September 1941 and but for the war these planes would doubtless be in service by now. Your letter states that about this same time you purchased a number of Lockheed 149s. You are as well advised as I regarding the present delivery prospects of the DC4. I know nothing as to the delivery prospects on the L49s. I understand, however, that although you ordered no DC4 until
recently you have within the past few months placed
17 orders for a number of these planes. Neither at the meeting of March 18, 1940 nor at any time before or since have any of your representatives stated to me or any of the Grace directors that you felt that Panagra should order an additional number of four engine planes. I do not know what conversations you may have had with Mr. Harris who is at present in Bolivia. If your directors on the Panagra board have any specific proposal to make they are, of course, at liberty to make it at any meeting of the
2197 d PAA-5551
[fol. 506] Board and you may rest assured that the Grace directors will give such proposal full consideration and take whatever action in the premises is in the best interests of Panagra.

On July 28th last, I suggested to Mr. Trippe the possibility of an arrangement along the lines of the Western Air United Air Lines agreement under which Panagra might bring its equipment through to New Orleans and Miami under Pan American's franchises. The suggestion was made as a possible compromise substitute for Panagra's bringing its line through to a United States terminal. It was suggested that, incidental to this main purpose, Pan American equipment might perhaps to meet schedule convenience, be operated over the Panagra route as far south as Cali. On August 7th an agreement in principle was reached and counsel was to prepare draft agreement. I have endeavored repeatedly since then to secure a draft of this agreement but as these efforts have been wholly unsuccessful, I was forced to the conclusion some time since

that you did not desire to proceed further along this line. From the last paragraph of your letter it would now appear that this idea has been turned entirely around, the main purpose totally eliminated and the incidental suggestion developed into the sole object of the agreement. While I will, of course, be glad to consider the draft agreement provided it is in Panagra's interests, I do not see how Panagra's traffic problem arising not out of the matters to which you refer but out of its great increase in traffic, have any bearing on or can be availed of to divert attention from your failure to provide Panagra with adequate direct connecting service between Miami and the Canal Zone. Moreover, I do not see how Panagra can have the

2197 d PAA-5552

[fol. 507] slightest interest in the suggested agreement if its effect is to turn over the operation of our Northern Sector to Pan American. Panagra is not interested in seeing the scope of its operations as an independent air carrier restricted. It is interested only in seeing them developed and enlarged.

Very truly yours,

/s/ H. J. Roig

November 4, 1941

Pan American-Grace Airways, Inc.
Chrysler Building,
New York, N.Y.

Attention of Mr. H. J. Roig, President

Dear Sirs:

We have your letter of October 9th regarding our service between Miami and the Canal Zone. We were surprised to note that you complained as to the accommodations

afforded to your traffic by this service. We have investigated the matter and we find that out of a total of 99 flights from the Canal Zone to Miami between February 13 and September 30, 1941, only 40 seats were refused your passengers on our service, while during the same period your reservations office released a total of 176 seats which had been allotted to it. We also find that during the same period you refused us space South of the Canal Zone for 55 passengers for whom we had available space on trips from Miami to the Canal Zone.

In the light of these figures it seems to us that if criticisms of this sort are to be made between partners at a time of acute shortage in equipment, such criticisms would more appropriately come from us than from you. This seems particularly evident when it is recalled that we came

PAG-XP 65
10/12/54
RLA

[fol. 509] to your assistance with a loan of equipment which was urgently needed on certain of our own operations and that we also released multi-engine transports to the British, at great sacrifice to ourselves, without calling on Pan American Grace to release their proportionate share of the System's contribution.

In this connection, we may say that we have always been somewhat puzzled as to the basis for the position apparently taken by the Grace interests that Pan American Airways was obligated to maintain operations between the United States and the Canal Zone with types of equipment vastly superior to those which the Grace interests have been willing to have the joint company acquire for its own use. This question, however, is in a sense academic, since Pan American Airways recognized many years ago that operations between the United States and the Canal Zone could best be conducted by 4-engine equipment. The S-42s were put on this run as early as 1937 at a time when the joint company was using S-43s. In the same year, Pan American Airways ordered the first 4-engine land aircraft with cabins, supercharged to permit flight at high altitudes the Boeing S-307. When these aircraft were delivered, Pan American utilized them to provide service between the

Canal Zone and the United States, notwithstanding the fact that Pan American-Grace Airways continued to supply limited capacity south of the Zone to the detriment of both the company and the travelling public.

It is true, of course, that pending the improvement of a landing field between Miami and the Canal Zone, suitable

PAG-XP 66

[fol. 510] for regular use by the S-307, the capacity of these aircraft on this service has been limited by the long non-stop flight of 1,170 miles. This, however, is merely a temporary situation and happily, as you know, is about to be remedied by the availability of the new landing field at Camaguey. We note that in your letter you are at pains to reject in advance the inclusion of a stop at this point. There is no justification for this position. The inclusion of a stop at this point will permit the S-307s to carry some 1,350 additional pounds of payload on this service, and with this stop the route between Miami and the Canal Zone will be traversed in 6 hours and 55 minutes. We know of no such fast time over an equivalent distance made by our joint company. Furthermore, the use of this stop will still leave a non-stop flight mileage between Camaguey and the Canal Zone of 867.5 miles, a flight considerably longer than any maintained on the jointly owned company's service.

Any contention on the part of the Grace interests that the service between Miami and the Canal Zone must with present equipment be a non-stop service is utterly without basis. The direct connecting service referred to in the agreement of February 14, 1939, was a service by S-42s, including stops at Cienfuegos and Kingston, and the service with the S-307s via Camaguey will of course be far speedier than was the flying boat service via those points and over a shorter and more direct route. Indeed, your opposition at this time to the stop at Camaguey which will so greatly increase the capacity of aircraft destined to the Canal Zone, and in this manner will benefit the commerce

PAG-XP 67

[fol. 511] of the United States and the national defense, seems to us to throw significant light upon your letter.

Two other matters are mentioned in your letter, viz. a fourth service from Miami to the Canal Zone with which

your fourth trip might connect, and the possibility that at some future date you may inaugurate daily connecting services at the Canal Zone. These matters are the subject of a letter which Pan American Airways Corporation, one of your joint owners, addressed under date of October 22nd to W. R. Grace & Company, your other joint owner, a copy of which letter you already have. As stated in that letter, we have long since placed firm orders (involving substantial down payments) for suitable 4-engine equipment for operation of daily service to the Canal Zone and also, for operations through Central America to the Canal Zone as well as between the United States and Barranquilla, with direct connecting service to the Canal Zone. You will also see from that letter that it is again urged that steps be taken to put the jointly owned company in a position at the earliest possible date where it can render a comparable service having sufficient capacity to move connecting traffic along the west coast to Santiago and Buenos Aires.

Without waiting, however, for delivery of the limited amount of 4-engine equipment which you have on order, we are prepared to enter into an agreement with you, subject to approval of the Civil Aeronautics Board, which would not only permit the exchange of such equipment if and when obtained, with our 4-engine equipment, but also in the meantime an arrangement for charter of our B-307s to you on certain of your operations. The charter of 307

PAG-XP 68

[fol. 512] equipment for use by our joint company on certain of its operations would permit a more efficient express service and the partial elimination of the traffic bottleneck which has so long existed with respect to your through traffic to all west coast countries other than Colombia. Enclosed is a draft of such agreement.

Very truly yours,

PAN AMERICAN AIRWAYS, INC.

GOVERNMENT'S EXHIBIT 216

PAN AMERICAN AIRWAYS CORPORATION
15 Exchange Place, Jersey City, N. J.

November 4, 1941

Mr. H. J. Roig, President,
Pan American-Grace Airways, Inc.
Chrysler Building,
New York City.

Dear Sir:

We have your letter of October 27th wherein you undertake to reply in part to our letter of October 22nd to W. R. Grace & Company.

We are very much surprised that you should take our statement that the services of Pan American-Grace "connecting with our service at Cristobal, should be speeded up and greatly expanded" and by distorting it make it a pretext for raising again the proposal that the operations of Pan American-Grace be extended north of the Canal Zone. We are hardly less surprised that, in answer to a suggestion that certain admitted defects in Pan American-Grace's service be remedied, you should bring into the discussion a great many other extraneous matters.

We do not propose to become involved in a discussion of any of these irrelevant matters or to bring up at this time matters relating to your management's operating policies. We will limit our comments here to the following:

(1) You must know that such an extension of Pan American-Grace's service would be directly contrary both to the agreement under which Pan American-Grace was formed and to the agreement made between its two stockholders on February 14, 1939, and

(2) You must also know that there is not the slightest reason to think that such an extension (which, with the limited number of 4-engine aircraft which Pan American-Grace has on order, could only be achieved

at the expense of service on the route for the operation of which the company was formed) would speed up through service between the United States and the Canal Zone which is now being operated by Pan American Airways with the fastest and most modern aircraft in use in any international operation anywhere in the world.

With respect to your version of the negotiations in regard to the exchange of 4-engine equipment, you are, at the least, badly confused. You state that you suggested "an arrangement along the lines of the Western Air United Air Lines agreement under which Panagra might bring its equipment through to New Orleans and to Miami under Pan American's franchises."

PAG-XP-70
10-12-54
RLA

14

[fol. 514] If you will read the Western Air United Air Lines agreement you will see that your statement is self-contradictory. The Western Air United Air Lines agreement was one for a reciprocal interchange of equipment. It was not a unilateral agreement whereby one company would operate its aircraft over the lines of another. From our standpoint the arrangement discussed was simply regarded as a constructive step in the development of air transportation to Latin America which would be in the public interest as well as to the mutual advantage of the parties.

The difficulty in any such arrangement was that Pan American-Grace's had, and still has, no 4-engine equipment to interchange. It is for that reason that, as indicated in our letter of October 22, 1941 we would be willing, in order to alleviate the bottleneck on the northern part of Pan American-Grace's route, to permit Pan American 4-engine equipment to operate over that sector even before Pan American-Grace is able to reciprocate. Your characterization of such an offer, made in a spirit of good partnership, as indicating desire on the part of Pan American to take over the northern part of Pan American-Grace's route is

such an obvious distortion of the facts as to make us doubt whether the effort that has been expended on the proposed interchange of equipment has not been wasted.

Very truly yours,

PAN AMERICAN AIRWAYS CORPORATION

GOVERNMENT'S EXHIBIT 217

November 7, 1941

Pan American Airways Corporation,
15 Exchange Place,
Jersey City, New Jersey

Dear Sirs:

Yours November 4th.

I greatly regret that the very personal tone of your letter leaves me no alternative but to reply in a personal sense.

I am not aware of having distorted anything or of having brought any extraneous or irrelevant matters into this discussion. My only interest in such matters has been to see fully and correctly stated those which you have introduced.

I do not know either of the propositions as stated in your indented paragraphs marked "(1)" and "(2)" to be correct. On the contrary, both are, in my opinion, incorrect.

I am neither badly confused nor self-contradictory with regard to the Western Air/United Air Lines agreement nor with respect to my view of the negotiations in regard thereto. After all, it was I who brought that agreement into the discussion as a possible way out of our difficulty. I never for a moment suggested an exact literal counter-

part of that agreement to meet our situation. In my conversations with Mr. Trippe, among other differences, I repeatedly pointed out that since what Panagra was interested in was a means of coming through to the United States I would not be interested in the reciprocal features of the Western Air United Air Lines' setup beyond the barest schedule convenience which might in the most extreme case involve operating Pan American planes as far south as Cali.

It so happens that I know exactly how this particular idea came under discussion, whose offer it was, how it was received and just what the discussion of it has been. The last three paragraphs of your letter under reply are obviously based on inadequate information regarding these matters.

Very truly yours,

(Sgd.) HAROLD J. ROIG

PERSONAL

NEW YORK,
January 5, 1942.

Mr. T. J. Kirkland,
LIMA.

Dear Tom:

Attached herewith please find copy of my memorandum to Mr. Roig of January 3rd with regard to a possible fifth trip. I would appreciate your remarks.

With regard to your personal letter of December 31st which has just reached me, please advise whether your discussion with Dobbs indicated that nothing could be done to speed up the present 307 arrivals in the Canal Zone, now delayed because of the Army requirements for approach. I believe that we may be able to exert sufficient pressure on Panair at this end to see that they get away from Miami somewhat earlier in order to avoid the continuous overnights in the Canal Zone on all 307 connections southbound.

Yours very truly,

H. R. Harris.

HRH/Q
Enc.

PAG-C-188
10/7/54
JCL

[fol. 517] January 3, 1942.

Memorandum to Mr. H. J. Roig:

With further reference to a possible fifth trip on Panagra as outlined in my memorandum to you of November 29th, I have discussed this matter with Pan American Airways on the basis that an additional Boeing 307 operation can be instituted from the Canal Zone to Miami northbound on Saturday and southbound on Sunday. This would mean that we would operate our fifth trip from Balboa to Cali Sunday afternoon; Cali/Lima on Monday; Lima/Santiago on Tuesday; Santiago/Buenos Aires on Wednesday, giving four direct connections from Miami to Buenos Aires via Panagra, arriving in Buenos Aires on Sunday, Tuesday, Wednesday and Friday. We also have a Thursday arrival in Buenos Aires which leaves Brownsville Sunday morning on regular Panair operation, or Sunday afternoon on the present Panair special operation which may be discontinued in February.

Northbound, our present schedules leave Buenos Aires on Monday, Wednesday, Thursday and Saturday. The present Wednesday departure is a one-day operation be-

tween Lima and the Canal Zone on Friday. This would be changed to Lima Cali on Friday; Cali Balboa Saturday to connect with the new 307 operation Balboa Miami the same day. The fifth northbound trip could operate Buenos Aires Santiago Tuesday; Santiago Lima Wednesday; Lima Balboa Thursday to arrive in Brownsville Saturday afternoon on regular Panair schedule, or Saturday morning on the present Panair special schedule.

An alternate northbound schedule would be to leave Buenos Aires on Friday instead of Tuesday, operating Santiago Lima Saturday; Lima Balboa Sunday which, if we could get Panair to change their present S 42 Miami Barranquilla service to southbound Sunday and northbound Monday, would give us direct passenger service from Buenos Aires to Miami in 3½ days. From the standpoint of spacing of service for Santiago passengers northbound, the latter arrangement would be desirable since it would give Santiago departures direct for the United States on Tuesday, Friday and Saturday as compared with the present Tuesday, Friday and Sunday. There is, however, considerable merit in the idea of giving Buenos Aires a mail and passenger service to the United States on Tuesday.

If a fifth trip is to be operated as indicated above, be southbound leaving Balboa Sunday, the present U.S. mail pay and plane operation between Arequipa and Santiago on Monday would be transferred to Tuesday, and the pres-

PAG C-189
10 7 54
JPL

[fol. 518] ent U. S. mail trip operated on Sunday Santiago Arequipa would be transferred to Saturday provided it was decided to operate the fifth trip out of Buenos Aires on Friday. If the trip is made out of Buenos Aires northbound on Tuesday, the present Sunday mail trip would be transferred to Wednesday.

Assuming that Panair will agree to operate a 307 Balboa Miami Saturday and Miami Balboa Sunday, and shift their S-42 Miami-Barranquilla service to southbound Sunday and northbound Monday, it is recommended that the following steps be taken by Panagra

(1) Our present three basic trips and our southbound fourth trip be continued as at present.

(2) The Corumba services to continue as at present.

(3) The northbound fourth trip operate Friday Lima Cali instead of the present Friday Lima Balboa. This would then give a direct connection Cali Miami on Saturday.

(4) Panagra to operate Balboa Cali Sunday, Cali Lima Monday, Lima Santiago Tuesday and Santiago Buenos Aires Wednesday which is the southbound leg of the fifth trip.

(5) The northbound fifth trip to operate Buenos Aires Santiago Friday, Santiago Lima Saturday, Lima Balboa Sunday

The net result of the above would give us five passenger services with a 3½-day schedule Buenos Aires Miami and four 3½-day passenger services Miami Buenos Aires. The additional southbound passenger service would require from 2:30 PM Sunday leaving Brownsville to 2:15 PM Thursday arrival Buenos Aires.

Certain changes in the trips to be paid Panagra by the Post Office Department would be required in connection with the above additional services offered. These will be the subject of a separate memorandum report.

The total additional flying by Pan American Airways in connection with this program would be one 307 roundtrip Miami Balboa per week (2336 miles). For Panagra the additional flying would be one DC-3 roundtrip per week Balboa Arequipa (4525.4 miles).

H. R. Harris.

1/7/42 File)

January 6, 1942

J. T. T:

RE: PAA MIAMI-BALBOA SERVICE

(1) As you know, Pan-Grace is now operating four scheduled services per week into and out of the Canal Zone. It is putting on an additional service, making five in all, in the immediate future and is definitely planning on operating a sixth weekly service so soon as possible.

(2) We are as you know operating a thrice weekly service Miami-Balboa, and can put on an additional round trip service (307) at any time. The only way however that a fourth service can be operated is to have a plane which makes the southbound trip on Saturday (and overnights at Balboa) return on Saturday to Miami, and then make a round trip on Sunday. It is my understanding, though I may be in error, that the U. S. Post Office Department has no funds with which to accord us mileage pay for the fourth trip, and that it is not inclined to ask for additional funds for that purpose. I am however bringing to your knowledge the fact that we can operate a fourth Miami Balboa service because (1) of the action of Pan-Grace in augmenting its services into the Canal Zone and (2) the action of W.R. Grace & Company in applying for a certificate for Pan Grace for the route Canal Zone-Miami, or other point.

GOVERNMENT'S EXHIBIT 220

W. R. GRACE & CO.
7 HANOVER SQUARE, NEW YORK

Office of the President April 27, 1942

To the Civil Aeronautics Board,
Washington, D. C.

Dear Sirs:

Pan American-Grace Airways, Inc. has become one of the foremost air carriers in the world. Its route comprises not only one of the longest but also one of the strategic international air routes. As a result of competent and experienced management and operating organization, Pan American-Grace Airways, Inc. has attained a stature which not only justifies but requires its existence as a completely independent air carrier. At the present time its ability as an independent air carrier to fulfill its obligations to the public, and to the Governments of the United States and the eight South American countries which it serves, is being suppressed and its growth and development are being restricted by Pan American Airways Corporation, one of its own stockholders, in order that such developments may not interfere with Pan American's own interests and conflict with its own supposed monopoly of foreign air transportation.

Facts constituting the basis of this allegation are set forth in the memorandum submitted herewith. We stand ready to submit to the Civil Aeronautics Board such further information as may be required by it in making a full and complete investigation of the matters referred to herein.

We have long hesitated to place this matter before you, hoping that some other solution might be possible; but we have been reluctantly forced to the conclusion that there is no other way of remedying the existing situation. The

urgent war needs, the need for better service, for economy of men and equipment, and for erasing the obstacles and impediments to these accomplishments, the need to extend and make more valuable and effective the great organization which Pan American-Grace Airways, Inc. has built up, and to give it full opportunity to render the service to the nation which it is highly competent to render and anxious to perform—these urgent needs, as well as the long-range interests of the line itself, make it impossible to leave unremedied the difficulties under which Pan American-Grace Airways, Inc. has so long labored.

We, therefore, respectfully request that the Civil Aeronautics Board require Pan American Airways Corporation to cease and desist from the matters and things complained [fol. 521] of and require Pan American Airways Corporation to divest itself of its ownership of the stock in Pan American-Grace Airways, Inc. to such extent as may be necessary to divest itself of its present negative control of Pan American-Grace Airways, Inc., all in accordance with and as required by Section 411 of the Civil Aeronautics Act of 1938, and Sections 18 and 21 of the Clayton Act (Title 15, U. S. Code) and we further respectfully request that the Civil Aeronautics Board consider and grant the petition dated December 16, 1941 (Docket No. 707) and amend the Certificate of Public Convenience and Necessity of Pan American-Grace Airways, Inc. so as to name a point within the United States as a terminal of the route of Pan American-Grace Airways, Inc.

Respectfully submitted,

W. R. GRACE & CO.

GOVERNMENT'S EXHIBIT 221

Camagney

May 29, 1942

Mr. George L. Rihl,
Pan American Airways,
Chrysler Building,
New York City.

Dear George:

The more or less continuous record of delayed schedules in the Miami/Balboa service indicates that much still remains to be done at Miami to facilitate prompt dispatch and that the Camagney stop is definitely making a bad matter worse without any real advantage as even the contemplated additional payload seems to be frequently unavailable on account of the necessity of carrying additional gasoline because of weather conditions making the stop at Camagney impractical. Experience has shown that the average time required for the Camagney stop is far in excess of your expectations as indicated to the CAB when the stop was authorized.

It seems clear, therefore, that the time has come to discontinue the Camagney stop and to take such steps in connection with Miami dispatch as will permit of schedule departure,—including such changes as may be necessary to insure dispatch of the Rio plane without its holding up departure of the Balboa plane.

Very truly yours,

June
5
1942

Mr. Harold J. Roig
President
Pan American-Grace Airways, Inc.
c/o W. R. Grace & Co.
7 Hanover Square
New York City

Dear Harold:

I am sorry I have delayed answering your letter of the 29th, regarding the Miami-Balboa service.

I have just looked up the schedules from May 16th through June 3d inclusive, and find that out of the nineteen flights only three were more than thirty minutes late, 3 of which one was more than an hour late, but this 6 was due to mechanical trouble. Six flights were from 7 twenty to thirty minutes late, and seven were less 3 than twenty minutes, the remaining three being on, or ahead of, time. I think you will agree that the operation has been greatly improved, and considering all the elements involved is not bad and hardly justifies the elimination of the Camaguey stop. We do have a considerably increased pay load southbound, which should be of benefit to Pan American-Grace.

It may be of interest to you to know that we begin loading the plane at four o'clock in the morning in order to avoid posible delays due to inspection of baggage, etc. Of course, we still cannot leave without the mail, although we do not have to wait for E.A.L. mail as that is all censored. A couple of times when we have been late leaving it has

been due to the late arrival of the mail from Miami, for which we hardly can be blamed.

I think you will find my information correct.

Yours faithfully,

/s/ Geo. L. Rihl.

Dear George:

Yours June 5th.

I am very glad to note improvement in Miami/Balboa service. The improvement is, of course, pretty recent but I hope it may continue. In any event, I agree with you that so long as present schedule performance is maintained, we may well defer consideration of the elimination of the Camaguey stop.

The thing I am primarily concerned with is, of course, that our passengers, mail and express should not be required to overnight in Balboa. Nevertheless you appreciate that even twenty or thirty minutes delay in the arrival of

your plane is not unimportant. The time available for the transfer at Balboa in order not to overrun our deadline is not excessive. When your plane arrives late we have just that much less time in which to handle the transfer which means that we have not only lost all the advantage of the one hour's extra time made available by U. S. War Time but must also manage somehow to save at our end the additional time which has been lost in Miami or en route to Balboa. For example, while I find that between May 12th and June 4th we were required to overnight only once on account of delay in your arrival, it is a pretty safe guess from the number of moderately late arrivals mentioned in your letter, that many transfers had to be made very expeditiously indeed to avoid overnight stay. I trust, therefore, that the progress indicated by your letter may be continued to the point when even these twenty and thirty minute delays may be substantially reduced.

Very truly yours,

MIAMI-BALBOA SERVICE

I have a letter from Mr. Roig calling my attention to the fact that while there has been an improvement in our performance we should constantly keep in mind the fact that

the Pan-Grace connection is at best close, and that even a twenty minute delay might cause them to have to over night at Balboa, which naturally is very undesirable at the present time, particularly in view of the available accommodations. I know that you realize the closeness of the connection, but I thought it just as well to bring it to your attention again in order that Operations might bear in mind that while a twenty minute delay is not ordinarily serious, it can be in this particular instance.

MIAMI-BALBOA DELAYS

I was very much interested in reading Mr. Critchley's memorandum to you of June 15th, on the above mentioned subject. It is very apparent that you are making a great effort to maintain schedules.

Considering the length of the operation, twenty or thirty minutes after scheduled arrival time should not be judged a bad operating performance, and would not be, under ordinary circumstances. I realize perfectly that the connecting schedule of Pan American-Grace is too tight, but there is nothing to be done about that, for reasons you know.

In checking over the causes of the delays I note that there are five serious ones, due to maintenance trouble. That does seem to me a fairly high percentage for a month's operation. Operations certainly cannot be blamed, but unless we are getting a tremendously high use out of the 307's it would seem to me Maintenance difficulties ought not to be responsible for 33% of the departures more than thirty minutes late out of Miami.

I also note that dispatching the Rio ship has a high percentage. It would seem possible that the Balboa ship could be given preference, and is, in the timetable. You can readily see that delaying Balboa passengers, or the ones destined for the West Coast, due to our favoring the East Coast operation could cause criticism that might be difficult to explain. As a matter of fact, it has already been called to my attention.

If we can better our performance for the two above mentioned causes I don't believe we will have any more trouble.

Geo. L. Rihl

SUBJECT: STATUS OF ARRIVALS BALBOA 307'S

REFERENCE:

With the thought of keeping you informed concerning the success of our combined efforts to eliminate delays in arrival of our 307's in Balboa, we are attaching hereto a summary of arrivals with pertinent comment relative to the cause of delays. There has been a marked improvement over our record for the month of May and, while a repetition, we are repeating at this time a comparison of the average of arrivals in Balboa for the period February to June inclusive:

February	1 hour 23 minutes late
March	1 hour 31 minutes late
April	41 minutes late
May	37 minutes late
June	2⅝ minutes late

It seems pertinent to mention that during the month of June our aircraft arrived in Balboa on 8 occasions on time or ahead of time, whereas 4 delays were of less than 15 minutes duration; 13 from 15 to 30 minutes; 3 from 30 to 45 minutes; and 2 over 45 minutes.

In our memorandum of June 8 we outlined the action that was being taken to minimize and eliminate delays, and there is very little which can be added in this respect other than to state that this important matter is continually under study in order to obtain closer adherence to schedule.

Insofar as July is concerned, the results to date appear rather encouraging. For your information we are indicating the pertinent data for the trips July 1 to 6 inclusive:

July	1	28 minutes ahead of schedule
	2	23 minutes late
	3	20 minutes ahead of schedule
	4	4 minutes ahead of schedule
	5	34 minutes ahead of schedule
	6	27 minutes late

SUBJECT: STATUS OF ARRIVALS BALBOA 307'S

REFERENCE:

Pursuant to our recently established policy of reporting at the end of each month on the success of our efforts to adhere to our Miami-Balboa schedule with particular reference to arrivals at the latter point, we are attaching hereto a statement covering the month of July, indicating comparison of arrivals to published schedules with a brief comment regarding any delays concerned.

We feel that we have made considerable progress during the month of July, as our planes arrived at Balboa on time, ahead of time, or less than five minutes late on eighteen occasions; between five and ten minutes late, twice; fifteen to thirty minutes late, four times; thirty to forty-five minutes late, twice; and over forty-five minutes late, five times.

While the average delay for the month of June was twenty-eight minutes, for the month of July it was thirty-six minutes; however this was brought about by lengthy delays on several different occasions, which you will note from the enclosure.

All concerned here are carefully following the scheduled performance over the Miami-Balboa sector and we would be interested in knowing if the improvement to date in any way reduced the complaints from the connecting carrier.

August 7, 1942 EEY:RB

Manager Eastern Miami — Vice President Executive New York — operations

STATUS OF ARRIVALS BALBOA 207'S.

Your memorandum of August 4th.

Referring to the last paragraph of your memorandum, no complaints from Pan American Grace Airways regarding this matter have been made for quite some weeks past.

I do hope that it will be practicable for the Division to keep up the good record made of recent months, and possibly even improve it.

Evan E. Young

GOVERNMENT'S EXHIBIT 229

Minutes of Adjourned Regular Meeting of the Board of Directors of Pan American-Grace Airways, Inc. held at the office of Pan American Airways, Inc., 135 East 42nd Street, New York, N. Y. on the 22nd day of September, 1942 at 2:30 o'clock in the afternoon.

PRESENT:

Messrs. W. F. Cogswell,
A. Garni,
H. Preston Morris
R. H. Patchin
G. L. Rihl
Harold J. Roig
J. T. Trippe
E. E. Young

being all of the members of the Board.

Mr. Roig, President, presided. Mr. Cogswell, Secretary, acted as such.

Mr. Garni moved the following resolution which was seconded by Mr. Patchin:

RESOLVED that the President of the Company is hereby authorized to retain Counsel to represent the Company in connection with CAB Order Docket No. 779 dated September 10, 1942 and to take all necessary action to present to the CAB the Company's position with respect to said order to the end that the CAB authorize and require the amendment to the Company's Certificate of Convenience and Necessity in the manner referred to in said Order, U.S. terminals to be Miami and such other terminal as may be agreed upon between Mr. Roig and Mr. Rihl or, failing such agreement, by the CAB.

Vote being had said resolution failed to pass, Messrs. Roig, Garni, Patchin and Cogswell voting in favor and Messrs. Trippe, Young, Rihl and Morris voting against.

Mr. Young stated that the proposal of the Grace interests that Pan American Grace should apply for a certificate of convenience and necessity, between the Canal Zone and [fol. 531] the continental United States had been discussed so often and at such length by the parties that no useful purpose would be served by further extended discussion. However, he desired briefly to state for the record:

1. Pan American Grace now operates on the west coast of South America and across the Andes. Its only American flag competitor is the Grace Steamship Line, competition for air traffic between the United States and Buenos Aires being nominal. It enjoys end-on connecting services at the Canal Zone furnished by the three trunk lines of Pan American Airways across the Caribbean and through Central America. The best interests of the Company require that its energies should be devoted to the intensive development of this important route, utilizing fully the technical, sales and traffic organizations of Pan American Airways; and that its energies should not be dissipated by attempted extensions into territories already served by Pan American.

2. An extension of the route of Pan American-Grace Airways from the Canal Zone to the United States would bring it into direct competition with the routes which Pan American Airways, 50% owner of Pan American-Grace, has operated for more than 13 years and for which it holds a certificate of convenience and necessity, as well as with the northern portion of the route of the Grace Steamship Line. Such a situation would be directly contrary to the public interest, as recently enunciated by the Civil Aeronautics Board, which said that there would be "inherent in such an arrangement, the possibility, where the interests of air and steamship transportation come into conflict, that an impasse would be reached concerning the policies of [fol. 532] the joint company which might obstruct or retard its activities and the development of air transportation."

3. Pan American-Grace Airways, in view of its obligations to the War Department and on its own route, has neither the equipment, the personnel nor the facilities required for even a limited twin-engined service between the Canal Zone and the United States. The proposal is therefore wholly academic.

4. The proposal is contrary to the basic agreement between Pan American Airways Corporation and W. R. Grace & Co., under which the two companies associated themselves to form Pan American-Grace. This agreement provided that the Company was to operate "on the route from the Panama Canal to Valparaiso," that Grace was to have an option to acquire an interest therein not to exceed more than 50% of the total capitalization, and that Pan American was to have charge of the operation. A departure from this basic agreement of the two stockholders has not and cannot be made without their agreement, and is outside the appropriate scope of action by the directors.

Mr. Trippe, Mr. Rihl and Mr. Morris concurred in these views.

Mr. Garni then made the following statement in which Messrs. Roig, Patchin and Cogswell concurred:

"I quite agree with Mr. Young's statement that no useful purpose will be served by extended discussion at this time. I will not attempt therefore to state our position fully.

"It does seem to me, however, that the position taken by Messrs. Young, Trippe, Rihl and Morris overlooks the fact that the matter is before this meeting in quite a different light than at any previous time. The CAB has by its [fol. 533] Order in Docket 779, made this company a party to a proceeding instituted by the CAB and in our opinion it is plainly the company's duty to appear in this proceeding and present its case from its standpoint as an independent entity. The object of my resolution is to enable the company to do this. The effect of the vote of Messrs. Trippe, Young, Rihl and Morris is to make this impossible. The CAB by its Order in Docket 778 has instituted an investigation of the entire situation in the Caribbean area on the ground that there exists in that area "a serious shortage of transportation facilities due to the war, which may

adversely affect the national defense and the relations of the United States with Latin American countries." The Order invites anyone able to do so to apply for temporary certificate to operate in this area to assist in relieving this war emergency. It seems to me that it is the duty of this company to respond to this invitation to the limit of its ability with due regard to its other obligations.

Commenting seriatim and very briefly on the four points raised by the Pan American Directors, I would merely like to say:

1. The relevancy to the present resolution of the reference to the Grace Line in this and in the next paragraph is not apparent. Competition for air traffic between the United States and Buenos Aires is not nominal and will become increasingly important. Panagra is devoting and will devote its energies to the intensive development of its main route as it has in the past. In doing this experience shows that it can count on very little constructive assistance from Pan [fol. 534] American Airways. We believe that extension of the company's route to a terminal or terminals in the United States is in no way inconsistent with the development of its present route but is essential to such development; that such extension is in the best interests of the company and in the public interest and that the company should present its position in this regard to the CAB in response to its Orders in Dockets 778, 779 and should offer any services within its power to the CAB to meet the war emergency.

2. There is nothing in the instant situation comparable to that before the CAB in the decision to which Mr. Young refers. The CAB with all the facts before it can determine the principles applicable to the present problem.

3. The statements in this paragraph are incorrect. Mr. Bibl, after a complete study, has stated to this meeting that it is entirely possible for Panagra to undertake, commencing now, three trips per week with a DC-3 airplane between Balboa and Miami. This service,

if begun now under the Order in Docket 778 may or may not have to be interrupted later owing to the company's obligations to the Air Transport Command depending on the time when the Air Transport Command is able to make equipment available to the company for this service. It is entirely possible that we may be able to run both services. Our feeling is that in view of the war emergency referred to in No. 778 the company should submit all the facts to the CAB and indicate its willingness to be of such help as it [fol. 535] can with due regard to its other obligations and that it should not totally decline any offer of assistance. As far as No. 779 is concerned that does not in any case contemplate immediate operation and there is no reason whatever to suppose that any Order of the Board issued in this proceeding will not afford ample opportunity to the Company to provide any equipment, personnel and facilities which may be necessary.

4. The proposal is not contrary to any agreement between W. R. Grace & Co. and Pan American Airways Corporation and the matter is not one to be determined by the stockholders of Panagra rather than by its directors. By agreement between W. R. Grace & Co. and Pan American Airways dated February 14, 1939 it is provided that if the Pan American connecting service between Miami and the Canal Zone is at any time inadequate Panagra shall be permitted to apply to the CAB for a certificate to operate this connecting service. Under this agreement the Pan American directors are clearly obligated to vote in favor of the resolution.

Messrs. Trippe, Young, Rihl and Morris dissented from the views expressed by Mr. Garni for the reasons set forth in the above statement made by Mr. Young. Mr. Rihl thereupon moved the following resolution which was seconded by Mr. Young:

WHEREAS, the Civil Aeronautics Board has instituted a proceeding known as Docket No. 779, "to de-

termine whether the public convenience and necessity require that the certificate of public convenience and necessity of Panagra should be altered, amended, and modified to authorize and require (a) that Panagra's route terminate in the United States at Miami or [fol. 336] Tampa, Florida; New Orleans, Louisiana; Brownsville or El Paso, Texas; Los Angeles, California; or at two or more of said points; and (b) in the event a terminal or terminals in the United States are authorized and required pursuant to this proceeding, that Panagra reserve one or more intermediate points between the Canal Zone and said terminal or terminals in the United States"; and

WHEREAS, the Board has made Panagra as well as Pan American Airways, Inc. and W. R. Grace & Co. parties to the said proceeding; and

WHEREAS, half of the capital stock of Panagra is owned by Pan American Airways Corporation and half by W. R. Grace & Co., and four of the directors of Panagra are officers of Pan American and the other four are officers of Grace; and

WHEREAS, an amendment of the certificate of public convenience and necessity of Panagra so that Panagra's route should terminate in the United States is favored by Grace and by the four directors of Panagra who are officers of Grace, and is opposed by Pan American and the four directors of Panagra who are officers of Pan American; and

WHEREAS, while in view of the foregoing Panagra as a corporation is not authorized to take any position in the said proceeding, it nevertheless requires the services of counsel, in order that all relevant facts desired by the Civil Aeronautics Board or by the parties to the proceeding may be elicited.

NOW, THEREFORE, BE IT

RESOLVED, that

If the retainer by Panagra of Gerhard A. Gesell, Esq. of Washington, D. C. [illegible] he shall be

unavailable, such other attorney as may be approved by Harold J. Roig, President, and [fol. 537] by either George L. Rihl, Vice President, of Panagra, or E. E. Young, Director of Panagra) to represent Panagra in C.A.B. Docket No. 779 be and the same hereby is authorized and approved;

(2) the two said officers of Panagra shall jointly request counsel to act and shall inform counsel that the proposed retainer is pursuant to this resolution of the Board of Directors;

(3) counsel shall be instructed that he is not to take any position in respect of the merits of the said proceeding, but that he shall see to it that all relevant information in the possession of Panagra which may be desired by the Civil Aeronautics Board or by the parties to the said proceeding, is made available to the Board and such parties, respectively, under such reasonable limitations as counsel may deem necessary in the interests of Panagra; and that counsel shall report to the said Harold J. Roig and the said George L. Rihl (or in the absence of said George L. Rihl, the said E. E. Young) jointly, shall act only on their joint instructions, and in the event of any difference of opinion between them shall report for instruction to the Board of Directors.

Vote being had on the above resolution same was passed. Messrs. Roig, Garni, Patchin and Cogswell in voting in favor of the resolution stated that Mr. Garni's resolution represented their views in the matter but they were voting in favor of Mr. Rihl's resolution in a spirit of compromise and to avoid a deadlock but without any implication from the preambles to said resolution that Panagra is not an independent entity or any implication except for the purpose of this resolution that Panagra should take merely a neutral position in the proceedings.

On motion of Mr. Garni, and seconded by Mr. Patchin, the following resolution was moved:

RESOLVED, that the proper officers of this corporation are hereby authorized to file application pursuant to Order of the CAB in Docket 778 dated September 10, 1942 for a temporary Certificate of Convenience and Necessity for operation between Miami and Balboa subject to our commitments to the Air Transport Command, under advice to the Air Transport Command, and to retain Counsel and take all steps necessary in the premises; said application to the CAB to contain full statement of our equipment and personal position with respect to our ATC commitment and to our other services.

[fol. 538] Vote being had, said resolution failed to pass, Messrs. Roig, Garni, Patchin and Cogswell voting in favor and Messrs. Trippe, Young, Rihl and Morris voting against.

Mr. Rihl stated that he desired to have recorded in the minutes a statement in explanation of his vote against the resolution just voted on.

He said that, in addition to the various fundamental objections which had been stated by Mr. Young on the resolution offered by Mr. Garni at the meeting of September 22 with reference to the permanent amendment of the certificate of Pan American-Grace in C.A.B. Docket No. 779, the comment made by Mr. Young as to the lack of equipment, personnel and facilities on the part of Pan American-Grace was peculiarly applicable to the temporary service covered in Mr. Garni's last resolution.

He stated that there had been no effort on the part of Mr. Roig and his associates to deny that if the Air Transport Command delivers planes in November and December of this year,—which was a month later than originally agreed to and which Mr. Rihl had confirmed to be the intention of the Air Transport Command—the lack of crews would make it impossible for Pan American-Grace to operate the planes to which it was committed even though the proposed temporary service were to be suspended. Fifteen additional crews would be needed for the Transport Command planes. As against this the Operations Department of Pan American-Grace has stated that it expects

to have two additional crews ready on December 1st, and four on January 1st with three others by the first of February—or six less than will be required for the Transport Command planes by the end of December.

[fol. 539] Moreover, from information submitted to the meeting it can be said without contradiction that the load factor of the Company is very high, averaging 75%, and between Balboa and Cali well over 90%, from the latest figures available. While high load factors are common under present conditions, it does seem plain that a company in the position of Pan American-Grace, i.e., unable to acquire additional commercial flight equipment and with limited available pilot personnel, should not think of taking on additional commercial commitments in new territory. This would seem particularly true when there is every indication that additional traffic will have to be handled by the Company immediately on its own route. Pan American Airways is doubling its commercial services to Balboa, and while a part of the traffic on this increased service will be local to the Zone, the remainder that will be destined to or originate at points on the West Coast cannot be handled except by increased utilization of the present equipment available to the Company,—particularly because of the limited capacity on the "bottleneck" between the Canal Zone and Cali. A three times a week service to Miami, which would have to be terminated in any event upon delivery of the Air Transport Command aircraft, would be of much less value to the war effort than the greatest possible utilization of the equipment and facilities available to the Company on its certificated route to meet acute traffic demands.

In the light of the above facts, the statement of Mr. Roig and his associates that they hoped and felt that some way could be found to continue the temporary service as well as operate the planes that are to be delivered by the Air Transport Command appears to be simply wishful thinking.

[fol. 540] Mr. Rihl stated that, believing that the facts in this statement were not subject to dispute, he felt that the only possible basis for Mr. Garn's resolution was a desire to extend the operation of Pan American-Grace to a

terminal in the United States without awaiting the decision of the Civil Aeronautics Board on that question in the proceeding (Docket No. 779) which had been initiated by the Board for that very purpose.

Messrs. Trippe, Young and Morris concurred in this statement.

Mr. Rihl asked that the letter of the Air Transport Command dated July 21, 1942, and the letters of Mr. Roig and Mr. Campbell to the Air Transport Command dated July 22 and August 6, 1942, be made part of the record of this meeting. Such letters are as follows:

"ARMY AIR FORCES
HEADQUARTERS FERRYING COMMAND
WASHINGTON

July 21, 1942.

"Pan American-Grace Airways, Inc.,
Attention: Mr. Douglas Campbell, Vice-President
New York, N. Y.

Gentlemen:

In connection with the plan of the Army Air Forces to utilize to the fullest extent possible the personnel and facilities of the civil air carriers, we would be interested in the operation by your company of services between Miami and Canal Zone, via Cozumel Island and Puerto Cabezas.

On the basis of present equipment figures, it is believed that three C53 or C47 aircraft can be assigned to this service in the month of October, with an additional two aircraft in the month of November. On that basis, one round trip should be available in the month of October and two round trips per day in the month of November.

It is expected that you would take responsibility for the maintenance of aircraft assigned to you and for the flight operation of such aircraft. Please inform us if maintenance facilities can be provided for such pur-

[fol. 541] pose and if flight crews sufficient for the operation can be made available by the dates given.

For the Commanding General:

C.R. Smith, Colonel, AUS
Chief of Staff
The Air Transport Command"

"PAN AMERICAN-GRACE AIRWAYS, INC.
NEW YORK

July 22, 1942.

"Commanding General
Air Transport Command
Washington, D. C.

Attention: Colonel C. R. Smith, Chief of Staff

Sir:

We beg to thank you for yours of July 21st and to advise that we will be glad to undertake the service between Miami and the Canal Zone via Cozumel Island and Puerto Cabezas.

We are in a position to make use of existing maintenance facilities at Miami and the Canal Zone and to provide such facilities at other necessary points.

We are entirely confident that flight crews sufficient for the operation can be made available by the dates indicated in your letter.

Awaiting your further instructions, we are

Respectfully yours,

PAN AMERICAN-GRACE AIRWAYS, INC.

(signed) H. J. Roig
President."

[fol. 542]

GOVERNMENT'S EXHIBIT 230

October 28, 1942.

L. Welch Pogue, Esq., Chairman,
Civil Aeronautics Board,
Washington, D. C.

Dear Sir:

We wish to confirm our position taken at this morning's conference.

We accept your suggestion in principle and, for the duration of the war, agree to the immediate addition to Panagra's Board of an odd director (satisfactory to both stockholders) who might also serve as Chairman of the Board, with the understanding that this individual will be free to decide independently and without limitation, and on the basis of Panagra's being an independent entity, all matters involving Panagra's operations with regard to which the Pan American and Grace directors may be unable to agree. Such an arrangement accomplished the same purpose as establishing a voting trust along the lines you suggested, while being less complicated and more easily put into effect.

For reasons pointed out this morning, the suggestion of Pan American that there be an odd director appointed, who would only have "power to break any deadlock on any questions arising in connection with operations of the company *that fall within the scope of the dedication of capital made by the two stockholders*" begs the entire question. Grace and Pan American are not in agreement as to what is the proper scope of the company's operations, and fourteen years' experience has shown that such deadlocks as arise almost invariably revolve around this very issue which Pan American Airways wishes to exclude from the jurisdiction of the odd director.

Very truly yours,

W. R. GRACE & Co.

(signed) A. GARSI
First Vice President

Copies to: Pan American Airways Inc.
Pan American Airways Corporation
Henry Friendly, Esq.

GOVERNMENT'S EXHIBIT 231

Minutes of Annual Meeting of the Board of Directors of Pan American-Grace Airways, Inc. held at the office of Pan American Airways, Inc., 135 East 42nd Street, New York, N.Y. on the 27th day of April, 1943 at 3:30 o'clock in the afternoon.

PRESENT:

Messrs W F Cogswell
Howard B Dean
H P Morris
R H Patchin
H J Roig
E E Young

being a quorum of the Board.

Mr H J Roig, President of the corporation, presided. Mr W F Cogswell, Secretary, acted as Secretary of the meeting.

Mr. Cogswell nominated the following to be officers of the corporation. Mr. Patchin seconded the nominations. No other nominations were made.

Harold J Roig	President
R H Patchin	Vice President
G L Rihl	Vice President
Douglas Campbell	Vice President
G Vidal	Vice President and Comptroller
Thomas J Kirkland	Vice President
John T Shannon	Vice President
W F Cogswell	Secretary
J S Woodbridge	Treasurer
H Preston Morris	Assistant Secretary

Mr. Young then made the following statement:

"The agreement between W. R. Grace & Co. and Pan American Airways Corporation, dated February 14, 1939, provides in part as follows:

> 'One of the Grace directors of Panagra (who shall also be a director of Grace) will be elected President of Panagra and placed in responsible charge of the management of the Company. If at any time the Company's affairs are not being conducted to Pan American's reasonable satisfaction, then the President will resign.'

[fol. 544] The affairs of Pan American-Grace Airways are not being conducted by the President to Pan American's reasonable satisfaction. The President has devoted himself to efforts to procure a compulsory extension of the route of the Company into an area beyond the scope of the original dedication of its capital. Such action, in the opinion of Pan American, would not only be contrary to the agreement under which the Company was formed but would be adverse to the Company's true interests. These efforts actually have as one of their principal objects the compulsory divestment of the interest of one of the two stockholders in the Company. Pan American cannot regard activities of this sort as consistent with the duties of the President.

Moreover, Pan American considers that Grace, both by its persistent refusal to submit to arbitration in compliance with paragraph 4 of the contract and by the general course of action which it has followed in the past eighteen months

has breached the agreement of February 14, 1939, so that Pan American is no longer obligated to comply therewith.

However, the agreement of February 14, 1939, may be terminated on or after February 1, 1944, which is prior to the next annual stockholders' meeting of Pan American-Grace Airways. By that time a decision may have been rendered in the proceeding (Docket No. 779) now pending before the Civil Aeronautics Board. Pan American believes that under these circumstances a dispute over the election of a president at this time would not be in the best interests of Pan American-Grace Airways, Inc. Accordingly, while the representatives of an American on the Board of Pan [fol. 545] American-Grace are unwilling to cast their votes for the reelection of Mr. Roig as President, they are attending the meeting for the purpose of furnishing a quorum and permitting the election of Mr. Roig by the directors representing W. R. Grace & Co. Messrs. Dean and Morris concurred in these views."

Mr. Roig thereupon made the following statement:

"In reply to Mr. Young's statement I would like to say simply that I have devoted my best efforts as President of this company to the administration of its affairs and to its sound development and progress.

In my honest opinion an extension of the company's route to a terminus in the United States is not beyond the scope of the company's purposes, nor contrary to the Agreement under which the company was formed, nor adverse to its true interests. On the contrary, in my judgment, such extension is in the public interest and in the best interests of the company. I cannot, therefore, consider such action as I have taken in this regard, which has not been activated by the ulterior motive suggested, to be inconsistent with my duties as President. Grace has not, in my opinion, breached the Agreement of February 14, 1939. I sincerely regret that the Pan American directors do not share these views."

Mr. Dean thereupon left the meeting. Vote being had, Mr Roig was elected President, Messrs Young and Morris refraining from voting.

[fol. 546] Mr Dean returned to the meeting and the remaining officers as nominated by Mr Cogswell were thereupon unanimously elected.

There being no further business, the meeting adjourned.

/s/ H. R.
Chairman

GOVERNMENT'S EXHIBIT 233

PAN AMERICAN AIRWAYS SYSTEM

Office of
Evan E. Young, Vice-President

January
7
1944

Dear Harold:

I received yesterday a copy of your telegram to Howard Dean (in Miami) in regard to the Miami-Balboa service, which he has asked me to answer.

I am glad to advise you that the Martin M-130 departed from Miami Wednesday night on schedule, and we have every reason to believe that this schedule will now be maintained. If there should be any further difficulty with the Martin M-130 before the return of the Boeing 307s to service, we are making arrangements to operate the Miami Balboa service by temporary use of an S-42B, which is now operating to San Juan. The Boeing 307s will be returned to service within ten days to two weeks after receipt of new spars which are expected to arrive in Miami this week.

The difficulty with the service between Miami and Balboa is temporary and due to causes entirely beyond our control. That structural trouble should develop simultaneously in two of the 307s was a circumstance for which we can hardly

be held responsible. It was extremely fortunate that just at this time we had been able to re-purchase the Martin M-130 from the Navy, and although this plane had been re-acquired by us for use in quite different service, we immediately placed it on the Miami-Balboa run. The difficulty since January 2 to which you refer was due to the facts that this plane developed engine trouble, and we had not yet received from the Navy the necessary parts which would have enabled us to have available built-up engine mounts to effect an immediate engine change, in accordance with our usual procedure, and therefore were delayed in correcting the engine trouble. We have been and are endeavoring to expedite the delivery of such additional parts from the Navy.

We do not agree with the remarks in your telegram concerning the New Orleans service. The structural difficulties which developed with the 307s would, of course, have developed regardless of the routes on which these planes were operated. It is true that these planes have been intensively utilized, as I know you will agree that they should be, but our figures show that utilization since the inauguration of GR-2582

10-21-52 PJS G-3509

[fol. 549] the New Orleans service has not been materially greater than during January and February 1943, when the planes were exclusively used in operating a second section in addition to the regular schedule between Miami and Balboa.

You may be sure that the matter referred to in your telegram is receiving *most earnest and continuous attention*, both in Miami and here.

Sincerely,

Evan E. Young (signed)

January 10, 1944

Mr. Evan Young
Pan American Airways
Chrysler Building
New York 17, N. Y.

Dear Evan:

Thank you for yours of January 7th and the news contained therein.

I understand that there has been no trip completed since Friday (January 7th) and that there is no indication when service will be resumed.

Referring to the next to the last paragraph of your letter, I am afraid my telegram did not make entirely clear what I had in mind. Granting the intensive use of equipment would have lead to difficulty with two of the three 307's wherever operated, my point is that the third 307 which has developed no difficulty and which is now being operated on the New Orleans run should be transferred to the Miami/Balboa run. My reason for this is, or course, that the Miami/Balboa service is of much greater importance than the other and that this important and long established route should have equipment preference in an emergency like this over the New Orleans route which was established (whether providently or otherwise) only a few months ago.

Very sincerely yours,

GR-2584

Mr. Harold J. Roig, President
Pan American-Grace Airways, Inc.
7 Hanover Square
New York 5, New York

Dear Harold:

I wrote you on February 4th as to the desirability, in connection with the exhibits to be presented to the Civil Aeronautics Board in the pending Latin American certificate case, of providing for interchange of four-engine equipment between Pan American Airways and Pan American-Grace Airways at the Canal Zone.

The desirability of providing for such an interchange seems particularly clear in view of the express schedules which Pan American-Grace proposes to show in its exhibits.

As you know, the exhibits are due on March 30th and while I understand that an application for an extension of time may be made, the matter is one requiring prompt decision.

Yours very truly,

Howard B. Dean

Mr. Howard B. Dean
Pan American Airways
Chrysler Building
New York 17, N. Y.

Dear Howard:

Yours March 13th.

Your letter of February 14th was, by no means, overlooked. On the contrary, I have been considering the matter from a good many different angles. In this connection the testimony pro and con in Docket 519 is interesting.

As you know, my past experience under this heading has not been such as to lead me to believe that there is any possibility of working out a satisfactory basis.

It is rather difficult at this time to accurately weigh the merits and demerits of equipment exchange in connection with the Constellation without really knowing definitely what the schedules will be with this equipment and whether or not passenger schedules will be operated with sleeper planes.

Extension of Panagra's route to Miami would, of course, eliminate the whole question so far as Miami is concerned and would solve the problem in a way in which no equipment exchange can ever do.

Have you considered the question of equipment exchange to Brownsville, New Orleans, Los Angeles and/or possibly other gateways which may be opened as a result of various

applications now pending? Similarly, have you considered equipment exchange with domestic lines from the various gateways through to New York, Chicago, San Francisco and other important interior points?

These are by no means all of the angles I have been considering but they are enough to indicate to you that the matter has been having attention.

Sincerely yours,

H. J. R.

Office of
Howard B. Dean, Vice-President

June 29, 1944

Mr. Harold J. Roig, President
Pan American-Grace Airways, Inc.
7 Hanover Square
New York 5, New York

Dear Harold:

During my recent trip to South America, two of Pan American's representatives on the Pan American-Grace board took up with you the question of the four-engined equipment which our joint company should plan to utilize for its future express services between the Canal Zone, Lima and Buenos Aires, with particular reference to the estimates in the pending *Latin American Certificate Case*, Docket 525 et al. They disclosed to you in confidence that Pan American Airways was planning to utilize, on certain

Latin American routes, four-engined land aircraft of larger and even more advanced type than the Constellation, and recommended that Pan American-Grace should plan to use this same type of aircraft for its express service between Balboa, Lima and Buenos Aires. These discussions were pending when, on May 18, 1944, all parties to the case were advised that the date for filing exhibits would be postponed to a date to be subsequently announced.

Now that exhibits are required to be filed on July 21, 1944, it is necessary to arrive at a prompt decision on this matter, as well as on the related subject of the through operation of equipment as to which I wrote you on February 4, 1944 and again on March 13, 1944.

Pan American's present plans include service to Balboa with the large equipment discussed, both from Miami and from Los Angeles as well as additional service from New Orleans with Constellation aircraft, all three of these connecting at Balboa with our joint company's express service.

In my judgment and in line with our past policy the way to keep the west coast service most effective is for Pan American-Grace to use the best possible equipment and where advisable in the interest of both parties make fair

PAG-X P 97
10-12-54
RLA

[fol. 556] and appropriate arrangements for its through operation. The Miami-Canal Zone-West Coast service seems to me an absolutely ideal situation for equipment interchange. In the light of the C.A.B.'s recent opinion, our joint efforts should be devoted to making Pan American-Grace the most effective possible "connecting carrier as to through traffic between the United States and South America"—to use the C.A.B.'s words.

If an arrangement for equipment interchange can also be made with the domestic airlines at Miami, so much the better; but I hardly think the present is the moment to take this up with them.

What we *can* do now is agree between us on this matter of equipment and interchange. In view of the early date

set for the exchange of exhibits, I am obliged to ask both that the subject matter of this letter receive immediate consideration and decision—and also, of course, that it continue to be treated on a confidential basis.

Sincerely yours,

/s/ Howard B. Dean

Mr. Howard B. Dean
Pan American Airways
Chrysler Building
New York 17, N. Y.

Dear Howard:

Yours June 29th.

I am not entirely clear what you have in mind with reference to equipment interchange particularly in view of the next to last paragraph of your letter. You refer to your letters of February 4th and March 13th but do not refer to my reply of March 21st to which I have had no answer.

Mr. Friendly and Mr. Balluder discussed with me and Mr. Tweed, in confidence, the question of using a larger

type of ship on our express service. As they have doubtless reported to you, the subject was discussed from several angles without reaching a conclusion. Then came the adjournment and there it rests.

Perhaps it would be better if we deferred invoking the C.A.B. in this matter until we have their final word.

If results and time savings are desired, I suggest that we sit down right away and talk these matters out instead of writing letters. At the same time, I think things would be greatly facilitated if the "confidential basis" to which you refer were removed so that I might discuss the proposition with my associates. There is certainly no mystery about the plane under discussion and I am sure that open discussion will not prejudice Pan American in any conceivable way and will greatly facilitate prompt and correct decision by our joint company in a matter of such great importance.

Sincerely yours,

/s/ HAROLD J. ROIG

Equipment

PAN AMERICAN AIRWAYS SYSTEM
General Offices, Chrysler Building, 135 East 42nd Street, New York 17, N.Y.

Office of
Howard B. Dean, Vice-President

July 20, 1944

Mr. Harold J. Roig, President
Pan American-Grace Airways, Inc.
7 Hanover Square
New York 5, New York

Dear Harold:

This is in reference to your letter of July 5, 1944 in answer to mine of June 29 on the subject of equipment interchange.

Accepting the suggestion in the last paragraph of your letter that "if results and time savings are desired,—we sit down right away and talk these matters out instead of writing letters," Henry Friendly and I met with you and your counsel, Mr. Tweed, at the latter's apartment on the afternoon of July 11. We presented to you at that time Pan American's program for equipment interchange with Pan American-Grace. We explained that what we had in mind was an interchange similar to that between United Air Lines and Western Express approved by the Civil Aeronautics Authority in its Docket No. 215, whereby each carrier's pilots operate the equipment on its own route, and revenues earned and expenses incurred in such operation are for the account of the carrier over whose route the equipment is being operated. You seemed to agree that such an interchange would be of advantage both in promoting the convenience of the travelling public and in reducing the number of four-engined aircraft that Pan American-Grace Airways would be required to purchase. You did not point out any respect in which such an equipment interchange would be anything but beneficial either to the public interest or to the interest of Pan American-Grace Airways.

Although you undertook to consider the matter and advise us promptly, ten more days have now gone by, and August 4, the date on which we and Pan American-Grace Airways, Inc., must submit our program for future air transport service in Latin America, is rapidly approaching.

I would be less than candid if I did not state that, in Pan American's opinion, the negative attitude which you have taken toward equipment interchange, both in the past and now, has been motivated, not by consideration of the

PAG-XP 100
10-12-54
RLA

[fol. 559] true interests of Pan American-Grace Airways as "a connecting carrier as to through traffic between the United States and South America"—to use the words of the Civil Aeronautics Board—but by a fear that the very advantages that would accrue from making of such an

arrangement would have an adverse effect upon the ambitions of W. R. Grace & Co. to change the status of Pan American-Grace Airways. Manifestly, we cannot permit our interest in Pan American-Grace Airways to be jeopardized by such a point of view.

As to your discussing with your associates the large equipment which we have proposed for operation by Pan American-Grace, we stated to you on July 11 that we had no objection to your doing this on a confidential basis if you were yourself prepared to consider the type of equipment under discussion.

Also, if you or your associates are not prepared to accept the idea of equipment larger than the Lockheed Constellation on Pan American-Grace's Canal Zone-Buenos Aires express service, we would be willing to arrange for an interchange at the Canal Zone on the basis of Lockheed Constellation equipment, in spite of our belief that larger aircraft should be used, as a temporary measure, and with the hope that you and your associates will reconsider their views on the equipment problem.

May I ask that this matter receive your prompt consideration.

Sincerely yours,

/s/ HOWARD B. DEAN
Vice President

Cable Address
"PANAGRA"

PAN AMERICAN-GRACE AIRWAYS, INC.

Office of the President
7 Hanover Square
New York 5, N.Y.

July 25, 1944

Mr. Howard B. Dean
Pan American Airways
Chrysler Building
New York 17, N. Y.

Dear Howard:

I really do not feel that your letter of July 20th is either accurate or fair. In the midst of preparation of Panagra's case in Docket 525, I have not the time to go into details but my omission to do so is not to be construed as an admission of any of the statements or conclusions in your letter.

The plan you and Mr. Friendly presented on July 11th and the point particularly played up, as Mr. Tweed and I understood it, was an exchange through to New York between Panagra, Pan American and Eastern. It later developed that you had never discussed such an exchange with Eastern and upon my suggestion, at our meeting on July 19th, that we do so now, you said that this was impossible for reasons which you mentioned. Your proposal, therefore, fell of its own weight and left nothing to be considered except the plan of exchange between Panagra and Panair previously discussed,—a very different idea.

PAA-6504
813 6/13/55

[fol. 561]

I see no reason for apology for the ambitions of W. R. Grace & Co. to promote Panagra's welfare and the public

interest by the best possible service between Panagra's line and the United States. If it be your interest in *Panagra* that concerns you, obviously the best way to avoid jeopardizing that would be for you to permit Panagra to extend its route to the United States by joining with the position taken by W. R. Grace & Co. in the still pending Docket 779. Certainly a through route is far better than any exchange agreement.

I have discussed this whole matter with Mr. Tweed, counsel for Panagra in Docket 525, and we do not see that Panagra's interests would be served by further discussion of this subject at this time.

Yours very truly,

/s/ H. J. Roig

GOVERNMENT'S EXHIBIT 242

July 27, 1944

Mr. Harold J. Roig, President
Pan American-Grace Airways
7 Hanover Square
New York 5, New York

Dear Harold:

I received this morning, July 27, your letter bearing date of July 25, 1944, in reply to mine of July 20.

Your characterization of what took place at Mr. Tweed's apartment is not accurate. Henry Friendly and I made it quite clear that although we did not believe a discussion of interchange with Eastern and National at this time would be profitable, we favored going ahead immediately with an interchange agreement between Pan American Airways and Pan American-Grace. That was the proposition which we left with you and on which you undertook to advise us.

Our position in this matter of interchange is perfectly simple and clear. We believe that an interchange of equipment between Pan American Airways and Pan American-Grace at the Canal Zone would enable Pan American-Grace better to discharge its function as a connecting carrier as to through traffic between the United States and South America. We understood at the meeting at Mr. Tweed's apartment that you felt so, too. If we are right, we want the interchange and want it now. If there are any reasons why we are wrong, we want to know from you definitely and specifically what these are.

We cannot accept your view that this matter, which vitally affects Pan American-Grace Airways, is one to be decided by you and Mr. Tweed. Will you please therefore consider this letter as a formal request for the calling of a special meeting of the Board of Directors of Pan American-Grace to consider and take action upon a proposal for interchange of equipment with Pan American Airways at the Canal Zone.

PAA-6507
813 6/13/55
JPC

[fol. 563] We request that this meeting be set for as early an hour as possible on Monday, July 31, or, if you would prefer, we would be glad to waive the formality of two days notice and have the meeting at any hour tomorrow, Friday, July 28, that would be convenient to you and your associates.

We also request that you come to this meeting prepared with full details as to the nature of the presentation to be made on behalf of Pan American-Grace Airways in Docket 525, so that I and my associates may have an opportunity to know what our company is proposing and to express our views about it.

In order to comply with legal formalities, I am having this letter signed also by Mr. Balluder.

Very truly yours,

GOVERNMENT'S EXHIBIT 243

Minutes of Special Meeting of the Board of Directors of Pan American-Grace Airways, Inc. held at the office of Pan American Airways, Inc., 135 East 42nd Street, New York, N.Y. on the 31st day of July, 1944 at 3:00 o'clock in the afternoon.

PRESENT:

Messrs	Erwin Balluder	A Garni
	W F Cogswell	H P Morris
	Howard B Dean	R H Patchin
	H J Friendly	H J Roig

being all the members of the Board.

There was also present Mr Tweed, Counsel for the company in Docket No. 525.

Mr H J Roig, President of the corporation, presided. Mr W F Cogswell, Secretary, acted as Secretary of the meeting.

The Secretary presented Call of the Meeting dated July 28, 1944 and the notice of the meeting, together with affidavit of mailing thereof on July 28, 1944 to all of the directors of the corporation.

At Mr Dean's request, Mr Roig summarized briefly our proposed presentation in Docket No. 525 and answered inquiries in respect thereto. Mr Dean voiced the regret of Pan American Airways that Mr Roig had not seen fit to adopt Pan American's suggestion as to the use of DC-7 equipment which Mr Dean believed to be more economical and to permit a greater reduction in passenger fares, and also that the presentation was not to include a more definite statement as to such a reduction.

Mr Dean stated that it was well known to the directors that Pan American Airways had long entertained the view that the operation of equipment through the Canal Zone under an appropriate equipment interchange agreement between Pan American Airways and Pan American-Grace Airways would be in the public interest and in the interest

GR-9409
/12/55

G051461

[fol. 565] of Pan American-Grace Airways. He said that it was unnecessary to recall all of the various proposals for such an interchange which the representatives of Pan American Airways had made and the representatives of W R Grace & Co had rejected over the years, since these were a matter of record and he had no intention of engaging in controversy as to the merits or demerits of any of these past proposals.

Mr Dean said that in Pan American's opinion the pendency of the *Latin American Certificate case* (Docket No. 525 et al.) made it of the utmost importance that arrangements for such an interchange of equipment should be made, at least in principle. This would enable Pan American-Grace Airways to represent to the Civil Aeronautics Board that it was in a position to offer through plane service between the continental United States and points on the west coast of South America and Buenos Aires. He stated that in order that the management of Pan American-Grace Airways might have ample time to consider this matter, he had brought it up as early as February 4, 1944. In the interval since that date a considerable number of letters had been exchanged and conferences held. It appeared to Mr Dean, from the remarks made by Mr Roig at a conference held on July 11, that Mr Roig also considered that such an equipment interchange agreement would be in the interests of the traveling public, particularly in avoiding the danger of missed connections and change of plane at the Canal Zone, and that such an arrangement might also result in equipment economies for Pan American-Grace Airways. However, these discussions had had no result, and had culminated in a letter from

Mr Roig dated July 25, which in Mr Dean's judgment simply evaded the issue and ended with a statement that Mr Roig and Mr Tweed did not feel that Pan American-
GR-9410 G051462
[fol. 566] Grace's interest would be served by further discussion of the subject at this time. Mr Dean said that in his opinion this was a matter which neither Mr Roig nor Mr Tweed had authority to decide for the company and that he had therefore requested this meeting.

Mr Dean stated that he was authorized on behalf of Pan American Airways, Inc., to enter into and conclude with Pan American Grace Airways arrangements for the interchange of four-engined equipment at the Canal Zone, subject to approval by the Civil Aeronautics Board. Mr Dean stated that while Pan American had considered that the large carrying capacity and low passenger mile cost of the DC-7 made it the ideal plane for operation both on Pan American's express service between Miami and the Canal and on Pan American-Grace's express services south of the Canal, Pan American was entirely willing to discuss the interchange of any other type of four-engined equipment. Mr Dean stated that Pan American hoped that a similar interchange agreement might eventually be concluded with the domestic airlines operating from the gateways but that the fact that discussion of such an agreement at a time when these airlines themselves hoped to extend their lines into Latin America would hardly be profitable was no reason why Pan American and Pan American-Grace should not unite in doing what could now be done, namely, conclude an interchange agreement at the Canal.

Mr Dean said that the advantages to Pan American-Grace Airways of an equipment interchange agreement with Pan American Airways along the lines of the United Air Lines-Western Air agreement seemed to Pan American to be evident. He said that he had heard of no argu-
GR-9411 G051463
[fol. 567] ments to the contrary, but that if there were any reasons making such an interchange agreement undesirable from the standpoint of Pan American-Grace Airways, he wished that the Grace directors would state them

so that the Pan American directors should be able to consider them.

Mr Dean thereupon made the following motion:

WHEREAS, Pan American Airways Corporation believes that it is in the interest of the traveling public, in the public interest, and in the interest of Pan American-Grace Airways, that an agreement be entered into by Pan American-Grace Airways, Inc. with Pan American Airways, Inc., the holder of certificates for operation between the United States and the Canal Zone, for the interchange of four-engined equipment at the Canal Zone which would permit the through operation of four-engined equipment between a point or points in the continental United States and points on the routes of Pan American-Grace Airways, such agreement to be substantially along the lines of the agreement between United Air Lines and Western Air Express, approved by the Civil Aeronautics Board in said Board's Docket No. 215; and

WHEREAS, Pan American Airways, Inc. has proposed the making of such an interchange agreement with respect to DC-7 aircraft, or if Pan American-Grace Airways is of the opinion that the utilization by it of equipment of such size is not presently warranted, then with such other type of four-engined equipment as may be presently agreed upon by the appropriate officers of the respective companies; and

WHEREAS, Pan American Airways Corporation, as owner of 50% of the stock of Pan American-Grace Airways, considers that the conclusion of such an arrangement would enable Pan American-Grace Airways more effectively to perform its duties as "a connecting carrier as to through traffic between the United States and South America" as set forth in the opinion of the Civil Aeronautics Board in said Board's Docket No. 779; and

WHEREAS, Pan American Airways Corporation, considers that it will be seriously detrimental to Pan

American Grace Airways if the presentation to be made on behalf of Pan American Grace Airways in Docket No. 525 does not include a statement that

GR-9412 6051464

[fol. 568] arrangements for such an interchange agreement have been or will be made; and

WHEREAS, Pan American Airways has stated its willingness to discuss at an appropriate time arrangements with domestic carriers serving Pan American Airways' gateways in the United States for the through operation of the equipment to be so interchanged with Pan American-Grace Airways;

NOW, THEREFORE, BE IT RESOLVED (1) That the President of the Company be, and he hereby is, authorized and directed to enter into negotiations with Pan American Airways, Inc., with respect to an interchange of four-engined equipment at the Canal Zone, as described in the preambles to this resolution, to conclude an agreement for such interchange with all practicable speed, and to present such agreement when concluded for the approval of the Civil Aeronautics Board; and (2) That the President of and counsel for this Company be directed to include in the presentation to be made on behalf of this Company in Docket No. 525 a statement that this Company intends to make, or has made, such an equipment interchange arrangement.

Vote being had, said resolution failed to pass, Messrs Ballinger, Dean, Friendly and Morris voting in favor and Messrs Cogswell, Garni, Patchin and Roig voting against.

Mr Patchin then made the following statement:

"On my own behalf and on behalf of Messrs Garni, Roig, and Cogswell, I should like to state our reasons for voting against the motion." While the proposal is not a new one, we do not agree with Mr Dean's summary at the opening of his statement regarding what has previously taken place concerning it. It was thoroughly ventilated in the hearing in Docket 779. We have considered it anew during the

past few days. We do not understand just why Pan American should be attempting to force the proposal at this time. We can see no reason for doing so from Panagra's standpoint and it seems clear that their concern must be related to the interests of Pan American rather than to
GR-9413 G051465
[fol. 569] those of Panagra.

"In view of Mr Dean's reference to certain letters exchanged with Mr Roig, I would like copies of all of those letters to be attached to the minutes as a part of this statement. As only a few minutes have been available to study Mr Dean's statement, I would like to reserve the right to amplify my statement if I deem it advisable later.

"We consider that the proposed equipment exchange agreement between Pan American and Panagra would not be in the best interests of Panagra for these reasons:

"1. In Docket No. 525 Eastern Air Lines, National Airlines and perhaps others have applied for a route between Miami and Balboa, while several applicants propose direct service between New York and Balboa. When the Board has decided what carriers are to operate between the United States and Balboa, that will be the time for Panagra to consider equipment exchange agreements with one or more of the carriers operating to the Canal Zone. Clearly, it is not in the interest of Panagra to limit its freedom of action, negotiation and contract by entering into an exchange agreement at this time with Pan American involving only the sector between Miami and Balboa, to the exclusion of other arrangements which may be much more beneficial to Panagra, particularly with reference to direct connections with New York.

"2. At the present moment any exchange agreement between Pan American and Panagra would be purely theoretical. The different type of equipment operated by the
GR-9414 G051466
[fol. 570] two companies makes such an exchange at this time physically impossible. The date when it would be even possible to have uniform equipment is some time in the future. Under these conditions and in view of all the uncertainties which the future holds, the making of an

equipment exchange agreement now which can be relied upon to prove as beneficial to Panagra as one made in the future is a practical impossibility.

"3. An extension of Panagra's route to a terminal in the United States is manifestly more in Panagra's interest than the proposed equipment exchange agreement. So long as the question whether the Civil Aeronautics Board will direct such an extension remains pending in Docket No. 779 or in the courts, it is not good judgment for Panagra to enter into an arrangement which constitutes a far less favorable solution of the problem. Mr Dean recognizes this when he states that discussion of exchange with domestic lines would be unprofitable at this time when they themselves hope to extend their lines to Latin America.

"Accordingly, we propose that the Board of Directors adopt a solution to the problem which is obviously in Panagra's best interest as well as in the interest of the public—namely, the extension of the Company's route to a terminal in the United States. The Civil Aeronautics Board has frequently referred to the advantages of single carrier direct through service. This is preferable to the adoption of an inferior and temporary expedient, for equipment interchange between two carriers is at best a poor substitute for direct through service by a single carrier.

G051467
GR-9415

[fol. 571] "Consequently, I move the adoption of the following resolution:

> RESOLVED that the Company take action forthwith to secure the extension of its route from Balboa to a terminal in the United States, as is required in the interests of this Company and in the public interest; and
>
> RESOLVED FURTHER that the President is hereby authorized to file an application on behalf of the Company for the extension of its route from Balboa to Miami or such other point in the United States as the Civil Aeronautics Board may determine."

Vote being had, said resolution failed to pass, Messrs Cogswell, Garni, Patchin and Roig voting in favor and

Messrs Balluder, Dean, Friendly and Morris voting against. Mr Dean stated that the reasons prompting himself and his colleagues to vote against this resolution appeared in the minutes of earlier meetings and in the presentation made on behalf of Pan American Airways in Docket No. 779, and that there was no need of repeating them here.

There being no further business, the meeting adjourned.

PAN AMERICAN AIRWAYS CORPORATION
15 EXCHANGE PLACE, JERSEY CITY, N.J.

April 3, 1945

W. R. Grace & Co.
7 Hanover Square
New York 4, New York

Dear Sirs:

It is our understanding that at the meeting of the Board of Directors of Pan American-Grace Airways, Inc. which is to take place tomorrow, your representatives may again bring up the question of that company's applying to the Civil Aeronautics Board for a certificate to operate a connecting service between the Canal Zone and the continental United States.

As you are aware, we take the position that this question is governed by the agreements between our two companies. We refer in particular to the original agreement of August 31, 1928, under which our two companies agreed to "as-

sociate for the commencement of an airplane service in Peru with the view of ultimately inaugurating a through mail service from the Panama Canal to Valparaiso, Chile," and to the further agreement of February 14, 1939. This latter agreement, which was made for the purpose of settling this identical question, provided that one of your representatives on the Board of Pan American-Grace would be elected President of that Company, and that on the other hand that we were to cause our Directors on the Board of Pan American-Grace to take action that would permit an application for a route between the Canal Zone and the United States only if Pan American Airways, Inc. failed to supply "an adequate direct connecting service."

The agreement of February 14, 1939, also provided that any disputes arising under the general plan embodied in the agreement, including any question as to the adequacy of Pan American's direct connecting service, should be determined by arbitration. We therefore request arbitration pursuant to the terms of that agreement.

Very truly yours,

PAN AMERICAN AIRWAYS CORPORATION

By J. T. Trippe
President

[fol. 573]

GOVERNMENT'S EXHIBIT 245

Minutes of Regular Meeting of the Board of Directors of Pan American-Grace Airways, Inc., held at the office of Pan American Airways, Inc., 135 East 42nd Street, New York, N. Y. on April 4, 1945 at 9:15 o'clock in the forenoon.

PRESENT:

Messrs. Erwin Balluder
W F Cogswell
Howard B Dean
Henry J Friendly
A Garni
H Preston Morris
R H Patchin
H J Roig

being all the members of the Board.

Mr. H J Roig, President of the corporation, presided. Mr. W F Cogswell, Secretary acted as Secretary of the meeting.

• • •

Mr. Garni thereupon made the following statement in which Mesrs. Roig, Patchin and Cogswell concurred:

"As reported to the Board at the meeting of March 15, 1945, the Report of the Examiners, Francis W. Brown and H. Heinrich Spang, served March 5, 1945, in the Proceeding before the Civil Aeronautics Board, designated Docket 525, contains recommendations which raise questions of the greatest importance to this company's welfare.

A service by Eastern from Miami to Balboa and by Braniff from Houston to Balboa combined with an extension of Pan American's East Coast route to provide through service to New York, all of which the Examiners recommend, while this company remains with no through service at all, would result in very great injury to this company.

While the company, through its counsel, has filed exceptions to these recommendations it cannot adequately maintain them or fully defend its position in Docket 525 unless [fol. 574] it file application for extension of its route from Balboa to a terminal or terminals in the United States.

The purpose of the Proceeding in Docket 525 is to establish a postwar air service pattern for United States air carriers in Latin America. Unless this company be given its proper place in such pattern now, it will be unable to secure it later. If that pattern is established in such fashion that this company remains dead ended at Balboa while domestic carriers such as Eastern and Braniff take over its proper role as a through carrier to the United States and are placed in position to become potential competitors in South America while at the same time Pan American's competitive East Coast line is given a through service to New York, this company must look forward to gradual weakening of its position and even possible elimination as an American international air carrier.

The extension of the routes of Eastern and of Braniff to Balboa would not only indefinitely defer if not completely destroy all possibility of the route of this company ever being extended to a terminal in the United States but would largely destroy the benefits of such extension if it were later secured. On the other hand, it would make the extension of the routes of Eastern and Braniff southward from Balboa into territory served by this company almost inevitable. Both Eastern and Braniff, in their original applications applied for routes in the continent of South America and Braniff is still pressing its application. Such routes would result in irreparable injury to this company [fol. 575] since an American international airline operating exclusively abroad without even a terminal in the United States cannot compete effectively with American domestic airlines with through services and extensive domestic networks within the United States. Additionally the lack of a United States terminal would greatly weaken this company's position with respect to foreign competition which, under the terms of the International Air Transport Agreement, is free to operate to and from the United States terminals. Meanwhile extension of Pan American's East

Coast South America route to New York, without simultaneous extension of the route of this company via the West Coast of South America to the United States, would result in great disadvantage to and discrimination against the West Coast countries of Ecuador, Peru, Bolivia, and Chile and would give the East Coast service to Buenos Aires an overwhelming advantage which would result in the diversion to the East Coast route of the greater part of this company's normal traffic between the United States and Buenos Aires.

The Examiners Report states in effect that in the Latin American air service pattern Panagra is the logical operator to serve the sector between Balboa and the United States and that they recommend the extension of Eastern's route into this sector because Panagra has not filed application for extension of its route to the United States. The language of the Report indicates that this is the reason Eastern is recommended for the route between Miami and Balboa and that this or some other route extending Panagra to the United States would have been recommended by the Examiners had Panagra filed an application for such extension. Similarly Public Counsel in their brief find this company entitled to be certificated for the Balboa-New York [fol. 576] service and that "such an authorization would also provide the greatest public convenience" (Brief p. 59). The Examiners' Report states:—

> "Another consideration which is of considerable importance is the need of Panagra for an independent connection to the United States. As heretofore indicated, at the present time Panagra is dependent upon connections with Pan American at Balboa for traffic from the United States to points along its route. A substantial portion of the traffic moving over Panagra's route originates or terminates in the United States, as demonstrated by the fact that during the year 1941 almost 40 percent of the Canal Zone traffic from the United States consisted of passengers received from or transferred to Pan American at Balboa. In view of the conclusion heretofore reached that the traffic potential south of the north coast of South America is not suffi-

cient to justify the establishment of an additional American flag carrier, Panagra should be in a position to compete on an equal footing with Pan American for the traffic destined to the common terminal point of Buenos Aires. In order to accomplish this purpose it should be relieved of its dependence upon Pan American for connecting service from the United States.

W. R. Grace in a petition filed in this proceeding and in its brief urged that the Board find that the public convenience and necessity require the extension of Panagra's route from Balboa to the United States and that a certificate be issued to it authorizing such a service. A similar proposal was before the Board in the so-called *Panagra Terminal Investigation* case (*Panagra Terminal Investigation*, Docket No. 779 decided May 24, 1944). In that case after an extended hearing, the Board concluded that the extension of Panagra's route from the Canal Zone to the United States would not be an alteration, amendment, or modification of its certificate within the meaning of section 401 (h) of the Act in the sense that the Board could compel such an extension in the absence of an application from Panagra. Since there is no application by Panagra in the present case the reasoning of the Board would appear to apply with equal force and accordingly the petition of W. R. Grace should be dismissed. In view of this recommendation and the previous conclusions it follows that an independent operation should be authorized between the United States and the Canal Zone."

[fol. 577] We and W. R. Grace & Co. have sought continuously over several years to secure the approval of Pan American and of its directors and of its President, Mr. Juan T. Trippe and of its directors on the Board of this company to the filing of an application by this company for an extension of its route from Balboa to the United States. Such approval has at all times been refused. W. R. Grace & Co. brought the matter to the attention of the Civil Aeronautics Board and sought their assistance. The Proceeding before the Civil Aeronautics Board known as Docket

779, to which the Examiners refer, was thereupon instituted by the Board under Section 401 (h) of the Civil Aeronautics Act to determine whether in the public interest the Board should compel an extension of Panagra's route to the United States. Pan American vigorously opposed such extension in that proceeding and the Civil Aeronautics Board, on Motion of Pan American, ruled that it was without jurisdiction to order the extension in the absence of an application by this company therefor. In Docket 525, W. R. Grace & Co. is again seeking relief from the Civil Aeronautics Board as indicated in the above quotation from the Examiners' Report. Pan American is opposing the granting of the petition of W. R. Grace & Co. and the Examiners have found that by reason of the Board's ruling in Docket 779 they are unable to recommend extension of the company's route in Docket 525 in the absence of application by this company therefor.

In order that this company may protect itself in the crisis which now confronts it (as Pan American is itself doing in numerous applications for extensions it has filed with the Civil Aeronautics Board including its recent application for routes within the continental United States) and if possible avoid the great damage it will sustain [fol. 578] through its having in the past failed to avail of the opportunity open to it, as indicated in the Examiners' Report, of securing a through route from Balboa to the United States, it is desirable and necessary that this company file without delay an application to extend the route of this company from Balboa, Canal Zone to the United States. What we originally sought as an advantageous development of this company's air service has now become necessary to the preservation of its very existence. Failure to secure such extension to the United States in connection with Docket 525 will not only deprive this company of the highly advantageous opportunity to enlarge and improve its service but will imperil its very existence as an American international air carrier and will result in great injury and damage to the company and to its stockholders;—a damage for which those responsible must assume full liability.

In view of all the foregoing, I move the adoption of the following resolution:—

RESOLVED

1. That this company apply forthwith for an extension of its route from Balboa to New York and New Orleans and in the alternative to Miami and New Orleans as the Civil Aeronautics Board may determine and via such intermediate points as they may designate.

2. That this company take such further action incidental to or relating to any and all of the foregoing matters as the President may deem appropriate including, if he deem it advisable, the formation of a 100% owned and integrated subsidiary company and the filing of application for the routes referred to by said company.

3. That the President of the company and other officers be and they are hereby authorized to do all such things as they may deem desirable to carry out the foregoing.

[fol. 579] Mr. Cogswell seconded Mr. Garni's motion.

Mr. Dean stated that the directors who were representatives of Pan American Airways Corporation were fully aware of their responsibilities but that it must be plain that they could not agree to the resolution proposed by Mr. Garni. The subject had been discussed on so many occasions and at such length that he would not attempt to make a full statement of Pan American's position. However, he did wish to refer back to the minutes of the meetings of September 22, 1942 and July 31, 1944 and to make the following additional remarks:

(1) Pan American Airways Corporation considers the subject-matter of the proposed resolution to be covered by the agreement of the two stockholders dated August 31, 1928 and the supplementary agreement dated February 14, 1939. It renews its previous offers to submit the question under discussion to arbitration, as provided in the 1939 agreement, and asks to have incorporated in the record of these proceedings a letter to W. R. Grace & Co. reaffirming that offer. It considers its position as to the effect of the agreements to be directly supported by the opinion of the Civil

Aeronautics Board in Docket 779 in which the Board stated "that to extend the Panagra system from the Canal Zone to a point in Florida would constitute a basic transformation of the character of the carrier."

(2) Pan American Airways Corporation believes also that the evidence both in Docket 779 and Docket 525 et al. demonstrates that service by two American-flag carriers between the Canal Zone and the Eastern United States [fol. 580] would be uneconomic. This would very definitely be the case on the basis of the traffic estimates submitted in Docket 525 by Pan American-Grace itself.

(3) Pan American Airways Corporation and Pan American Airways, Inc. have long been of the view that, in order to eliminate the necessity of a change of plane at the Canal Zone, it would be advantageous for Pan American Airways, Inc. and Pan American-Grace to enter into arrangements for equipment interchange, but all efforts to secure the assent of the Grace directors to such arrangements have been unavailing. Recent opinions of the Civil Aeronautics Board have shown great interest in this type of arrangement on the part of the Board. Pan American Airways, Inc. wishes to reiterate to Pan American-Grace its desire to make such interchange arrangements with Pan American-Grace at the Canal Zone as would best serve the public interest.

While the directors representing Pan American Airways Corporation are thus unable to join in the action sought by the directors representing W. R. Grace & Co., they would of course, be glad to join with the Grace representatives in discussions with any appropriate Governmental authorities.

Letter referred to in Mr. Dean's statement:—

"W. R. Grace & Co.
7 Hanover Square
New York 4, N. Y.

April 3, 1945

It is our understanding that at the meeting of the Board of Directors of Pan American-Grace Airways, Inc. which is to take place tomorrow, your representatives may again bring up the question of that company's applying to the Civil Aeronautics Board for a certificate to operate a connecting service between the Canal Zone and the continental United States.

As you are aware, we take the position that this question is governed by the agreements between our [fol. 581] two companies. We refer in particular to the original agreement of August 31, 1928, under which our two companies agreed to "associate for the commencement of an airplane service in Peru with the view of ultimately inaugurating a through mail service from the Panama Canal to Valparaiso, Chile," and to the further agreement of February 14, 1939. This latter agreement, which was made for the purpose of settling this identical question, provided that one of your representatives on the Board of Pan American-Grace would be elected President of that Company, and that on the other hand that we were to cause our Directors on the Board of Pan American-Grace to take action that would permit an application for a route between the Canal Zone and the United States only if Pan American Airways, Inc. failed to supply "an adequate direct connecting service."

The agreement of February 14, 1939 also provided that any disputes arising under the general plan embodied in the agreement, including any question as to the adequacy of Pan American's direct connecting service, should be determined by arbitration. We therefore request arbitration pursuant to the terms of that agreement.

Very truly yours,

PAN AMERICAN AIRWAYS CORPORATION

By J. T. Trippe, President"

Vote being had said resolution failed to pass, Messrs. Roig, Garni, Patchin and Cogswell voting in favor and Messrs. Dean, Balluder, Morris and Friendly voting against.

Messrs. Garni, Roig, Patchin and Cogswell requested that the following statement appear in reply to Mr. Dean's statement:

1. Regarding the subject of arbitration we refer to W. R. Grace & Co.'s reply to Pan American Airways Corpora-

tion's letter dated April 3rd, copy of which will be attached to these minutes. The agreement dated February 14, 1939 was not "supplementary" to the letter of August 31, 1928 which you refer to as "the agreement of the two stockholders dated August 31, 1928."

[fol. 582] 2. This company submitted no estimates in Docket 525 relating to the routes referred to in the application we now propose. We believe the routes we propose would be profitable in themselves and would add greatly to the strength and earning power of this company's route in South America. The problem now confronting this company, however, is not whether or not a route between Balboa and the United States would in itself be "uneconomic" or otherwise. The fact is that such a route is necessary to protect the company's route in South America.

3. Our position with reference to Pan American's current proposals of equipment interchange is stated in the minutes of the meeting of July 31, 1944 to which we refer. The validity of the suggestion of Pan American's directors of this solution of the problem may be judged by contrasting it with Pan American's consistent insistance on through routes instead of equipment exchange in their own operations including the statement in their recent application for extension to interior points in the United States that the granting of foreign routes to domestic airlines "would make it impracticable for Pan American to continue to offer the character and quality of service under the certificates held by it which the public convenience and necessity requires, unless Pan American were itself to engage in domestic air transportation." That is precisely the reason we desire to apply for the proposed extension and the reason why equipment exchange is no more a solution in our case than in Pan American's. The merit of their [fol. 583] suggestion may further be weighed in the light of the unwillingness of Pan American's directors to give any indication in reply to our question as to whether, if Eastern is ultimately extended to Balboa, the Pan American directors would agree to this con-

pany's entering into an equipment exchange with Eastern through to New York which would obviously be greatly preferable to an exchange with Pan American merely as far as Miami.

Referring to the last paragraph of Mr. Dean's statement, we would be delighted to join with the Pan American representatives "in discussions with any appropriate Governmental authorities" and request that you forthwith designate your representative or representatives to join with the President of this company as our representative in discussions as suggested. We propose Mr L. Welch Pogue, Chairman of the Civil Aeronautics Board as the Governmental authority with whom such discussions be begun.

• • •

Mr. Friendly requested that the following additional statement on behalf of Messrs. Dean, Balluder, Morris and himself should appear in answer to the foregoing statement of Mr. Garni:

1. We wholly disagree with the interpretation of the agreement of February 14, 1939, set forth in Mr. Inglehart's letter of April 10, 1945, and in the opinion of Mr. Fred J. Knauer dated April 9, 1945. This subject is dealt with in the reply of Pan American Airways Corporation dated April 14, 1945 to Mr. Inglehart's letter and in the opinion of counsel to Pan American, copies of which we ask to have included in these minutes.

[fol. 584] 2. It is realized that Pan American-Grace submitted no evidence in Docket 525 relating to routes north of the Canal Zone. However, the Company did submit estimates in that Docket as to the amount of traffic south of the Canal Zone, and it is quite possible to derive from these estimates, as well as from the data presented in Docket 779, an indication of the estimated traffic between the Canal Zone and the Eastern United States. The very arguments which have been made by Pan American-Grace as to the uneconomic character of certifying additional carriers in

South America apply equally between the Canal Zone and the Eastern United States.

3. The third paragraph of Mr. Garni's statement does not correctly set forth the position taken by the Pan American directors at the meeting in answer to a question then propounded by Mr. Roig whether if Eastern were ultimately extended to Balboa, they would agree to Pan American-Grace's entering into an equipment exchange with Eastern. The statement of the Pan American directors was that they would be quite prepared to consider this matter if Eastern were certificated and if Eastern were then to be willing to enter into an equipment interchange with Pan American-Grace, but that in view of the facts that Eastern had not been so certificated and that Eastern had consistently opposed the whole idea of equipment interchange, there was no purpose in discussing the matter at this time.

In connection with the last paragraph of Mr. Garni's statement accepting the proposal made by the Pan [fol. 585] American representatives at the meeting of April 4 that they "would be glad to join with the Grace representatives in discussions with any appropriate Governmental authorities," it should be clear for the record that this acceptance did not occur at that time but only in an extension of Mr. Garni's remarks which was not received by the Pan American representatives until April 12. Pan American hereby designates Mr. Friendly as its representative to join in such discussions with Mr. Roig as a representative of W. R. Grace & Co. It welcomes the suggestion that these be begun with Mr. L. Welch Pogue, Chairman of the Civil Aeronautics Board.

* * *

There being no further business, the meeting adjourned.

Attention of the President

Gentlemen:

We acknowledge receipt of your letter of April 3rd.

This letter was obviously written before Mr. Garni's statement to the meeting of the Board of Directors of Pan American-Grace Airways, on April 4th, copy of which we enclosed.

In substance your letter asks that we should arbitrate the pending issue. This issue is not morally legally or practically a subject for arbitration. We attach herewith opinion of Counsel making clear the legal question. Having personally made the agreement of February 14, 1939 with Mr. Whitney, I know that it never contemplated arbitration of any such issue as the present one.

The real issue is the choice between permitting Panagra to realize its normal destiny to come through to a terminal in the United States as part of the Latin American air pattern being worked out by the Civil Aeronautics Board in Docket 525 or of abandoning this opportunity and allowing this service to be taken over by one of the domestic airlines and, so creating a competition to Panagra that would seriously prejudice your interests and ours and that would, we believe, prejudice rather than benefit the national interest. The Examiners' Report in Docket 525 makes it reasonably clear that Panagra rather than Eastern would have been recommended for the Balboa United States connection if you had permitted Panagra to apply therefor.

We have had reason to believe but have hesitated to accept the theory that you were willing to sacrifice Panagra's interest in this matter in order to avoid possible prejudice to the interests of your company in connection with the plan you are advocating of a "Chosen Instrument" to control all American international aviation. In view, however, of the critical condition that has arisen and of the refusal of your representatives on the Panagra Board to agree to action necessary to meet it, we need hardly call your attention to the serious responsibility that this places on Pan American Airways Corporation and its Directors.

We are sending copies of this letter with enclosures to the members of your Board of Directors.

Very truly yours,

W. R. Grace & Co.

D. S. Iglehart, President

Attention of the President

Dear Sirs:

We acknowledge receipt of your letter dated April 10th in response to ours of April 3rd.

It is correct, of course, that our letter of April 3rd was written prior to Mr. Garni's statement to the meeting of the Board of Directors of Pan American-Grace Airways, Inc. on April 4th. However, previous discussions between our representatives and yours had accurately indicated the nature of the proposal which Mr. Garni would make and the grounds that he would advance, and nothing in his statement would alter the position taken in our letter.

We wholly disagree with your statement that the pending issue "is not morally, legally or practically a subject for arbitration." Our counsel have advised us that legally it is subject to arbitration under our agreement of February 14, 1939. We enclose a copy of their opinion. Aside from the legal obligation to arbitrate we are at a loss to understand why any business man having confidence in the equity of his position would consider a question of this nature not to be "morally" or "practically" a subject for arbitration.

You refer to the possibility that in Docket 525 the Civil Aeronautics Board might authorize service between the United States and the Canal Zone to be conducted by a domestic airline, thus "creating a competition to Panagra." If such action were to be taken, the domestic airline competition would be for Pan American's wholly owned service between the United States and the Canal and not for the West Coast portion of the System conducted by Pan American-Grace Airways.

You refer to the fact that our Company has taken the position that the interests of the United States would be

3955
PAA
1/4/55
JH

[fol. 588] best served if its international air transportation were to be conducted by a community company uniting all interests able to contribute to the development of this service,—including not merely the existing international operators but also the domestic airlines, the railroads and the steamship companies. We sincerely believe this policy to be in our country's best interest, for reasons which have

been publicly presented at a recent hearing before the Senate Committee on Commerce. However, our attitude with respect to the subject of this letter is based upon the particular facts and circumstances relating to Pan American-Grace Airways, which have been repeatedly discussed between your representatives and ours, and not upon the general questions to which you refer.

Very truly yours,

PAN AMERICAN AIRWAYS CORPORATION,

GOVERNMENT'S EXHIBIT 248

TELEPHONE CONVERSATION BETWEEN MR. DEAN & MR. ROIG 11:00 a.m. JULY 11, 1945

Dean telephoned Mr. Roig and advised him that he had had an opportunity last night to discuss with Mr. Trippe the conversation which Mr. Roig and Mr. Dean had had on July 9, previous to the Pan-Grace Board Meeting. Dean told Roig that he had tried to present to Mr. Trippe as accurately as possible the reasons why Mr. Roig felt it was imperative at this time, as a result of the North Atlantic Certificate decision, again to consider the desirability of having Pan American-Grace Airways extended to a point in the United States.

Mr. Dean further informed Mr. Roig that, as a result of this conversation with Mr. Trippe, it had been decided that this whole matter would be referred again by Mr. Trippe to the Executive Committee Meeting to be held on Tuesday, July 17, and that if there were any additional points which Mr. Roig or his associates wished to bring up before that date, Mr. Dean would like to have them presented for consideration.

Mr. Roig made no comment at all other than thanking Mr. Dean for so promptly taking up the matter with Mr. Trippe.

* * * * *

Mr. Roig telephoned Mr. Dean at 1:00 p.m. and requested that he be allowed to appear before the Executive Committee Meeting next Tuesday, for the purpose of being able to answer any questions that might come up and to present his views on this matter. Mr. Dean advised Mr. Roig that Mr. Trippe was out of town, and that he would let him know after Thursday or Friday.

August 13, 1945

Return to

Harold J. Roig, Esq.
Vice President, W. R. Grace & Co.
7 Hanover Square
New York, New York

Dear Harold:

Over the past month our Executive Committee and Board of Directors have given most careful consideration to the questions concerning Pan American-Grace Airways, Inc., which formed the subject of your talk with Mr. Trippe and myself on July 17, of your memorandum of July 17, and of your letter of August 7. Your memorandum was sub-

mitted to our counsel for comment; and the entire matter was thoroughly canvassed at two meetings of our Executive Committee and at the August 7 meeting of our Board. At the latter the attention of our directors was specifically called to Pan American's petition for rehearing in the *North Atlantic* cases, as requested in your letter of that day.

As I have already told you on the phone, our Board was unanimously of the opinion that we should not now depart from the position which we have previously taken.

We are unable to agree with the position taken by you that we are obliged to consider this question without regard to the fact which, we believe, was demonstrated in C.A.B. Docket 779, that Pan American-Grace Airways was intended from the outset to be an integral part of the Pan American Airways System, operating as an extension down the West Coast of South America of the service for which Pan American had already received a mail contract between the United States and the Canal—an extension which was well under way when, in August, 1928, we granted your Company an option take up to a 50% interest in it. We are likewise unable to agree, as your memorandum seems to imply, that we are likewise bound to eliminate from consideration the agreement between us of February 1939, with its arbitration provision, and our repeated offers to arbitrate thereunder.

However, even on the approach taken in your memorandum, our directors do not believe that the best interests of Pan American-Grace Airways would be served by seeking to be allowed to compete between the Canal Zone and the continental United States with Pan American Airways and the other possible American-flag connections referred to in your memorandum, with the almost certain result of stim-

[fol. 591] ulating these connecting carriers to press for extensions down the West Coast of South America.

At our meeting on July 17 you asked whether, if we determined to adhere to our position in regard to Pan American-Grace Airways, we would be willing to sell our

interest in that company to you. Apart from the fact that your steamship interests would almost certainly prevent approval of such an acquisition, we entertain no fears as to the future of Pan American-Grace Airways as a part of the Pan American Airways System. On the other hand, since you have indicated that W. R. Grace & Co. is of the opinion that failure to apply for an extension of Pan American-Grace's route to the continental United States threatened a loss of the shareholders' investment in that company, our directors have thought it would be appropriate that Pan American Airways Corporation should offer to purchase your half interest in Pan American-Grace, at its fair value, to be determined by agreement or, in the event that we are unable to agree, by a disinterested arbitrator or arbitrators. This offer we now make.

Sincerely,

/s/ Howard B. Dean
Howard B. Dean
Vice President

HAROLD J. ROIG
Vice President

August 27, 1945

Mr. Howard B. Dean
Pan American Airways
Chrysler Building
New York 17, N. Y.

Dear Howard:

I refer to your letter of August 13th and my acknowledgement of the 14th.

Your letter was a very great disappointment. After, as you say, a month's consideration by your Executive Committee and Board of Directors, I felt that the least we might expect was a frank and fair statement in reply to the submission I made to Mr. Trippe.

You will recall that at the very opening of my conversation with Mr. Trippe he agreed with me that the present discussion should be on the basis of conditions as they exist *today* and what is in the best interests of our joint company under these conditions. There is nothing to prevent Panagra's stockholders from agreeing now on any action necessary in that connection. The legal quibbling of the third paragraph of your letter has, accordingly, no relevancy to the present discussion. Our position on the points mentioned in this paragraph is well known to you and I shall not repeat it. Suffice it to say that not only do I not agree with the statements in this paragraph but I feel that Pan American is hardly in position to make deductions on the

C
PAA 3961
1/4/55 2
H

2112 B

[fol. 593] facts from the record in Docket 779 in view of its insistent efforts to prevent us from securing a determination by the CAB of what that record establishes.

Your only other point, and the single argument you advance related to the best interests of Panagra, is that such interests would not be furthered by an extension to the United States with the result of stimulating domestic carriers in the area to press for extensions down the West Coast of South America. The bona fides of this contention may, I think be best judged by the fact that Pan American has applications already granted or pending to bring all of its own divisions and associated companies to United States' terminals and, at almost the very time your letter was being written, the press services were announcing that Avianca of which Pan American owns 64% and Cia. Mexicana de Aviacion, S. A. of which you own 56% were applying for such extensions, Avianca's extension being actually from Balboa. The idea that Panagra is the only line or company associated with Pan American whose interests are best served by remaining without a United States terminal is simply too absurd for comment.

Your letter, as I see it, merely reflects a continuation of the policy in respect of a United States terminal for Panagra consistently followed by Pan American Airways and its representatives on Panagra's Board, of always sub-

2112 B PAA 3962

[fol. 594] ordinating Panagra's interests to their own. The latest action not only denies Panagra the benefit of the honest and independent judgment of its four Pan American directors to which it is entitled but is on its face an admission that this action is without even plausible justification under today's condition. Quite apart from any legal considerations, I think that we had a right just as men and partners to expect fairer treatment.

While your letter is addressed as a personal one to me and I am, therefore, replying in the same form, this matter is by no means personal. I accordingly request that you

bring this letter to the attention of Pan American's Board of Directors.

Very truly yours,

/s/ HR

January 17, 1946

Mr. Howard B. Dean
Pan American Airways
Chrysler Building
New York 17, N. Y.

Dear Howard:

In two letters from South America, received yesterday, I am advised:

(1) of a project to establish an international line between Lima and Toronto, Canada, presumably via United States points, under the auspices of our old friend Webster.

(2) of a proposal to extend T.A.C.A. to Peru. T.A.C.A., as you know, already has extension existing and projected to the United States.

(3) of a projected Peruvian national line to enter the international field as an offset to the projected Chilean C.S.A.V. line which, as you know, proposes

to paralled us all the way from Santiago and to proceed to New York via Havana.

In our discussion at Judge Burns' office the other day, you suggested that the reason you were acquiescing in Avianca, Panair do Brasil (and other subsidiaries in which you had a stock interest) coming to the United States, was that as long as national lines from those countries were coming through, the company in which you had a stock interest might just as well come through. Why does not that reasoning apply to Panagra in view of projects such as those above referred to?

Yours very truly,

HJR

February 21, 1946

Mr. Harold J. Roig, President
Pan American-Grace Airways, Inc.
135 East 42nd Street
New York, New York

Dear Harold:

We have discussed the matter of your proposed operation of the two Pan American-Grace Constellations with Mr. Shannon and Mr. Vidal on the basis of Mr. Shannon's memorandum to me of February 16th. This matter was referred to our Executive Committee meeting on February 19th. The Committee felt that the operation as outlined would result in excessive cost to Pan American-Grace as well as providing uneconomical utilization of this equipment.

I have been requested by the Committee to submit to you a plan whereby Pan American Airways, Inc. would be willing to contribute two Constellation aircraft to a pool to be formed with Pan American-Grace's two Constellation aircraft making a total of four aircraft of this type. With this fleet, an efficient operation could be conducted from the Miami base serving both the East and West coasts of South America by providing a daily service from Miami to Lima and a three times weekly service from Miami to Rio. This would result in a utilization of a little over nine hours per day per unit which could be still further improved, as for example, through a second daily service between Miami and Balboa, if warranted, or a daily Miami-Barranquilla trip. In support of our plan, I attach a memorandum outlining in detail the economic disadvantages of the proposal submitted in Mr. Shannon's memorandum and justifying in every respect our suggestion that a pool of equipment be formed to increase the utilization of the equipment to a satisfactory point, where the cost per mile will be comparable to that which we expect to obtain in our Constellation operations elsewhere.

I need hardly elaborate on the point that a through service from Miami to Lima, such as would be provided by the proposed equipment interchange, would be highly desirable from the standpoint of the traveling and shipping public.

We are confident that our proposal is entirely practical and in the interest of Pan American-Grace Airways, as well as the public interest. If you will kindly advise me that you concur in principle, I shall immediately take the necessary steps to coordinate this program, and put it into effect at the earliest possible moment.

Very truly yours,

April 11, 1946

Mr. Howard B. Dean,
135 East 42nd Street,
New York 17, New York

Dear Howard:

Yours April 8th received yesterday.

I really haven't time just now for letter writing. So please consider all rights reserved in respect of yours under reply as well as yours of February 21st which I referred to at the last Board meeting.

Your enumeration of the advantages of pooling compared with our present position dead-ended at Balboa seems to be based on essential acceptance of the arguments for a U. S. Terminal which I have been urging for so many years. The only trouble is that you do not go far enough. What I am interested in is the comparison between our present position *and a U. S. Terminal*,—not comparison with a poor substitute for that terminal through a pooling agreement with all its infirmities and inadequacies. It is obvious that a U. S. Terminal for Panagra is of far more vital concern to the public service as well as to Panagra's very existence than the half-way financial advantages to which you refer,—even assuming that they would be realized.

But quite apart from this, as I explained at our Board meeting, Mr. Gerhard A. Gesell, Panagra's Counsel, is of

the opinion that entering into a pooling agreement pending decision in Docket 525 would be prejudicial to the company's interest. Moreover, as stated at that meeting, I am

PAA-2895 Apr 16 '48
12/21/54 mfr

1563

[fol. 600] of the opinion that while Docket 779 is pending, Pan American having insisted that Panagra maintain a strictly neutral position in respect of the entire U. S. Terminal question, it is not appropriate for Pan American to put Panagra in a position of violating this neutrality by forcing it to take action which could in any way or to any extent have the effect of prejudicing the terminal question. The Constellations were not tied into any pooling arrangement when they were bought and pooling arrangements have nothing to do with the changes in our equipment program which we now have under consideration.

I am writing you separately regarding the action the Panagra Management proposes taking at this time regarding equipment.

Sincerely yours,

/s/ H. R.

GOVERNMENT'S EXHIBIT 255

April 15, 1946

Mr. Harold Roig, President
Pan American-Grace Airways, Inc.,
7 Hanover Square,
New York 5, N.Y.

Dear Harold:

Howard Dean has transmitted to me your letter of April 11, 1946 in answer to his of April 8.

As I understand it, you do not question that an arrangement for the interchange of Constellation or C-54 equipment with Pan American would provide substantial economies and better service to the public. If so, why should not Pan American-Grace have the advantages of these economies and the public the benefit of that service while the controversy over the proposed extension to the continental United States goes on? Surely the answer that successful operation of such an interchange might militate against the efforts of W. R. Grace & Company to force such an extension is not one which you can expect us to regard as consistent with the duties of the management of Pan American-Grace.

I am quite unable to understand your suggestion that acceptance of our interchange proposal would put Pan American-Grace's management in a position of violating neutrality on this issue of the extension. So long as Pan American-Grace's route is what it is, the duty of Pan American-Grace's management is to operate that route in the most economical and efficient manner and give the best possible service to the public. Refusal by that management to make an interchange arrangement because of fear that this might demonstrate the lack of necessity for a route extension seems to us not only to be taking a decidedly unneutral position but, what is more important, to constitute a breach of fiduciary responsibilities.

There would, of course, be no objection to postponing this matter for a short time pending the expected decision in Docket 525, were it not for the fact that the imminent delivery of four-engined equipment makes time of the essence.

In view of your continued refusal to consider an inter-

PAA-2891

May 24, 1946

John C. Cooper, Esq.
Director, Pan American Airways Corporation
135 East 42nd Street
New York 17, N. Y.

Dear Sir:

According to the Record in C.A.B. Docket 779, at a meeting of the Board of Directors of Pan American Airways Corporation, held January 7, 1941, the following resolution was adopted:

> RESOLVED, that the Corporation, as owner of half of the stock of Pan American-Grace Airways, Inc. should decline to acquiesce in the filing by Pan American-Grace Airways, Inc. of an application

for a certificate of convenience and necessity between the Canal Zone and New Orleans, Louisiana, and that the representatives of the Corporation upon the Board of Directors of Pan American-Grace Airways, Inc., should not attend the meeting of such Board of Directors called for the afternoon of January 14, 1941, to act upon such proposal, or any adjournment thereof, and except upon further instructions from the Executive Committee or the Board of Directors, should not attend any other meeting of the Board of Directors of Pan American-Grace Airways, Inc., at which action is to be taken upon the subject matter above described.

In view of this action by Pan American's Board of Directors of which you are a member, I am enclosing herewith a copy of the Notice of a Special Meeting of the Board of Directors of Pan American-Grace Airways, Inc. which I have called to be held on May 28, 1946 for the purposes stated in said notice.

Very truly yours,

PAN AMERICAN-GRACE AIRWAYS, INC.

NOTICE OF SPECIAL MEETING OF BOARD OF DIRECTORS

May 28, 1946

Pursuant to call of the President, a special meeting of the Board of Directors of PAN AMERICAN-GRACE AIRWAYS, INC. will be held at the office of Pan American

Airways, Inc., 135 East 42nd Street, New York, N. Y., on the 28th day of May, 1946, at 4:00 o'clock in the afternoon, for the purpose of complying with the decision of the Civil Aeronautics Board in Docket No. 525 approved by the President of the United States, in which they state:

> "The importance of providing service between the traffic generating areas of the northeast is recognized. It should be pointed out, however, that in extending Pan American from New York to San Juan, this area will be afforded a substantially improved service to the Caribbean area and to the east coast of South America. In addition, we have long recognized the desirability of an application to the Board which would permit a determination of the question of extending Pan American Grace Airways from its present terminal at Balboa to a point in the United States. If such an extension were made to Miami or New York, or some other point on the eastern seaboard, the eastern part of the country would be afforded a fast direct service to the west coast of South America and to Buenos Aires."

GOVERNMENT'S EXHIBIT 257

W. R. GRACE & CO.
7 Hanover Square, New York 5, N.Y.

Office Of The President — May 31, 1946

Mr. J. T. Trippe
Director, Pan American Airways Corporation
135 East 42nd Street
New York 17, N. Y.

Dear Sir:

By their decision in Docket 525 (Latin American Route Case) the Civil Aeronautics Board and the President of the United States have placed the responsibility upon Pan American Airways Corporation and W. R. Grace & Co., as the owners of Panagra, to implement the decision "that the joint owners should in the public interest cooperatively enable Panagra to apply for access to the east coast of the United States."

W. R. Grace & Co. is prepared to discharge this responsibility by enabling Panagra forthwith to apply for corresponding extension of its route to New York. With a view to making this possible cooperatively we have already discussed the matter with your President, Mr. Trippe, and feel that we should briefly state our position to the members of your Board.

The decision in Docket 525, unless Panagra obtains this extension, involves potentially tragic consequences to our joint company. That decision introduces into the Latin American and adjacent field for the first time certificated routes by six aggressive American airlines, Braniff, National, Eastern, Western, Colonial and Chicago & Southern. Braniff is granted a route the full length of South America to Rio and Buenos Aires, tapping en route many of Panagra's principal traffic points on the west coast of South America and tying in with its own network in the United

C

[fol. 606] States and with those of National and Chicago & Southern at Havana. Unless Panagra is put in position to meet this new setup, Braniff may well become the principal American airline to the west coast of South America and, by improvements in its route, which will doubtless be effected in the course of time, the principal American operator to all of South America. This decision with its far-reaching consequences to the American flag South American route pattern comes at a time when not less than six foreign flag operators, paralleling all or part of Panagra's route and with projected terminals in the United States, are well advanced in their plans:

An Argentine line (Dodero) up the West Coast from B.A.

A Chilean line (CSAV) paralleling our route from Santiago with terminal in New York

A British line between New York and B.A. via the West Coast

A Canadian/Peruvian line operating between Lima and Canadian points via the United States

AVIANCA, a Colombian company; 48% owned by Pan American, which has extended its route to Ecuador, and is applying for extension northward to the United States

TACA which has extended from Colombia to Ecuador and is extending to Peru, and has applied to come to the United States

Bad as the situation is for Panagra, the Civil Aeronautics Board has left the door open for Panagra to make a battle for its existence. The omission of the decision to authorize any direct route between Balboa and the east coast of the United States and the denial of Eastern's and Colonial's applications, coupled with the language of the decision itself leaves no doubt that it is the intention to award this route to Panagra if it is applied for promptly. If this opportunity is lost there can be little doubt that the route will be granted to some other carrier, thus giving

them a foothold on the South American continent. Even since the Board's decision in 525 Colonial has moved for reconsideration of its application for the New York/Balboa route on the ground among others that the granting of the route to Colonial would "relieve the Board of further appeasement efforts as mediator between Pan American and Panagra."

2600 PAA-5719

[fol. 607] We believe that in the light of this decision the pros and cons of Panagra's extension previously considered are hardly open for further discussion. The Civil Aeronautics Board with the approval of the President of the United States has decided that the extension is in the public interest as it is obviously in the interest of the joint owners of Panagra. It is manifestly in the public interest as in Panagra's interest that the west coast countries of South America should have an American flag air service equal to that provided on the east coast. This can only be done by Panagra's extending to the United States in the same way that Pan American has so extended or is seeking to extend all of its own routes and those of all of its affiliates except Panagra. That the decision had this clearly in mind in granting Pan American's extension between San Juan and New York clearly appears from the language of the decision where referring to a Panagra extension, it is stated: "If such an extension were made to Miami or New York, or some other point on the eastern seaboard, the eastern part of the country would be afforded a fast direct service to the west coast of South America and to Buenos Aires."

We need not review Panagra's record of accomplishment nor dwell upon the value of our joint property. We feel that unless immediate action is taken along the lines indicated our joint investment of capital and of eighteen years of pioneering and development work by which we have built up a great international trunk line will be seriously damaged if not destroyed.

We most earnestly urge that you cooperate with us in enabling Panagra to secure this extension so vital to its

success in meeting the very difficult situation which lies ahead of us.

Very truly yours,

W. R. GRACE & CO.

/s/ J. P. GRACE, JR.
President

GOVERNMENT'S EXHIBIT 258

EXTRACTS FROM MINUTES OF PAN AMERICAN AIRWAYS CORPORATION

Board of Directors
June 4, 1946

The Directors took up the request of W. R. Grace & Co. that this Corporation, as owner of half of the stock of Pan American-Grace Airways, should take action to authorize an application by that Company for an amendment of its certificate of convenience and necessity so as to extend its route from Balboa to New York and/or Miami.

Grace's request was discussed at length. Several Directors to whom representatives of W. R. Grace & Co. had presented that Company's views stated to the meeting the various arguments advanced by Grace. These were thoroughly considered, particularly in the light of the competitive situation created by the certification of Braniff Airways, as a result of the action of the President, as a second American-flag air carrier to Lima, Rio de Janeiro and Buenos Aires and probably foreign-flag competition.

After such discussion, upon motion duly made and seconded, it was unanimously:

RESOLVED, that in the opinion of this Board an extension of Pan American-Grace Airways, Inc. from Balboa to Miami or New York would not be in the best interests of Pan American-Grace Airways, Inc., and likewise would not be in the best interests of this Corporation or its stockholders, and that consequently the representatives of this Corporation on the Board of Directors of Pan American-Grace Airways, Inc. be instructed not to take action authorizing an application for such an extension by that Company.

GOVERNMENT'S EXHIBIT 259

Minutes of Adjourned Special Meeting of the Board of Directors of Pan American-Grace Airways, Inc., held at Room F, 66th Floor, No. 135 East 42nd Street, New York, N. Y. on the 5th day of June, 1946, at 1:00 o'clock in the afternoon.

PRESENT: Messrs. William F. Cogswell
Howard B. Dean
A. Garni
H. Preston Morris
R. H. Patchin
Harold J. Roig

being a quorum of the Board.

Messrs. Henry J. Friendly, J. Clawson Roop, Samuel F. Pryor, Jr. and J. A. Woods were also present.

• • •

The President referred to the decision of the Civil Aeronautics Board in the Latin American Route case, Docket 525. He referred specifically to the following statements in the Board's decision:

"The importance of providing service between the traffic generating areas of the northeast is recognized. It should be pointed out, however, that in extending Pan American from New York to San Juan, this area will be afforded a substantially improved service to the Caribbean area and to the east coast of South America. In addition, we have long recognized the desirability of an application to the Board which would permit a determination of the question of extending Pan American-Grace Airways from its present terminal at Balboa to a point in the United States. If such an extension were made to Miami or New York, or some other point on the eastern seaboard, the eastern part of the country would be afforded a fast direct service to the west coast of South America and to Buenos Aires.

Such an extension of Panagra was the subject of an investigation instituted by the Board in 1942, which terminated in a dismissal on the ground that the Board [fol. 610] was without power to accomplish the compulsory extension of Panagra to the United States. This case has recently been remanded to the Board by the Circuit Court of Appeals for the Second Circuit for further consideration.

Before instituting the *Panagra Terminal Investigation* the Board explored the possibility of working out a voluntary settlement of the controversy between Pan American and W. R. Grace & Co. Several conferences were held with both parties. Finally the Board suggested that the parties enter into an agreement under which sufficient shares of the two stockholders would be transferred to an independent voting trustee or trustees to permit the election to the Panagra board of an independent director or directors, or under which such an independent public director or directors might otherwise be appointed, who would be able to break the deadlock resulting from the equal division of ownership of Panagra stock between the two companies. After it became apparent that no satisfactory voluntary agreement could be reached by the parties and

that all efforts to mediate the differences between them would be unsuccessful, the Board issued its order instituting the *Panagra Terminal Investigation* proceeding.

In the *Panagra Terminal Investigation* the Board took note of the unhealthy condition existing in the internal affairs of that company by reason of its joint ownership and control by Pan American and W. R. Grace & Co., and pointed out that deadlock between the two interests equally represented in the ownership of Panagra was likely to occur again in view of the conflicting interests of the two co-owners.

In view of the facts above outlined we feel that the joint owners should in the public interest cooperatively enable Panagra to apply for access to the east coast of the United States."

Mr. Roig stated that this meeting had been called to enable the joint owners cooperatively to enable Panagra to apply for access to the East Coast of the United States in accordance with the said opinion.

[fol. 611] Mr. Garni thereupon offered the following resolution which was seconded by Mr. Patchin:

WHEREAS in the decision of the C.A.B. approved by the President of the United States it is stated "we feel that the joint owners should in the public interest cooperatively enable Panagra to apply for access to the east coast of the United States", and

WHEREAS the joint owners of this company, Pan American Airways Corporation and W. R. Grace & Co., are desirous of complying with this decision of the C.A.B. and of the President of the United States,

NOW THEREFORE BE IT

RESOLVED that the President of this corporation be and he hereby is authorized and directed to file with the Civil Aeronautics Board in the name and on behalf of this corporation, application for appropriate amendment of the Certificate of Convenience and Neces-

sity of this corporation so as to authorize extension of its route from Balboa to New York via Havana, Cuba and/or Miami, Florida.

RESOLVED FURTHER that, in the discretion of the President, such application may contain an expression of willingness on the part of this corporation that the amendment of its Certificate of Convenience and Necessity, in lieu of the extension requested, provide for service to such other point on the east coast of the United States and via such intermediate points as the Civil Aeronautics Board might require.

Mr. Garni stated that it was the desire of W. R. Grace & Co. to comply with the decision of the C. A. B. and the President of the United States and that the resolution he was offering, and which the Grace directors were prepared to vote for, was intended to implement such compliance. He stated that in his opinion the most satisfactory route from the point of view of the public interest and of Pan- [fol. 612] agra which would comply with the foregoing should be from Balboa to New York via Havana, Cuba and/or Miami, Florida, as proposed in the resolution and he recommended that we apply for that route. He stated that he was, however, entirely willing to consider any reasonable amendment with regard to the route proposed in the resolution which Pan American might consider to constitute more appropriate or acceptable compliance with the decision.

Mr. Dean stated that the subject matter of Mr. Garni's resolution had been discussed at great length at a meeting of the Board of Directors of Pan American Airways Corporation held on the previous day, and that after such discussion the Pan American Directors had unanimously adopted the following resolution:

RESOLVED that in the opinion of this Board an extension of Pan American-Grace Airways Inc. from Balboa to Miami, or New York, would not be in the best interests of Pan American-Grace Airways Inc. and likewise would not be in the best interests of this corporation or its stockholders, and that consequently the

representatives of this corporation on the Board of Directors of Pan American Airways Inc. be instructed not to take action authorizing an application for such an extension by that company.

Mr. Dean stated that as a matter of record he wished to make it clear that in the opinion of Pan American the portions of the C.A.B. decision which were quoted by Mr. Roig had not been approved by the President and that the President had merely approved the Board's order and the certificates. Mr. Dean on behalf of the Pan American Directors and Pan American Airways Inc. urged that consideration be given to an arrangement whereby Panagra's planes might operate over one or more Pan American routes north [fol. 613] of the Canal Zone.

Mr. Garni's resolution was thereupon put to a vote and failed of passage. Messrs. Garni, Roig, Patchin and Woods voting in favor of such resolution and Messrs. Dean, Pryor, Roop and Morris in opposition thereto.

Discussion of Mr. Dean's proposal with respect to the operation of Panagra's planes over one or more Pan American routes north of the Canal Zone, was thereupon had. The Directors who had voted in favor of Mr. Garni's resolution expressed a desire to confer among themselves with respect to this proposal and the meeting thereupon adjourned to June 10, 1946, at 9:30 o'clock in the forenoon.

[fol. 615]

GOVERNMENT'S EXHIBIT 261

Board of Directors
July 2, 1946

Mr. Trippe reported on the status of negotiations with W. R. Grace & Co. for a settlement of the controversy arising out of that company's desire that Pan American-Grace Airways, Inc. be extended to the continental United States. At the Board meeting of Pan American-Grace Airways, Inc. held on June 5, 1946, the Pan American representatives had proposed as a basis for settlement a long-term arrangement whereby Pan American-Grace aircraft and flight crews would fly north of the Canal Zone under charter over the certificated routes of Pan American Airways, Inc. so as to permit through service between the continental United States and points on Pan American-Grace's route in South America. Drafts recently presented on behalf of W. R. Grace & Co. were based on a completely different theory, namely, that Pan American-Grace would itself operate its aircraft north of the Canal Zone over Pan American's certificate, simply paying to Pan American a share of the profits of the operation.

Mr. Trippe then asked Mr. Bush to report certain conversations which he had had with Mr. Adolf Garni, Co-Chairman of the Board of W. R. Grace & Co.

Mr. Bush stated that the first of these conversations had occurred shortly after the Pan American Board of Directors, at their meeting on June 4, had, by unanimous vote, adopted a resolution against the representatives of this Corporation on the Board of Directors of Pan American-Grace Airways, Inc. taking action to authorize an application for an extension by Pan American-Grace Airways, Inc.

GR-2955 G007861

[fol. 616] to the continental United States. Mr. Garni had requested Mr. Bush to come to the former's office at W. R. Grace & Co. Mr. Garni had stated at this meeting that while others in W. R. Grace & Co. favored the proposed method of settling the controversy through an interchange agreement, he felt that a sale of the interest in Pan American-

Grace Airways, Inc., held by W. R. Grace & Co. might be preferable as a permanent solution. Mr. Bush had reported this conversation to Mr. Dean. Mr. Dean had felt that, in view of the pending negotiations for an interchange agreement, it would not be wise to pursue Mr. Garni's suggestion. However, at Mr. Dean's request, Mr. Bush had had a further talk yesterday with Mr. Garni at which Mr. Garni named a price of 700,000 shares of Pan American Airways Corporation as a fair consideration for W. R. Grace & Co.'s interest in Pan American-Grace Airways, Inc., which Mr. Garni valued at $14,000,000.

Mr. Trippe reported that the Executive Committee had discussed the basis on which Mr. Garni had arrived at this figure and other data relating to the value of Pan American-Grace Airways, Inc. The Committee had decided to recommend that, in view of the difficulties that were being encountered in working out an interchange agreement, the Board of Directors authorize the purchase of W. R. Grace & Co.'s holdings in Pan American-Grace proposed by Mr. Garni and that in view of the difference of opinion as to the value of these holdings, if the representatives of the parties were unable to agree upon a figure, a suitable way to determine any difference of opinion, and one which

GR-2956 G007862

[fol. 617] could hardly be unacceptable to W. R. Grace & Co., would be that, after both parties had had an opportunity to present the necessary data, the figure should be set by Judge John J. Burns, who had been acting as attorney for W. R. Grace & Co. in this controversy. It was felt that Judge Burns' reputation and judicial qualities were such that the Corporation could afford to leave the matter to him for settlement.

Upon motion, duly made and seconded, it was thereupon unanimously

RESOLVED, that the representatives of this Corporation be authorized to enter into a contract with W. R. Grace & Co. for the purchase of the latter's interest in Pan American-Grace Airways, Inc., as proposed by Mr. Adolf Garni of W. R. Grace & Co., at a price to be negotiated or, if an agreement upon such

price could not be reached within fifteen days after signature of the contract, then at a price to be settled by John J. Burns, Esq., or, in the event of his inability to act, by such other person as was mutually agreed upon, such contract to be subject to any necessary approval by the Civil Aeronautics Board.

"While the general feeling was that the Grace proposal with respect to interchange constituted such a departure from the proposal originally made by Pan American (which was approved in principle by this meeting) as to be unacceptable, it was determined to take no action with respect to the Grace proposal pending the outcome of the negotiations for the purchase of W. R. Grace & Co.'s interest in Pan American-Grace Airways authorized by this meeting.

Directors' Meeting

The regular meeting of the Board of Directors of W. R. Grace & Co. was held at the company's office, No. 7 Hanover Square, New York City, on July 3, 1946, at 11:30 O'clock AM.

PRESENT:

Messrs. M. Bouvier
Gale H. Carter
Geo. Doubleday
W. G. Holloway
A. Garni
Harold J. Roig
J. H. H. Phipps

E. A. Eyre
J. T. Kirby
J. P. Grace, Jr.
Andrew B. Shea

being a quorum of the Board.

Mr. Holloway, Chairman, presided. Mr. Cogswell, Secretary, acted as such.

******

There was reported to the meeting discussions being held with Pan American Airways in connection with contract proposed by them to bring Panagra into the United States over the former's route and also indication on the part of Pan American Airways of their desire to acquire our stock in Panagra issuing their own stock in exchange.

The following resolution was duly made and seconded:

RESOLVED that it is the sense of this meeting that we continue to attempt to negotiate a contract with Pan American Airways as proposed by them to bring Panagra into the United States and advise them that we are not interested in the sale to them of our Panagra stock.

Extended discussion ensued. Before completion of the vote on this resolution the meeting turned to other business *********

Mr. Layman thereupon joined the meeting and there was further discussion on the aforementioned resolution in respect to Panagra. Vote then being completed, such resolution was adopted.

There being no further business, the meeting adjourned.

A true record.

Memorandum.

Subject: P. A. A.—GRACE.

At the P. A. A. directors' meeting on June 4th the request of Grace interests in Panagra that P. A. A. join in an application to extend the Panagra route to North

America was considered. Unanimously, the P. A. A. directors voted to disapprove that request.

On the following day Mr. Adolf Garni, of W. R. Grace & Co., asked me to go to his office, which I did. He said that personally he felt that a sale of Grace interests in Panagra to P. A. A. was desirable; that he did not like the proposal of an "interchange" contract and did not think it would work out satisfactorily, although Mr. Roig strongly favored that course. He said he had been giving some consideration to the price which Grace might receive for its 50% in Panagra. He showed me a lot of figures which he had prepared comparing the value of Panagra stock to the stock of various airlines quoted in the open markets. On the basis of these calculations he thought that the price of 700,000 shares of P. A. A. stock was fair for the Grace 50% interests in Panagra.

I reported this conversation to Howard Dean, of P. A. A., on the following morning.

At the July meeting of P. A. A. directors, Mr. Trippe informed us of the contract negotiations indicating that our representatives and the Grace representatives were working on a contract which would permit Panagra to fly north over the P. A. A. certificated route. After a rather full explanation of the course of the negotiations on this contract he asked me to explain to the directors the nature of my conversations with Mr. Garni. This I did.

Mr. Trippe then informed the directors that the Executive Committee that morning had considered the Garni proposal. Our management had presented some figures to the Executive Committee indicating a much lower price
Really there were two meetings— PAA
one on June 5 the other on July 1. 2111 1 1/4/55
TJK 4005
[fol. 621] for Panagra stock as being of some possible interest to P. A. A. The Committee thought it desirable to present to the Board the following proposition for consideration, i. e., that P. A. A. enter into an agreement with the Grace interests providing that the two interests negotiate on price and terms for the sale of the Grace interests

in Panagra. If, after a period of fifteen days no agreement could be reached, then both sides would refer the case to Mr. John Burns, who would make a final decision as to the price and terms. His decision would be subject only to C. A. B. approval and would be binding on both Grace and P. A. A.

At the suggestion of Mr. Trippe the Board asked me to present this proposition to Mr. Garni immediately. This I did the following morning (July 3rd). W. R. Grace & Co. had a Board meeting that day and in the afternoon Mr. Garni telephoned to me. He said that the Grace Board had asked him to say the following to me:

1—They were very much disappointed that the contract negotiations had been sidetracked and that this proposal of sale had been introduced at this time. I reminded him that the proposal came from him and that it was presented to P. A. A. directors at the first opportunity, namely, the next meeting following our conversations.

2—He said that the Grace interests were not at all interested in the sale.

3—On their behalf he urged that negotiations on the contract should proceed at once. They had been led to understand from Mr. Friendley that the contract might receive favorable consideration. They were very much disappointed at the delay—felt that time was of the essence.

2111 e PAA 4006

[fol. 622] I immediately telephoned Howard Dean and reported the conversation with Mr. Garni at 3:15 on July 3rd.

In connection with all of the above it must be said for Mr. Garni that he indicated in our conversations that he was talking as an individual, that he was not speaking for the Grace interests. Nevertheless, it is important to note that he initiated these conversations of his own volition.

AGREEMENT

BETWEEN

PAN AMERICAN AIRWAYS, INC.

AND

PAN AMERICAN-GRACE AIRWAYS, INC.

DATED JULY 30, 1946

PAA 663
12-3-54
RLA

[fol. 627] AGREEMENT made and entered into this 30th day of July, 1946 by and between PAN AMERICAN AIRWAYS, INC., a New York corporation (hereinafter called PAA), and PAN AMERICAN GRACE AIRWAYS, INC., a Delaware corporation (hereinafter called Panagra):

RECITALS

A. PAA holds various certificates of convenience and necessity for routes between the continental United States and the Canal Zone, and Panagra holds a certificate of convenience and necessity for a route between the Canal Zone and various points in South America.

B. A substantial amount of the passenger, air express, mail and cargo traffic proceeding between the continental United States and the Canal Zone originates at or is destined to points on Panagra's certificated route in South America.

C. PAA and Panagra believe it is in the public interest that such through traffic should be enabled to proceed by fast direct flight without change of plane at the Canal Zone and that the making of arrangements to that end is desirable in order that they may compete effectively with foreign-flag and other American-flag carriers operating or contemplating operations between the continental United States and the countries of South America which Panagra is certificated to serve.

D. Because of the foregoing and a desire to settle outstanding differences, PAA and Panagra desire to make arrangements, as hereinafter set forth, whereby PAA will charter aircraft of Panagra to be operated with Panagra flight crews over PAA's certificated routes between the Canal Zone and the continental United States.

GOVERNMENT'S EXHIBIT 267

AGREEMENT

between

W. R. GRACE & CO.

AND

PAN AMERICAN AIRWAYS CORPORATION

Dated July 30, 1946

PAA—4937
2/25/55 mfr

[fol. 630] AGREEMENT made and entered into this 30th day of July, 1946 by and between W. R. GRACE & CO., a Connecticut corporation (hereinafter called Grace), and PAN AMERICAN AIRWAYS CORPORATION, a Delaware corporation (hereinafter called Pan American).

RECITALS

A. Grace is the owner of 50% of the stock of Pan American-Grace Airways, Inc., a Delaware corporation (hereinafter called Panagra).

B. Pan American is the owner of 50% of the stock of Panagra and of 100% of the stock of Pan American Airways, Inc., a New York corporation (hereinafter called PAA).

C. Panagra and PAA have entered into a certain contract dated July 30, 1946 (sometimes hereinafter called the Panagra-PAA contract).

TERMS OF AGREEMENT

Now, therefore, in consideration of the mutual covenants herein contained, it is agreed as follows:

1. *Ratification of Panagra-PAA Contract.* Grace, as owner of 50% of the stock of Panagra, and Pan American, as owner of 50% of the stock of Panagra and all of the stock of PAA, ratify the provisions of the Panagra-PAA contract, and each agrees to use its best efforts to facilitate the carrying out of said contract in accordance with the terms thereof and not to exercise its rights as owner of voting shares in such a manner as to interfere with or impede the performance of said contract in accordance with its terms.

2. *Representation of Panagra in Matters under Panagra-PAA Contract.* Pan American agrees that any action to

[fol. 631] make any claim, to take any position, or to enforce any rights of Panagra under the Panagra-PAA con-

tract may be taken on behalf of Panagra by its President, or if the President shall deem that such action requires authority from Panagra's Board of Directors, Pan American will cause its representatives on the Board of Directors of Panagra to attend a meeting for the purpose of furnishing a quorum and at such meeting to abstain from any action which would cause a deadlock within the said Board of Directors with respect to such action; provided, however, that the foregoing shall not be deemed to withdraw from the Board of Directors of Panagra its function of determining such questions of general business policy relating to the conduct of Panagra's affairs (such as the purchase of equipment, the establishment of equipment reserves and the fixing of depreciation rates) as are determined by a board of directors in accordance with law or normal corporate practice.

3. *Management of Panagra.* (a) Pan American agrees that during the term of this agreement it will cast its votes for the election as President of Panagra of one of the directors of Panagra nominated by Grace and approved by Pan American, which approval shall not be unreasonably withheld. The President of Panagra shall be in responsible charge of its management. If at any time Pan American shall be dissatisfied with the conduct of the affairs of Panagra by the President so elected, Pan American shall give notice to Grace stating the respects in which it is dissatisfied. Grace shall thereupon take appropriate steps to remedy the matters set forth in Pan American's notice, unless Grace shall be of the opinion that Pan American's dissatisfaction is unreasonable, in which event the matter shall be referred to arbitration as provided in paragraph 9 of this agreement. If Pan American prevails in such arbitration, Grace shall be bound to take the action recommended by the arbitrators and thereafter diligently proceed with the same. If the arbitrators shall have found, pursuant to a request of Pan American, that the then President of Panagra should resign, Grace will take appropriate action to procure such resignation and nominate his successor. The arbitrators may, upon the failure of Grace to

[fol. 632] take the action recommended by the arbitrators, relieve Pan American of further obligation under this subparagraph (a) of paragraph 3.

(b) From time to time the President of Panagra shall nominate, with the approval of Pan American, which shall not be unreasonably withheld, a person to hold the office of Vice President-Operations of Panagra and the parties will cause such person to be elected to such office.

(c) If a vacancy shall arise in the Board of Directors of Panagra at any time by reason of the death, resignation or inability to act of a director of Panagra who shall have been nominated by one of the parties, both of the parties will cooperate to cause such vacancy to be filled by a person nominated by the party who shall have nominated the director who shall so have died, resigned or become unable to act.

4. *Services of PAA as Sales Agent for Panagra.* If Grace shall at any time be of the opinion that the continuance of the services of PAA as general sales agent for Panagra under paragraph 10 of the Panagra-PAA contract is unsatisfactory and that the best interests of Panagra require that other arrangements for sales representation of Panagra should be made, Grace shall give notice thereof to Pan American, stating in detail the defaults complained of. Pan American shall thereupon cause PAA to take appropriate action to remedy such defaults unless Pan American shall dispute the defaults complained of, in which event the matter shall be referred to arbitration as provided in paragraph 9 of this agreement. If the arbitration determines that Grace's complaints are well founded, Pan American shall be bound to cause PAA to take the action recommended by the arbitrators and thereafter diligently proceed with the same. The arbitrators may, upon the failure of PAA to take the action recommended by the arbitrators, direct that PAA's sales agency should be terminated and that other plans for sales representation of Panagra should be made.

5. *Effect of Cancellation of PAA's Certificates.* In the event of violation by PAA of its obligations under para-
3491 PAA-4940
[fol. 633] graph 18 of the Panagra-PAA contract (whereby PAA agrees that, except with Panagra's written consent, it will not transfer or abandon any of its certificates covering routes over which Panagra aircraft may be operated under charter to PAA or seek to modify such certificate or certificates in any manner which would prevent or adversely affect the operations contemplated thereunder) or in the event that any such certificate of PAA is canceled by action of the Civil Aeronautics Board or otherwise and such cancellation becomes final, Pan American will consent to Panagra's making application to amend its own certificate so as to include the route for which PAA has so violated its obligations or for which PAA's certificate has been so cancelled.

6. *Pending Litigations.* The parties will forthwith make suitable application to the Supreme Court of the United States and to the Civil Aeronautics Board requesting that the proceedings now pending in the said Court and before the said Board relating to the controversies between them shall be kept *in statu quo* until the Civil Aeronautics Board shall have made a final order in the proceeding relating to the Panagra-PAA contract contemplated by paragraph 20 thereof and, if a timely proceeding to review any such order shall be instituted, until such proceeding for review shall have been finally determined. Upon an order of the Civil Aeronautics Board approving said contract having been made and become final, the parties will make appropriate applications for the dismissal of all such proceedings.

7. *Term.* Except for paragraphs 6 and 8, which shall become effective immediately, this agreement shall take effect simultaneously with the Panagra-PAA contract and shall remain in effect during the term of such contract.

8. *Non-prejudice.* If this agreement does not become effective or if, having become effective, this agreement

should be terminated or canceled, the negotiation and the terms of this agreement and all applications filed and acts done hereunder shall be without prejudice to the rights or future position of the parties.

3491 PAA-4941

[fol. 634] 9. *Arbitration.* Any and all disputes as to the construction or operation of this agreement shall be submitted to arbitration pursuant to the rules of the American Arbitration Association having general application in the manner hereinafter provided. The party requesting arbitration shall notify the other party naming its arbitrator in the notice. The other party shall appoint an arbitrator within ten (10) days after the receipt of such notice. Within ten (10) days after such appointment, the two arbitrators shall appoint a third arbitrator and the decision or the award of any two of such three arbitrators shall be final, binding and conclusive upon the parties. If either party fails to appoint the arbitrator to be appointed by such party, or if the arbitrators appointed by or for the respective parties shall fail to appoint such third arbitrator, then and in either such event such then unappointed arbitrator shall be appointed by the then President of the American Arbitration Association or in the event such President shall be disqualified by reason of his association with either party or otherwise, then by the next highest ranking official of such Association. Any such arbitration shall be conducted in accordance with the law of the State of New York and held in New York City, New York, unless the parties shall otherwise agree in writing.

10. *Termination of Prior Agreement.* The agreement between the parties dated February 14, 1939, shall be terminated upon this agreement becoming effective.

11. *General Provisions.* (a) Nothing in this agreement shall be deemed to require either of the parties to take any action in violation of any applicable law, regulation, or order.

(b) The various headings herein and the grouping of the provisions of this agreement into separate paragraphs shall not be construed to limit or restrict the meaning or application of any provision hereof, and are for the purpose of convenience only.

(c) All references in this agreement to the Civil Aeronautics Board shall include any Federal agency having jurisdiction similar to that now exercised by said Board.

3491 PAA-4942

[fol. 635] In witness whereof each of the parties hereto has caused this agreement to be executed in its respective corporate name and its respective corporate seal to be hereunto affixed and attested by its respective officer or officers thereunto duly authorized as of the day and year first above written.

Correspondence
File 2

PAA
PAN AMERICAN WORLD AIRWAYS SYSTEM
CHRYSLER BUILDING, 135 EAST 42ND STREET,
NEW YORK 17, N. Y.

EXECUTIVE OFFICERS

August 19, 1946.

Hon. James M. Landis, Chairman,
Civil Aeronautics Board
Washington 25, D. C.

Dear Sir:

Since the decision of the Circuit Court of Appeals for the Second Circuit remanding the Panagra Terminal Investigation, Docket 779, for further proceedings before the Civil Aeronautics Board and the order of the United States Supreme Court of June 10, 1946 granting a writ of certiorari to review that decision, agreements have been reached between W. R. Grace & Co. and Pan American Airways Corporation and between Pan American Airways, Inc. and Pan American-Grace Airways, Inc. (Panagra) which, upon becoming effective, will dispose of the controversy between Pan American and W. R. Grace & Co. which gave rise to CAB Docket 779 as well as to CAB Dockets 707 and 744.

On August 5, 1946, Pan American Airways, Inc. filed an application under Section 412 of the Civil Aeronautics Act for approval of the Pan American-Panagra agreement. The agreement between Grace and Pan American Airways Corporation was also annexed to the application for the information of the Board since it relates to the subject matter of the agreement between Pan American and Panagra and its effectiveness is dependent on the approval of such agreement. Paragraph 6 of the Grace-Pan American agreement provides:

"6. *Pending Litigations.* The parties will forthwith make suitable application to the Supreme Court of the United States and to the Civil Aeronautics Board requesting that the proceedings now pending in the said Court and before the said Board relating to the controversies between them shall be kept in *statu quo* until the Civil Aeronautics Board shall have made a final order in the proceeding relating to the Panagra-PAA contract contemplated by paragraph 20 thereof and, if a timely proceeding to review any such order shall be instituted, until such proceeding for review shall have been finally determined. Upon an order of the Civil Aeronautics Board approving said contract having been made and become final, the parties will make appropriate applications for the dismissal of all such proceedings."

Under the terms of these agreements, the subject matter of the controversies presented in CAB Dockets 779, 707 and 744 will be disposed of and application for dismissal

2111a

PAA 4072
1/4/55
YK

[fol. 637] made both by Pan American and by Grace upon the Panagra-Pan American agreement being approved by order of the Civil Aeronautics Board and such order becoming final. It is respectfully requested, therefore, that CAB Dockets 779, 707 and 744 be kept in *statu quo* until the Board shall have made a final order in the proceeding relating to the Panagra-Pan American agreement and any timely review of such order finally determined.

Very truly yours,

GOVERNMENT'S EXHIBIT 269

EXCERPTS FROM MEMORANDUM AGREEMENT REGARDING SERVICES RENDERED AND TO BE RENDERED TO PANAGRA BY THE PARENT COMPANIES AND COMPENSATION THEREFOR

This memorandum sets forth the understanding between Pan American-Grace Airways, Inc. (herein called "Panagra"), Pan American Airways, Inc., (herein called "Pan American"), and W. R. Grace & Co., (herein called "Grace"), regarding certain services to be performed, the method of determining compensation for such services and the amount to be paid for certain of such services for 1947-1948.

. . . . . .

2. Panagra shall act as General Sales Agent in Ecuador, Peru, Bolivia and Chile for Pan American and for each of Pan American's affiliated carriers in those of said countries for which said affiliated carrier shall have at the time appointed Pan American and its affiliated carriers general sales agent, except that it shall not so act for Avianca in Ecuador. Panagra may at any time on ninety days' written notice decline to act for any affiliated carrier in one or more of the countries for which it is General Sales Agent. In the event the President of Panagra fails to approve or requests termination of the designation of an affiliated carrier of Pan American under paragraph 1 above, then that affiliated carrier may on ninety days' written notice discontinue Panagra as its general sales agent in any of

[fol. 639] said countries. Panagra shall delegate to Grace its full responsibility for the performance of this general sales agency, and Grace shall hold Panagra harmless for the performance of Panagra's obligations to Pan American and its affiliated carriers. Panagra shall continue to be responsible to Pan American and its affiliated carriers for acts of Grace pursuant to such delegation and such delegation shall not constitute Grace a sub-agent.

3. Grace shall continue to act as General Sales Agent for Panagra in Panama City, Canal Zone, Colombia, Ecuador, Peru, Bolivia and Chile and shall be responsible to Panagra for carrying out of all Panagra's obligations arising from the appointment of Panagra as General Sales Agent by Pan American and its affiliated carriers as specified in paragraph 2 above.

4. (a) For services rendered as General Sales Agents, in accordance with the foregoing paragraphs 1, 2, and 3, commissions shall be paid at the following rates, namely, a 10% commission on all passenger traffic, including excess baggage, and 7½% commission on all cargo and express traffic sold; and in addition Panagra may at its discretion pay to Grace for handling or other services a 5% commission on its revenues from incoming cargo and express on shipments on which Panagra determines such payment to be justified. Where sales are made by a sub-agent, the General Sales Agent shall be entitled to retain an over-

GR-9893 G043287

[fol. 640] riding commission of 2½%. These commissions shall be payable commencing January 1, 1948. No other compensation shall be paid for the services rendered by Panagra, Grace or Pan American as such General Sales Agents except to the extent specifically provided herein or in any General Sales Agency Agreement.

(b) Panagra shall turn over to Grace the full amount of all General Sales Agent commissions paid to it by Pan American and its affiliated carriers and the full amount of any other sales commissions paid to Panagra under interline agreements or otherwise resulting from traffic sold by Grace as General Sales Agent for Panagra.

(c) In connection with the assumption by Grace of responsibilities as General Sales Agent at various points, particularly Lima and Santiago, Panagra will discontinue its existing general selling activities at these points. Certain expenses incurred by Panagra at the above and other points in 1947, as set forth in more detail in Annex A attached, shall be assumed by Grace. Grace shall assume the similar expenses incurred by Panagra in 1948.

G043288

5. General Sales agency agreements covering the understandings recorded in paragraphs 1 to 4 inclusive of this memorandum and otherwise describing and clarifying the obligations of the parties will be prepared promptly. Nothing in such agreements shall relieve Pan American of any obligation to Panagra already assumed under the Through Flight Agreement; provided, however, that the said agree-
GR-9894
[fol. 641] ment shall be modified in the event of the contingency specified in paragraph 1 hereof.

. . . . . .

8. In addition to the sales, purchasing and shipping services provided for above, Pan American will continue to make available to Panagra the services and facilities of its general and administrative organization in New York. Grace will continue to make available to Panagra the services and facilities of its entire organization both in the United States and in South America. The nature of the services which the companies will render Panagra is more fully described in the attached memorandum entitled "Payment to Parent Companies for Services", dated March 3, 1948. In order that Panagra may obtain the fullest advantage of the availability of these services and facilities, it is agreed that Panagra may from time to time indicate in writing to Pan American and Grace the precise type of available services, facilities, information and consultation desired, and Pan American and Grace agree that they will use their best efforts to provide service to Panagra of the type and character specified and in the manner so indicated.

Panagra agrees to credit Pan American and Grace as full compensation for services rendered by such companies

to Panagra during 1947 with and
of which represent sales commissions paid or
payable by Pan American and its affiliated carriers through
GR-9895 G043289
[fol. 642] Panagra, respectively, less amounts heretofore paid on account of such services to Pan American and Grace respectively in respect of 1947 and, in the case of Grace less expenses assumed by Grace hereunder amounting to . These amounts were computed in accordance with the said memorandum entitled "Payments to Parent Companies for Services", and cover the services referred to therein. The foregoing amounts do not include sales commissions paid or payable by Panagra to foreign affiliates of Pan American; nor do they include sales commissions paid to sub-agents.

For services referred to above to be furnished during the year 1948, excluding services as General Sales Agent and services of Pan American covered by Paragraph 6 of this memorandum, which are to be compensated on the commission basis herein described, Panagra agrees to pay Pan American and to pay Grace

The amount payable to Grace and Pan American for years subsequent to 1948 for services other than sales, purchasing and forwarding for which specific commissions are provided, will be determined in the manner described in the memorandum entitled "Payments to Parent Companies for Services", dated March 3, 1948, and an effort will be made to agree upon the amounts payable for each year as promptly as possible after the beginning of such
GR-9896 G043290
[fol. 643] year. It is understood that while Pan American and Panagra each maintains seperate general offices in New York for its own account, certain office functions such as telephone switchboard and mail handling are now pooled and will continue to be pooled for convenience, and the payment herein provided for covers Panagra's full share of such pooled services. In accordance with past practice, Pan American shall continue to charge Panagra with out-of-pocket expenses, such as postage, specifically incurred

at the request of Panagra and resulting from such pooled services. Long distance telephone calls made by Panagra through Pan American's switchboard, except calls made over existing tie lines with Washington or other tie lines not charged by Pan American directly to its divisions shall be charged to Panagra.

In accordance with past practice, Grace shall continue to charge Panagra with out-of-pocket expenses incurred at the request of Panagra by the Grace offices in New York and Washington, such as postage, the cost of cables, long distance telephone calls, travel expenses and the medical examination of Panagra employees assigned for service abroad.

GO43291

. . . . . .

11. To facilitate operation of all phases of this agreement, both immediate and long term, Grace and Pan American will each designate one of its officers stationed in the

GR-9897

[fol. 644] United States and authorize him to act for Grace or Pan American, as the case may be, in the resolution of any problems referred to him by Panagra's executive management which may arise under this arrangement and which have not promptly been solved to Panagra's satisfaction by the Administrative sales or operating personnel immediately concerned.

12. This agreement shall in no respect alter or repeal any provision of the Through Flight Agreement; provided, however, that the said agreement shall be modified in the event of the contingency specified in paragraph 1 hereof.

13. This agreement shall remain in effect until May 5, 1950, and thereafter until terminated by any party hereto by six months' written notice to the other two parties. In the event of such termination, Pan American and Grace shall continue to make available to Panagra the services and facilities being provided at the date of the execution of this agreement, and Panagra shall continue to avail

itself of such services and facilities and compensate therefore at amounts then to be determined.

No. 5.

SANTIAGO, 30th October, 1930.

R. H. Patchin Esq.,
W. R. Grace & Co.,
NEW YORK.

Dear Patchin,

Our Santiago-Buenos Aires Division is, I believe, at the moment, and will continue increasing to be the object of Trippe's desire.

From what I can gather from conversations with Rihl and others, Panair, since the absorption of NYRBA, find themselves with an enormous expense account in Buenos Aires and no business. They have taken over the huge NYRBA offices, hangars and shops, but, apart from using the latter for reconditioning the Commodores also taken over from NYRBA, they have no manner of use for all this

show, as the only service they are running is a daily service between Buenos Aires and Montevideo, which Rihl states does not pay of itself, and which we know from experience never will pay without some form of subsidy. They are, of course, talking about running passenger line to connect with their mail line at Santos and also talking of other passenger lines to other points in the Argentine, but these too we know will never pay without a subsidy, because one of the few thoroughly well established facts with regard to commercial aviation is that a well equipped passenger line with multi-motor planes cannot be made to pay, even if it carries maximum loads every mile flown. I reckon that Panair cannot be losing less than between $50,000 and $100,000 U sg. per year in the Argentine at present, and I would not be surprised if it were in excess of the latter figure.

The result of all this is that Panair are going to be desperate to get their East-Coast line extended to Buenos Aires in one form or another. Rihl states that he sees no reason why the United States Government should subsidize two air services to the Argentine and that therefore so long as our line runs to the Argentine there is no reason why the United States should extend their East Coast line beyond Punta Alegre. This is perfectly obvious, but it of course concentrates the pressure on our line as about the only way Panair can get their East Coast line extended to Buenos Aires is by discontinuing our line from Santiago. I cannot escape feeling that this is behind Trippe blocking all efforts to get the Chilean situation settled on a reasonable basis and a good deal of his other conduct. You may recall that he suggested to me a long while ago that we ought to turn over the operation of this line to them, which would probably be the first step in getting it discontinued and switched to the East Coast.

[fol. 646] In my low moments I have sometimes thought that it might be worthwhile falling in with Trippe's idea and stopping our line at Santiago, provided we can in exchange get a controlling stock interest in Panamerican Grace, which might not be utterly impossible. This would certainly be worth some sacrifice, and we would not be

giving up very much in direct revenue, because the Buenos Aires run is not going to be very profitable anyhow. I have always abandoned this idea, however, because of the fear that if our line stopped at Santiago the shrinkage in our mail movement would be such that there would be little possibility of a third trip, and we might even lose our second trip. The loss of either of these would, of course, offset any financial disadvantage from the operation of the Buenos Aires Division; I am therefore of the opinion that we should hold on to this Division, which, in my opinion, means that we must fight for it, because our friend in his usual relentless fashion will never let up unless he has his way.

* * *

Very truly yours,

HJR/FL.

[fol. 647]

GOVERNMENT'S EXHIBIT 271.

SANTIAGO, 9th December, 1930.

D. S. Iglehart Esq.,
W. R. Grace & Co.,
N E W Y O R K.

Dear Mr. Iglehart,

"P A N A G R A"

Fifty-fifty control has just about reached a breaking point, so far as I am concerned, in connection with this Chilean negotiation.

No man can be left on a limb the way I have been and be expected to get results. What has happened to me is just typical of the way the Company's business is being handled. It will get worse as conflict of interest becomes more and more intensified.

If the Panamerican directors are going to vote en bloc it simply means that one man is going to run the Company or prevent its being run, and this man I fear would be equally satisfied with either alternative.

The Company cannot hope to succeed under such conditions.

Although we have never done it, Trippe has on a number of occasions suggested submitting controvertial points to arbitration. In line with this thought what would you think of the idea of adding an odd man to our Board, such man to be someone of high type, absolutely free from bias in favour of either side? Do you think Panamerican would agree to this idea? We would probably have to pay such a man a substantial director's fee, but this is the only way to go on which I can think of at the moment.

Yours very sincerely,

HJR/FL.

[fol. 648]

GOVERNMENT'S EXHIBIT 272

March 2, 1931

PAN AMERICAN-GRACE AIRWAYS

Mr. Patchin and I had a talk with Hoyt this morning. After some discussion of radio, pending bills and agency contracts, we got to the question of general management.

I recalled conversations that had taken place about a year or so ago about MacGregor and told Hoyt that I had recently learned that these had been carried directly back to MacGregor so that he felt that we were the people anxious to be rid of him although the decision was that of the entire Board. Hoyt promptly denied that this had gone back to MacGregor through him which I said I of course understood and had in fact already accused Trippe of having done this.

A general discussion followed during which the name of Grow was discussed for a moment but Hoyt finally said that, of course, the difficulty was that Trippe wished to take over the management of this line and that we recog-

nized that if MacGregor were let out without a successor being appointed Trippe would never consent to the appointment of a successor with the result that he would accomplish his result by indirection and that accordingly we were at a stand-off. He said that Trippe had some support among the directors for this view, mentioning Groveneur particularly, [fol. 649] although he, Hoyt, personally sympathized with our view. I explained once more the reasons why we could not agree to Pan American's taking over the operation. The net of it all was that Hoyt finally said he did not see how anything could be done at the moment except to get along as best we could from day to day as we had been doing.

* * *

In the course of the conversation I told Hoyt that I had formed the impression from a conversation with Trippe some time ago that he was figuring on some way of getting the money for his Argentine extension out of our contract, —perhaps by keeping us from the $1.80 rate on our second trip after July 1st and that we naturally felt it was highly irregular and would not for a moment tolerate any attempt in this way or any other to finance his Argentine extension at our expense. Hoyt admitted that Trippe had had some such idea and that he had told him that it was out of the question and suggested that I write Trippe stating my views which I shall do.

In spite of all this I still do not feel that we have enough to gain by trying to get Trippe off the Board, even if we can accomplish it, to offset the fact that by so doing we would make him an absolutely free lance against us. He would continue to run whoever took his place and we would [fol. 650] lose whatever slight restraint his dual position imposes on him. You will promptly question this view but I can only express it as my honest opinion. The fact that Whitney and Trippe are endorsing notes does not seem to me to indicate any weakening in their position and I am wondering if Hoyt's marital situation may not weaken his. I do not set much store by his suggestion of buying out Pan American's interest in Panagra but it may be a very faint ray of hope.

Mr. J. D. MacGregor,
Vice President & General Manager,
Pan American-Grace Airways, Inc.,
Santiago, Chile.

Dear Mr. MacGregor:

AIR EXPRESS

Mr. French of the Panair Express Department has just called my attention to the fact that our air express rate between Montevideo and Buenos Aires, both ways, is equivalent to 30¢ a pound, whereas the Panair rate between those two points amounts to only 25¢ a pound.

This being the only point where direct competition exists between the two companies, in addition to Miami/Buenos Aires, I have told French that we shall revise our rate to the equivalent of 25¢ a pound provided this meets with your approval.

If it does, kindly notify Messrs. Van Law and Zalduondo that they may adjust their tariffs accordingly.

Yours very truly,

PAN AMERICAN-GRACE AIRWAYS, INC.

Comptroller

Mr. J. D. MacGregor, New York.

Your personal #1395 (Oct. 19):

In connection with Mr. Trippe's suggestion that we pool the revenue from passengers that might take either the West or East coast routes to B.Aires, it strikes me that our Grace friends might see in this an opportunity for Trippe to tremendously increase his passenger comfort and accomodations on the East coast run during the period when the pooling arrangement was in effect, permitting at the same time the West coast passenger accomodations to stay as they are, or increase only slightly, and then at the end of this pooling agreement to have a very strong argument in his own favor on the East coast with regard to his passenger accomodations and also a strong argument with the U.S. postal authorities in connection with the question of subsidies for the East and West coasts. It would seem, therefore, that this pooling arrangement might possibly meet with considerable opposition.

I am indeed interested to note your idea that at present there may be some incentive on the part of Panair in booking passengers from the States to favor the East coast over the West coast route. I trust that this is not a fact, since I believe that if it is arrangements might be made to counteract this if possible. For instance all Grace agencies throughout the United States might be persuaded by Grace to put on an intensive campaign in connection with the West coast air route.

H.R. HARRIS

[fol. 657]

GOVERNMENT'S EXHIBIT 277

PERSONAL 1426

FOUR-DAY SCHEDULE

NEW YORK,
November 6, 1933

Mr. H. R Harris,
LIMA.

My dear H. R.:

With reference to your personal letter =1619 of October 30th, I do not know where you got your information that Panair is planning to institute a fast service on the East coast by January 1, 1934. I presume that this is an optimistic estimate made by George Rihl. As a matter of fact, Panair is figuring on a one-day faster schedule, but, so far, all the talk has been January 1, 1935.

It is pretty self-evident that Panair cannot accomplish this with their present slow Commodores.

. . . . .

You can be sure that we will not allow Panair to have the jump on us in this matter, and I think you also agree that we should not try to get the jump on them by extending our flying time with our present equipment.

. . . . .

I do not think that we should enter into a speed competition with Panair. From what I am able to gather, the United States Government is just as anxious for us to [fol. 658] increase our passenger traffic as it is for us to increase the speed of the airmail. By running at a reasonable speed, with later departures and earlier arrivals, and with more modern equipment, we can satisfy our passengers and, at the same time, decrease our lapsed time.

. . . . .

J. D. MacGregor.

PERSONAL Letter No. 1674

Subject: NEW EQUIPMENT

HRH/FL

LIMA, November 20, 1933.

Mr. J.D. MacGregor, New York.

Your personal #1426 (Nov. 6) four-day schedule:
#1428 (Nov. 7) " ".

Thank you very much for giving me this very interesting information about the possibility of Panair and Panagra speeding up schedules to and from B.Aires. One way of looking at our Panagra service would be that we should give the best service we can, regardless of what our affiliated company find they can do, since it is unquestionably true that we were in B.Aires long before Panair ever got there, and we have the shorter route, so from one way of looking at it we are justified in operating as we like over the route which we pioneered. It is quite true that if we did today speed up to four days between Cristobal and B.Aires and still had the same arrival and departure days at Cristobal as at present, we would be arriving in B.Aires on Friday, the same day as Panair arrives from the north, and leaving on Thursday, the same day as Panair leaves for the north, which would, of course, be undesirable both to the U.S. Post Office and the Argentine Post Office. However, I assume that you will be willing to authorize this four-day schedule, even with our present equipment, if we should suddenly have Panair pull a fast one on us and institute a faster service from B.Aires than they are carrying on at present. I, of course, am completely in agreement with you that we cannot enter into a speed-competition with Panair, since if it should ever come to actual competitive effort between the two companies, Panair could, of course, throw a good deal of money into high-speed

equipment to compete with us, whereas we would be unable to make any expenditures for our own high-speed equipment due to their failure to approve such expenditures in Board meetings.

GOVERNMENT'S EXHIBIT 279

No. 29 (AG Trip Series) Air Mail 2.24 New York 2.28

NEW YORK, February 22, 1934.

Harold J. Roig, Esq.,
NEW YORK.

Dear Roig:

PANAGRA

I have had several long talks with Harris with reference to Panagra in general, and in one of my recent conversations led up to the new schedule, primarily for the purpose of understanding some things which were not very clear to me before I sailed.

* * * * *

I then led up to the bottle-neck, which will be the northern section, i.e., Panama-Guayaquil or Panama-Talara, saying that it seemed to me that until we replace the Skorskys with a larger and faster seaplane we have a definite bottle-neck up there as regards passenger accommodations, and that from the little I knew about this aviation business it seemed to me that sooner or later we would have to find a faster and larger seaplane, adding that from what I heard, this kind of a plane is still to be designed.

Harris then opened up and said that this kind of a plane is already in existence and he explained to me in detail what

Redshaw tried to bring to your attention in his cable No. 17. I am enclosing herewith a copy of a letter from the Con- [fol. 661] solidated Aircraft, who are manufacturing this particular type of plane, which I understand has a capacity for 20 passengers and is supposed to cost about $110,000. per plane. In addition to this letter I also enclose marginal comments submitted by experts. Harris feels very definitely that this is the type of plane we should ultimately have on the northern run.

After we finished this part of the conversation I remarked that the two-day run from Miami to Panama seemed rather too long, and he immediately opened up, showing me a very detailed letter on the subject written by him to MacGregor under date of October 27. In this letter Harris submits very definite recommendations to cut the time of that trip down and to rearrange the routing. Harris says it is perfectly ridiculous that the Canal Zone gets a secondary mail service whereas Colombia gets a first-class service. It is his idea that Trippe should run the Panair planes from Miami to Panama in one day by running via Puerto Cabezas and then take care of Colombia with some sort of a shuttle service. He is quite frank to say that while in his opinion this is the correct thing to do, he does not think it would suit Panair to cut the trip from Miami to Buenos Aires by an additional day as this would only increase the differential against the East Coast run.

* * * * *

Very truly yours,

Enclosures

Dear Roig,

In casting about for a suggestion that might be useful to you on the one hand to offset Trippe's East Coast propaganda and on the other, the move in Washington toward cancellation or modification, I decided to put forward to you the idea of preparing and presenting a constructive and progressive program. The strength of the west coast position is that we can use fast land planes and availing also of the shorter distance can make faster time. If we could add night flying to our program and could find a way to beat the French record of 30 days, Paris to B. A., then I would feel that we could hold our own.

I know that I am suggesting a tall order and am also not unmindful of the necessity of avoiding risks. The Douglas plane is however such an enormous step ahead that I believe that with them we are going to be able to do something notable. Furthermore the moment is ripe. The enclosed card greatly impressed me and yesterday Tommy Hitchcock who had just arrived from Los Angeles by this route and who is well posted on planes told me that this Douglas service is unbelievable in its security and comfort. Should we not order some more, and meanwhile make a little sensation by trying to inaugurate our Douglas service with an eye opening performance?

I have been away from my desk for a fortnight but am feeling better and will be back in a day or two. Hope you are fine.

Yours, Iglehart

Letter No. 15
(D.S.I.Series)

ORIGINAL AIR MAIL LETTER
copy follows by steamer

New York, August 13th, 1934

Harold J. Roig, Esq.,
Lima, Peru.

Dear Roig,

. . . . .

A good many matters have come up and are still pending with reference to Panagra, and I am asking Cogswell, who is more conversant with them than I, to write you fully with reference to them. One matter came up, however, in my discussions with Clark, of which I want to acquaint you. I told Clark of the difficulty we are having in the administration of Panagra due to the character and attitude of Trippe and called his attention to the matter we are now discussing, namely, the advisability of speeding up the West Coast schedule. Clark felt so keenly the advisability of doing this that I asked him to discuss it with Root and see if he agreed to its importance, and if so, Root should make the suggestion to Trippe. Clark talked to Root and the latter said that Trippe was in favor of speeding up the service on the West Coast but that he was holding back as he was at odds with us with reference to the general plan of administration of Panagra. Clark called me up [fol. 664] yesterday and suggested that it might be a good thing for me to have a talk with Root to see whether we could not work out some suggestion for solving the fundamental difficulty we have with Trippe. I called Root on the telephone but find that he is away on his boat but expects to be back shortly, and I left word for him that I would be glad to see him as soon as it is convenient.

Meanwhile, regarding the question of the improved West Coast schedule and the question of the equipment for the northern section, I see very little prospect of our making very much progress with Trippe here and feel that, burden-some as it will be to you, our best chance will be for you to work this out with Trippe. You have more influence with him than any of us, and although I think he will vigorously resist any schedule from the West Coast to B.A. that is faster than his East Coast schedule, I should think that Washington would support us in an effort to make as fast a schedule to B.A. by the West Coast as is safely practicable. It seems to me that it would be difficult for Trippe to sustain the attitude that no advantage is to be taken of the shorter distance, or of the faster land equipment, or of the possible saving of time by night flying or otherwise that is practicable on the West Coast in order to avoid getting to B.A. in quicker time than that of the East Coast service. [fol. 66]

Regarding the airmail hearing, and particularly regarding the danger of Trippe's taking any action which might be prejudicial to Panagra, this again is a matter of conjecture. I am going to make an effort to get at some basis with Root that will put an end to our impasse with Trippe, and although I have no reason to think I will be successful, I am certainly going to try hard to get at some suggestion to put before you, and if by chance I am successful in this, then the atmosphere will be clear and your task made easier.

Yours very truly,

[fol. 666]

GOVERNMENT'S EXHIBIT 282

MEMORANDUM OF CONVERSATION WITH J. T. TRIPPE, SEPTEMBER 14, 1934 AT HIS OFFICE 4:00 PM

oooOooo

After discussing various general matters, I said that we had all become convinced as a result of certain recent developments and particularly various matters which had come to my attention on my trip, that a serious situation existed with regard to Panagra which we would have to find a way to remedy and, painful though it might be to do so, I felt that we should discuss the matter with the utmost frankness.

* * * *

I replied that I was sure there was some way of making the trip in one day to the Canal if he wanted to do so and felt that the real reason for their not doing so was to prefer the East Coast Line in every possible way over the West Coast. I pointed out that this was further emphasized at the other end of the line where every effort was made in B.A. to emphasize the fact that Panagra was merely a West Coast line and that the only way to the States was via the East Coast.

* * * *

I called attention to the fact that although he had radioed me that he invited the people in the Brazilian Clipper to return by the West Coast, I knew for a fact that he had on the contrary urged even those who wanted to come that way [fol. 667] not to do so and that upon my return I had found him knocking our line in the newspapers and that the only conclusion that could be drawn from his attitude in all these matters was that he was seeking in every way to prejudice the West Coast line to the advantage of the East Coast and that this was no way for a partner to act.

New York City, N.Y.

Dear Garni:

PANAGRA.

I think we ought to get definite information as to the number of passengers we are turning away on the West Coast trips. It seems to me that for Trippe to be building up this system of the East Coast, with all the expense of publicity and that at the same time he should be spending a year in futile discussion and in an endeavor to prevent the logical development of our West Coast business is something that is little short of criminal. I think that you ought to get Grenville Clark to put the whole thing on a piece of paper in such a form and in such a powerful light that it will bring Trippe to his feet and to immediate action. I am not sure that in doing this it may not be advisable to leave a very strong position on record so that we will have Trippe in our fingers in the future, and at all times.

Yours sincerely,

DSI/KH.

Letter No. 75 Airmail 5.12.35
(HJR trip series) NY 5.18.35

ORIGINAL AIR MAIL LETTER

Copy follows by steamer

Santiago, May 11, 1935.

R. Garni, Esquire,
New York.

Dear Garni,

BUENOS AIRES TRAFFIC

This letter was begun in Buenos Aires after extended discussions with Messrs. Dagnino, Moore and Martin there but I have delayed putting it in final form until after an opportunity to turn the subject over in my mind a bit.

In my discussions in both Buenos Aires and Santiago I have endeavored to emphasize that we must have more through traffic from both of these points. While we want every possible passenger between Buenos Aires and Santiago, we cannot consider that either of these offices is entitled to any particular credit for getting this traffic since to so large an extent it comes to us automatically because of conditions on the Transandine. The traffic effectiveness of these offices must be judged almost entirely by the traffic which they secure for points north of Arica and particularly for Cristobal and points north, which, in the case of Buenos Aires, means to Miami since passengers for Central [fol. 674] America and the West Coast of the United States would normally favor our Line in any case. We must have long-haul business from Buenos Aires and Santiago, not only because of the greater revenue, but because so long as we cannot carry local traffic through Chile, this is the only way we can fill our planes over that long run between San-

tiago and Arica. This, as I see it and have tried to develop both with Dagnino and Moore, is the nub of our traffic problem in the Southern and Eastern Divisions.

The obvious inadequacy of the present movement is apparent from the following figures for the year 1934:

	No. of passengers to Miami	Passages issued against: Cash Sales	CTC	Exchange Orders	PAA or Panagra Flight Coupons
Buenos Aires	25	8	1	4	12
Santiago	12	8	3	0	1

These figures show, not only that the total movement from both of these points was wholly inadequate, but, what is more specifically to the point here, that the number of through passengers directly influenced from these points, —i.e. their cash sales plus CTC—was insignificant being only 9 from Buenos Aires and 11 from Santiago. The out- [fol. 675] standing problem at both points, therefore, is the development of more through business. The explanation given in Buenos Aires for the small movement is that the field of prospects is limited largely to Around South America tourists and to commercial travellers, the latter being considerably restricted by the fact that American interests are not of a size in proportion to the city. Argentineans travelling abroad are more likely to go to Europe than to the States and even when going to the States the problems of baggage and much greater expense by air are serious ones. I feel *that the long-haul problem has not been scratched* and that we need a thorough study and specialized attack on it in both Buenos Aires and Santiago. The problem will involve devising selective media of approach which will reach at reasonable expense the selected list of prospects on which we must rely, and a carefully worked out system of contact and follow-up.

The question immediate presents itself whether a joint office with Pan American in Buenos Aires or a separate office will get the best results. A joint office is certainly less

expensive. I doubt if we could run an adequate traffic office of our own in Buenos Aires for what our present contribution to the joint account now amounts to and certainly not [fol. 676] for what that contribution will be when reduced to the 50% basis. There is some risk that separate offices might lead to destructive competition where each office would be pointing out the disadvantages of the other's route, the result being definitely prejudicial to travel on both lines.

The share of the Buenos Aires traffic which we have received to date from the joint office is less than we would be entitled to on a strictly mathematical basis. In 1934 there were 33 passengers from Buenos Aires to Miami. Of these, 25 travelled via Panagra and 8 via Panair, but, of these 25, 12 travelled on Panair or Panagra flight coupons and 4 on exchange orders. Most, if not all, of these 16 passengers were probably Around South America tourists who had been routed down the East Coast and up the West. No choice of route was involved in these cases and had their tour proceeded in the opposite direction the purely superficial conclusion which might be deduced from the above figures would be entirely reversed. Eliminating these 16 cases from the above 25 leaves 9 West Coast passengers (including 1 CTC and 1 passage issued in connection with Panair ticket) who might possibly have been influenced in choice of route by the Buenos Aires office, against 8 East Coast passengers (including 1 CTC). As we have twice [fol. 677] as many trips as Panair, we should mathematically have had at least twice as many passengers, but where the total is so small conclusions from this comparison cannot be pressed too hard. Special and personal considerations become too large a factor where such small figures are involved. On the other hand the fact cannot be ignored that with a service one day shorter to Miami than the East Coast we have so far enjoyed a natural advantage which will cease to exist when the schedules become the same. I discussed frankly with Moore and Martin how they proposed to see at that time that each company received fair treatment. Their only answer was that the passenger determines the route he will take for reasons of his own. With equal time schedules I doubt that this will serve our purpose.

Taking all things into consideration, my feeling is that we have not sufficient reason at this time to warrant considering a separate office and that we should continue with the joint office with certain changes. In doing so, however, we must be constantly alive to the risk we are running and continually on the lookout to see that we are not being prejudiced. Once it became apparent that even with the changes proposed we were being prejudiced there would be no escape from a separate office.

[fol. 678] The changes we have under consideration are:

(1) The entire Panagra traffic organization should concentrate more attention on the long haul traffic problem from Buenos Aires. Moore fully understands that, as the agency of Panagra, the Buenos Aires office is under the general instructions of the Panagra traffic organization, subject to the policy of avoiding antagonistic competition between East and West Coast Lines. By constant contact with the office, supplying them with more distinctively Panagra literature and Panagra traffic ideas and seeing that these are carried out, we can, I believe, impress the position of our Line on that office. The fact that our business over the Andes supplies a predominant part of their current movement assists to keep the position of our Line prominently in the foreground.

* * * *

If you have any definite ideas on any of the above suggestions it might be well *to cable promptly on receipt of this* letter as the matter is likely to be moving right along.

Very truly yours,

[fol. 679]

CABLE ADDRESS
"PANAGRA"

Private & Confidential

January 24, 1936.

Memorandum to Mr. A. Garhi,
First Vice President,
W. R. Grace & Co.,
New York City.

* * *

I suggest for your consideration the purchase of two Northrup Gamma airplanes, equipped with F-53 Cyclone motors, which would cruise at 200 miles per hour using 70% power, gassed for a range of 1760 miles and which would then carry over 800 lbs. of mail. The plane would be manned by a pilot and equipped with radio, the weights thereof having been included in calculating the above payload. The Gamma has a maximum range of 2,120 miles, at which range the payload would be over 400 lbs.

* * *

In developing this thought I have considered:

1. That it would put us beyond the reach of Panair east coast competition.

2. We would not infringe Panair rights by flying over their territory or that of their affiliates.

3. It would practically assure us a monopoly of U.S. and intercountry mails.

4. It would permit PanGrace passengers to continue on the present 3½ day schedule which would not be too onerous.

5. The propaganda value would be enormous and our place in the sun would be restored.

[fol. 680] 6. My discussions with Mr. Allen and Mr. Campbell have shown this operation to be feasible.

J. D. MacGregor.

J. D. MacGregor.

[fol. 681]

GOVERNMENT'S EXHIBIT 288

August 4, 1936.

C. V. Whitney, Esq.,
230 Park Avenue,
New York City

Dear Whitney:

Once or twice in the past I have asked for and received your help in an endeavour to keep the affairs of our jointly owned enterprise, the Pan American-Grace Airways, moving in a satisfactory way. Now I come to you again with a matter which has great importance to this enterprise.

I have recently returned from South America, and while there looked carefully over the business and was impressed with the fact that our company is receiving from the Pan American Airways very little traffic. In fact, I estimate roughly that there are only about 1½ passengers per trip coming to Panagra at Cristobal from the Pan American services from Miami and Brownsville combined. On looking for the cause of this condition I think that I have found it in the fact that we are not getting adequate publicity and traffic solicitation in the United States. As you probably know, we are paying the Pan American Airways a substantial amount each year for attending to publicity and traffic work, but notwithstanding our efforts to obtain adequate service, we have up to the present time found it impossible to do so. Publicity in respect to the Pan Ameri-
[fol. 682] can-Grace Airways and its services is not only not obtained but it is systematically suppressed by the Pan American Airways. I hand you herewith a memorandum

which will give you an idea of what is occurring in this respect.

Now the point that I want to bring out is this. I believe that not only is Panagra suffering from a lack of publicity and traffic service in the United States, and not only is the company paying amply for something which it is not receiving, but I venture the opinion that the Pan American Airways itself is suffering a prejudice by failing to sell the service of our joint company. I believe the physical conditions and weather conditions of the route to the Argentine via the West Coast are so far superior to those of the route on the East Coast, and due to this and the reduced distance it is so much more practicable to give a fast and satisfactory service to Buenos Aires via the West Coast than the East Coast, that if the Pan American Airways were to devote their effort to building up business via the West Coast it would probably make more money in the end with a half interest in our joint company than it would make with 100% interest in the East Coast service south of Rio or possibly Santos.

The situation of our company, giving as it does today one of the finest air services in the world and having no adequate publicity or traffic solicitation in this country is [fol. 683] quite anomalous and obviously cannot be allowed to continue. We have endeavoured to be as patient as possible but I fear that we have reached a point where we cannot continue to tolerate the treatment which our company is receiving, and I believe, after looking over the position, you will agree with me that it should be modified.

I appreciate the fact that you will eventually have to take up this matter with your associates, but, I would be very much indebted to you if you would treat the matter as confidential until you have gone over it carefully yourself and given me an opportunity to discuss it with you.

Yours sincerely,

(Sgd.) D. S. IGLEHART

BUE Sales Folder

* * *

We've really got a competitive situation in Argentina now and apparently no holds-barred as to what we do about it insofar as to the quantity of advertising we put out to hold and improve on our market. Panagra is advertising right and left about their "Thirty Hours to the U.S.A." and their "Naturally Air Conditioned West Coast Route" so we've got to get on our toes and sell the East Coast—but good.

We'd also like to adapt the BUE folder for DEO and print a quantity of them there later but we'll have to wait 'till the BUE art work can be sent over to DEO for a local quotation.

June 19, 1947

* * *

It is my understanding from you that some sort of agreement exists under which we are supposed to send about half of the Miami-BA shipments via Pan-Grace with the apparent intent of giving them about half the revenue.

You told me that the Miami Express Department has been sending about half of the Miami-BA shipments by way of Pan-Grace but as you know, Miami has not been marking the Airwaybills so as to enable G.A.O. to distribute this revenue to Pan-Grace. Alternative methods of making this distribution appear to be as follows:

1. You suggested that Pan-Grace bill us based on Shipping and Discharge lists maintained by them. Since distribution of revenue originates in G.A.O. and since the revenue would be distributed before billings would originate from Pan-Grace, G.A.O. is not in a position to accept this method.

2. Miami Express could enter the flight number on each Airwaybill and G.A.O. would distribute accordingly. You state that this is not possible to accomplish.

3. Arrangements could be made (if such is the intent of the deal) to have G.A.O. distribute half of the Miami-BA express revenue to the West Coast route of which Pan-Grace would receive its share. If this were done, Miami Express would have to develop a definite control of shipments to make sure that half of the shipments went via the West Coast as otherwise L.A.D. would be carrying some for which it would not receive revenue. This same control of shipments would have to exist at Balboa to avoid shipments being diverted there and sent to Buenos Aires via the North coast.

[fol. 690]

In this connection, it should be noted that the C.A.B. in authorizing the thru flight agreement with Pan Grace specifically denied a provision in paragraph 13 of that agreement which provided for sharing the Miami-BA revenue in a manner similar to that contemplated in the deal we are discussing. It is suggested that you might want to refer this entire matter to the Legal Department before taking any further action.

Amos Hratt
Assistant Comptroller

PANAGRA THROUGH FLIGHT AGREEMENT.

* * *

In addition to the special advertising campaign for the through flight service, Mr. Gunter points out that in October and November, Pan American is planning a national advertising campaign aimed at the development of business to South America with major emphasis on the Argentine which will cost approximately $60,000. As originally planned, this was primarily for development of PAA business via the east coast. However, it is believed that with the development of the through flight service, it might be

that the emphasis on east coast and west coast could be balanced and that the amount of money involved could be considered as 50% applicable to east coast and 50% applicable to west coast. If such a program were followed through, it would mean that $30,000 of the total of $60,000 would be applicable to the through flight service.

In connection with this matter, a study has been made of the amount of traffic between the U. S. and the west coast (including B. A.). We have considered that under the through flight agreement, ⅔ of the total traffic between B. A. and Miami would go via the west coast. On this basis, traffic has been projected to revenues which total for the year 1946 approximately $1,900,000. This revenue is based on one-way fares in effect for PAA and Panagra. Of this total revenue approximately $465,800 was for the account of PAA and the remainder of $1,435,000 for the account of Panagra or approximately 31½% and 68½% of the total revenue on this route would accrue to PAA and Panagra respectively. It occurs to me that the participation [fol. 692] in revenues of the service from Miami to B. A. via the west coast would be a fair basis for participation in the cost of advertising. If there is agreement in this premise, PAA would accept 31½% of the U. S. advertising program ($100,000) covering the through flight service, 31½% of the cost of the advertising program of Panagra on the west coast ($65,000) and 31½% of ½ of the cost of the national magazine advertising program ($30,000).

With regard to advertising at B. A., it is assumed that the advertising of PAA and Panagra will be directly competitive from the standpoint of the B. A.-U. S. traffic. It would appear, however, that we would require agreement with Panagra as to the amount of money each company will spend in advertising through service to the U.S. As I understand it, we are currently in agreement in spending $3,000 per month. However, I am not informed as to whether this $3,000 is entirely directed toward the development of traffic to the U.S. If it is based on the revenue principle of distribution, it would be necessary for

PAA to absorb 31½% of the cost of Panagra's advertising of the through flights in B.A.

Attention Mr. J. T. Shannon

Gentlemen:

Ex-employee Robert Kelly, who has just returned from the states, visited this office yesterday and reported the following:

A friend of his whom he met in Miami inquired of him why it took so long to travel Miami Buenos Aires. Kelly asked to see his tickets and he was sold over the East Coast route. Mr. Kelly proceeded with his friend to the downtown Pan American Airways Traffic Office and when he asked the Traffic Clerk why he sold this passenger over the East Coast, the Clerk replied: "We are instructed to sell all passengers over the Pan American Airways route unless the passenger particularly specifies the West Coast or Panagra."

In addition Captain Achilles on Monday evening May 17, was standing in this same office when a passenger inquired if he could travel on the DC-6. The Traffic Clerk replied that there was no DC-6 that evening, whereupon Captain Achilles reminded him that we were now into daily service

with DC-6's. The Traffic Clerk in front of the passenger refuted this argument and went further by saying that there was a DC-4 the evening before (May 16) and Captain Achilles of course told him he was incorrect. The rest of the discussion is wordage but the point is clear.

Reasons such as the above are probably partially responsible for the falling off in our southbound loads over El Interamericano. We trust you will be able to use this information advantageously.

Yours very truly,

Jim
/s/ JAMES W. WALKER, JR.

BUENOS AIRES SALES TO THE UNITED STATES

Please refer to your copy of Mr. Homs' memorandum of August 13 showing comparative PAA-Panagra sales ex Buenos Aires and Montevideo to the United States. As you are aware, Panagra during the months of June and July far outsold PAA on both one way and round trip tickets.

I would very much like to receive your thoughts as to what we can do in Buenos Aires to offset this alarming increase in Panagra sales to the States. A short time ago, I wrote you on the same subject and you, in turn, wrote Buenos Aires indicating that every effort should be made to plug our guest houses along the route which seemed to be the only weapon we have to counteract the Panagra DC6 service. If, However, you feel that any other steps can be

taken from a sales or advertising standpoint, I would certainly appreciate receiving your ideas.

SEND ORIGINAL BY PAA MEMORANDUM

TO: Division Sales Manager FROM: Regional Traffic Manager

DEPT. OR DIV.	LAD	DEPT. OR DIV.	LAD
Location	Miami	LOCATION	Rio de Janeiro

DATE: 25 August 1948

SUBJECT: BUENOS AIRES SALES TO THE UNITED STATES

REFERENCE:

In reply to your memorandum of August 17th with further reference to our diminishing sales to the United States in Argentina as compared to the increasing sales for Panagra we advise you frankly that the only solution we foresee to this competition is the use of competitive equipment by LAD. I do not believe that efforts from a sales or advertising standpoint beyond what we are now doing could conceivably result in offsetting this competition or placing Argentine sales to the United States on a comparable basis for both companies. We are satisfied our Buenos Aires office is plugging our East Coast guest houses and is offering our service to the United States on an impartial basis. However, we cannot ignore the difference in equipment and service aloft in favor of Panagra.

We have discussed this matter of service in a round-about way with Mr. Fernandez, assistant flight superintendent

who is now in Rio, and we find that, for example, there is no comparison in the presentation of meals aloft between the two companies. Whereas Panagra offers meals in a very attractive plastic tray with all items complete, we in turn offer the same meal but in a less attractive manner. Then we have the comfort and speed of the DC 6 as against the DC 4.

We do not mean to be overly pessimistic, but we cannot help feeling that until we have DC 6 Constellation or other comparable equipment we will have to be content with receiving our share of Panagra's income from Argentine sources.

[fol. 697]

GOVERNMENT'S EXHIBIT 300

April 22, 1949

Memorandum to: Mr. A. B. Shea

The following statement shows the passages sold by Pan American Argentina S.A. to New York out of Buenos Aires via east and west coasts respectively for the year 1948:

Month	*East Coast*	*West Coast*
January	176-1/2	34
February	82-1/2	63
March	241-7/2	42
April	230-4/2	82
May	142-6/2	142
June	154-2/2	83-4/2
July	93-3/2	84-1/2
August	101-3/2	88-3/2
September	133-5/2	106-2/2
October	146-10/2	106-3/2
November	94-3/2	107-3/2
December	106-2/2	110-1/2

The interesting item in these figures is that during the second half of the year Pan American carried approximately 15% more than Panagra to New York, whereas during the first half Pan American carried 130% more than Panagra. For the year 1948 Pan American carried approximately 60% more than Panagra.

The improvement during the last half of 1948 is very encouraging, but I still cannot see why we cannot get better than a 50-50 division of this traffic when we are flying DC-6's and Pan American is flying DC-4's.

The record during the first half of 1948 is absolutely amazing and I would like very much to hear from somebody in Panagra the reasons for Pan American's having [fol. 698] carried 130% more traffic out of Buenos Aires to New York than we did when we were flying DC-6's and Pan American was flying DC-4's.

We have to particularly watch this situation now that Pan American have their Sleeperettes on the run, and an encouraging feature of this point is that we seem to be holding more than 50% of the traffic during the month of February. I am sure you will agree with me that this trend must be maintained and that we have to hold the Buenos Aires business.

We have the handicap of the changeover at Miami, but this still will not explain the very poor performance of 1948, particularly the first half.

J.P.G., Jr.
J.P.G., Jr.

[Handwritten notation at top of 1st page of Memorandum]

J.P.G., Jr.

I think the explanation is entirely the fact that we were running DC-4's through April and the resumption of the DC-6 service explains the improvement that started in May. I agree of course that we should get more of the business.

A.B.S.

MIA-BUE TOURIST FARES

It is highly important that the MIA-BUE tourist fare be equalized east coast versus west coast as we cannot afford to permit the west coast routing to undercut the east coast. The absence of a tourist service from Miami to San Juan necessitates the absorption of the differential, but that action is entirely justifiable under the circumstances.

Therefore, let's immediately move up on equalizing the east coast tourist fare with that published by Panagra.

SERVICE ON TOURIST FLIGHTS

NEW YORK,
June 23, 1949

Mr. J. W. Walker, Jr.
LIMA

Dear Jim:

*****

In this instance I do not feel that modification of the aforementioned instructions with regard to food service and cabin attendants on the tourist class flights ~~was~~ is

justified by the facts stated in your two letters above referred to, and it seems possible that perhaps your staff does not have the picture as to our concept of the tourist class service. We are operating this service (a) for the purpose of meeting the competition of the tourist class service of Braniff on the West coast of South America and of PAA at Buenos Aires; (b) to improve our capacity and frequency of service for cargo and express; and (c) to determine by actual experiment whether a substantial new traffic market can be tapped in our area at substantially lower rates. All of this is being done at the very considerable risk of diverting to this service passenger traffic which would otherwise travel on El Interamericano at full rates.

....

Sincerely yours,

Douglas Campbell

Avenida Roque Saenz Pena 788
Buenos Aires, Argentina

Buenos Aires, September 1st, 1949.

Mr. Porter Norris, Traffic Manager
Latin-American Division
MIAMI.

Personal

Dear Porter

I have been meaning to write to you about a certain situation here in Argentina for some time but refrained from doing so while our one-way sales restrictions were on as we had so many problems at that time that this matter was rather insignificant by comparison.

Now that we are back in business down here we are making every effort to get everybody sales-minded again and I am certain that the figures in our monthly sales reports will be more encouraging from now on. We have some nice training programs organized and if we can get a few raises for some of our personnel we expect CAPAASA to be back competing with New York for the title of "Number One System Sales Office".

The problem I am writing about at this time is a very delicate matter but one about which you should definitely be informed as it is having an increasing daily effect on LAD's efforts to sell their excellent "El Panamericano" and "El Turista" services. As you know, I have always conducted myself on an entirely neutral basis when it came to the question of selling Panagra or Pan American to the United States or other competitive points. I feel quite certain that all of the CAPAASA employees are likewise following this procedure and all of us will continue along these lines until instructions to the contrary are received. Hardly a day passes but what personal friends in the American colony ask me about our services from Buenos Aires to the States and I always quote both impartially and let the passenger make his own decision as to what route he prefers. Unfortunately for LAD, there is a group of airline personnel here in town whose sole interest is in selling Panagra. I refer to the personnel in the Panagra Sales Office here in Buenos Aires and I am calling this matter to your attention at the present time because the effect of their presence here is increasing every day and as long as they continue to be here the LAD is not getting the neutral representation in the local market which they had a right to expect. The personnel in this office consisting of *Mr. Bourne*, *Mr. McCoun*, *Mr. Pickering* and *Mr. Earsman* have developed a great number of contacts in the English speaking colony here, especially among the Americans, and naturally not being held down to the neutrality policy on U.S. sales, such as George and I are, the promotional efforts which they are able to do through [fol. 702] their social contacts, is an important factor to be

considered in analyzing LAD's position in the Argentine market. You can rest assured that when any of the personnel of this office have a chance to discuss transportation to the United States at cocktail parties, luncheons, American Club functions, etc., they do a very enthusiastic job for Panagra. Whenever George and I have similar occasions we are supposed to give enthusiastic support to both Pan American and Panagra, so that over a period of time this influence is bound to result to the sales detriment of your Company.

I do not want you to feel that I am bringing this matter to your attention on a personal basis. I have the highest regard for all of the employees of Panagra Buenos Aires Sales Office and socially our relationships are on a most excellent basis. What I am trying to say is that the presence of the local Panagra Sales Office, regardless of the personnel involved, increasingly tends to upset the balance of promotional power and works against the sales neutrality position which Mr. Dean so strongly emphasized to me before I came down here. Whether or not you wish to do anything about this matter is not my concern, but I feel that it is my duty to make the situation known to the persons in the LAD who are responsible for getting their share of business out of the Argentine market.

Best personal regards.

Sincerely,

/s/ Juan

September 7, 1949.

PANAGRA REPRESENTATION BUENOS AIRES.

CONFIDENTIAL AND PERSONAL.

Some months ago, when Panagra made known their plans to open a local office in Buenos Aires where certain Panagra personnel would be assigned, I opposed it on the basis that it would give Panagra a selling advantage over PAA in that important revenue producing city.

I discussed this with Mr. Morrison, who brought up the subject during a visit of Mr. Douglas Campbell in Miami, and I was invited by Mr. Morrison to his office to discuss this possibility with Mr. Campbell.

Mr. Campbell pointed out the reason for the move of the advertising office from Lima to Buenos Aires was because of the lack of vendors in Lima to print the type of advertising that Panagra desired. Mr. Campbell further informed us that the activities of this group would be limited directly to preparation of advertising for papers, magazines and brochures.

For your information, the personnel in this office now consists of Mr. Bourne, Mr. McCoun, Mr. Pickering and Mr. Earsman, which enables Panagra to enjoy a great number of personal contacts daily in the English speaking colony of Buenos Aires especially among the Americans.

Let us not forget that George Smith and Juan Homs find it necessary to retain neutral attitude in their sales promotion contacts and efforts. From the above, you may well realize that Panagra is beginning to enjoy a distinct sales advantage.

It is my belief that it is timely and necessary that Panagra again be cautioned the men assigned to their advertising office in Buenos Aires should be limited to their definite assignment, preparation of advertising material and if they persist in their present indirect solicitation promotion efforts that PAA will find it necessary to assign a Regional Traffic office in Buenos Aires to counteract their activities.

November 29, 1949

You will be interested in a memorandum dated November 25 which I have received from John Shannon, Vice President of Panagra, which I quote in full.

"In the latter part of October a Major General Appleyard of the National Provincial Bank of London, who is making a trip around South America from New York, came to see Mr. Campbell, and during the course of the conversation expressed great surprise that it is possible to go from New York to Buenos Aires via El Interamericano in 26 hours rather than the longer period required via the east coast. He indicated that had he had this information when he bought his tickets in London he would have requested to be routed via the west coast, both because he preferred the shorter route and because he could have used an extra day in New York to great advantage. Unfortunately, at the time he was given the foregoing

information from Mr. Campbell he was unable to change his plans because after he had bought his ticket via Rio he made appointments to see some people in Rio, although he would not have gone via Rio specifically for that purpose.

"He stated that when he was discussing his trip with travel agents and the Pan American office in London, no one gave him any information with regard to the existence of the route via the west coast, much less any information with regard to the service available via that route, and he was quite put out that he had not been completely advised concerning the service available between New York and Buenos Aires at the time of buying his tickets in London.

"It appears from the foregoing that PAA offices abroad are not aware of their responsibilities as our General Agents, both with regard to their own personnel and the advice to travel agents. It would be appreciated if you would have the necessary action taken to correct this obviously unsatisfactory situation.

"Thank you for your cooperation."

[fol. 707] Please take the necessary action to be sure that all our personnel quote both services in South America—i.e., the west coast as well as the east coast.

GOVERNMENT'S EXHIBIT 307

A.B.S. PANAGRA TRIP SERIES
No. 3

BOGOTA, January 10, 1950

Douglas Campbell, Esq.

NEW YORK, N.Y.

Dear Doug,

I have just read a copy of Bourne's letter #3749 and of McCoun's letter to Bourne dated December 19th, both reporting on their respective trips to Montevideo and Rio. I am frankly very poorly impressed by these letters and will cover this fully later on in this letter.

The outstanding impression I got from both letters, with respect to Montevideo, was that Bourne and McCoun are thinking primarily, if not exclusively, of getting a share of the passengers who might otherwise travel via Braniff from Rio and secondly of getting passengers who do travel via Braniff to change to Panagra at Lima. It seems to have escaped both men that as far as Montevideo is concerned our principal competitor is Pan American Airways. I am unable to find any indication in either of the letters that we are going to put on a real drive in Montevideo to get through long haul passengers destined to points in the United States.

I have had to do a lot of adding and subtracting and dividing of the figures given in McCoun's letter. From that it appears that in 11 months Pan American's sales to New York, Miami, Los Angeles, Houston and San Francisco [fol. 709] totalled 372 passengers, or an average of 34 passengers per month. McCoun states that the breakdown showing passengers travelling PAA vs. Panagra is not available. What must be available, however, is the breakdown of the Panagra vs. Pan American sales in Montevideo for that period and from that we can work out some idea

as to how much of the U.S. movement we were getting. My opinion is that we are getting little or none.

McCoun's letter shows that Pan American's sales (which include Panagra) amounted to $730,000.—for the first 11 months of 1949.

I feel that Bourne and McCoun should be impressed with the fact that our principal objective in Montevideo is to get through passengers away from Pan American. We have the best service and the fastest service and I presume the same tariff. Therefore, we want to go out and get business from Pan American, just as much as we want to take business away from Braniff. I do not understand the apparent failure to grasp this very obvious principle on the part of two of our own top sales promotion men.

With respect to Bourne's letter, two of the three pages are devoted entirely to a discussion of the Rio picture, the fare differential in Braniff's favor on his through service Rio/Havana and the necessity of eliminating it. In the rest of the letter comments on Montevideo are limited to the statement that we are faced there with the problem of "competitive carriers waging an exchange war and by selling in Argentine pesos or Brazilian Cruzeiros or a [fol. 710] combination of both, underselling us very seriously". The remainder of the letter is devoted principally again to Rio and Braniff.

There is not one word of explanation in the letter as to why the Montevideo market has been so completely neglected by the Buenos Aires sales promotion staff. The only encouraging statement in the letter is that Bourne's office will call weekly on Montevideo.

I think this is pathetic.

McCoun's letter contains a good deal more meat principally, I think, because he undertook to secure some sales statistics requested by New York. However, there is no attempt to analyze these statistics and the monthly sales were not added up to give 11-month totals, and the letter generally has quite an amateurish tinge. Here again, however, the last two pages of the four-page letter are devoted

to the Braniff/Panagra competition to such an extent that one of the immediate steps McCoun is taking is to complete breakdown of the "Elapsed Times" out of Montevideo to Buenos Aires connecting Panagra to all South American west coast points and principal cities in the United States, as compared to Braniff "Elapsed Times" via PAA to Rio with connections there with Braniff. (underlining mine). Far more important than this is a breakdown of our "Elapsed Times" vs. those of Pan American and the active selling of Panagra for travel to the United States vs. Pan American.

****

Sincerely yours,

sgd. ANDREW B. SHEA

c.c. Mr. John T. Shannon

[fol. 711]

GOVERNMENT'S EXHIBIT 308

January 13, 1950

MEMORANDUM TO: MR. A. B. SHEA

Do you see any significance in the fact that southbound out of Miami Pan American is carrying 25% of the movement to Buenos Aires, whereas northbound to Miami they are only carrying approximately 15% of the movement? In other words, Pan American seems to be getting a better share of the business out of the United States than they are to the United States.

Furthermore, with our running DC-6's versus their DC-4's, actually Pan American carries 709½ passengers down the East Coast to Buenos Aires versus Panagra's 708½. Don't you think we ought to get at least ⅔'s of the movement?

If these figures are another proof that Pan American is not handling our sales as carefully as they should be, can't we get any breakdown showing the number of through non-stop passengers who travel to and from New York/Washington and Buenos Aires?

It is difficult to see why anyone would travel down the east coast on a trip involving fourteen hours more time if they knew the facts. This would be a very strong indication that prospective passengers are not being told all the facts.

Are we continuing to have checks made at the different [fol. 712] Pan American counters and at the different tourist agencies in Chicago, Los Angeles, San Francisco, New Orleans, etc., to see whether or not Pan American is telling people about Panagra's better service?

J.P.G., Jr.

[fol. 713]

GOVERNMENT'S EXHIBIT 309

MIAMI, January 18, 1950

MEMORANDUM TO MR. ANDREW B. SHEA

In a discussion with Baker, at one point he said he would rather have a deal with Braniff if he goes to Buenos Aires since Braniff does a much better selling job than Panagra's agents in the Argentine or than Panagra's agents in the U. S. and even possibly better than Panagra's agents in Lima.

Both he and Sternberg said that Pan American was selling their own service over ours constantly, and attempted to prove his point by asking me to go down and look at the Pan American, Miami Beach office where there was no Panagra literature, also to check in Cuba where Pan American is selling Braniff to Lima and Pan American to Rio. Baker also cited the Montevideo situation as showing that we are not at all aggressive saleswise.

I naturally answered by stating that you were taking all these things in hand etc. but I think the Pan American Miami Beach window and the Havana situation should be checked into and the Uruguay situation fixed immediately along the lines of your letter to Doug Campbell concerning

Bourne's and McCoun's reports. On this latter point, how long do we keep people who write reports like that?

J.P.G. Jr.

cc: Mr. H.L. Clark—You might get started on the Miami Beach window immediately and find out from Kirkland why he doesn't check these things.

J.P.G Jr

[fol. 715]

GOVERNMENT'S EXHIBIT 311

Vice President Morrison	E. Balluder
Latin American	Executive
Miami	New York
July 28, 1950	CONFIDENTIAL

PANAGRA

I had lunch yesterday with Howard Clark and Gustave Vidal who discussed with me some of their ideas about non-cooperation on the part of Pan American.

1. They again brought up the question of separation of sales activities in Buenos Aires which had been discussed between Mr. Peter Grace and Mr. Trippe, and on which Mr. Grace still expects a decision. I told Messrs. Clark and Vidal that to the best of my understanding the decision had already been made negatively.

2. Assuming that our relations in Buenos Aires continue as at present, they talked about the advisability of having Bourne and his secretary take space in our offices in the Shell Building to which I had previously agreed.

3. They brought up the case of Smith. Panagra has lost confidence in Smith whom they consider a one-hundred percent Pan American man. They are annoyed because Smith leans toward Pan American for what they call "favors".

They are very jealous because Smith talks to us about his housing problem, his automobile plans, his vacation plans, etc. They again bring up the fact that his bonus is paid by Pan American without participation from Panagra and that consequently Smith has become a Pan American man who does not serve their purposes well any more. I expressed my surprise at their attitude because after all CAPAASA is a one-hundred percent owned Pan American company and Smith as an employee of that company should naturally look to his employers for the matters they mentioned. They referred to our contractual understanding that we would consult with them on CAPAASA matters, but I told them that these were small routine affairs with which nobody in New York should be bothered, and that they themselves should not be worried about because they had competent men in the field like Jimmy Walker, with whom Smith was in constant contact, and Campbell who spent a great deal of time down the line. Obviously they are building up a case against Smith. They suggested the [fol. 716] advisability of transferring Smith out of Buenos Aires to be replaced by a new man who was not prejudiced against Panagra. I told them that was impossible and that I felt that Smith had served them satisfactorily as an agent and that their apprehensions about his discriminatory attitude were unfounded. I did not convince them and I expect further trouble along this line.

* * *

5. They again discussed the division of express out of Miami. Mr. Dean at one time had agreed with them that we would endeavor to split the volume of express from Miami to Buenos Aires on a fifty-fifty basis with Panagra. They now feel that they should have the entire volume because Pan American gets the whole movement out of New York. I informed them that I could not understand what New York had to do with it, that Pan American had a certificate to serve New York while Panagra had not, that we had tried to live up to our agreement about Miami and saw no reason why their share of the volume should be increased. They brought up the fact that they had the fastest service to Buenos Aires and should have the right

to carry all the express to that point instead of it being routed via the circuitous route down the East Coast which required trans-shipment. I agreed to ask you to look into this matter further. Therefore, please let me have some information on the volume of express being carried respectively over the the East and West Coasts to Buenos Aires from Miami.

6. In a subsequent conversation with Mr. Shannon, he suggested that Pan American should permit the whole Miami/Balboa route to be referred to as the Panagra West Coast route to Argentine as contrasted with Pan American's East Coast services. In other words, he wants the name Panagra to describe a route comprising both the present Pan American and Panagra sections. In effect their present advertising campaign which is being done over our protest is endeavoring to do precisely that.

E. Balluder

[fol. 719]

GOVERNMENT'S EXHIBIT 313

LIMA, August 13, 1950

MEMORANDUM TO MR. ANDREW B. SHEA

As you will note from the attached, John Kirby's flight was delayed in departing from Miami, by ten hours.

When he received the standard Porter Norris letter of apology there were, of course, the usual references to "clipper" flights which, in my opinion, is wrong (and I haven't changed on this in the last four years), and what is really out of this world in ridiculousness, an advertisement for the "El Pan Americano".

How Pan American thinks it is fair for them to circularize our passengers, explaining what was a lousy performance, and then to hit them with propaganda on what is really our toughest competition today down the East Coast, is be-

yond me and it shows again that we are dealing with a bunch of chiselers who have to be watched every inch of the way.

Why can't the reference to "Clipper" be taken out, including the hope that future "Clipper" flights will be better, etc.?

This is a clear invitation to fly on Pan American World Airways and the flight that should be referred to is, of course, El Interamericano. Can't we get this agreed to?

I feel that the attached letter from John Shannon to Porter Norris, with a copy to Balluder, is one of the worst possible ways to get any action out of Pan American on this matter. [fol. 720] It seems to me that we should scream to the high heavens concerning Pan American's having sent a pamphlet advertising "El Pan Americano" right at the top and not bring this out in a letter to Porter Norris as "an additional point", stating that it might be "inferred".

If we go after Pan American in this Mamby-Pamby way, we can expect a continuation of the kicking around we have been getting for years, which brings me to the fact that the following clause in the Panagra-Pan American General Sales Agency Agreement was interpreted by a Panagra executive as precluding Panagra salesmen making solicitation calls on travel agencies without being accompanied by a Pan American representative:

> Pan American Airways . . . . "making personal visits in the United States to the sales representatives, to sub-agencies, and to persons and firms which have been or which are potential customers, for transportation via Panagra, it being understood that, if Panagra so requests, a representative of Panagra may accompany Pan American's sales representatives on any such visit"

I am not a lawyer but there doesn't seem to be any preclusion in this clause to Panagra's making individual unaccompanied visits and no exclusive right to Pan American to make sales contacts. The point I am making is how has

this been interpreted in the exact opposite way (which seems particularly stupid now that Pan American has agreed to the reverse) for so many years by the Panagra executives. Isn't this just another proof that you don't have any aggressive associates?

J. P. G. Jr.

Enc. letter of 7/20/50 from Porter Norris to JTK
letter of 7/25/50 from JTShannon to Porter Norris

[fol. 721]

GOVERNMENT'S EXHIBIT 314

29 January 1951

NOTE TO ADMIRAL TOWERS:

The following summarizes impressions gained from a review of the Executive files.

CAPAASA: (Compania Argentina Pan American Airways S.A.)

This organization is the General Sales Agent, 100% PAA-owned, which is responsible for the traffic and sales activities in B.A. for the three companies, PAA, PGA, and PAB. Mr. Balluder is the President, Dr. Negri Morano is the Vice President and Mr. George P. Smith is the General Manager. Mr. Juan Holms is the Traffic Manager and Mr. Rodrequis is in charge of Sales.

The major operating problem of CAPAASA appears to be that it is working for three carriers who to a certain extent are competing with each other for available traffic. The major contention of course is in the Argentine-U.S. sales via Panagra's west coast route vs PAA's east coast route. CAPAASA personnel are reported as trying to sell these impartially but it does not work out in actuality because of 1) presence and influence of Panagra's sales, advertising, and airport operating staff in B.A. 2) Constant pressure by Panagra officials, which is understandable since

B.A. is probably the major traffic generating station for PGA hence of very major importance to them, and 3) PAA officials are too busy with other System affairs to devote as much time to B.A. as Panagra officials do.

GOVERNMENT'S EXHIBIT 316

WALTER THOMPSON ARGENTINA

Report of call covering several meetings on Pan American Airways

Present for Clients: Messrs Juan Honas,
Enrigue Silvetti,
George Smith.

Present for J W T: Messrs M L Stiver,
Juan E Claus,
J B Robinson.

Mr. Watson's memo of March 12th was reviewed in detail, as well as the layouts which accompanied his memo of March 19th. Everyone agreed with the basic premises, subject to some modification due to local conditions.

The client feels that the "world's best airline" theme should be included in each advertisement, but that the primary emphasis should be on positive selling features aimed at regaining the US traffic which has been lost mainly to Panagra's El Interamericano as well as to the Argentine Airlines. Competition from the latter is not as serious now that (as of a month ago) the Argentine Airlines revised its rate structure upward to a par with PAA and Panagra.

****

3) The primary competition is with Panagra, and secondary with Argentine Airlines and Braniff, all of which have DC-6 service at present.

4) Over 80% of the US traffic originates in greater Buenos Aires, and the balance primarily in the larger interior metropolitan areas.

Traffic Manager
Pan American Argentina, SA
BUENOS AIRES

Private & Confidential

From the recent exchange of correspondence between your office and Mr. Muhlfeld's office we note that both of you are preoccupied with the preponderance of Panagra over PAA's sales to the USA in the Buenos Aires territory. Most of the factors contributing to this situation have already been discussed and are being worked upon by those who are in a position to contribute.

At various times I have called to your attention the direct sales activities undertaken by the personnel in the local Panagra office. At first this started out to be merely social contacts at the homes of these persons and at the American Club. Later, we were requifed to permit the Panagra representatives themselves to contact the local travel agents

(accompanied by one of our CAPAASA employees) and the Panagra personnel told the story of Panagra to the travel agents even though this already had been done by our CAPAASA personnel.

The next step taken was that some six months ago Mr. Jorge Milberg was hired by the local office and under direct instructions from the executives of Panagra office he was to contact all RSA passengers of any importance arriving from the East Coast via PAA or arriving via the West Coast by Panagra and render them special attentions in the direct name of Panagra. This contact work was in direct duplication of work which was already performed in a *neutral* basis by local CAPAASA personnel and there were frequent occasions when this duplication created confusion to the annoyance of some of our passengers.

It now appears that the local Panagra office has instructions to proceed to engage in direct sales activities both in Argentina and Uruguay. I already reported to you on the two weeks trip to Punta del Este by Mr. Bourne and Mr. Milberg to contact the movie stars and reroute their return to the United States via Panagra (this trip entailed considerable expense and, as you know, PAA will probably be required to pay 50% when the final accounting is made). [fol. 725] The latest and more barefaced violation of the neutral sales position which George Smith and I have always tried to preserve here in Argentina came to my attention last week. It seems that some time last December a *Mrs. Keller from the Memorial Hospital in New York City came to Argentina for the purpose of selecting 14 Argentine nurses who were to be awarded two years scholarships in the United States. Apparently Mr. Bourne was the only one in Argentina who new about this mission and he proceeded to make the contact with Mrs. Keller upon her arrival and even arranged to have himself appointed chairman of the Committee who were to select these nurses for scholarship.* Mrs. Keller returned to the United States and Mr. Bourne and his committee selected the nurses. Mr. Bourne booked 13 "no name seats" for these nurses on El Interamericano flight of March 31st and it was not until two days prior to the departure of these nurses that anyone

in the CAPAASA office now of this movement of passengers. The point I would like to make about this case is that *while every sales representative at CAPAASA, including George Smith and myself, is constantly impressed by Panagra's and the need by CAPAASA personnel remaining neutral in regard to competitive traffic, as you can see the Panagra personnel on data here in Argentina do not feel required to preserve this same neutrality and protect PAA interests.* The many social and other contacts made by Mr. Bourne, Mr. Milberg and the many Panagra vice presidents who visit Buenos Aires permit them to promote Panagra wholeheartedly to the complete exclusion of PAA. CAPAASA personnel are always required to tell both sides of the story and it is this situation which I wish to call to your attention once again which is certainly one of the factors contributing to the fact that in 1950 this office sold 1662 seats via Panagra to the United States against 787 for Pan American World Airways System.

PANAGRA PROMOTION.

Attached you will find copy of memo just received from Juan Homs, which is self explanatory.

We in this Division have been aware of these practices for some time and I think we should not hesitate any longer in bringing this to the attention of top management to find out just where the line is going to be drawn.

.....

Only recently the Panagra representative and Mr. Bourne proceeded from Buenos Aires to Montevideo to pirate members of the group of movie stars who had flown on a charter from New York to Montevideo. The Panagra representative offered these passengers every inducement to return via the West Coast. As we all know, Panagra maintains a staff of representatives in Buenos Aires, who evidently spend most of their time pirating business which has been already sold, instead of creating new sales.

I sincerely hope that this pirating can be stopped and that the efforts of Panagra as well as ours be used to create and develop new business, and if we have to pirate, let's be sure and see that the victim is Braniff or some other competitor and not one of the family.

Pereira April 28th, 1951

MEMORANDUM TO MR. ANDREW B. SHEA

I don't see how Pan American can make anyone believe that the situation that existed when the 1929 letters were exchanged, continued on indefinitely.

What about the extension of Panagra over the Andes to Buenos Aires which is so lightly glossed over by Pan American's petition? Didn't this immediately make Pan American and Panagra competitive? How would the Department of Justice feel about Pan American Airways con-

trolling both coasts and both services to Buenos Aires when there should be competition there which we fortunately have provided them despite their misleading allegations?

There have been any number of changes in the pattern which they went along with and which are completely inconsistent with the letters which they are now screaming about, proving that both partners agreed to changes, nowhere near enough, of course, as circumstances changed.

With all the screaming about Grace and its railroads, etc. I hope that the Government will not lose sight of the main issue—Panagra, which has lagged behind the entire certificated aviation industry in growth of revenue plane miles, revenue passenger miles, air express and freight on miles, etc.

Name any yardstick and Panagra will be shown to have failed to have kept the pace—so much so in fact that J O'C said "I would think it should be L'd if I were a government official".

[fol. 730] If the figures were this bad, why not use them to prove that Panagra must get its airplanes through to New York immediately?

When we get all finished, the proof of the pudding is in the fact that Panagra is the only airline that has been unable to obtain what the President of the United States and the CAB itself have recommended for it. It is the only airline that has not come through to its main terminal. It is the only airline that covers its main route by interchanges. The cause of this uniquely unfavorable position is Pan American and only Pan American.

The record shows that Grace did everything in its power to get Panagra's own certificate for its main line terminus to terminus which every other airline has.

It seems to me that this is the point that we should stress in our answer to Pan American's petition.

I hope, in the light of their lies, smoke-screens, distortions, etc. that you, Burns, Cahill, and O'Connel, will throw the book at them with everything that you have.

Personal

Dear Porter:

Many thanks for sending me a copy of John Muhlfeld's report of April 25th. I only hope you will reread two sentences of this report, namely, "The situation in Buenos Aires, however, instead of improving is deteriorating to the extent that it is no longer possible for Capaasaeto maintain System policy and a neutral sales position because of the direct sales activities of Panagra representatives who are based there". . . . . "The situation in Buenos Aires requires immediate attention for it concerns System sales policy, not necessarily individuals". For over three years now I have had to put up with this situation and I can assure you that it just about has ruined my disposition. The best example I can think of is that of the boxer, who knows he is just as good as his opponent, to be put into the ring with both hands tied firmly behind his back and his opponent with both arms free jabbing at him from all angles while the referee calls foul on the boxer with his hands tied for butting with his head. This example is absolutely no exaggeration and I can assure you that if I ever had to do it again I would not let myself be put into this very disheartening and demoralizing situation.

The best solution I can think of, providing the big fight in the Chrysler building does not result in the elimination

of the local Panagra office, is to place me in the same position as Bourne on the PAA side of this situation and let me go to work on them. I guarantee I will get my year's salary back for PAA within one month. I am really quite serious about this proposal and wish you would discuss it with Mr. Morrison as just during the past few days I have discovered that the only thing that is wrong with my disposition is the frustration of the sales situation I find myself in. It has made me difficult to get along with both in the office and at home and unless Bourne and his activities are taken out of here I am going to find it very very difficult to ever take a neutral view of things as I find a terrific sensation of well-doing comes over me when I can route some of my Panagra minded friends on "El Presidente".

[fol. 736] You and I have seen eye to eye on almost everything. Both of us have been salesmen all of our lives and both of us have the PAA System deep in our hearts. Just stop for a moment and imagine yourself in the exact same position which I have been for three years and then I think you will have a clear conception of the frustration of which I speak. I would certainly like to come up to Miami in a few weeks to discuss all these matters with you and also to attend to some important matters concerning some investments of my fathers. I would appreciate it very much if you could arrange this for about the second week in June.

Kindest personal regards,

Sincerely,

Juan Homs, Jr.

JH/eck

[fol. 737]

GOVERNMENT'S EXHIBIT 325

MEMORANDUM

Yesterday afternoon Willis Lipscomb repeated to me in front of Jim Nason that Pan American did not intend in any way to promote sales over PAB's Lima Rio route as far as U.S. passengers were concerned. He said that they

would not help to develop sales because this route when used by U.S. passengers was competitive with Pan American.

Pan American is of course PAB's general sales agent in the U.S. and in addition PAB is a part of the "System".

This is an interesting position taken by Pan American in view of the fact that they are also general sales agents for Panagra and Panagra competes with PAA for U.S. traffic to and from Buenos Aires.

I understand that Lipscomb has made the same statement to Ed Bern and I believe others in Panagra.

Panagra Sales Force

CONFIDENTIAL

Mr. Morrison tells me that Panagra have increased their sales force in Buenos Aires to six men on the street promoting Panagra transportation and that Panagra is outselling LAD, Buenos Aires USA five to one.

I spoke to Mr. Bern who tells me that Panagra has not increased their traffic representation for the past few years and it still consists only of Rowe and his assistant, Jorge Milberg.

In order to clear up this matter, please advise me just how this situation stands.

PERSONAL

BUENOS AIRES
August 13, 1953

Mr. Edward G. Bern
Vice President & Sales Manager
Pan American-Grace Airways, Inc.
New York City.

Dear Mr. Bern:

For your private information and further to our recent telephone conversation, I would like to give you the details and background of various comments concerning the Sales Promotion Office which were made to me by George Smith during the occasion of Mr. Wilbur Morrison's visit to Buenos Aires.

Approximately a month and a half ago the CAPAASA Personnel manager requested me to advise him of the specific functions performed by the various members of our office. After complying with his request I casually inquired as to why this information was needed and was advised that Mr. Smith had asked for it. Several days later, I asked George Smith the same question, and he informed that the LAD people in Miami were interested in this office and wanted to know how many people were involved and the functions of each.

I heard nothing further in this connection until George Smith took me aside on the occasion of a cocktail party he offered for the top employees of CAPAASA in honour of Mr. Morrison. He indicated at that time, in a confidential manner, that Mr. Morrison had questioned him at length regarding the Sales Promotion Office and had shown great interest in its functions. Mr. Smith alluded to the possibility of there being some changes at a future date as regards the existence of the Sales Promotion Office and the things we were presently doing. I asked him exactly what he meant, but was told that he would discuss the mat

ter with me after his return from a two week trip to the U. S. He did mention, however, that he thought that neither I nor Milberg would be able to continue to visit the local travel agencies independently, and that in all probability we would have to go back to the old arrangement where contacts were always made in the company of a CAPAASA representative.

• • • •

It is my feeling that this renewal of interest in the Sales Promotion Office on the part of the LAD people can prob- [fol. 742] ably be attributed in part to a desire to strengthen PAA sales in this market now that they will shortly be operating DC-6B equipment on all of the East Coast flights. In this connection, and as we have already advised you by cable, we have learned that the CAPAASA Advertising Department will break large size ads in most of the B.A. newspapers on August 19th, announcing PAA's new East Coast service. These single ads, apparently will constitute the only deviation from their regularly scheduled advertising campaign.

As I feel certain that with the incorporation of the new DC-6B equipment, effective August 16th, LAD will put the pressure on CAPAASA for increase of sales in PAA's behalf, you may be sure that I will keep my eyes open for any activity which may be prejudicial to Panagra's interest.

MEMORANDUM

SEND ORIGINAL BY DATE October 10, 1953

TO Div. Trf. Sales Manager

FROM Traffic Sales Manager

DEPT.
OR DIV. Latin American

DEPT.
OR DIV. Pan American Argentina, S.A.

LOCATION MIAMI

LOCATION BUENOS AIRES

STD. FORM. 9-29

SUBJECT: MONTHLY SALES REPORT BUENOS AIRES, SEPTEMBER 1953.

REFERENCE:

CAPAASA System sales for the month of September totalled $588,945.00 dollars. This marks the third consecutive month of sales above those of the same months of 1952 and it now appears more than likely that this will be true for our sales for the rest of the year. If this should prove to be the case, the half million dollar gap between 1952 and 1953 sales first noted in the July report, will no longer exist when the final figures are in.

For the fourth consecutive month, Pan American gross passenger sales exceeded those of Panagra. Pan American accounted for 48.32% and Panagra 41.31% and interline 8.81% of the total. Only 1.36% was for Panair do Brasil.

At the same time agency production went down again a couple of points to 61.71% for PAA and 60.53% for Panagra. It is also interesting to know that the agents did not sell Panagra in preference to Pan American

by more than 2 to 1. This time, taking the first 15 agents as a reference, they sold 57.39% for Panagra and 42.61% for Pan American. Apparently, the fact that Pan American now offers on-time performance with DC-6B equipment has finally begun to influence on agents and the travelling public in their choice of routes, particularly to the United States.

* * *

[fol. 746] COMPETITION.

* * *

Pan American's gain of one percentage point so far has been at Braniff's expense and since Aerovias do Brasil is now a negligible quantity and the traffic of Aerolineas is a matter of discounts, a future Pan American gain can only be a Panagra loss.

GOVERNMENT'S EXHIBIT 333

Copy of handwritten letter—

Delray, Florida
March 13, 1930

Dear Roig,

AVIATION—I have your No. 2. We went into this business because we felt that in view of our big investment in steamers we should become a party to this new branch of transportation which will yearly become more important and which in ten years will be a real competitor of our steamers. We felt that if we got the mail subsidy we could

put ourselves in a position in ten years to meet any flying competition.

We have had difficulties but for a new business it has worked out quite well. In fact remarkably well considering the fact that none of us have as yet made an intensive study of it on the ground.

Now to consider selling out and abandoning aviation in South America because we find it difficult to deal with Trippe is I think a mistake. The amount of profit that we could make by doing so is to me quite immaterial.

We started out on a project which we considered would have future importance to us. We knew when we did so that a 50 50 partnership might be difficult to work out. I am not in favor of quitting now.

I do not think that Trippe will last because he has no ability except as a promotor. I know nothing of the reported January profit of $30,000. How is it figured and [fol. 748] on what capital? January, February and March are the big months of the year and are not a criterion.

As an operator of a business enterprise I do not think he will last—I know the type quite well. Meanwhile I appreciate that we will have to have patience, infinite patience, and that is a *wearysome* task. Furthermore we will have to avail of our superior knowledge of South American business and our superior ability to manage it and get out on the ground and make a success of it. I do not believe that Trippe can sustain his claim to a right to sacrifice Pangrace interest for the benefit of Pan Am. That is illogical, it is utterly unfair, and we can certainly make Hoyt see it.

If Trippe gets into his head the idea that he is going to be able to buy us out, then your task will be greatly increased in difficulty and in fact made almost impossible. He will have no interest in making Pangrace a success until he has got rid of us in fact will try to induce a failure so as to buy us cheap.

My opinion is that the first thing to do is to convince Trippe that under no conditions are we going to sell and

then to shift the real management of the business *to the other end* and *get on top of it* and *manage* it. You can then reduce the talking to Trippe to a minimum.

Even if we decided today that we *wanted to sell*, this would be the best plan to follow.

Yours sincerely,

D.S.Iglehart

April 21, 1930

MEMORANDUM FOR MR. GARNI

AVIATION

I noticed in Redshaw's letter No. 957 that he recommends our getting out of this business. I think it would be opportune to write quite a strong letter to him telling him definitely that we are not going to get out of this business. We went into the business because we felt that in ten years from now air transport would be an important competitor of steamer transport in which we have so large a capital investment, and we felt that we, as a matter of policy, should begin to learn and develop this air transport work. From a broad standpoint we must be in this competitive line and with the American mail contracts we have an exceptional opportunity, not only of developing a successful business, but of making money out of it. But, it can only be done if all of our men and particularly our men on the Coast are giving enthusiasm and confidence and a very strong effort to making it a success. Therefore, I think it important to write to Redshaw a strong letter, telling him that we are not going to sell and that we expect him to get his back and his shoulders into the support of this business. We expect him and all of his men to give the time and attention to it. We consider it is up to him more than anyone else to see that this business is made a success in Peru. [fol. 750] I think you should consult Roig as to the exact terms of this letter, as obviously you want to say nothing

that would conflict with his views as to our relation with our partners. We must get it into their heads.

MEMORANDUM TO: MR. ROIG
MR. PATCHIN
MR. COGSWELL

AIRWAYS

I am anxious, as I know you are anxious, to see the traffic of our planes built up in a very agressive way.

We know from our experience with steamers that the handling of the whole problem of passenger traffic is a highly specialized one and that this traffic is satisfactorily developed only in the hands of men of specialized experience and capacity. You know what Crowder has done and is doing in our passenger traffic at present, and what Young did. Now I think the time has arrived to get hold of a passenger traffic man who understands all of the tricks of the trade including publicity, and set him to work on our passenger traffic problem with the idea that he will work out a program with you here and then go down and move from point to point developing that program and educating our men in carrying it out. I believe that if you get the right man and get the right program it might result in a very great increase in your movement.

Why not talk over the idea with Mann, Crowder and Young, who are all here now, and see whether you cannot get a practical suggestion and get hold of a man who would not only build up the air traffic but would build it up in a [fol. 752] way in which it would not necessarily draw traffic away from our steamship line, but on the contrary would tend to build up the whole movement to and about South America and by getting these steamer and air traffic men

working together, we would build up a movement that would be reciprocally beneficial to the two interests.

I appreciate the fact that steamer and air traffic are competitors, but I believe that by handling the whole matter as I have indicated we may avoid the prejudice of competition and even get general benefit from it.

D. S. I.

[fol. 753]

GOVERNMENT'S EXHIBIT 336

March 29, 1932.

MEMORANDUM FOR MR. ZALEES:

Mr. Hargy, the Panagra traffic man at Cristobal, after a trip over the lines, has made the statement in a report that he considers Panagra would do better in the sale of passenger tickets at Buenaventura and Guayaquil if represented by agents who do not also represent steamship lines, which may, in a sense, be considered competitors; he recommends that at all events in each office one man be delegated whose sole duty will be to attend to Panagra business and who will have nothing to do with the sale of steamship tickets.

This is a criticism which, in view of our partnership arrangement, we would like if possible to avoid. Our position has always been that inasmuch as each particular agency receives the same commission from Panagra as it does from the steamship company there is in effect more of an incentive to sell an airplane ticket than a steamship ticket in view of the fact that the fare in the former case is generally higher than the latter. There is somewhat the feeling in Panagra, however that the agents do not go out and attempt to sell tickets, pointing out the advantages of airplane travel, but rather wait until approached by prospective passengers. In other words, their position is passive rather than active.

I should appreciate it if you could instruct Buenaventura and Guayaquil to make more intensive efforts to build up the Panagra Passenger business.

W. F. COGSWELL.

ORIGINAL AIR MAIL LETTER
Copy follows by steamer

NEW YORK
May 17, 1932

Mr. G. Vidal.
SANTIAGO.

PASSENGER TARIFFS

When you are in the south, I wish you would study the question of making a lower passenger rate between points on our system other than Cristobal to Montevideo.

Our through rate, as you know, figures out 10.8c per mile. Our rate from Lima to Buenos Aires is $303.00 for 2,505 miles or 12.1c per mile. I have an idea that before long the question will come up on the reduction of these rates. I know that it is complicated due to the fact that 10c a mile on Panair from Miami to Montevideo means a $666.00 fare and if we have to preserve that fare even though our mileage is shorter there should be no reason why we should not establish a 10c rate as an international rate on our own line where a long haul of, say 2,000 miles is involved. This is necessary for us if we are to compete with the lower [fol. 755] steamship through rates now being studied by the Grace Line.

I am informed that when the $375.00 through rate New York to Buenos Aires was published, the Grace offices at Cristobal and Lima immediately demanded a lower rate from their points to Buenos Aires. I was asked to maintain my arrangement for passengers proceeding from Cristobal and Lima to Buenos Aires who travel by airplane over the Andes and I consented as a temporary measure, but I think we can use this as a lever to reduce our airplane

rates between these points, at which time the Andes portion of the route would be reduced and we would ask the steamship Companies to pay us full airplane fare on an airplane/steamer tie-up.

J. D. MacGregor.

P. S. Since dictating this letter, we have received the attached Foreign Airmail Contract mileages from Washington as of April 15, 1932. You will note that this new mileage sheet gives our route an additional six miles.

[fol. 756]

GOVERNMENT'S EXHIBIT 338

No. 1480

F. O.
AIR MAIL.

Lima, 20th January 1933.

Messrs.
Grace Line Inc.
NEW YORK.

Dear Sirs:

PASSENGER RATES

On several occasions recently we have pointed out to you the competition we are up against on the Coast; particularly with the Chilean Line, from which you will have noted that our rates are such that it is going to make it difficult to secure our share of passengers from Callao south.

It is also well to note that the aviation services are taking away first class passengers—especially coastwise. Between the Panagra and the Faucett Co., they are carrying 700 to 800 passengers a month, who would be travelling by steamer, first class, if these companies did not exist.

At one time the aeroplane fare was double that of steamers. However, Panagra have been reducing consider-

ably, and are giving a 75% reduction on the return portion of round trip tickets in Peru.

Enclosed herewith is a statement of first class fares on our steamers as compared with fares of the Panagra.

In this we have given the straight fare one way and the round trip. Also we have indicated the shore expenses on steamers, which include transportation of ordinary luggage, gasoline launch to go on board and other small items. This expense, of course, does not apply to planes.

Although the straight one way ticket of the steamers on the Coast is still lower than that of the plane, considering the conveniences of the latter and the saving in time, even this rate makes the aeroplane far mor attractive than formerly when there a greater difference in the rates.

[fol. 757] On the other hand, the round trip rate taking in the shore expenses, is practically the equivalent of the steamship rate. Especially to Mollendo southbound, the cost on this basis is more than by steamer and yet the time by plane from Lima to Arequipa is 4¾ hours, and by steamer, two days.

Undoubtedly all of this will be of interest to you and is well worth while studying in connection with the other facts we have already mentioned on competition rates with other steamers.

Yours very truly,

p.p. W. R. GRACE & CO.

ORIGINAL AIR MAIL LETTER

Copy follows by second airmail

Subject: GRACE LINE MEETING

LIMA, February 17, 1933.

Mr. J. D. MacGregor, New York

Dear Mac,

Yesterday I gave a luncheon for the Grace Line people now here, that is, Adams from the New York office, Rebstock from Cristobal, Marshall from Buenaventura, Holguin from Guayaquil, Bush from Lima, Heavey from Valparaiso and Redshaw from Lima. . . . .

. . . . .

Adams also told me that he felt our rates were now at too low a figure compared to the steamer rates: in other words that we were not on a reasonably competitive basis in that our operating costs should be much higher than steamer operating costs, and that consequently our tariffs ought to be much higher. I did not discuss this point with him, knowing that when the time came we could make as much or little of the economies as we cared to, depending upon the point to be gained.

ADVERTISEMENTS

NEW YORK
March 18, 1933.

S.A.G.O.,
LIMA
Attention Mr. J. M. VanLaw

I have in front of me a Peruvian Airways Corporation advertisement which has a red background, an airmail cover on the right-hand side, and what looks very much like a Grace steamship on the left-hand lower corner. This advertisement carries the caption AIRMAIL GETS THERE THREE TIMES FASTER. This advertisement seems to have been taken from the WEST COAST LEADER.

As I wrote you some time ago, I believe in connection with the editorial you prepared for my signature in the Panagra Magazine, it is against the policy of this Company to make invidious comparisons with other means of transportation. Such a policy would have the undoubted effect that our own service would be the subject of invidious comparison. There is nothing to be gained by placing ourselves in this position.

I have never, in any of the advertisements issued by the Grace Line or by the Munson Line, seen anything which would intimate that their attitude toward Panagra service was in any way approaching the attitude we have assumed [fol. 760] in the advertisement under criticism.

I shall ask you to bear this in mind as a policy of the Company and one which I should wish ~~to be~~ strictly adhered to. You will, therefore, kindly revise any advertisements which would have the above unsatisfactory tinge and place them in line with the above policy. I have written about this before, as I mentioned, and I should not wish to have to insist that all advertisements be sent to this office for examination before being published.

I am aware that the advertisement is taken from the Pan American Airways System Folder, of which copies are sent to all agents, but information that we give to agents is a very different question in relation to what we publish as a Panagra advertisement.

J. D. MacGregor.

MEMORANDUM FOR MR. MANN:

I am returning herewith private letter 15015 from Lima in reference to Panagra propaganda, together with copy of advertisement in "West Coast Leader", which was enclosed with said letter.

Instructions have been issued to Panagra office in Lima that no invidious comparisons between steamers and airplanes are to be made in connection with Panagra advertising. In view of this, I trust you will find your way clear to instruct that the same of course should be applied in the case of steamers.

W. F. COGSWELL

(D.S.I. Series)

Air Mail 4-28-33
Lima 5-5-33

New York, April 26, 1933

A. Garni, Esq.,
Lima, Peru

Dear Garni,

PANAGRA

I notice your No. 210 to Roig. There is one point that has not been touched upon by you and that is the relative rates of our steamers and of Panagra.

I think that if you will check it up you will find that with the reduced value of Peruvian currency and with the discount for a round trip that you can go from Lima to Arequipa cheaper by plane than you can by steamer and rail. This is a condition which does not exist anywhere, and seems to indicate to me that air rates are getting too low in comparison with steamship rates.

I think you might have Bush put all the facts before you and see whether your Panagra rates have not actually got too low and whether or not there isn't some way of jacking them up, not suddenly or in a radical way but gradually, for we know that these things can be done gradually without calling attention or creating any opposition, whereas if anything radical is done it is spotlighted and always causes difficulty.

Yours very truly,

IGLEHART

[fol. 763]

GOVERNMENT'S EXHIBIT 343

May 24th, 1933.

MEMORANDUM FOR MR. GARNI:

I am returning herewith Lima's letter #1055 in reference to Panagra passenger rates. My own opinion is that we should discontinue all or a greater part of the 75% discount on round trips. However, it is my understanding that this would be inadvisable at the present time from a political point of view in view of the fact that Faucett has given up service and turned over his planes to the government.

While the steamer fare is undoubtedly a factor to be taken into consideration, this would seem to be only the case where steamers and planes both go to the same points and I do not believe we should go as far as Mr. Bush does in the next to last paragraph of his letter of January 20th, in which he compares the cost between Lima and Arequipa including, in the case of the steamship company, the rail fare from Mollendo and comparing the time of $4^3/_4$ hours by air to two days by steamer. The fact that the plane goes directly is an inherent advantage and there would seem to be no reason at all why the fact that the steamer passenger has to go indirectly via Mollendo should be taken into consideration. A more important point is, are the fares on Panagra high enough to enable it to do business on a profitable basis, and my opinion is that they are not.

W. F. COGSWELL.

Letter No. 3010—PRIVATE

Subject: AIR AND STEAMER PASSENGERS—COLOMBIA Ref. your #2988

CRISTOBAL,
September 26, 1933.

Mr. J. D. MacGregor,
New York.

I have your above numbered letter, and the information contained therein is certainly very interesting.

The difference in the percentage of passengers we are getting by air in and out of Buenaventura as compared with those procured by Panair in and out of Barranquilla certainly, on the surface, appears to indicate that there is something wrong somewhere. However, I feel that there are contributing factors in comparing these two particular ports which lead to this difference, other than the important one which you mention in your letter under reply, as being due to the net work in the interior of the country; and, as a matter of interest, I will state these factors which, in my opinion, contribute in the main to this differential.

1. The greater frequency of boat service in and out of Buenaventura as compared with Barranquilla. Both the Grace Line and the Hamburg have weekly sailings at Buenaventura, both northbound and southbound. The Dutch Line has a fortnightly sailing in and out of Buenaventura, northbound and southbound; whereas, at Barranquilla, the United Fruit is the only line which has a weekly service, and Grace, of Course, a fortnightly service.

2. The fact that embarkation and disembarkation of passengers entering and leaving Barranquilla has to be effected

at Puerto Colombia has indeed resulted in passage by air in lieu of steamship in view of the greater convenience [fol. 765] of embarking and disembarking directly at Barranquilla via plane.

• • •

Another contributing factor which, while a most ticklish one to mention, nevertheless exists, is that our Colombian representatives are primarily steamship men. I do not at all wish to make again a mis-statement which this office once before made to the effect that our agents are our biggest competitors, but I still feel that the major portion of their contact work and solicitation is obviously along the lines of steamship business. One possible remedy for a condition of that kind, in my humble opinion, is one which would greatly concern the matter of policy with our affiliated companies. Nevertheless, with the growth of passenger traffic by air, as we have observed it in the last two years, I have often wondered whether or not eventually the time would come when we might find it profitable to desire to place in each of our principal agencies a traffic man who would do exclusively airways business and whose salaries, of course, would be borne by us. As stated above, this is purely a matter of opinion and, of course, in view of policy which such a move would involve, thought along this line is not being entertained by us further than an idea of a possible future solution for increasing our passenger traffic.

No. 10,629
(A. G. Series)

Air Mail 10.
Lima 11.1

NEW YORK, October 27, 1933.

H. H. G. Redshaw, Esq.
LIMA, Peru.

Dear Redshaw:

PANAGRA AGENCY COMPENSATION

I think you have already been advised from another desk that we have finally reached an agreement with Panair with reference to a basis for compensating Panair, as well as W. R. Grace & Co. and their affiliates, for services rendered to Panagra.

At a distance it must seem difficult to appreciate that there should have been any delay in arriving at such an agreement but having been close to the conversation, especially during the last few months, I can assure you that to reach a final settlement was indeed a most laborious task and as strange as it may seem to you I might also tell you that not the smallest of the difficulties were the culmination of numerous incidents on the West Coast of minor and greater importance.

In making this indication I do not want to go over the whole ground again in detail but in order that you may appreciate the situation I want to say that an incident such as was reported earlier in the year with reference to the lack of intelligent passenger solicitation in the Arequipa [fol. 767] and other districts, or incidents such as that of one of our employees openly stating and confirming it in a memorandum that when a passenger turns up with an exchange order for a ticket on passage it does not suit

that particular office to encourage a trip by air because if he sold an air passage he would get no commission whereas if he supplies such a client with a ticket by that particular railroad the Grace House would receive a commission of $2.45, have been greatly magnified in the various discussions. I could give you a number of other similar incidents but I just refer to these specific cases which are foremost in my mind at the moment to bring out the very great importance of seeing to it that every man in your organization is made to understand in unmistakeable form that the Pan American-Grace Airways Co. is not only of great importance but will develop very rapidly and as far as our organization is concerned must receive the very best service and that in rendering such service the people serving the Airways must leave on one side what they may consider conflicting interests, particularly the maritime traffic, or in other words the Grace Line.

Not very long ago someone presented himself at an office of the Grace Line inquiring as to the quickest way to get to a given point. The particular employee behind the [fol. 768] counter talked nothing but Grace Line and when the client inquired about air service the ticket seller admitted there was an air service but that steamer travelling was a great deal safer.

These incidents should not and must not occur. When we reached a settlement with reference to the general compensation for services rendered we promised to issue definite instructions to all our Managers to the effect that incidents of the above or similar character must not under any circumstances recur and that everyone of our Agents should get whole-heartedly behind this business and not subordinate it in any way to our steamers. I appreciate that this may divert a few passengers from our steamers to Panagra but this is relatively unimportant as in the first place it cannot amount to much per annum and in the second place travelling by air, particularly on the West Coast, is bound to develop very rapidly anyhow over the next few years.

There is another thing I want to mention and that is the fact that especially during the initial stages some of

our agents on the Coast took quite a while to warm up to the idea that Panagra is an important enterprise and a definite part of the Grace Organization and one that will develop rapidly and should, therefore, get first class service. I think this feeling developed during the first year or two on account of the fact that compensation for services [fol. 769] rendered to Panagra did not come forward as rapidly as desirable and perhaps not in the amounts it was expected. The amounts now fixed for 1932 and 1933, however, will, I believe, leave no cause for dissatisfaction on this score and there can therefore be no excuse whatsoever on the part of any of our West Coast Agencies for not rendering services that will be beyond criticism.

If our head men on the Coast issue definite instructions in about the foregoing sense to every employee who has anything to do with Panagra, all of these difficulties will be definitely overcome and I expect you to make it a point to issue such instructions to each one of the Panagra agents in your territory.

Very truly yours,

(Signed) A. Garst.

Letter 1738.

Subject: Misses Nathalie Boshko Brown and Elizabeth Hammond

CRISTOBAL,
December 17, 1934.

Panagra—Lima.

Please be advised that on board the "Santa Cecilia", southbound at the present time, are Miss Nathalie Boshko Brown and Miss Elizabeth Hammond. These ladies intend to go to Cuzco but apparently furnished erroneous information in the Grace New York office as to connections between Lima and Cuzco, and now find their plans somewhat out of kilter, as the time required will not permit their

proceeding as they intended. Unfortunately, Miss Brown is not much in favor of flying *anywhere*, but we believe that circumstances make these two ladies extremely good prospects for us, and suggest that they be contacted on arrival at Callao.

Miss Brown is a well known violinist. Her trip is apparently sponsored by Yale University, and is for the purpose of recording Indian music on a 100-pound instrument which she has along. The other lady is a member of the same expedition.

In connection with the above, these ladies stated that no information was supplied them as regards our service in the New York office of the Grace Line, although it is perfectly obvious that the use of Panagra would, and we trust yet will, greatly simplify their problems. It was interesting to note that the local Grace people used our literature to dig out information as to train connections, etc., required by this party, and had to refer to us for "dope" on several pertinent subjects about that part of the country.

Cable Address
"Papagra"

Letter No. SAGO 5726

NORTHERN DIVISION—
Subject: ORGANIZATION CHARTS

Private—Sago 5726

LIMA
August 26, 1935.

Mr. G. Vidal,
NEW YORK.

Receipt is acknowledged of your private letter of August 21st on the subject of "Organization Charts—Northern Division."

I believe that the entire question of whether Panama Agencies should head the "Traffic" and "Administration" on Northern Division organization charts should be held in abeyance pending the temporary duty of Mr. C. E. Blow at Cristobal, as acting accountant during Spencer's vacation, and receipt of Blow's ideas.

There are a number of reasons for delaying action on the final decision in regard to this matter. In the first place, the Grace organization at the Canal Zone is completely a Grace Line office rather than a diversified Grace & Company office such as we find elsewhere at points touched by us. A number of times in the past Brown has shown his inability to look on Panagra business as other than competition—even going so far as to inquire of George Smith what he was doing aboard the Grace steamers soliciting Panagra business. And it also appears that a recent Douglas wing shipment was delayed through action of the Panama Agencies in leaving the wing at Balboa in favor

of a shipment of other freight, thus delaying delivery in Callao by approximately ten days.

• • •

With regard to the point #1 in your letter, inasmuch as ninety percent of our local purchases are made from the U. S. Government Departments in the Canal Zone, none of the Grace organization could be of any assistance in securing lower tariffs than the standard prices fixed for all purchasers by the U. S. Departments involved.

Inasmuch as Mr. Brown has no interest in Panagra matters I can see no advantage in his becoming familiar with our disbursements before they reach the commitment stage, particularly since most local purchases in the Canal Zone are purchases made for other points on the Panagra system—especially the Lima repair shop.

LETTER NO.
4581—PRIVATE

Subject: PLATINUM SHIPMENT
FROM BUENAVENTURA

CRISTOBAL
December 20, 1935.

Panagra—New York

We have unofficial information, just received at 7:00 p.m. this date, to the effect that 25 cases of platinum will be available for shipment from Buenaventura to New York on or about December 23rd. On this date the Grace Line

have a vessel leaving Buenaventure, and they will undoubtedly lift this shipment unless we are able to offer a competitive freight rate. In this connection, we refer you to our numerous letters on this subject, which we do not have time now to refer to by number, and ask that you give this matter your best attention and advise us by cable if we can make a reasonable offer to the shippers.

We understand that the consignees, and probably the owners of this platinum are the American Gold and Platinum Co. of New York, and no doubt they control the routing of same ex Buenaventura. Perhaps if you could contact them immediately with a definite offer as to rates, the shipment could be secured for our Company.

Please regard this information as being completely confidential, as our tip came from a source which we most emphatically do not wish to close. We are sending you a week-end cable on this matter which we trust will arrive at yours about the same time as this letter. As we are very much interested in the outcome of this business, we rely on you to give it your prompt attention.

PLATINUM SHIPMENTS
BUENAVENTURA NEW YORK

CRISTOBAL
December 27, 1935.

Panagra—New York

This will serve to confirm our cable No. 13 to MACOR New York, in which we advised you that the platinum shipment, Buenaventura New York, for which we were

negotiating, had eventually gone to our competitors. At this time, we cannot tell just why our agents were unsuccessful in their efforts to secure this business but presume that one of the major factors must have been the absence of any news as to rates until too late. There may have been other reasons as well.

* * *

We have now had some additional word on the shipment of 25 cases which went forward on the "Santa Clara". It will be discussed in detail further along in this letter, but we have been given to understand that the shippers demurred from giving our proposition their serious consideration because of the fact that they carry outside insurance on their shipments and claim that the premiums immediately go up tremendously when air shipment is contemplated. In view of the fact that our insurance rates are quite reasonable, we wonder if something cannot be done about this. It should be fairly easy to discover who Choco's underwriters are.

* * *

Someone from this office will be in Colombia before the end of January and an opportunity will be had to contact the Choco people personally. We very much hope that you will have worked out something by then which we can offer them and in which they will be interested. Meanwhile, it certainly would not do any harm if one of your staff could [fol. 774] contact the consignees, American Gold and Platinum, in New York.

Panagra—New York

We attach hereto your copy of our #3694—Private to SAGO Lima in connection with a platinum movement ex Buenaventura for New York.

. . .

We are certainly deeply interested in this matter, and will be particularly glad to hear from you as to what progress is being made in regard to establishing a competitive rate for the class of traffic involved. There are several other shippers of treasure located on the west coast whom we would like to go after in case we find that we can compete on even terms with our surface competitors. One of them, as you may know, is the South American Development Corporation, who are primarily gold miners. Owing to their peculiar geographical location, it is possible that a chance exists for us to bring their produce from the mines, at least as far as the coast, and possibly all the way through to final destination if our rates compare in any way favorably with those of the competition. As matters now stand, our carriage rates are based almost entirely on a "distance haul" basis, whereas ocean freights pay very little, if any, attention to this point. Therefore, while water freights from Ecuador might be the same as those obtaining from Colombian ports, ours would be quite different; though, as a matter of fact, we believe we could actually accomplish carriage from Ecuador to New York at a cost to ourselves of little, if any more, than our cost Buenaventura/New York.

GOVERNMENT'S EXHIBIT 351

4788 PRIVATE

PLATINUM SHIPMENTS

NEW YORK
January 20, 1936

Panagra
CRISTOBAL

We refer to your recent letters on the subject of platinum shipments, and thank you for the information supplied which has enabled us thoroughly to study the entire problem.

We agree with you that it is most important that we make a determined drive to secure this business. It is believed that the contents of this letter will enable you to obtain results.

Attached herewith you will find cost estimates for air/rail, all air and steamer shipments of platinum proceeding from Buenaventura to New York. These figures are based upon values, weights and number of packages making up the hypothetical shipments mentioned in the last paragraph of your Private letter No. 4584.

A study of comparative costs indicates that air/rail platinum shipments between Buenaventura and New York can be handled more economically and in less elapsed time at our standard rates than if the ores were shipped by [fol. 777] steamer, with the possible exception of lots valued at over $250,000. The accumulation of such a large amount is unquestionably a costly proposition for the shipper, because of interest and insurance charges incurred while the ores are being held in the warehouse awaiting shipment. It is entirely possible that our costs are lower even on $250,000 shipments.

It is evident, therefore, that our present standard rates are decidedly competitive, and we are relying upon you and upon our agents at Buenaventura thoroughly to explain to all interested parties the definite advantages of

air rail shipments. It should be an easy matter to make a sale on the strength of lower costs and speedier transportation. We know from your recent correspondence on this subject that you will spare no effort to overcome any difficulties which might arise and to secure the business starting with the next available lot.

. . . .

CRISTOBAL

. . .

In summary it would appear that, while the platinum shipments out of Buenaventura can be secured by Panagra at competitive rates, gold shipments out of Guayaquil by air rail would be rather expensive as compared with steamer shipments, even after taking into account the interest saving because of faster transportation and after allowing for the annual discounts based upon accumulated freight charges between Guayaquil and Miami.

We have no intention of going into a cut-rate war with the steamship companies and we recommend that you attempt to secure frequent gold shipments of smaller sizes. These can be handled at competitive rates by air/rail.

[fol. 780]

GOVERNMENT'S EXHIBIT 353

Letter No. 4
(H.J.R. Panagra Series)

New York, February 10, 1936

J. T. Kirby, Esq.,
Lima, Peru

Dear Kirby:

I am particularly interested in what you say in your No.11317 (A.G.Series) with reference to the 40-passenger Douglases. I am a bit at a loss, however, to know the reasons for the feeling both you and Valverde have that we should go into this business and as the matter is of great importance to us, I would be glad if you would let me have your considered opinion in detail. I will have a chance to discuss it with Valverde when he is here.

* * *

Unless local traffic in the various divisions could be counted on to fill the planes, we would be thrown back on international traffic, including tourist business. Assuming we had capacity in the northern division equal to the new Doublases we would have with those planes accommodations for 4160 passengers a year, each way. Grace Line in the "A" and "B" services at present has accommodations for 7000 passengers per year, each way. During the last boom period when Grace Line was operating weekly services and PSNC and CSAV were also operating, combined passenger accommodations were 8000 passengers per year, each way. I assume that these figures more or less reflect the extent of the first class international passenger movement at present and during the last period of good [fol. 781] times. I realize that this does not include the movement by coastal vessels but I should think our rates would hardly enable us to hope to get much of this traffic. The question then is whether there is a good possibility of our getting enough of this steamer movement to fill the planes or whether increase in the movement is likely to be sufficient to fill them. Mr. Trippe counts heavily on the

latter factor as he feels that this improved equipment will develop a large volume of tourist business. Our experience with the "Santa Lucia" has, I am bound to say, given a good deal of support to this idea but I still somehow have the feeling that a large percentage of the tourists make the trip because of the time on the steamer and would not be interested in making it by air. I would not from the foregoing be understood as meaning that past experience constitutes an indication of the maximum traffic possibilities. That is not my opinion at all. I believe that traffic will increase. The question is rather as to the rate of increase which we may reasonably anticipate, and looking back over a number of years I think the record shows that this increase has been gradual, with occasional sharp ups and downs, and the question is whether it is not likely to continue more or less in this way rather than by any dramatic permanent increase. In other words, it looks to me as if our next step might logically be a plan with capacity for 20 or 25 passengers with a jump to 40 following after that rather than coming now.

[fol. 782] I realize that all the foregoing will sound very negative but it is not my intention to approach the matter in that way. I would really like to see our way clear to go ahead with this equipment. Unless we join the syndicate owing to the way it is being set up, we may find it very difficult to get this equipment three or four years from now if we should want it and it may even be that if development in this country follows along the lines of these large units, we may find it extremely difficult to get any suitable equipment between that size and our present DC2s. In pointing out the above considerations I have done so primarily with the idea of eliciting your answers to these objections if you feel that the objections are not well founded. I would be glad to find sound answers which would make it possible for us to go into the syndicate. I do not, however, without very compelling reasons to the contrary, want to find ourselves in the position of having taken on a "Normandie" or a "Queen Mary", much less a whole fleet of them.

Very truly yours,

(Sgd.) Howard J. Rose

GOVERNMENT'S EXHIBIT 354

C
O
P
Y

#11103
(J.E.S. Series)

Guayaquil, February 22, 1936.

A. Garni, Esq.
NEW YORK.

Dear Mr. Garni:

GOLD SHIPMENTS FROM ECUADOR

During 1935 the Banco Central del Ecuador effected four shipments of gold bars to New York, all of which moved on the Grace Line, who received revenue therefrom amounting to over $15,000 USC. Panagra have recently been working very quietly on this business and a few days ago their traffic representative from Cristobal proceeded to Quito to get in touch with the management of the Banco Central there. A comparison of the Panagra rates for this gold movement shows that these are $238.16 cheaper than the steamer rates for a shipment valued at $346,000, which was the amount of the last shipment per Grace vessel.

* * *

In view of this saving, the Banco Central have expressed their intention of making their next gold shipment (sometime next week) by Panagra plane.

I have recalled to the Banco Central management in Guayaquil their experience with us on all their gold shipments last year. Practically all these were made in the most private and confidential circumstances, and many times I have been called from my home at all hours of the night, sometimes having worked from 11 pm until 2 am sending cables effecting insurance, etc. for their a/c. They feel, therefore, very appreciative to the Guayaquil Agencies Company for the services thus rendered.

I feel that to have Grace Line lose this business to Panagra after having handled it successfully for so long, would be most unfair. In addition, I have in mind the fact that when shipments are made on Grace Line steamers the whole of the revenue remains in the organization, which is not the case should Panagra transport the gold. After the Panair's proportion of the traffic is deducted, I believe that the Grace share of the revenue would only amount to some 20% of the total freight, since I presume Panagra would [fol. 784] take the shipment to the Canal, at which point it would be turned over to Panair as far as Miami, and from Miami to destination some other Line would take a hand in the business. Therefore, on the run Guayaquil/Cristobal Panagra would, I presume, receive say 40% of the total freight paid, and only one half of that amount would remain with the Grace organization.

* * *

The Banco Central would be interested in having their shipments continue to be made on Grace Line vessels, provided freight rates could be shaded to meet the difference between plane and steamer transportation. They state that in order to make this worth while to them the rates would have to be rather lower than those of Panagra. As you will see from the comparison given, shipments on Panagra pay a much higher rate of insurance, although the Banco Central inform us that they could probably get this rate very much reduced, which would increase the difference in favour of Panagra transportation. It is noteworthy that the actual freight rates of Panagra are some $500 lower on the shipment last made valued at $346,000 than the steamer rates, while an additional 350.00 would have been saved in interest, so that any reduction in insurance rates would make the difference a very large one indeed.

If you agree with my views that Grace Line should retain this movement because of the benefits derived by the organization therefrom, I would appreciate your kindly passing the information on to the Grace Line and have them take steps to reduce freights immediately, preferably through the Conference, or if this is impossible due to the need to make an immediate decision in order to obtain the

next shipment which the Banco Central will shortly make, then if you consider it advisable for the Grace Line to authorize me to make a confidential refund on freights to the Banco Central equal to the difference between plane and steamer rates, I would appreciate prompt advices so that no time may be lost in assuring the Grace Line of this revenue.

Very truly yours,

No. 11081
(JEZ SERIES)

Air mail 3.9
Arrive 3.12

New York, March 9, 1936.

M. Holguin, Esq.,

GUAYAQUIL, Ecuador.

Dear Holguin:

GOLD SHIPMENTS FROM ECUADOR

Your No. 11103 (JEZ series).

In the matter of placing maritime freight rates on gold shipments from Ecuador on a competitive basis with those quoted by Panagra, the Grace Line have been giving this matter their study and cabled you with their No. 71 and will be writing you separately with their views on the subject.

In the first page of your letter and taking a shipment valued at $346,000. as a criterion, I notice that even under existing freight rates the shipment of gold by steamer works out at a little more than $100.00 cheaper than by air (exclusive of interest calculation). I also notice that in calculating interest advantage you figure on the basis of 6% per annum for the five days by which transit is reduced through the use of the air service. I am very interested in knowing where the Banco Central del Ecuador can earn 6% on gold deposits in New York, unless the shipment of the gold is in liquidation of an indebtedness involving a 6% interest payment, and for this reason cabled you with our No. 72 as follows:

"72—YOUR LETTER 11103 PAGE 1 ENTIRE DIFFERENCE DUE TO INTEREST CALCULATION AND UNLESS GOLD SHIPPED IN LIQUIDATION OF A 6% DEBT WE DOUBT GOLD WILL EARN ANY INTEREST VERIFY AND ADVISE"

From a net revenue point of view, there is, of course, an added advantage to the Grace organization through the retaining of these shipments for the Grace Line, but I do not consider that as a general rule, we can take a 6% interest calculation as a basis for the adjustment of rates, even though in this particular case, there may be some reason for using the 6% rate.

Very truly yours,

(Signed) A. Garay

[fol. 787]

GOVERNMENT'S EXHIBIT 357

Copy

#11105 Guayaquil, March 9, 1936.

J. E. Zalles, Esq.
NEW YORK.

Dear Mr. Zalles:

GOLD SHIPMENTS

I duly received your Balcoff cable #72 in which you pointed out that the entire difference is due to interest calculation and that unless gold is shipped in liquidation of a 6% debt you doubted whether gold would earn any interest. I replied to this to the effect that while this was true on the shipment which we gave to you as an example in my #11103, because of its size and weight, on shipments of lower valuation there was a marked difference in Panagra's favour on transport charges alone, viz. without counting insurance or interest charges.

For instance, I am attaching herewith, for your information, a copy of waybill covering a shipment made last week via Panagra on 189 kilos of gold valued at $78,000. While the actual transport charges via Panagra amount to under $600, you will see that by calculating the shipment via Grace Line at the rates listed at the bottom of the second page of my letter #11103, that Grace Line transport charges alone would amount to about $1,000, and it was just this great difference which prompted the Banco Cen

tral to respond to Panagra's overtures. They are very much inclined to reckon on these actual transport charges without taking into consideration the comparatively high rate of insurance on air express shipments, as they believe they can get these down to the level of the insurance levied on shipments via steamer.

I am very pleased, therefore, that you have since authorized me to accept the gold shipments for Grace Line at the standard rate of [illegible] of 1% ad valorem, with similar charges as have previously been assessed, and had this rate been applied on the shipment covered by enclosed Panagra airbill, actual transport charges would have been [illegible] $5060 as against Panagra's actual charges of more or less the same amount. I am very glad you have authorized me to go ahead and close a contract at the fractional rate named, and although I have not yet succeeded in having the contract signed, as the Bank officials here have found it necessary to take up the matter through rather drawn out channels in Quito, I am sure that we shall be able to obtain all future shipments for the Grace Line. Many thanks for your cooperation towards this end.

Very truly yours,

(sgd) Manuel Holguin.

PRIVATE

PLATINUM SHIPMENTS

CRISTOBAL
March 10, 1936.

Panagra—New York

We are now about ready to begin negotiations with the Choco-Pacifico people for the handling of their platinum movement between Buenaventura and New York but, in view of the contents of your letter No. 4902-Private, feel that, in fairness to our prospective client, we must hold off

until we have something more definite to offer. We believe it can readily be appreciated that shippers would be placed at a very real disadvantage in coming to any agreement with us for a movement such as this Choco-Pacifico platinum if they could not be given sufficient *exact* data beforehand to enable them to determine, before commencing shipments, what the final cost of the movement would come to. For example, at present rates, and with a predictable rebate, Choco might determine that movement by air would be more economical than by other means. Later on, because of an increased air freight rate, the reverse could easily be true, even taking the rebate into consideration, and Choco would then feel bound to revert to water shipments. If this happened to be the case, the predicted rebate due on shipments made by air, but not received by Choco at the time shipment was made, would be materially altered. We hardly believe Choco or anybody else would be willing to give any serious consideration to any such grab-bag proposition, and are convinced that the only way we can hope for any progress in dealing with such important shippers will be to follow the lead of our surface competitors [fol. 789] and offer freighting agreements based on firm prices, unalterable during the life of the agreement. We feel sure that there is nothing unorthodox in making the above suggestion as we have convinced ourselves that it is common practice with such an established firm as the Grace Line, Inc., by their own admittance.

Having had no experience in dealing with the states on-carriers, we hesitate to make any suggestions as to the manner in which our case might be best presented to them. However, we certainly feel that the least we can ask is that they co-operate with us to the extent of offering a firm price for their services for a year, at least.

(JEZ SERIES)

Air Mail 3.23
Arrive 3.26

NEW YORK, March 21, 1936.

Manuel Holguin, Esquire.,
GUAYAQUIL, Ecuador.

Dear Holguin:

GOLD SHIPMENTS

Your letter No. 11,105.

I am glad to note that with the adjustment of the maritime rate on gold you expect to be able to secure all of the future shipments of the Banco Central via the Grace Line.

In the second paragraph of your letter you indicate that the bank is somewhat inclined to disregard the high rate of insurance on air express and that they expect they will be able to bring the insurance rate by air down to the level of that charged for ocean transport.

In checking this matter over here, I am inclined to believe that the rate for air transport of 30¢ per $100.00 is very reasonable, and it does not seem probable that the Underwriters will take this risk for any less. It seems somewhat illogical that the Bank should disregard a difference in insurance rate, and on the other hand figure closely on interest for the difference in time between ocean and air transit.

While on the subject of interest I would advise you that the Underwriters will only give the 30¢ rate by air provided that the gold is shipped over land routes. In other words, from Cristobal gold would have to be carried by the Central American route and this makes the period of transit 5 days, rather than 4, as you figured in your letter No. 11,103. The difference between ocean transit 10 days and air transit 5 days on the basis of the very low interest

rates prevailing here, would make the advantage of air travel, from an interest point of view, practically negligible, and certainly not sufficient to offset the difference in insurance.

Very truly yours,

GOVERNMENT'S EXHIBIT 361

Letter No. 1

(W.J.R. Panagra Series)

New York, March 30, 1936

M. Holguin, Esq.,
Guayaquil, Ecuador

Dear Holguin:

My attention has been called to correspondence with reference to recent gold shipments from Ecuador.

This happens to be one of the few instances which have arisen involving a conflict of interest between Panagra and the Grace Line. I recognize that in this situation your position as representing both concerns is a difficult one. When such questions arise, however, they cannot be resolved on the basis of relative stock ownership and the interests of Panagra subordinated because our stock interest in that company is only 50%. If this were to be the test we would be automatically disqualified from acting as Panagra's representative.

I do not mean by this that the interests of Grace Line are to be subordinated to those of Panagra. Their representation is also entitled to be properly served. What I do mean, however, is that where a question of conflict of interest is presented, it is incumbent on you as representative of both companies to occupy a neutral position, reporting the facts to the corresponding principals and letting them decide what action is to be taken.

I am bringing this matter to your particular attention as it is one of the first instances of the kind which has arisen and I want to make sure, for your guidance, that our position is fully understood.

Very truly yours,

(Sgd.) HAROLD J. ROE.

Mr. H. R. Harris,
Cristobal, C. Z.

Dear Mr. Harris:

I would enormously appreciate it if you could find it possible to bring up the subject in the attached letter in any conversation in which Mr. Iglehart and Mr. Holguin may participate.

We have been obtaining fine cooperation from Guayaquil, but the matter in question has been held up on two counts:

First—Mr. Holguin is holding up decision until he knows definitely whether Guayaquil will continue as an overnight stop. I have pointed out to him that this is entirely immaterial as, whether Guayaquil remains as such or not, we still need some one dedicated to getting business for us.

Second—In an indefinite manner I have understood that a question of policy is involved, more or less "How can someone go out and drag in business for Panagra, when no one is doing so for Grace Line". I believe this is the more important of the two reasons; and in view of Mr. Iglehart's expressed goodwill you may be able to get us over this hurdle.

[fol. 794]

GOVERNMENT'S EXHIBIT 363

SUBJECT: M. HOLGUIN—TRANSPORTATION

LIMA
July 16, 1936.

Mr. J. D. MacGregor,
NEW YORK.

Attached herewith please find copy of a letter from Mr. Sinclair to Mr. Beatty, together with Beatty's remarks and also Van's remarks. I am forwarding this matter to you for action since I feel that this is a policy question which I would rather put up to you.

In the first place, while I feel that Holguin has done a great deal for Panagra in many ways, at the same time I feel that he definitely has steered the Ecuadorean gold his shipment from Panagra to the Grace Line, and in ~~such~~ dual capacity has never been prone to give Panagra any breaks which he could give to Grace. In the second place, I have forwarded you a memorandum from Van pointing out that the Grace agency in Guayaquil is apparently doing some tricks in connection with exchange transactions to and from sucres in connection with advances to our employees. In the third place, I feel that if we give the Grace manager in Guayaquil a free pass we can't very gracefully refuse to give a free pass to other Grace managers from time to time, which might not be desirable.

I suggest that you advise Cristobal direct in regard to this matter, sending me a copy of your letter.

GOVERNMENT'S EXHIBIT 364

(TRANSLATION)

PERSONAL

Guayaquil, August 24, 1936

Mr. A. E. Sinclair
Cristobal

Dear Sinclair:

The fears which I have so often expressed to you have finally materialized; today I was called to the Manager's office and severely reprooved because of my atitude towards Guayaquil Agencies.

You have no idea how badly I feel, having been so completely absorbed by my work, practically tearing myself apart in an effort to find something new and to experiment with some new idea—I have never forgotten my work even at home or in the street—just continually thinking in terms of my job and nevertheless getting nowhere.

I have never found anything but misunderstanding and I don't know but it seems to me that everything related to Panagra is looked upon with a jaundiced eye, they are jealous of it and I cannot understand why they can't be more broadminded and permit each Company to carry about its own business in the best way possible.

As you can very well understand my situation is a most difficult one even though Mr. Kolditz has told me that based on reports he has had about me in the short time he has been in this Office, he had formed a good opinion of me and it is because of this that he is not now doing what he should do, though that would be his duty, and it probably would be different after New York writes him about it—in other words, I can state that I am in the dog house.

If all this came about because I do not perform my duties; because of any misconduct on my part, etc., well and good, but since it is only because of the very contrary, because I am, as someone said jokingly, too conscientious, that really hurts.

The blame for this is mine, and I say mine because it may result from my having tried to give another person something of the same full confidence which I have placed [fol. 796] in you; the reason for this; my great interest in my work; my decision to try to solve my problem as quickly as possible, my belief that because you were not here to serve as my adviser I would therefore need someone else with mature judgment to help me—and so it was that I find myself in my present jam because of a mistake in choosing that person, no one else, but Mr. J. M. Van Law.

If I could have only imagined for even a moment that Mr. Van Law could be so tactless! When I got to the Airport last Friday I asked him if I could talk to him a little later that afternoon, and he was very agreeable so we made a date for 9 o'clock when I would go to see him at the Grand Hotel where he was stopping; and this I did at the time set whereupon he listened to my story and asked me to write to Cristobal regarding the matters I had mentioned and other things listed in a memorandum I handed to him during this meeting.

This memorandum was simply a sheet of paper on which, when returning from the Airport, I had made a few notes regarding things I wanted to discuss with him and that perhaps he might be able to settle that very night so that I might forget some of my problems. Among the ideas and suggestions listed there was: Why couldn't we print some of the Panagra advertisements, our tariffs to the more important cities (passenger fares) in the same way that Grace does, in view of the fact that some of our fares for these

points are lower than theirs—this was more or less the way I presented the matter.

Van Law took the memorandum and I left shortly thereafter—on Saturday I did not see Kolditz, and so it was only this morning that he sent for me and that I talked to him and you can hardly imagine my surprise when he charged me "how is it that you who are an employee of Guayaquil Agencies and not of Panagra, have begun to work against this Office—how can you suggest plans that are against our interest, such as the proposal to print the tariffs and passenger fares on airplanes in comparison to steamships, in the way you have done in a memo you have given to Mr. Van Law, *who has turned it over to me!*"

[fol. 797] As I already told you, I just cannot believe that this has happened—perhaps Mr. Van Law just did not understand the importance of all this and so turned over my paper to Mr. Kolditz. Well, the fat is in the fire and what I have so long feared would happen has happened—and what can I do about it?

Among the things which they told me is that they are going to write to New York complaining about you for wiring to me directly and not to the Guayaquil Agencies—the same goes for Lima.

As was to be accepted I have no friend on my side at Guayaquil, I am completely alone and I don't know what to do now. Do you think I should ask them to be transferred to another department? I would have against me the whole management, MacLean and Arrarte—the latter has a very special dislike for Panagra, although I cannot understand why. It is because of this that they loathe me, just because I don't agree with them on this.

Well, please don't speak of this to anyone and I won't say anything about it to Van Law when he comes back—all

the "staff offices" will go to meet him then; I wouldn't be surprised that this were not the last letter you get from me as an employee of Guayaquil Agencies, although I shall always be your friend.

I hope the situation isn't as serious as it seems to me now and in the assurance that you will be able to help me as well as to show me how best to carry on, I am, as always,

Your sincere friend,

(signed) G. JIMENEZ ARRARTE

CRISTOBAL
September 19, 1936

Mr. G. Vidal
NEW YORK

Dear Vidal:

Incidentally, I do not see very much good in continuing our intensive efforts to have the Panair-Panagra schedules and other literature distributed to the Grace Liners. Muhlfeld handed a number of schedules to the purser on the SANTA ROSA. The schedules were placed in the rack used for steamship folders, so I took occasion to ask for a copy of the Panair schedule, and the assistant purser fished for one, which he found at the bottom of his desk drawer, and handed it to me. I asked him why a supply was not in the rack. At that time the purser came up and said:

"Of course, they should be in the rack", and a dozen were placed there. The next day they were gone again. In the evening I went to the Captain's cabin for cocktails, and facetiously asked him why he had given orders to remove the folders. The Captain flatly replied: "Who do you think I am working for—the steamer company or the airline". I think there is no question that the open animosity of Ed. Ford, President of the Grace Line, is responsible for this attitude on the part of the steamer personnel. I think you should not retell this conversation as I have written it to you, but it would be in order, when next you see Cogswell or Roig, to state I had written you that no airline folders were in the SANTA ROSA folder-rack. Please have a supply of folders sent to the other Grace boats as they arrive in New York, and I shall ask one of our men here to look at the rack and see whether he can find any there. I think we shall have to follow out a plan of just attrition, on the same theory of rock corrosion through the constant dripping of water. If we make a fight about it we will simply increase the opposition.

ALL AIR TOUR—PANAGRA.

SANTIAGO,
October 7, 1936.

Mr. G. Vidal,
NEW YORK.

I am in receipt of your JDM #15 of September 28th, and am glad to note that the matter of an all air—all expense tour is approaching a definite conclusion.

It is rather strange and is, of course, one of the handicaps with which we have to contend, that the Grace Directors themselves do not seem to be in accord concerning these tours. Possibly this arises from the fact that certain of them are more closely aligned with the Grace Line than others.

In connection with Mr. Roig's suggestion that we submit a similar tour involving steamer transportation to and from the Canal Zone, it would seem to me that we are in danger of falling between the nether and the hither millstone, by having a multiplicity of tours rather than settling on one specific tour and pushing it in every way we possibly can.

CTC CHILE EXPLORATION CO.
ROUND TRIP DISCOUNT STEAMER AIR-PASSAGE

LIMA, April 10th, 1937.

Panagra, New York

Att. Mr. J. D. MacGregor:

We have learned that the Grace Line are granting 5% discount to employees of the Chile Exploration Co. and it is my understanding that they grant similar discounts to many other important American business firms in South America.

I believe we should also give due consideration to this as we are in many instances competing with other surface transportation and naturally we should take into account not only their tariffs, but also special discounts, such as Grace Line are granting.

We would like to have your views on the above.

MEMORANDUM

Mr. J. E. Muhlfeld,
S.A.G.O.

As the Grace Line, and apparently other steamship companies, have and are revising their passenger rates upwardly because of increased operating costs, and as our own costs are also on the increase, it may well be that this would be an opportune moment for Panagra to raise the prevailing passenger rates throughout the line.

Regardless of the merits of the above possibility, I would appreciate your ideas in writing as to what upward rate adjustment could be made if it were decided to take action at this time intended to offset the higher operating costs.

It is my idea that the present through rate between Miami and Buenos Aires could perhaps be raised from $500. to $600., an increase of 20%. Other tariffs could be adjusted more or less in the same proportion by bearing in mind competitive and pay load conditions over the various sections of the line.

I would appreciate your written report on the above not later than August first next.

PASSENGER RATES

Lima, August 3rd, 1937.

Panagra, Cristobal
Panagra, Lima
Grace y Cia., Santiago
W. R. Grace & Co., La Paz
Pan American Arg. S. A., Buenos Aires

Attached please find a rate sheet showing on the lower line existing rates between Los Angeles, Brownsville, Miami and all points served by Panagra.

By return private airmail, will the *manager* of your agency advise us specifically by referring to each individual rate whether in your honest and frank opinion you believe traffic will stand the increases as shown on the top line and which represent a general 20% increase over existing tariffs.

Bear in mind that, because of general improvement in business throughout the world and increase in operating costs, other surface carriers have increased their rates on both the east and west coast of South America and that ocean freights and passenger rates throughout the world are on a general increase; that between certain sections of our line we are shutting out business, even during the seasonal low months of May, June and July; that next October we will operate DC-3 equipment probably between Buenos Aires and Cali, and extra sections between Cali and Cristobal; that traffic will probably increase approximately 28 to 30% this coming year over last year; that we still depend about 98% upon commercial travel although we are just commencing to obtain pleasure and tourist travel; and any other pertinent facts of a local or other nature which may affect traffic movement in the present and near future.

Will you please indicate in figures the highest rates which you believe the traffic will bear after taking into consideration the above factors or any additional facts affecting your own local picture.

• • •

We agree thoroughly with all of the factors considered in your letter which affect the traffic and rate structure and in view of present existing conditions we too, are of the opinion that you are justified in raising the fares and are just as confident that the traffic will bear the increase.

The steamer fares we are using for comparison are minimum first class on vessels that appear to be your strongest competitors for passengers to these destinations, with the possible exception of Talara, and are quoted to the port nearest the destinations of the planes.

The proposed rates to Lima and Cristobal appear to us to be fair and reasonable and we consider them very much in order. Talara, we believe would stand considerable increase over what you suggest, say $35.00. The rate to Buenaventura is what we think of as part fare to Cali

and other interior points of Colombia because obviously most of the travellers are enroute to these places. Now that you have the direct service to Cali we believe that the rate could safely be increased to at least $90.00. Please, consider here not only the saving in time over other means of travel, which is tremendous, but also the difficult and sometimes uncomfortable travel encountered in the alternative routes. The Miami/New York and Santiago rates which you propose we consider in order as they are. While they are much higher proportionately over steamer fares than your rates to other points, we believe that the trip is sufficiently long and the time saved sufficiently great to warrant the higher rate. Of course, we understand that your rate affects only a minor proportion of the through rate to Miami/New York.

We trust that the foregoing observations will be of interest to you and we await news of your action.

GOVERNMENT'S EXHIBIT 371

PAN AMERICAN-GRACE AIRWAYS, INC.

Private 8964

Subject: U. S. CURRENCY PASSENGER TARIFFS

LIMA, September 17th, 1937.

Panagra, New York
Att. Mr. J. D. MacGregor:

Panagra, New York
Att. Mr. Vidal:
(Ref. your memo of
July 19 to JEM.)

Mr. H. R. Harris,
SAGO, Lima.

At Mr. Vidal's suggestion the undersigned, with the assistance of Messrs. Zalles and Van Law, has studied our present US Currency passenger tariffs to determine whether they should be raised. The conclusion to be drawn, as will be seen from the analysis given below, is that the only section of our line which can stand a raise in tariffs is that comprised between Cristobal and Lima. All other tariffs should not be raised because of competition from other air lines and surface means of transportation.

* * *

In each group consideration has been given to (1) competitive conditions offered by other airlines and surface means of transportation, (2) carrying capacity of our schedules at present and in the near future, (3) political considerations, (4) potential volume of traffic, (5) type of traffic, business or pleasure, and (6) inherent advantages of air travel over other means of transportation, in order to arrive at the highest possible fare under the circumstances in each case or in other words to determine what the traffic will bear.

* * *

1-b) *Through Fares from Los Angeles and Brownsville*:

Steamer fares from Los Angeles to West Coast ports compared to the air tariff indicate that a raise would be in order. This raise is obtained by adding the present Western Division fares to Cristobal to the proposed higher fares from Cristobal south. A similar raise is likewise obtained in the Brownsville through fares, which would seem warranted because of the comparatively small movement involved.

[fol. 805]

2—*Northern Division Tariffs*:

It is felt that tariffs in this sector can be raised because (1) steamer rate between points in this sector are very close to present airline rates, (2) it is a bottleneck in our line since the carrying capacity is very limited and (3) there is hardly any competition from other airlines.

• • • •

4—*Lima-Santiago Tariff*:

It is considered that this important fare cannot be raised because (1) it is at present 37% over the comparative steamer fare, (2) the competition of the LAW-Faucett combination, and (3) traffic over this section has not been heavy. Similarly the Arequipa-Santiago fare was not raised. The through tariffs to Santiago from all points north of Lima are set at the sum of the fares to Lima.

5—*Santiago-Buenos Aires Tariff*:

The Santiago-Buenos Aires tariff has been left at $109.-USCy, but it must be borne in mind that Air France and Sindicato Condor have already advised they are lowering this fare effective October 1, 1937, and that if they actually do so, we may have to follow suit. With few exceptions, through fares to Buenos Aires are the fares to Santiago plus the Santiago-Buenos Aires fare and will therefore reflect any reductions in the latter fare.

• • • •

9—*U. S. Currency Tariffs With Peru*:

As Mr. A. B. Shea's recommendation that the present Panagra *soles* tariffs be raised 20% would place them above the present U. S. currency tariffs at present rates of exchange, the proposed soles tariffs have been converted to dollars at an exchange rate of 4:1. This would place the dollar tariffs and the local currency tariffs very close at present exchange rates and any future exchange fluctuations would merely determine whether the local currency or dollar tariffs would be effective in practice. The actual raise in U. S. currency tariffs under present conditions ranges from 6% to 8%.

[fol. 806] In view of the continuous passenger movement between Lima and Guayaquil by the combination Faucett to Talara and Panagra to Guayaquil, the fare Talara-Guayaquil was raised to $45.-USCy., which also brought this fare more in line with comparative steamer fares.

As noted above the Lima-Guayaquil fare was not raised in same proportion as the Lima-Cristobal fare because of this travel movement, however, it is also recommended that Aerovias be authorized to quote an inter-line fare AVP-Panagra equal to the sum of Faucett's fare to Talara plus Panagra's fare Talara-Guayaquil so as to get at least a share of this traffic for Aerovias.

* * *

Respectfully,

J. E. Muhlfeld

PRIVATE 10146

INCREASED PASSENGER TARIFFS

NEW YORK
September 24, 1937

SAGO
LIMA

ATTENTION: Mr. J. E. Muhlfeld

Receipt is acknowledged of your Private letter 8964 which is receiving our careful attention. Its contents are also under study by Panair's Traffic Department.

Yesterday we cabled you as follows (Palmetto 58):

"YOUR LETTER 8964 PANAIR PLANNING ESTABLISH $550 USCY MIAMI BUENOS AIRES THROUGH RATE. INCREASE OTHER RATES FROM 5% to 25% EFFECTIVE NOVEMBER 1st. FORWARD PROMPTLY ADDITIONAL RECOMMENDATIONS BASED ON FOREGOING."

You will note that Panair has also come to the conclusion that rising operating costs and the higher passenger rates being established by steamship lines justify similar action by the System.

Inasmuch as the table attached to your Private letter 8964 is based upon a through rate of $500. between Miami and Buenos Aires and as Panair is planning to establish a $550. rate between those two points, it is entirely possible that you may want to modify your recommendations in some respects.

As stated in our cable, Panair is planning to raise other rates from 5% to 25%, leaving some unchanged where an increase does not appear justified at this time.

G. Vidal

GOVERNMENT'S EXHIBIT 373

No 1

Dear Mf. Iglehart:—

FARE INCREASES

As Muhlfeld is leaving on tomorrow's plane I have had a wholly inadequate time to go over traffic matters with him and most of them will have to await his return. I have, however, spent today with him mostly on rates. He will be taking these up in New York and will I think need some encouragement to get them up enough. Attached memo touches some of the high spots.

I think he is unduly concerned about getting the air rates too much over steamer rates. In making his comparisons, moreover, he takes as the steamer the minimum on the Clara etc. which I think gets him off to too low a start. He feels, however, that with the last increase Grace Line fares are already losing the line business and he is fearful of a similar result if air rates are stepped up too much. Here again I think he may be too pessimistic. I mention these things because you will be seeing him and can doubtless buck him up a bit as I have tried to do.

The whole question is, of course, a difficult one and I shall continue to work on it and let you know any further ideas which may develop.

I think it is fair to say that Muhlfeld has gone about this job in a pretty intelligent way. He has had the matter up both personally and by letter with all our people and [fol. 809] his schedule seems to be in line with their recommendations.

Very sincerely,

(sig) HAROLD J. ROE

No. 1

INCREASE IN RATES

Mr. Muhlfeld has prepared a new rate schedule over the whole line which starts with the $50.00 increase in the through rate Miami to Buenos Aires and makes corresponding increases to a number of way points and in way-to-way rates.

The following may be noted with reference to the proposed schedule. The changes have been made after extended studies by the Panagra Traffic Department in consultation with Grace and other agents.

1. It will be noted that there is no increase suggested in the rate from Miami to any point on the West Coast north of Santiago, although rates between Cristobal and these points are increased.

2. On the strong recommendation of W. R. Grace & Company, La Paz, no increase is made in Bolivian rates except from La Paz to points north of Lima.

3. In Peru, local currency rates on Panagra planes are increased about 20%, which works out about 6% to 8% in the dollar rates. This difference in percentage results from the fact that heretofore there has been a currency rate which, converted to dollars, worked out materially lower than the dollar rate. The new schedule does not deal in any way with Aerovias Peruanas rates.

4. The new rate of $550, between Miami and Buenos Aires will presumably be pro-rated between Panair and Panagra on a mileage basis as heretofore.

5. Pro-ration of through rates between Brownsville and Buenos Aires will have similarly to be worked out along the same lines as the present rates. The mileage basis should not be entirely controlling here, as Panair may rea-

sonably make some concession in respect to their Central American mileage in order to equalize rates from western United States points via Brownsville with Miami rates, allowing, of course, in the Brownsville rate for the additional cost of traveling from United States West Coast points to Miami.

[fol. 811] 6. Mr. Muhlfeld will be discussing the new rates with Mr. Vidal and Mr. Chenea, and they will have to decide whether some of the increases may not be larger than indicated in order to keep pace with rising costs. In a broad way, the increases proposed seem to run between 5 and 10 percent. Changes in specific rates—except perhaps in a few special cases—over those suggested by Mr. Muhlfeld may be difficult, as this might result in upsetting the whole formula on which the rates are based. It may, however, be worth considering increasing all of his new rates by some definite percentage. In my opinion, an overall increase in present international rates of 30 percent would be very moderate in these times.

TRANSLATION

Guayaquil March 8, 1938

Mr. A. E. Sinclair
Panagra, Lima

Dear Sinclair:

I found out only today that you are again in Lima so I hasten to write you to inform you directly about something you probably already have heard: my being laid-off by this office, "for reasons of economy".

When I was advised that this was about to happen I wrote about it to G.P. Smith and told him that if I do not bring

any income to the Grace Line, I certainly do bring in good profits to Panagra, so that if the Grace Line decides to fire me on the score of economy Panagra could very well afford to take me on. This because in less than two years I have brought in about $12,000 U.S.Cy. in a Department which, as you know, was completely unknown in this city.

I have no need to talk to you about my work, since you instructed me in it and therefore know more about it than anyone else and therefore you know also better than anyone else that in throwing me out for "economy" I am being treated with the utmost injustice.

But we also know the real reasons and that is that it has been brought about by the Grace Line, and by no one else because of the last gold shipment which they lost and which meant $3700 U.S.Cy. for Panagra. They also know that the Central Bank plans to make many large gold shipments during the coming year and they know that if I am let out there will be nobody to handle the competition against them.

LETTER NO. 9806
PRAVATE

AIR MAIL Trip 53

Subject:

UNACCOMPANIED BAGGAGE - GRACE LINE

Lima, April 4, 1938.

Panagra, New York

Att. Mr. J. D. MacGregor:

During my absence from Lima, while I was on a recent trip to Buenos Aires, all our offices on the West Coast were advised by Grace Line they would not accept unaccompanied baggage belonging to Panagra passengers as outlined in Traffic Bulletin No. 725, dated June 15, 1938.

To date we have not received reply to our letter 9633 on this subject and the purpose of this letter is to point out to you that the action taken by Grace Line will seriously affect our passenger sales.

If it were not for excess baggage we would sell a great deal more business from South America to the United States, especially where families are concerned and I consider this one of the principal obstacles with which our selling offices are confronted at the present time.

Do not know what Grace Line objective was in cancelling their agreement with Panair System, however, I wish that you would bring this matter to the attention of the proper authorities in W. R. Grace & Co. and endeavor to have them cancel their recent instructions to their West Coast offices.

I am sending a copy of this letter to Mr. Chenea as undoubtedly he will be interested in discussing this subject with you and the Grace people as well.

I do not believe it was Grace Line's intention to divert traffic from Panair System, however, I would like to know the reasons behind their cancelling their intercompany arrangement with us.

[fol. 814] I am attaching my copy of Santiago's 3107 of March 28th to Valparaiso and Mr. McPhee's (Grace Line Manager) letter 15319 of March 26th to Grace Line Inc., New York, on this subject.

W. R. Grace & Co.
New York

New York, April 20th, 1938.

H. J. Ros, Esq.,
LIMA, PERU.

Dear Harold:

...

I found Chena very appreciative of Mann's recent prompt modification of the Grace Line ruling against unaccompanied baggage, but he feels that the general run of Grace *Line* traffic people are unsympathetic, if not hostile, to air traffic and cited the fact that he couldn't get the Pan American Airways schedules, including Panagra, on the Grace Line steamers departing from here but that they had to be slipped on board by the Panagra office at the Canal.

...

Sincerely yours,

Robert H. Patchin

[fol. 816]

GOVERNMENT'S EXHIBIT 377

W. R. Grace & Co.
New York

No. 30

Lima, Peru,
April 27, 1938

Mr. R. H. Patchin,
W. R. Grace & Co.,
NEW YORK

Dear Bert,

Your #17.

I agree that the Miami-Kingston-Cristobal-Lima Tour is an easier selling possibility than the Chilean Tour but I think Panagra gets very little benefit out of it. The chilean Tour is undoubtedly much harder to sell but from Panagra's standpoint, one passenger on that trip is worth several to Lima.

We have no shortage of traffic to Lima especially north of Guayaquil and, even with our somewhat larger payloads on the overland route, I think this will still be true, after taking care of Cali business. Where we are short of traffic is south of Guayaquil and especially Trans-Andean as I have pointed out in several of my recent letters. Our Trans-Andean passenger traffic is off over $4,000 a month for the first three months of this year compared with last year. This is a real problem and if you or Chenea can work out any suggestions to help this very acute situation they will be very greatly appreciated. I am glad you are working with Daulton on a closer tie-in with Grace Line. I think you will find that Grace Line sells very little air transportation in connection with steamship com-
[fol. 817] bination or otherwise. Our Grace Line propaganda for the Chilean Lake Section, for which I do not blame them in the slightest as it is one of their selling points to get tourists to go to Chile at all, is also diverting to this route many tourists who would otherwise fly over

the Andes. Perhaps we ought to set up a counter-propaganda for the Trans-Andean trip.

No one can expect Grace Line to sell air transportation at the expense of steamer transportation any more than Panagra or Panair would be expected to do the reverse, but there must be some points where we can work together to much advantage. To date we have somehow not succeeded in finding them. This is another point where anything you can do will be most helpful. As you say, our reduced Grace Line passenger service might fit in very nicely with this program.

I hope you will soon find a suitable assistant and get started on this whole matter of getting more traffic for Panagra in the United States. The problem is urgent and every day's delay is costing us money. While Panair's sales for carriage on Panagra are impressive, I imagine they represent tickets bought and not sold. I mean that when anyone is going to a point on Panagra on the West Coast, no doubt in part because of their general propaganda, he goes to Panair to buy his ticket but when they are interesting a tourist in a trip to South America they push the East Coast. Just a glance at the literature in any of their sales offices makes this apparent.

Yours sincerely,

H. J. Roig

GOVERNMENT'S EXHIBIT 379

February 25, 1942

Mr. James Magner, Vice President
Grace Line
10 Hanover Square
New York City

Dear Mr. Magner:

It has come to our attention that the Grace Line offices on the West Coast for some reason are not permitted to endorse the unused value of tickets to PANAGRA although we understood originally that that was perfectly permissible.

We have instructed our offices that in case it is necessary to endorse the unused value of one of our tickets to a steamship line like the Grace Line we should lift the unused portion of our ticket and draw an exchange order on the other for the unused value of our own ticket. I should think that your offices could be instructed to follow the same practice and doubtless the present situation may have arisen because of some misunderstanding or lack of definite instructions on the subject.

I would be very grateful for any comments you may have on this point since it has come to my attention in a number of instances during the past year that both the Grace Line and PANAGRA have been given a black-eye by passengers when after deciding to change their reservations they have found out that the Grace Line will not endorse tickets to PANAGRA.

With kind regards, I am,

Sincerely yours

Mr. Geo. L. Rihl, Vice President,
Pan American Airways Inc.,
New York.

Dear Mr. Rihl:

Reference is made to our confidential letter of October 16, 1942, with which we enclosed an informal agreement between the Grace Line and our Argentine Company. We never received a reply and we assume that Grace Line must have informed you of their intention to close their representation here.

We attach hereto copy of a memorandum from Mr. H.J. Aller, Grace Line Representative, informing us of the decision to close the Grace Line Agency in Buenos Aires as of December 11, 1942 on which date Mr. Aller moved out of the office which had been set aside for their use, and turned it and the furnishings over to us in perfect condition.

• • • •

This closes the Grace Line representation case as far as we are concerned, and we are (personally) very happy about it because we do not believe it is a good idea to have an Airline-steamship combination here. Before steamship services was suspended too many people made remarks such as, "If you don't get them one way you get them another".

We should very much appreciate being informed of the final settlement made with Grace Line, and we await your reply with interest.

With kindest personal regards,

Sincerely yours,

January 20, 1943

CONFIDENTIAL MEMORANDUM FROM MR. A. E. SINCLAIR TO MR. R. FERGUSON

* * * * * *

... Panagra employees who boarded Grace Line steamers in order to leave timetables on board were ordered off the steamers and in some cases not allowed to go on board, and any literature, even for some time thereafter, would be taken out of racks and destroyed. Mr. J. M. Van Law, now with PAA, was by then Traffic Manager and can probably add a great deal of information as he was for many years thereafter the head of the Panagra Traffic Department. I am sure it was at a later period, although I might just as well mention it here, that the Grace management in Peru periodically refused to authorize the purchase of instruments, spare parts or other items considered necessary by the technical personnel, creating considerable excitement from time to time until this situation was eventually placed on a normal footing as Captain Harris gained more and

more direct power. As an example, I recall the refusal of Grace to authorize the purchase of Kollsman altimeters for the use at the various airports, since this was considered an exhorbitant and unnecessary expense, the argument then being that these instruments in the opinion of the Grace executive responsible were for use aboard aircraft and not on the ground.

* * * * * *

I made frequent inspection and business solicitation trips over the territory encharged to me. I cannot say that in Cali I received anything but extreme cooperation from the Grace representatives. In Ecuador, however, the situation was altogether different, and my every move was watched with suspicion and my efforts were frequently checkmated. I finally arranged for a meeting of the Manager in Ecuador and his local executives in order to get all our cards on the table.

At that time my main efforts were being directed towards the securement of air freight. The Manager of the Guayaquil Agencies Company and his assistants contended that I must abstain from soliciting effective or potential Grace Line cargo and confine my efforts to soliciting such items as might be "Parcel Post" material. The manager pointed out to me that the commissions earned by his organization in Ecuador (which is 100% Grace-owned) from Grace Line business were enormously more important to him compared to anything he got out of Panagra, with the further consideration that any profits that might be earned on Grace Line business accrued entirely to Grace interests, whereas Grace only obtained 50% of any profits on Panagra business. The discussions were long, to some extent heated—net result an impasse.

G-382

[fol. 823] Naturally my job was to secure all the business I could for Panagra and I therefore continued in my efforts. I got wind of gold shipments being made by the Bank of Ecuador and went to see the Manager of the Bank in Guyaquil, who informed me that the matter would have to be discussed with the Director General in Quito. I therefore immediately proceeded to Quito. By a lucky fluke, the wife

of the Director General of the Bank of Ecuador, the man I had to see, was a very dear friend of my mother-in-law. I had never met fer or her husband, but using thix family connection and armed with "Whitman Sampler" candies and flowers I called at their house. I received a very warm reception, was invited to dinner one day, to a movie the next—and in the midst of all this arranged for an appointment at the Bank with the Director General and some other bank executives whom he called to hear my story. With this lucky break I made the sale and it was arranged that the next shipment of gold would go—and did go—via Panagra.

On my return to Guayaquil I came in for bitter remarks on the part of the Grace manager and his assistants, who had been informed of my activities by their Quito representative, and I know that they did not cease their efforts to secure this and other business that I solicited for the Grace Line. It is nearly five years since I left Panagra and, in the meantime, I understand and believe that the above conditions have radically changed and that as a matter of policy dictated by New York Grace Headquarters, all offices of Grace now watch without bias or even preferentially the interests of Panagra, but obviously if at any time a greater Grace interest were to be adversely thereby affected it is only natural to suppose that the major interest would gain supremacy.

* * * * * *

I hope the above note will be of some use.

Kindest regards.

A. E. SINCLAIR

TRAFFIC AND SALES—CHILE.
(YOUR PALMETTO 10 TO LIMA)

SANTIAGO,
August 21st, 1949.

Pan American-Grace Airways, Inc.,
NEW YORK

Attn.: Mr. J. T. Shannon.

Reference is made to the attached copies of our Palmettos 61, 62, 63 and yours 79 and 82, in connection with Chilean traffic and sales matters.

Our company restrictions effective August 5th, 1949 against the acceptance of Chilean pesos for round trip passages between Santiago and New York sold to Chilean nationals and bona fide residents was sharply at a variance with the policy of other transportation agencies in Chile. As explained in our cables all of the steamship carriers and air lines serving Chile are offering round trip tickets in pesos. Panagra's demand of dollars to cover the return portion of a ticket to the United States forced prospective passengers to expend double the amount of pesos in order to secure dollars at the present street rate of exchange which is $83.—. A comparison of the following fares indicates how we priced ourselves out of the Chilean market until this policy was reversed upon receipt of your Palmetto 82 on August 19th.

[fol. 829] It is most unfortunate that the Grace Line was quot—more attractive rates than Panagra by accepting not only round trip passages in Chilean pesos but also pasajes de llamada. We were losing traffic every day to the Grace Line, especially return business, booking by steamer to take advantage of the facility of purchasing the passage in pesos. As requested in our Palmetto 63 it is urged that a decision is reached as quickly as possible with respect to our position on pasajes de llamada, which the Grace Line is currently offering to the public. This feature now gives them an important sales advantage and we feel that both carriers should maintain the same policy towards pasajes de llamada.

Yours very truly,

G. G. Mason

January 26, 1951

MEMORANDUM TO MR. J. W. STARBUCK, JR.

Reference our discussion with Mr. Stevens of the Dickie Raymond Co. of a supplementary survey of the Grace Log circulation list. Mr. Stevens makes a suggestion that the Grace Lines run off their list on plain 3"x5" cards of salmon color so that Dickie Raymond in Boston may check for duplication between the Log names and those already on Panagra's list. By keeping the cards in salmon, all unduplicated names can be put directly into the file without retyping, and the color will be distinctive from any other colors presently used in the list and will identify the names as having come from the Grace Line.

Believe you should discuss this matter directly with Grace Line officials before releasing the list or cards on Panagra to Dickie-Raymond. There may be some objection within the Grace Line to our use of their list.

We at Panagra should have a clear and detailed idea of what the Grace Line list comprises, i.e. past passengers, shippers, exporters, wealthy persons, and so forth, before we embark upon any promotion. And the Grace Line should clearly understand that we intend to be competitive for travel business that may be developed out of this list. However, since it is all in the family, there may be no objections.

November 7, 1951

NOTE TO R.G.L.

On May 17th the Graces Line asked our approval of an agreement on "Round South America" tours at less than the normal one-way fares which the Grace Line had con-

cluded with the Delta Line and which named Pan American and its affiliates as connecting carriers.

Paragraph 4 of this agreement states, "Passengers proceeding independently between Valparaiso and Buenos Aires shall have the privilege of purchasing locally transportation for that portion of their tour, in which event no other connecting carrier need be employed."

Based on this provision, train transportation is being sold between Buenos Aires and Santiago and its effect creates an open jaw or RSA trips contrary to our tariff provisions. This also gives Grace and Delta, the sales advantage of offering this train transportation while Pan American and PANAGRA cannot.

Fausto Moscoso, Esq.

GUAYAQUIL, ECUADOR

Dear Fausto,

PANAGRA GRACE LINE PUBLICITY

I refer to the attached leaflet, which is representative of the type of publicity you are at present putting out for Panagra and Grace Line and which I consider to be most effective. The point has been raised here that the fact that Panagra and Grace Line, which to a certain extent are competitive services, are advertised together in a single leaflet might give rise to criticism or misinterpretation. I feel that there are some grounds for this thinking and consequently consider that in the future any leaflet or publicity material of the type attached to this letter should not advertise both Panagra and Grace Line but should only mention

one or other of these services. Although this will possibly signify a slight increase in the cost of your local publicity, the cost of such leaflets is not very high and I shall appreciate it if you will proceed accordingly in the future.

Yours very truly,

GOVERNMENT'S EXHIBIT 391

November 19, 1951

Note to Assistant Vice President Traffic Sales—
C. W. Moore

* * * * *

4) With respect to items 8 and 9 of Mr. Friendly's memorandum, a few days ago Mr. Rice was asked by Mr. Shannon, Panagra, and Mr. John Moore, Assistant Vice President, Grace, Washington, D. C., to furnish Grace the complete lists of the names of all passengers booked on Panagra by Washington. The alleged purpose was for Grace to determine which of these passengers would be considered VIP's so that Grace employees in Washington could extend special courtesies. Messrs. Shannon and Moore explained to Rice that our office in Washington is not capable of determining those people who are VIP's as far as the Grace Company is concerned. Rice replied to the effect that it would be a hardship to obtain this information for Grace and that he could not authorize it locally. Mr. Shannon intends to take this up with Mr. Lipscomb.

Howard Williard advises that W. R. Grace, New York, has a direct teletype line to the Panagra Traffic Office, Miami. He also informs us that Messrs. Eben Baker and Robert Golden were hired by W. R. Grace and assigned to the Panagra Traffic Office, Miami. An investigation should be made with respect to whose payroll they are now on as they

are referred to as being with Panagra's Traffic Office, Miami.

The Grace activities with regard to solicitation of the UN and the Pan American Olympic Games are fully outlined in the General Sales Manager's report. In addition Mr. Nagel submits the solicitation of the Hochschild charter as an example of Grace's activities in New York. The attached memorandum dated November 12, signed by Mr. Sylvester of Panagra, outlines Grace's interest in this charter.

Finally, as an indication of the problem confronting us in Washington, attached are two letters, both signed by James P. Freeborn. One dated March 16, 1951, is on Grace Lines' stationery. The other, dated April 11 is on W. R. Grace [fol. 835] stationery. This raises a competitive problem in view of the fact that any information concerning our passengers submitted to W. R. Grace in Washington becomes available to our competitor, Grace Line, as long as the same individuals represent both companies.

If I can be of further assistance, please advise.

WHR

LAD — LAD

Miami — Colon, R. P.

May 27, 1952.

PEPSI-COLA COMPANY—COLON FREE ZONE

* * *

The foregoing represents an actual annual tonnage from this firm of 2,001,000 pounds. However, the future potential cannot be appraised as Pepsi-Cola is undergoing an expansion program in Latin America which, if exchange

and regulations permit, could easily double their exports to some of the countries in the Western Hemisphere. Example of this is the probability of six new bottling plants in Colombia, which are awaiting dollar exchange permits in order to establish the bottlers in business.

• • •

It is worth while noting that the actual Clipper Cargo rates to the countries having the largest volume of these imports are substantially high when compared to steamship rates. There is a probability of a need to establish a commodity rate with a high minimum weight to offset or lower this differential in order to gain over the largest portion of this volume. However, we should wait until our Sales Representative surveys are completed in order to determine if there is such need for a reduction of rate to apply to soft drink concentrates or not. For this information, steamship rates Ex Colon to Central American ports is $6.41 per unit and to La Guaira is $5.78 per unit.

As the cost of insurance is absorbed by the shipper, Mr. Romero has promised to push Clipper Cargo service as much as possible, as this item represents a saving to his Company of 35 to 43 cents per each $100.00, the average cost of maritime insurance being 50 cents per $100.00 compared to ours of 7 cents to 15 cents per $100.00.

[fol. 837] By copy of this memorandum to Cargo Traffic Supt., we are requesting his investigation on the acceptability for carriage of the phosphoric non-anhydrous acid used in the preparation of soft drink products and to advise us as soon as possible in order to pass this information on to Mr. Romero.

This office will continue our contact with this firm and will advise the corresponding offices of any new developments.

Dear Lou:

I have your joint letter of August 28th regarding the arrangements for handling items of passengers' baggage to which the luxury tax would apply. Since the law permits passengers to avoid payment of this tax by acceptance of these items on board vessels or aircraft departing from the United States and since we have found it necessary to be competitive with steamship services in this respect we have had such arrangements in existence for many years. While the number of people who take advantage of it are not very numerous we would not wish to give it up because of the competitive steamship situation.

Sincerely yours,

R. C. Lounsbury
General Traffic Manager

COMPETITION.

* * *

Actually the most important competition we have here is not Braniff or Aerovias or Aerolineas but the steamships. The "Augustus" and "Julio Cesare" of the Italian Line, and the "Andes" of the Royal Mail Line and the "Luis Lumiere" of the French Line all offer excellent second-class accommodations at prices that are so much lower than those of the airlines that most travellers to Europe go by sea. The situation is less acute on the run north because Moore-McCormack is more expensive than the airlines and Delta only a bit cheaper but every month Flota Mercante, the state-owned steamship line of Argentina, is taking a bigger number of American passengers at least one way to or from the United States.

To meet this competition I am trying to work out an agreement with Flota Mercante of the sale type as we now have with the American steamship lines. I have also looked into the problem of a similar air-sea agreement with at least one of the European steamship lines, please refer to my memo to General Traffic Manager, New York, of July 25, 1952.

More important, I am analyzing at the moment the comparative costs to American companies of air versus sea transportation for their personnel. Roughly, the idea is this. An American company gives an employee a States-side vacation once every three years. The vacation begins when the employee reaches the States. That is to say, the

five to six weeks spent on the sea coming and going is additional vacation time which the company accepts by reason of the fact that it does not insist that the employee travel by air. Now if it can be shown that the cost to a [fol. 840] company will be less to send an employee and his family home every two years by air than once every three years by sea, say over a six-year period, then this home leave traffic will be ours.

MEMORANDUM FOR: MR. PATCHIN
MR. COGSWELL

I looked over Mr. MacGregor's undated memorandum.

• • •

CRISTOBAL OFFICE

The way that he has this laid out makes it the head office rather than New York, and I think it is a mistake. My ideas is that the operation should be in three distinct units and that in all matters except the actual operation of the ships, these three units should report direct to New York. The only way in which New York can keep any grip or control on that business is to have all the units lined up here; to have accounts kept here; and, to have control

of expenditure, etc. all dominated entirely from New York. Sufficient copies should be sent to the Operating Vice-President in Cristobal to enable him to do his work intelligently.

The matter of handling accounts ought to be worked out carefully, and my feeling is that the accounts of the three units ought to be handled in our Coast office and that all cash disbursements should be made through our Cashier's Departments. I think the practical way for doing this is for us to have a special employee to handle this work in our Coast offices, and that this employee should be a regular part of our staff and entirely controlled by our management. I think that one man in our office in Cristobal, one in Lima and one in Santiago, with possibly one in [fol. 848] Guayaquil, should be able to attend to all of this work in an entirely satisfactory way. I don't think that the Pan American-Grace Airways needs to have any independent employees in any of these places, except pilots and mechanics, in other words, men who have to do with the actual operation of the planes. This plan means minimum expenditure and maximum control.

I should therefore have answered Redshaw in that sense and told him that he was to delegate a man of our own staff to handle this work, and that this man should be our employee, rather than have cabled in the sense that you did.

I think it most important to get this matter of handling of accounting control, of cash and clerical work into the shape that I have indicated and to lay down a definite policy with reference to it at the start.

[fol. 849]

GOVERNMENT'S EXHIBIT 401

Confidential

No. 175

June 8th, 1929

Mr. J. H. Parmerton,
Corperacion Maritima Colombiana,
Buenaventura, Colombia.

Dear Parmerton:

As Buenaventura is a port in which aeroplanes of the Pan American Grace Airways are going to land and as you are going to look after the business of this Company in Buenaventura, I wish to advise you that our theory is, that this business should be developed in the same way as we have developed all of our businesses, namely, that we should make very careful estimates before we go ahead with anything; that we should work on a budget of expenditure as well as on a very carefully estimated budget of income; that we should watch every item of expenditure with the greatest care, and that we should follow a policy of the strictest conservatism that is compatible with a sound and enterprising development.

As far as your territory is concerned, we look to you to watch this business carefully and guide it along a policy of conservatism and profitable administration. We want your ideas continually and quite apart from the regular official correspondence that is carried on with your office and the head office of the Pan American-Grace Airways here. We will want your personal views on all subjects of importance to guide us in generally directing the course of this enterprise.

There is a tendency on the part of most aviation developments in this country to go ahead very rapidly with extensions and in many cases to lose sight of the importance of measuring expenditure and of making the business pay from day to day. We want to avoid any tendency in this direction on the part of the Pan American-Grace Airways, and we rely upon you in a tactful way to guide and gen-

erally direct the activities in your territory on the lines of a sound businesslike policy.

Mr. MacGregor with Mr. Harris and Mr. Jacob, and Mr. Vidal assisting him, have the direct responsibility for the [fol. 850] administration of this business, and in exercising any influence that we will want exercised, it will obviously have to be done in such a way that we do not relieve these men of the responsibility of handling this business and making a success of it. Nevertheless we must not lose sight of the fact that we own 50% of the shares of the company; furthermore, that we have a knowledge of South American enterprises and must gradually acquire a knowledge of the air business in South America, and that we must avail ourselves of our knowledge of local conditions and our experience in business management in order that this whole enterprise is well managed and profitably administrated from day to day.

Consider this letter strictly confidential and for yourself and for your guidance in everything pertaining to the above company.

Yours very truly,

ZALLES

GOVERNMENT'S EXHIBIT 402

New York, January 30, 1930

L. Valverde, Esq.,
c/o W. R. Grace & Co.
Valparaiso, Chile

Dear Valverde:

The outstanding features of the Grace agency agreement is, of course, that it places the whole growth and development of the Airways business in the hands of the Grace Houses. It is nothing like an ordinary steamship agency where the home office at one end of the line at least is providing traffic. Under this contract Airways will have no traffic organization at all outside of that which this agency agreement provides but the whole affair will be in the

agent's jurisdiction and we must look to them to originate our entire movement. This somewhat anomalous situation is only possible because of our stockholdership in Airways and the position of our Coast Houses is, therefore, really that of principals rather than agents.

Sincerely,

H. J. R.

[fol. 852]

GOVERNMENT'S EXHIBIT 403

COPY OF HANDWRITTEN LETTER

DELRAY, FLA. March 7, 1930

Dear Roig.

I have your letter of the fourth. The basic difficulty that I see in letting Trippe take over the administration of Panagrace is that he will be President of a 100% company and of a 50% company and no human can resist the tendency to pass the peaches to one and the lemons to the other. There is graphic evidence in his blocking Panagrace from getting the logical and necessary increase in service because it does not suit their East Coast programme. I fear that Trippe will think in terms of Pan Am. and will run Panagrace in these terms and that it will become impossible to get a square deal from day to day. If however you feel that you as Chairman can overcome that difficulty to the extent of getting a fair deal, then I think the plan may be feasible. The decision turns on the question as to whether as Chairman you feel that you can dominate the situation to the extent of protecting our interest against unfair or incompetent management. If so then I am ready to accept the plan. If not, then the plan means capitulating to Trippe who may be managing Pan Am. successfully altho reports until very recently were to the contrary; who knows nothing of S.A. conditions and who in his dual capacity might seriously prejudice our interest particularly if they decided they were going to buy us out. Now I am emphasizing the [fol. 853] dangers and difficulties because they are serious and we must face them squarely. Nevertheless I believe

that you can control Trippe to the extent that I indicate and am sure that you can do so if you can spare the time. It will be necessary that you go to S.A. promptly and repeat the trip frequently so that you will get to know the business thoroughly and in short will very soon get to know more about it than Trippe does. You should lay your plans so that not only will you gradually become expert in this business but that you will build up in South America Grace men who will gradually become dominating influences in the business. I believe in the business and think it may become one of great importance to us. To make it so, we must concentrate on it until we thoroughly master it ourselves; and as in all business, the partner who is most competent is the one who will effectively run it. I am not sure that it is wise to do away with the New York Office as I feel we should hold to the idea of an independent life. (I am not sure however how important this is as the business will be run in South America).

If you decide to carry out the plan you will of course have a very frank talk to Trippe and Hoyt and make clear the delicacy of the position Trippe will occupy and the necessity that Trippe in handling and discussing Panagrace matters should do so independently of Pan Am. interests. As President of Panagrace he must be working in their interest and do so honestly.

[fol. 854] The fees you fix for W.R.G. & Co. agencies appear to me very moderate. I am not sure that you have figured enough overhead provided our head men are to give the attention they must give to the success of the enterprise. You will find that our overhead runs about 100% of departmental salaries. If you figure less than this I think we will be out of pocket.

I hope you are fine.

Yours,

IGLEHART

I appreciate how much worry you have had over this matter and am confident that you will work out a solution on the lines on which you are thinking.

W. R. Grace & Co. will be responsible for the following local functions:

1) Agencies and representations
2) Negotiations
3) Traffic, including mail, cargo and passengers (When Carried)
4) Advertising
5) Purchases, including checking of presupuestos
6) Accounts, including checking and payment of all income and expenditures
7) Legal representation, including—
   a) Registration of Pan American Grace Airways Inc. to do business in Chile, if necessary
   b) Determination of Governmental fees and taxes
8) Employment of personnel except operations personnel.
9) Securing of requisite office space, furniture and office personnel where necessary.
10) Cables, telegrams and telephones.
11) Distributing all PAN AMERICAN GRACE AIRWAYS INC correspondence and checking to make sure that all correspondence is promptly answered with copies to all concerned.
12) All local insurance.
13) Movement of aircraft, except test flights.

The necessary personnel will, for the carrying out of these functions, be employed by W. R. Grace & Co. for the account of PAN AMERICAN GRACE AIRWAYS, INC. Such employees will be under the direct supervision and control of a Grace representative having Power of Attorney for PAN AMERICAN GRACE AIRWAYS INC. Up to 50% of this representative's salary will be payable by PAN AMERICAN GRACE AIRWAYS, INC to W. R. Grace & Co. for his work in charge of the various functions allocated to W. R. Grace & Co.

PAN AMERICAN GRACE AIRWAYS INC WILL be responsible for:

1) Operation and maintenance of aircraft and motors.
2) Sapre parts and supplies
3) Operation and maintenance of PAN AMERICAN GRACE AIRWAYS INC automobiles
4) Care of hangars, both of PAN AMERICAN GRACE AIRWAYS INC and/or rented ones.
5) Efficiency of aircraft movement
6) Employment of operating personnel
7) Efficiency of operating personnel
[fol. 857] 8) Appearance and conduct of pilots and flight mechanics while on duty
9) Proper maintenance of all operations reports and record and prompt forwarding of necessary operations reports to all concerned
10) PAN AMERICAN GRACE AIRWAYS INC personnel will at all times maintain complete cooperation with W. R. Grace & Co. employees or representatives engaged in PAN AMERICAN GRACE AIRWAYS INC work.

It will be the duty of both PAN AMERICAN GRACE AIRWAYS INC employees and W. R. Grace & Co. employees to report in writing to PAN AMERICAN GRACE AIRWAYS, INC. New York, with copies to PANAIR, New York, W. R. Grace & Co., New York and the undersigned in Lima, a weekly summary of the general situation as regards PAN AMERICAN GRACE AIRWAYS INC interests, activities and plans. There will also be reported any points of discussion or differences of opinion on questions of policy on any other questions that may arise in the minds of any one group with regard to the functioning of the other group. Since neither organization has control of the other, the best way to further the interests of PAN AMERICAN GRACE AIRWAYS INC. with the minimum friction is to attempt to visualize the problem presented by the general situation (including international as well as local problems) and to cooperate in every way possible in order that the PAN AMERICAN GRACE AIRWAYS INC.

may become a self-supporting organization based upon a solid economic foundation.

PAN AMERICAN-GRACE AIRWAYS, INC

H. R. Harris
Vice President.

GOVERNMENT'S EXHIBIT 406

Copy via Air Mail
Original by steamer

New York, October 10, 1930

Dear Roig,

I lunched yesterday with Rentschler of the City Bank, and among other things he brought up the subject of Aviation. He said that his brother had been talking to him about it and that they felt rather strongly that the Pan American Airways was not being well managed. He felt that they had very valuable contracts and that if the company were managed economically and in a close business-like way it should be on a profitable basis.

He asked my opinion of Trippe. I told him that I thought Trippe had great ability as a negotiator and a promotor, but that he had little business experience and furthermore that he was so much occupied with his negotiations that he had little time for administrating the business. Rentschler said that they had formed exactly the same impression and that he felt some steps would be taken shortly to put the administration of that company on a business basis. I told him that you were now in South America working over the details of administration of the Pan American-Grace Airways, and explained to him just the policy that we were following, and made clear to him that we were really running that company and that it was now on a paying basis.

* * * * * *

I hope you are well, and with kind regards, I am,

Yours, very truly,

[fol. 860]

GOVERNMENT'S EXHIBIT 408

Lima, November 27th. 1930.

Messrs. W. R. Grace & Co.,
LIMA.

Dear Sirs,

We regret to have to make a complaint against the service which we have received from the Furniture Department of your organization.

Shortly after lunch on November 26th. we approached this department with the request that they furnish us with two letter size filing cabinets. We were informed that while it was certain that they had one of these cabinets in stock in the deposit at Chacra Colorado, it was doubtful whether there were two available. We were informed by telephone about 3.30 p.m. that we could have two cabinets as requested and that they would both be delivered to our office before 5.30 p.m. We also understood that the price would be the same as we had previously paid for Art Metal steel filing cabinets, viz. $90.00 u.s.g. each (or S/.295.00 approx. at the present rate of exchange).

About 5.00 p.m. these two cabinets were delivered and we were rather surprised to note that one of them was an "Armor" cabinet, manufactured by the Corry Jamestown Mfg. Corpn., smaller and of much inferior structure to the Art Metal cabinets which we have been using previously and which have proved themselves to be very satisfactory. [fol. 861] The other cabinet which was delivered against our order from outside appearances seems to be equal in quality to the Art Metal, although we have been unable to inspect the interior due to the key not fitting the lock. This cabinet is made by the Yawman & Erbe Mfg. Co. and is stamped "Agente Exclusivo Lima—Const. H. Zollner."

In spite of the fact that the Furniture Department have always supplied us with Art Metal cabinets in the past and also in spite of the exclusive Lima Agent's name ap-

pearing on one of the cabinets just delivered to us, we were informed that these two cabinets were delivered from the Furniture Department stock and that the price would be the same as previously charged (viz. $90.00). We need hardly state that had the Furniture Department informed us in the first place that they had no cabinets in stock but could purchase same for us locally from one of their friends, charging us a reasonable price, we would no doubt have accepted their offer. However, we can under no circumstances agree to pay $90.00 u.s.g. for a filing cabinet which we could have purchased from Zollner direct for less than S/.220.00. On the basis of Zollner's price we estimate that the value of the other cabinet delivered to us to be not more than S/. 160.00 and this cabinet is also being charged to us at $90.00 u.s.g. We might mention that this cabinet is entirely unsuitable for our needs and would not be acceptable to us at any price.

It is therefore apparent that the Furniture Department have decided to use us as a means of making an exhorbitant [fol. 862] profit on a simple local purchase and under the circumstances we would prefer to cancel our order for these two cabinets and purchase same ourselves on the local market. Please therefore advise your furniture department to collect the two cabinets at their earliest convenience.

We might also mention that after considerable delay in fulfilling our order for office furniture, the glass tops for the tables were first delivered all out to the wrong size and it has been necessary to make new tops for these tables to fit the glasses. Said table tops have been delivered to date.

One of the office chairs was so well constructed that it after one week's continued use. Kindly have same replaced immediately.

Yours very truly

Thommen

SANTIAGO, July 24, 1931.

Messrs. W. R. Grace & Co.,

NEW YORK.

Attention Mr. H. J. Roig

Dear Sirs,

Panagra Representative Ovalle

Some misunderstanding must have arisen in the mind of Mr. Harris with regard to the Grace representative attending to Panagra planes at Ovalle, to judge from copy of H.R.H. No. 717 addressed to Panagra New York which we enclose. In regard to this matter we also attach copies of our private letter No. 9548 to Grace Valparaiso, of our private letter to Mr. Harris No. 339 and of private letter No. 810 to Panagra, New York, all of which are self explanatory and calculated to remove from Panagra's mind any doubts with regard to Grace representatives attending to their planes in Chile.

Just recently we have noticed a certain spirit prevailing once more inclining towards the idea of registering the Panagra in Chile, with the aim, so far as we can judge, of establishing separate offices throughout Chile. From where this idea has originated we cannot tell, but, in conversation with pilots coming from the North, the subscriber has gathered this.

We have no hesitation in saying we consider the Grace organization more competent and better equipped to attend to the interests and work of the Panagra than any separate entity that might be contemplated or established,

as apart from the saving in expense alone there are hundreds of other advantages accruing to them. We feel confident that the enclosed letters will meet with your full approval, and wish to state once more that we have an [fol. 864] extraordinary interest in the welfare and working of Panagra in Chile and do not believe that their business is conducted more efficiently in any other Division.

Yours very truly,

p.p. Grace y Cia. (Chile) S.A.

[fol. 865]

GOVERNMENT'S EXHIBIT 410

NEW YORK,
May 6, 1932.

Mr. H. R. Harris,
LIMA.

My dear H. R.:

CONVERSATION WITH MR. TRIPPE

I have had a long talk with Mr. Trippe and find a little change in his attitude in regard to the distribution of payments between Panair and Grace & Co.

He makes the flat statement that the Grace influence as agents in South America is very much exaggerated. He points out that Grace have not assisted us notably in any really constructive fashion. He mentions the necessity for paying for our rights in Chile and the seeming impossibility of securing "cabotaje" rights without a further payment.

He also says that the Grace influence did not prevent the Peruvian Government from taking away "cabotaje" mail rights in Peru.

He is willing to approve the $6,000 I told him I thought I should pay at Santiago for the supervision and legal ser

vices of Dagnino, Bulnes, Heavey, Metzner, etc. He would also approve the $5,000 payment in Lima of which, as you recall, $4,000 was to cover Thommen's salary. He considers, however, that it is ridiculous that we should cover Thommen's salary and not have Thommen definitely on our pay-[fol. 866] roll and subject entirely to our orders. As you will recall, Grace at present refuse to transfer Thommen to our payroll, for obvious reasons.

Mr. Trippe also considers we are paying far too much for agency services at Guayaquil as compared with what he is paying in Brazil for similar services. He knows that when we really wanted something in Ecuador either you went up to Quito personally or we assigned Zalduondo to the work. Therefore, he considers we benefit nothing from having Guayquil Agencies in any other capacity than in charge of clearances, etc.

Mr. Trippe also says that we are paying too much at Buenaventura; that the SCADTA Company will attend to clearing our planes and give us launch hire for an additional $7.50 per plane.

As you can see, the situation has not changed and I expect the Directors' Meeting next Wednesday, which is the first one since I came back, will be anything but amicable.

You will, I know, keep this letter as extremely confidential.

J. D. MacGregor.

JDM/Q

[fol. 867]

GOVERNMENT'S EXHIBIT 411

Letter No. 3
(H. J. R.)

New York, June 15, 1932

D. S. Iglehart, Esq.,
Lima, Peru

Dear Mr. Iglehart:

You may recall that almost immediately upon Shannon's arrival in Santiago friction arose with our people there in connection with changes which Shannon proposed to make in the way of administration of Panagra's business. One point which Metzner particularly objected to was Shannon's proposal that all Panagra mail be handled directly in Panagra's name without going through our office. You may recall my stating at the time that I felt Vidal was in some way responsible for this. This is now confirmed from the cross correspondence. A recent letter from Harris to Vidal stated:

> "Hope that the situation in Santiago is progressing satisfactorily and that Shannon is not having the same opposition that he seems to have met with at first. I will write Mr. MacGregor about addressing everything Panagra Santiago *as you suggest.*"

While all of the above has now been straightened out by Mr. MacGregor I am not sure how long it will stay in that condition and I am passing this to you with the idea that in your talks with Harris and Vidal you may, without disclosing the above, assist to keep the matter on the rails.

Very sincerely yours,

(Sgd.) HAROLD J. ROSE

P.S. For obvious reasons you will appreciate that it is highly desirable that the fact that we have seen the above letter from Harris to Vidal be kept strictly private.

H.J.R.

[fol. 868]

GOVERNMENT'S EXHIBIT 412

New York, July 15, 1932

L. Valverde, Esq.,
Valparaiso, Chile

Dear Valverde:

I understand that Nyquist has ceased to be an employee of Grace y Cia. and has entered into a definite contract with Panagra. While this particular instance may not be of very great importance, it raises rather definitely the question of what our policy should be in reference to assigning to Panagra the men in our coast houses who are devoting all or a part of their time to its business.

While it is a temptation to get these men off our pay-roll in these times I think in the long run we lose money by doing so. After all, we have always sooner or later collected for the time of these men and a little more with it and I think we will continue to do so. But when the question of compensation for Grace services comes up at the end of the year the first question our partners always ask is what have you done—not in general, but specifically. The more people we can point to devoting time to this agency the better off we are. We cannot collect for work done by men on the Panagra pay-roll. We always take the position here that a personnel with many years' experience on the coast is a valuable part of our contribution to the business and that we should not be called upon to turn them over to Panagra for the asking and once we do so we have given away our asset. Panagra management is constantly pressing to do everything and leave us as agents on a limb. When we turn over important men to them we facilitate this and greatly weaken our own position.

This question is really involved in the larger one of the relations between Panagra and its two parent companies and I would therefore appreciate it if you would advise the Santiago management to consult with us before indicating to Panagra officials their acquiescence in their taking over any of our personnel.

Very truly yours,

(Sgd.) HAROLD J. ROW

Due N Y " 22

Grace Y Cia. (Chile) S. A.

ORIGINAL AIR MAIL LETTER

Regular Mail Copy Follows

Santiago, July 30th, 1932.

Harold J. Roig, Esq.,
New York.

Dear Roig:

You remember the conversations I had with you and MacGregor in connection with Shannon's activities here. At that time I wrote to Metzner my letter No. 10267 copy of which I enclose herewith to refresh your memory, and which letter was verbatim a transcription of MacGregor's statements and was also approved by you before sending it out.

As you see from that letter MacGregor was going to write to Harris regarding the situation along the lines indicated in my letter. In other words, the idea as expressed by MacGregor was that Shannon was going to be in charges of operations practically in the same form that Robinson had been previously.

I have been discussing this matter with Harris and Metzner and the former tells me that the letter received by him from MacGregor does not define the situation as clearly as it was expressed by MacGregor during our discussings and it is Harris' understanding up to now that Shannon's position is not exactly as described in my letter after our interview with MacGregor.

The understanding in Chile is that Grace's responsibilities cover everything connected with Panagra with the exception of operations and certainly this was what MacGregor told us at that time.

In order to make clear what is the understanding under which Grace, Chile, have been working so far I refer to the memorandum drawn up by Harris in August 1930, dated from Santiago, copy of which I enclose and on which [fol. 870] are defined the responsibilities of W. R. Grace & Co., and of the Operations Department. It is true that this memorandum was cancelled some time later, but I think it was principally in connection with the question of division of payment of some of the employees, but it is also true that so far, according to Metzner, they have continued working practically within this program, until the arrival of Shannon. Since his arrival here, notwithstanding our conversations, there have been some deviation from the mechanism of the work within this plan in order to avoid misunderstanding, but since the matter is not clear I think it would be a good thing if you took the matter up with MacGregor and arrived at a definite understanding.

******

It is the understanding of Grace in Chile that whilst the staff is in Panagra payroll attending to the 13 points of Grace's responsibilities, all those men are actually responsible to Grace and should be completely controlled by them.

Very truly yours,

/s/ L. VALVERDE

Harold J. Roig, Esq.,
New York.

Dear Roig:

I confirm my cable No. 10 in answer to your No. 3. In view of the cable sent by Harris I had to *****.

As you know, I wrote the previous letter in front of Harris and he told me that he, in turn, was going to write to New York on the subject. From my conversations with Harris and from the correspondence that he had received, it seems that there is a fundamental misunderstanding with reference to the question of personnel of the Panagra. The whole staff of Panagra, with the exception of the operating men, has been always considered as Grace staff and under their responsibility and direction and I am told that it was only left on the payroll of Panagra in order to comply with the law that obliges them to have 75% of Chilean personnel.

[fol. 872]

Santiago, August 5th, 1932.

Harold J. Roig, Esq., New York

I take it that you have a clear understanding on this point as the whole Traffic Section has been always considered belonging to Grace, as undoubtedly Grace are the ones that engaged the men and always gave them all instructions up to the moment that Shannon arrived.

As I told you in the cable there is no doubt that Harris must have given instructions to Shannon to take over the traffic work and he has been actually doing so and Metzner has allowed this to go on, pending clearing up this matter with Harris and myself. There is no doubt that Harris' ambition is to handle the whole thing themselves; in fact, he actually said so in our interview, but of course, I do not believe that his intention would be to contradict his superiors' views if clearly put before him.

Although Shannon is actually doing this work I do not think there should be any difficulty in reinstating the modus operandi that existed until his arrival.

Dear Roig:

Your letter of July 15th. There is no question that the policy as outlined in your letter is the one that should be

invariably followed. I have taken the matter up with Metzner and he understands the situation thoroughly. The thing, however, boils down to the question of whether Panagra accepts the situation that all men handling Traffic and Accounting are actually Grace men. In the minds of the management here there is no doubt whatsoever that this is the case and that the men are only left on the Panagra payroll for convenience sake. I think this is clearly proved by the form in which the fees are disected in letter No. 10218, of my series, to Metzner and written by you, where it is clearly stated that there is a fee for general supervision, a charge for rent and a clearance fee. From that clearance fee the payroll of Panagra is deducted, but [fol. 875] to my mind it seems that this is merely a convenience and that Panagra should recognize that that Staff actually belongs to Grace, as it has always been the understanding in Chile.

There is no doubt that the whole Traffic business has been created from its infancy by Grace and I do not think that it should be fair for Panagra to consider those sections as belonging to them or getting any credit for them, merely because for convenience sake their salaries are on their payroll. I don't think there would be a doubt in anybody's mind that when operations were in charge of Robinson he had any interference whatsoever with any of these activities.

Very truly yours,

L. Valverde

GOVERNMENT'S EXHIBIT 416

Letter No. 118

Airmail 2/25/
Santiago 3/4/3

New York, February 24, 1933

A. Garni, Esq.,
Santiago, Chile

Dear Garni:

I enclose memorandum of Mr. Cogswell which is self-explanatory.

Perhaps you have some ideas on the subject and if so, we would be glad to get them.

Please understand that Mr. MacGregor is not making any complaint and Cogswell's idea and mine in writing to you is not primarily to make any complaint but rather, if possible, to anticipate complaint.

The matter is particularly acute in connection with the secondary service we have started in Peru. Mr. Iglehart is very keen about this service and the idea of having it worked into a Peruvian company with the many collateral advantages which that would give us. We are always in danger of losing our cabetaje rights in Peru and if we could get a Peruvian company going to carry on this secondary service it might at any time be of the very greatest assistance to us in this connection. For this reason, quite apart from the business itself, we are very anxious to make a success of this service. We will not be able to do [fol. 877] so unless we get business for it. This means active solicitation of passengers and other business and this job is the job which our houses and agencies are expected to do and ought certainly to be able to do in a far more effective and economical way then the Panagra organization. Nevertheless, the proof of the pudding is in

the eating and we are very definitely being put to that proof right now.

Very truly yours,

(Sgd.) HAROLD J. ROIG

[fol. 878]

New York, February 23rd, 1933

COPY

MEMORANDUM FOR MR. ROIG

Mr. MacGregor has several times stated to me that in his opinion the Grace Houses on the Coast do not actively go after business, either steamer or air, but rather take the attitude that they are glad to sell tickets to anyone who will come in and buy one. While I have naturally taken the position with him that I do not think his impression is correct, nevertheless, I must confess that I have gathered in a general way, in the case of Panagra at any rate, that there is something in what he says. Most of the activity and original ideas for getting new business, which is extremely necessary in the case of the airways, has originated with Panagra personnel.

I might cite as one instance the question of traffic from Arequipa. Mr. Farris took a trip to Cuzco to inspect the landing field and on his return to Arequipa by train procured five plane passengers who otherwise would not have flown. He called attention to the fact that at that time apparently no effort had been made by the agents to endeavor to get passengers from these trains or to acquaint them with our service.

[fol. 879] I am attaching herewith copy of letter No. 756 from Peruvian Airways Corp. to Grace y Cia., Arequipa, from which it is perfectly evident that very little initiative is being used by Arequipa Agencies in the question of the commencement of the service between Arequipa and Cuzco

which we are interested in starting, and very probably if anything is to be done Panagra will have to send their own man.

SANTIAGO, March 6, 1933

Harold J. Roig, Esq.,
NEW YORK.

Dear Roig:

PANAGRA

Your 118:

As you know, I was only in Lima a very short time and have not really had an opportunity to get any reliable impressions, but offhand I would say that the situation as portrayed in Cogswell's memorandum to you probably corresponds to facts as they exist. I have, however, seen a great deal of the Panagra office here and have been in fairly close contact with Shannon. I must say that Panagra's affairs are well looked after by Shannon and his staff.

One of the first subjects Metzner took up on my arrival here was the lack of sufficient authority over Panagra. I asked him just what he had in mind and he said that they should have broader general authority with reference to administrative matters that have to be decided from time to

time. I then asked him whether he thinks Panagra's business would be better handled by him than it is being handled at present, and much to Valverde's and my surprise, he answered in the negative. This talk closed the doors behind him and Valverde was rather disappointed at Metzner's confession in the above sense.

[fol. 881] Shannon is a very good man and has his heart and soul in anything that concerns Panagra, and if anyone should ever suggest going back to the previous system, I, for one, would vote against it.

Coming back to the criticism bought out in the memorandum enclosed with your letter No. 118, I can do nothing until I get to Peru, which as I told you today, should be the case in about two weeks. If I get my work here sufficiently advanced in time to take the plane on the 16th instant, which is about the time you will get this letter, I will probably decide to go by air as it would mean a saving of almost a week.

Very truly yours,

/s/ A. Garni

[fol. 882]

Government's Exhibit 418

Letter No. 180

Air Mail
Lima

New York, April 6, 1933

A. Garni, Esq.,
Lima, Peru

Dear Garni:

PANAGRA

Your No. 156, I take it that you will follow up this matter further while in Peru.

The difficulty in Santiago as well as in Lima is not that the work is not being well done by the Panagra staff but

that they are increasingly taking over the work which it was always intended that our offices should perform as agents and if the development along this line continues, our offices are likely to find themselves performing no functions at all and accordingly when it comes to securing compensation for them it will become increasingly difficult as our partners here will naturally take the position that the agents are not rendering any services.

Obviously, the answer is for our offices as agents to see to it that they are in a position to render these various services and that they keep themselves constantly in the picture and in a position to do so. I think this contact is pretty well maintained in Lima through Thommen but my constant concern is that beyond that and consultation with Miranda when various problems arise, we do not keep our hand in [fol. 883] the picture as much as we should. Panagra would very much like to take over Thommen but I have always resisted this for the reasons above indicated.

For your information, there seems some considerable likelihood of our having to locate at some new airport in Lima and I have heard some rumors that in this connection the idea is growing of moving the whole Panagra staff to this airport which would result in further separation. If you run into this idea in conversation with Harris or others, you might avail of the opportunity to discourage it. My own feeling is that just as Pan American and we keep very close touch on the Panagra organization at this end, our houses on the Coast should maintain a similar position there and I believe that in the long run the best results will be accomplished in this way.

Very truly yours,

(Sgd.) Harold J. Roe.

W. R. GRACE & CO.

7 HANOVER SQUARE, NEW YORK

A. GARNI
VICE-PRES & TREAS. — LIMA, April 18, 1933

Harold J. Roig, Esq.,
LIMA, Peru.

Dear Roig:

PANAGRA

Your No. 180: I went over the whole question of passenger solicitation with Thommen, starting out on the premise that past performance was not satisfactory and that an intelligent system of passenger solicitation has to be laid out and initiated.

*****

My provisional idea is that while Lima and Arequipa, which seem to be the pivotal points, should have a man especially detailed to passenger solicitation, the agency managers of the smaller outlying places ought to be able to attend to this job satisfactorily if they are properly coached and kept after from time to time. This, however, has to be done by the management of the Lima House, and Thommen, who really ought to be the connecting link between Panagra and ourselves, can do a great deal in this direction, in which sense I have spoken to him.

[fol. 885] While speaking to Thommen he said that in fairness to ourselves he must say that the atmosphere in the above respect has improved considerably within the last few months. I told him as well as Redshaw, that Panagra's and our own staff should establish much closer rela

tions. My own feeling is that the continual picking on W. R. Grace & Co.'s organization by the Panagra people, or vice versa, is to a large extent the result of a certain tension that exists between the two organizations. I noticed this particularly in Chile and to some extent also here.

Too much importance seems to be attached to the collection of as large an agency fee as possible instead of to the rendering of first class service and the establishment of close contacts.

. . . . .

Very truly yours,

s A. Garns

[fol. 886]

Government's Exhibit 429

PERSONAL 1291

SANTIAGO OFFICE—DAGNINO

NEW YORK
September 6, 1933.

Mr. H. R. Harris,
LIMA.

My dear H.R.:

I am rather disturbed at the information given me in your personal letter #1506 of August 26th, and I am just wondering whether all is as pleasant as it might seem. What I am particularly thinking about is—on what Panagra business can Dagnino spend 100% of his time? Do I understand that Dagnino is to handle some of the matters which have heretofore been handled by Shannon and, if so, has this departure from our recent policy been approved by you?

Confidentially, my own impression is that Grace & Co. have no work for Dagnino but wish to retain him, and if they can do so at our expense, they are that much ahead of the game. I am not at all sure how Mr. Trippe will view

this arrangement as he has constantly taken the position that Grace & Co. are our agents in South America and that the management of the concern is vested in Pan American Airways, Inc., through me as head executive.

In your personal letter #1495 you told me that Valverde was taking the position that accounting, traffic and all other kinds of business matters aside from strictly operations were the province of Grace & Co. In this same letter you stated that you had told Valverde that the Company was in a "state of flux at all times", whatever you mean by that.

I am particularly anxious to definitely know what led Valverde and Jory to make this decision. The Thommen case was different. As I recall it, we asked for his services on a 100% basis, and even in this case Mr. Trippe has several times stated to myself and to some of the Directors [fol. 887] that Thommen should be on the Panagra payroll and not on the Grace payroll. I should hesitate quite some time before I would consent to having Dagnino on the Panagra payroll, as, although he is valuable as a contact man, it would be extremely dangerous to charge him with responsibility for handling even negotiations with the Government.

I should like to hear from you further and very definitely as to what is in Valverde's mind so that when I take up the matter, as I shall, with the Grace Directors, it will not be with any misunderstanding as to what has been done by the Grace representative in Chile without, as I understand it, your approval and certainly without mine.

SUBJECT: TRAFFIC DEPARTMENT

CRISTOBAL,
September 13, 1933.

Mr. J. D. MacGregor,
New York.

With regard to Van Law's private unnumbered letter to me of August 18, which I sent on up to you in New York asking you to note and return, it would seem that since you have returned this to me without initialling it, that you did not see it. What Van Law suggests is the desirability of a down-town ticket office at both Lima and Santiago, either in addition to other offices in the Grace Building in these places, or else as a self-contained unit, removing all our offices from the Grace buildings. I agree with Van Law that the present locations in both Lima and Santiago are not the most satisfactory, from a standpoint of traffic appeal. I feel that eventually we shall have to make an extensive study and come to a final decision on whether or not we should be satisfied to give up a certain amount of possible Panagra traffic in order to retain our offices in the Grace building at these two points.

Subject: GUAYAQUIL AGENCY

HRH/FL
enc.

LIMA, October 2, 1933.

Mr. J. D. MacGregor, New York

Your attention is invited to the attached copy of Kirkland's private SAGO No. 1752 (Sept. 28) to me on the subject of Guayaquil agency.

The information contained therein is in line with what I have previously written you about our agent in Guayaquil and would indicate that he, like some of our other Grace friends, seems to think that Panagra is something to be exploited for the benefit of the agency, regardless of how unethical his actions may be. I am not taking any action on this matter pending advice from you.

(Sgd.) H. R. HARRIS

H. R. Harris

[fol. 890]

GUAYAQUIL AGENCY

1752 SAGO (Private)

CRISTOBAL,
September 28, 1933.

Mr. H. R. Harris,
Lima.

Mr. Searl advised me that he paid for the round trip passage of Mrs. Searl, Salinas, Cristobal and return in Sucres. This passage was paid for at 6.60 to the dollar.

the official rate of exchange being 6. On Guayaquil's credit memorandum covering tickets sold in sucres they invariably use a rate of exchange of 6 to the dollar, as applied to the regular dollar tariff. In this particular case, however, they gave us credit in the amount actually collected. However, the agency did not give Mr. Searl 10% discount for the round trip. Should New York, through copy of this letter, desire to look up this particular credit note from Guayaquil, it is attached to our Cash Receipt Voucher No. 8/162.

We know definitely of one other case where Guayaquil charged an irregular rate of exchange for passage collected in sucres. In this other case we did not, unfortunately, retain definite proof, but the circumstances were as follows: A passenger through from Guayaquil showed me a receipt which he had compelled the Guayaquil Agency to give him covering his passage. I noticed immediately the rate of exchange used as being 6.80 or 7. A few days later Guayaquil's credit memorandum came through covering this passage and crediting us only at the rate of 6 to the dollar, there being a discrepancy of 90 or 100 sucres on the amount credited us as compared with the amount indicated on the passenger's receipt as collected.

One other condition exists at Guayaquil which hardly seems right to me. We have received practically no credit for passages sold in dollars. As a matter of fact, the only ones which we have received from Guayaquil Agencies since establishment of the local currency account were for passages which Mr. Mackay sold in Salinas in dollars. Invariably Guayaquil indicates that they have never succeeded in selling passages in dollars. However, on passages sold in sucres they waste no time in forwarding us a debit note covering their commission payable in dollars; in other words, they are expecting us to accept the proposition which calls for their getting dollars in commission on tickets sold in sucres.

Furthermore, it seems that Guayaquil should be successful in selling at least a portion of their passages in dollars, particularly when you consider the fact that strict Grace

[fol. 891] Line regulations now prevent them from selling steamship passage out of Guayaquil except in dollars, and practically every ship leaving Guayaquil carries about 20 passengers. Also, on numerous occasions they have sold passages Guayaquil/Miami or Guayaquil/Brownsville, and, while successful in collecting dollars to cover the Panair portion, Cristobal/Miami or Cristobal/Brownsville, invariably their credit notes come through covering the Panagra portion as collected in sucres.

The above information is forwarded to you with the thought that possibly you may desire to use this in discussing the Ecuadorean situation with our people in New York.

Luis Valverde, Esq.
SANTIAGO, Chile

Dear Valverde:

PANAGRA/AGENCY COMPENSATION

To save repetition I attach hereto copy of letter No. 10,629 to Redshaw.

In citing examples which were used by Panair to prove that our services were to some extent ineffective and in fact prejudicial to Panagra's operations, I have endeavored

to avoid any direct reference with the exception of the Arequipa incident.

You will, however, notice from my letter to Redshaw that I spoke of a man who openly stated that it did not suit him to issue an air ticket on an exchange order because by doing so he would lose $2.50 which he would get if he supplied the same passenger with a railroad ticket. This is the kind of thing which depreciates our services out of all proportion to its importance.

. . . . . .

Yours very truly,

(signed) A. GARNI

GOVERNMENT'S EXHIBIT 424

Letter No. 3

Airmail
Lima 2/7/34

New York, January 31, 1934

A. Garni, Esq.,
Lima, Peru

Dear Garni:

CHILE CABOTAJE

. . . . . .

LIMA AIRPORT

. . . . . .

While the plan even if handled along simple and safe lines would involve our increasing our investment over what we have at present, there are some pretty important compensating advantages in owning our own airport and further very important indirect advantages in that as a part of the plan we would get our present concession extended for fifteen years from 1943 when it now expires.

One objection to the plan which is to be borne in mind is that it would probably mean a considerable concentration of Panagra activities at the airport and the consequent removal from our Lima office. Harris' idea is that the passenger station should contain office accommodations for the Panagra force now quartered in our office. This will, of course, have a tendency to remove the Panagra management from our supervision and guidance which I would consider unfortunate. I would appreciate it if you could discuss this whole matter with our people in Lima as well as with [fol. 894] Harris and let me have the benefit of your views as to the necessity or desirability of the move and if you consider that it should be made, your assistance in putting the arrangement on the best possible basis will be very helpful.

PERUVIAN COMPANY

We have as you know had this for a long time under consideration. Decision on the question has been deferred from time to time awaiting the arrival of Fawcett in New York with the idea that a plan might be worked out under some arrangement with him. He is now expected in New York shortly but may or may not come and in the meantime if you have any suggestions from the ground we will be glad to have them.

You are familiar with the general problem and the fact that our principal interest in this development is in connection with cabotaje business.

Very truly yours,

(sgd.) HAROLD J. ROIG

Encl.

[fol. 895]

GOVERNMENT'S EXHIBIT 425

Letter No. 68

Airmail 3/10/34
Lima 3/14/34

New York, March 9, 1934

A. Garni, Esq.
Lima, Peru

Dear Garni:

THOMMEN

Your No. 25.

Harris' memorandum to you of February 17th with reference to Thommen omits the following duties which were included under Harris' memorandum to me of September 25, 1930:

1. All traffic, including mail, cargo and passengers
2. Advertising
3. Local purchases, including checking of "presupuestos".
4. Control, through his traffic assistant, Mr. Matellana, of movement of all aircraft of Peruvian Airways Corporation, except test flights.

Some of these functions may be included under Thommen's duties as Comptroller but I should doubt if all of them were. The item I particularly do not like to see removed from Thommen's sphere of activity is the item of traffic (No. 1 above). This is an essential part of our Grace agency arrangement and should not be released. As I wrote you I think once before this problem may become acute with the new airport where I am afraid Harris will want to move most all of the activities now carried on in our office. If that comes to pass we should at least have some of our people also at the airport looking after such items as traffic.

Sincerely yours,

(sgd.) HAROLD J. ROIG

No. 25
(AG Trip Series)

LIMA, March 12, 1934.

Enis Valverde, Esq.,
SANTIAGO, Chile

Dear Valverde:

PANAGRA/CABOTAJE RIGHTS

* * * * *

Incidentally MacGregor is here and when he gets to Chile he will no doubt take up this question and will want to interest himself directly in it. While his presence may be useful, you will, of course, not relinquish the captaincy in this very important matter, as it is quite important that while availing of MacGregor's assistance, Grace y Cia, Santiago should keep control over every move that is to be made in connection with these negotiations. Very privately I might mention that in a similar question we have here with the Government with reference to the new airport, I had to do some skillful maneuvering in order to get the management and direction of the negotiations out of Panagra's hands into the hands of the management of our Lima House.

The Panagra people are all very efficient in their own way when it comes to operations of planes, handling of passenger movement, etc., but I feel so strongly that when it comes to a negotiation with a government on a matter which must of necessity be distasteful to that government, as in the case under discussion, they are simply not competent to handle the corresponding conversations. By this I do not in any way want to throw any reflection on their general ability, but do want to emphasize the importance of your making yourself the *principal responsible* party for the handling of whatever discussions you decide must take [fol. 897] place with the Chilean authorities with reference to the effort it is now felt should be made to secure the cabotaje rights in Chile.

If your views should differ totally from those expressed in this letter, do not fail to telephone or cable to Mr. Roig, to whom I am sending a copy of these lines.

Very truly yours,

(Signed) A. GARNI

NEW YORK, April 3, 1934.

John T. Kirby, Esq.,
LIMA, Peru.

Dear Kirby:

PANAGRA THOMMEN

I enclose herewith a copy of my No. 25 and 58 to Mr. Roig, as well as a copy of his No. 68 and his memorandum of March 16 to me.

Mr. Roig is still somewhat afraid that the transfer of certain duties from Thommen to one of the Panagra people as a result of the recent realignment of Thommen's duties, may somewhat weaken our position. He feels strongly that if Thommen has not time to attend to the duties which were included in the memorandum of September 1930 and excluded in my memorandum of February 20 to Mr. Harris, he should be given an assistant of our staff.

I have also discussed the whole subject with Vidal, who also feels that we should not transfer any of Grace's duties to Panagra and that Thommen should really have an assistant.

W. R. Grace & Co.
Lima, Peru

ORIGINAL AIR MAIL LETTER

Copy Follows By Steamer

A. Garni, Esq.,
NEW YORK.

Lima, April 23rd, 1934.

Dear Mr. Garni:

PANAGRA THOMMEN

After the receipt of your letter No. 10,723 I was not able to take this matter up immediately with Harris as I was remaining in the hospital with my wife.

However, last week I had several conversations with Harris along the lines that it was your feeling in New York as well as my own, that Grace were not fulfilling the function it was intended of them by not attending to traffic. I thought it advisable to concentrate on this important item as it is the one that Mr. Roig in his letter No. 68 to you particularly stresses.

. . . . .

Harris volunteered that as regards going back to the original set up as a justification for making a change in the handling of traffic that it was the idea originally that Panair should handle operations which, as he said, if carried out now would make him "de mas".

As you will recall I was in Santiago last September when the Panagra arbitration question was pending and I took the opportunity to privately recommend to Mr. Valverde the assigning of Dagnino entirely to Panagra, and I was able to bring in this question indirectly as evidence of how incorrect the Lima set up is and has been. In this connection I went over with Harris the form in which Panagra

[fol. 901] affairs are handled in all our agencies and there we, of course, handle all functions including traffic.

Another point came up which I made use of in connection with this question of traffic and that is, the idea of having a small outside sales office in Lima for tickets in the store of a Kodak agent. When Harris brought this to me for my opinion, I told him that it was an example of the necessity for our handling their traffic as I obviously could not sympathise with the idea of an outside sales office over which we had no control. In this connection this idea has been worked up by Jardine as Acting Division Superintendent and who has already commenced to show a considerable amount of commercial ability, a point to be borne in mind in connection with the idea of getting back traffic handling to Graces.

Yours truly,

J. T. Kirby

JTK/T.

New York, May 3, 1934

J. T. Kirby, Esq.,
Lima, Peru

Dear Mr. Kirby:

PANAGRA-THOMMEN

Your No. 10,830.

I am not at all in favor of having Panagra take over Thommen. This question has come up repeatedly in the past and I have always taken this position for the reason that if Panagra are permitted to take over our people who are performing certain functions, it simply means that the functions will go with the man and our whole position will be gradually washed out. It is precisely because Lima

has pursued a too easy going policy in this regard that the present traffic difficulty arose. The original understanding, clearly expressed in written memorandum of September 25, 1930, was that the Grace offices were to handle traffic and Lima should never have permitted this important function to drift away from them. Certainly we cannot consider another step now which would mean parting with still other functions. s'

A. Garnie, Esq.,
NEW YORK

Attn: Mr. Harold J. Roig

Dear Mr. Garni:

PANAGRA—THOMMEN

Rather close contact with Panagra matters and with Thommen during the last few months has led us to the conclusion that his handling of the departments of Panagra's Peruvian business for which W. R. Grace & Co. is responsible, leaves much to be desired.

He does take care in A-1 fashion of routine Government negotiations, such as straightening out Custom House dif-

ficulties, collection of Post Office accounts, settlement of minor controversies arising at Las Palmas, the following up of matters pending in Government offices, etc. He also contributes materially to the handling of matters which really should be taken care of by the local Division Operations Department, such as the purchase and shipment of gasoline and other supplies.

At least two other departments, however, for which Grace is directly responsible, have received very little attention. These are the Accounting Department of Peruvian Airways Corporation and the supervision of Grace agencies in their representation of Panagra.

• • •

[fol. 904] Needless to say, the situation above outlined will be emphasized with the continuous development of Panagra's Peruvian business, specifically, and in the very near future, when CADA and Aerovias Peruanas commence operations. It is simply too much to expect that Thommen is or will be able to bring to his work the degree of alertness and the grasp of Panagra affairs that we should have the right to expect of him.

We are particularly a little fearful that criticism will become more and more frequent from Panagra sources and that unless some steps are taken to avoid such criticism, the deficiencies of our present set-up might afford an excuse for attempted gradual encroachment of Panagra personnel on our functions.

This is exactly how we lost control of the handling of Panagra traffic, which got away from us in fact, though not in theory, long before the discussions of last February.

Yours very truly,

J. T. Kirby

Lima, March 30, 1935.

A. Garni, Esquire,
New York.

Dear Garni,

PANAGRA LIMA BUSINESS MANAGEMENT

Referring to the last part of my letter No. 13 the more I think of the business side of Panagra's problem here the more hopeless it seems to arrive at an effective solution without some rational plan under which we can exercise direct controls. Kirby has been up at the sugar estates since the day after my arrival so I have not had an opportunity to go over the matter with him. I have, however, discussed it at considerable length with Shea and the more we get into the matter the more difficult it seems to evolve an effective remedy merely by the process of adding further patches to the machinery.
